**TRADES PUSH REBER PLAN FOR DEFENSE**

*The Reber Plan would aid navigation, flood control, fresh water supply, and saving the Democratic way of life...* and help promote military security.

San Francisco, Dec. 8: In a resolution unanimously adopted and forwarded to state officials and to California labor organizations, Created a task force from floods and tides and at a time when the task is far from being finished. The committee feels that adequate disaster control should be provided. They believe that a plan for disaster control should be established in the state.

A. LAWRENCE R. REBER

**APRIL PREVENTION WEEK—PLEASE DONATE!**

*April Prevention Week is the annual campaign to raise funds for the prevention and control of diseases. It is a national effort to promote health and safety.*

*We must control the floods... or else... we may lose our lives...*

The battlefields. The joy of Christmas will not be the same unless we do something to prevent such great damage.

VICTOR S. SWANSON, Local Union Manager.

---

**TECHNICAL ENGINEERS LOCAL NO. 56, Bldg. will be held in the Union Offices at 474 Valencia Street, San Francisco, Calif., December 23, 1950.**

---

**INFECTIONOUS ENERGIES**

*Infectious energies have brought on $40 million in California flood damage. Only the efforts of the local unions have been able to control the flood situation.*

VICTOR S. SWANSON, Local Union Manager.
HIS is the only commodity the working man has to sell. The possibilities (as a salesman) of the Laboring man are limitless, and the profits are hummersonic. Let us dwell on this subject for a moment.

How successful a salesman are you? Does the person who buys your services get value? His the best market. The man you sell to is not interested in buying your services. Let's see how many people ever really do.

One doesn't have to be a "Curtis Parke" to understand, but it helps. The person who smiles and has a pleasant disposition finds it much easier to sell his services.

Some people envy the individual who is able to sell his services and make a living. There is nothing wrong with being envious of success. It is not success that is enviable, but the desire to achieve success. Let's see if we can come up with a few examples that should be enviable.

In the world of commerce, there are many examples of successful business men who have made a fortune. It is possible to be envied of or, at least to some degree, be interested in their success, but if you don't have the desire, then you will never achieve success.

The man who has the ability to sell his services, whether it be books, insurance, or any other commodity, is a person worthy of envy. It is not the success that is enviable, but the desire to achieve success.

The man who has the ability to sell his services should not be envied for the money he makes, but for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

The man who has the ability to sell his services should be envied for the desire to achieve success.

GETTING AROUND THE JOBS

Up until the first of December work in the Oakland area has been very good and it is expected that out of work list is beginning to make a slight move. Work has been only for during the past week. Of the jobs which are mentioned in this report have been completed and has been announced that the job is ready for public announcement. The following is the list of jobs which have been completed:

1. The new hospital at Alameda Interceptor, to run the name of the officer who had ended out. The property development going loaders and two cats on the site. This job should start in three to four weeks.

2. The Hydraulic Dredging Co. is scheduled to finish their job at the Columbia. The job should begin at the end of the month. This job has two of its small dredges working on the river. It is expected that the order of operations on this project will be: first to finish the job at farthest point from the population center, then to move to within 49 or 56 miles of the work. The company expects to hold the job and to get to and from work. This puts us in the position where we are forced to pick up inexperienced men who have to be trained on the job before they can do the work. The only solution I can see is to stand by the company to set up some provision for the men who are put on at a rate of pay. This will not be enough in the long run.

In last month's paper we mentioned that the proposed additions to the streets for the new housing development in the area will be completed by the end of the month. However, with the shortage of men, we are not sure whether their program will be continued until the end of the year. Also, the additional work will be very little additional.

On November 25, 1960, the Oakland Police Dept. We've Gene

NEWS ABOUT THE BROTHERS

Tom Rodgers dropped in at 10:00 PM on Saturday, said he was having a really good time and wanted to take his friend with him. This was the first time he had been out since his release from the hospital. He said he was doing well and was in good spirits. He had been released from the hospital two months ago after suffering a severe attack of the flu. He said he had been feeling better ever since.

Tom Rodgers is scheduled to get married next month. He said his fiancée, a beautiful young woman, had been waiting for him patiently during his hospital stay. They have been dating for six months and are very much in love. The wedding is planned for the end of the month and the couple is looking forward to their future together.

The Rodgers' wedding will be held in the beautiful old church at the end of the street. The reception will be held at the restaurant next door. The couple is expecting a large number of guests and is looking forward to a wonderful day.

In other news, the Rodgers' son, a young boy, has just graduated from high school and is planning to attend college next year. The family is very proud of him and is looking forward to his future.

Marysville
Marysville May Get Big Air Base: Engineers Fight Floods
By W.M. WILSON and LES COLLEST, Site Representatives, Local 3

A military advisory committee of the Marysville District Chamber of Commerce, along with a delegation from organized labor, are endeavoring to get the military academy of the state of California as an air base in the Marysville area.

This movement was begun by the Marysville District Chamber of Commerce, and it is now in the hands of a group of interested citizens and representatives of organized labor.

The movement has been well received by the people of the district, and there is great hope that a permanent solution will be found for the recurring flood problem.

The Marysville district has been suffering from severe floods in November, and 10,000 people were homeless for a week or so, and among them were many local members of Local 3 and other unions. The floods were of such magnitude that they threatened the very lives of those who had to escape.

Preparations and development of the new air base will require a considerable period of time and will involve the construction of a new airport.

The construction of the new air base will provide work for over 2,000 men, and it will be a great boost to the economy of the area.

All interested parties are urged to support this project and to work for its success.

San Jose
Terroric Rains: Complete Lengthen Out-of-Work List
By B.L. FRANCE

Business Representatives, Local 3

Well, brothers, we are happy for your company. We can report that we have had a wonderful year in 1950, which is fast coming to an end. We are proud and happy of what is anticipated for the future, we see no reason why 1951 should not be equally as good for a banner year.

Brother John Hanstein has taken over the leadership of the company, and we all hope that under his guidance the company will continue to grow and prosper.

The rains have been heavy and persistent, and it is the opinion of our weather bureau that the rains will continue and extend into the spring.

For the benefit of our members, we must make several important announcements:

1. The company is prepared to offer work to all members who are out of work.
2. The company will take every possible step to ensure the safety and well-being of all workers.
3. We urge all members to remain calm and patient during this difficult time.

We wish you all the best of luck in the future.
New Home for Utah Brothers

By RENNY BROOKS and C. E. VAN WINKLE and NERLINI BOWMAN, Business Representatives, Local 3

Operating Engineers in Utah are proudly looking over their new home, the home that belongs to them, for they have purchased a building that they have designed primarily for the convenience of their membership. They have built it at a great cost, but the result is not only a wonder of construction, but a thing of beauty and realistic practicality. It is an expression of their loyalty to the Operating Engineers Local No. 3 sign on the front of the building was appropriately designed, and we are sure that it will enliven the general presence for that reason.

Office hours are 8 a.m. and 11 noon 1 and 3 p.m. 5. Our operating engineers are required to be at the office by 7 a.m. and this is a strict rule. It is also a rule that the office secretary and Lewis, the superintendent, must sign in the list of attendance every day. The superintendents of our offices are working longer hours and this is in order to keep up with the demands of the job.

As a result, we have had to hire a number of helpers, including秘书, and we are happy to report that these helpers are doing a first-rate job. The building is being kept clean, and the work is being done promptly. The staff is hard at work, and we are confident that the new home will be a source of pride to all of us.

Stockton - Water, Mud and Ice

By EDDIE DORAN and GLENN ROBINSON, Business Representatives, Local 3

Water! Phooey! Nothing but water, mud, ice, snow, and fire. That is our lot in life, and we are used to it. The Colorado River is our source of water, and it flows through the valley of the Kings, where we live. It is a source of great pride to us, and we are always ready to work for it.

There are a number of points that we would like to bring to your attention. First, the Colorado River is our source of water, and it is necessary for us to get the water to our homes.

A number of the grave plots were not so fortunate, however, as they had to be dug without a break. The men were in the ground all day, and they were working until the last breath of the season. It was necessary to use our hands to get the material to dry ground.

The steak was delicious and we all enjoyed it. The food was served at the Surf Club, and the atmosphere was delightful. The members of the Operating Engineers Local No. 3 signed on the front of the building was appropriately designed, and we are sure that it will enliven the general presence for that reason.

As a result, we have had to hire a number of helpers, including秘书, and we are happy to report that these helpers are doing a first-rate job. The building is being kept clean, and the work is being done promptly. The staff is hard at work, and we are confident that the new home will be a source of pride to all of us.

Plan Training

Washington - President James A. Farley of the U.S. Employment Service has announced the appointment of two Regional Training Administrators. Mr. Farley said that these appointments are consistent with the policy of the Service to make effective use of Federal funds which are available for training purposes.

Vic Parson, the new Regional Training Administrator for the State of California, has been designated to handle the Workforce Development Program in the State. Mr. Parson is an experienced administrator, having served as Assistant Director of the California Employment Service for many years.

The other appointment is that of Robert E. Wood, who will serve as the Regional Training Administrator for the State of New York. Mr. Wood is an experienced administrator, having served as Assistant Director of the New York Employment Service for many years.

Both men have been selected for their ability to handle the complex problems involved in the implementation of the Workforce Development Program. They are expected to make a significant contribution to the success of the Program in their respective States.

Bust Up Strikes

In the case of the strike at the Winter Garden, the company in charge was able to secure a Federal injunction against the strikers. This was due to the fact that the company was able to show that the strikers had engaged in an illegal strike.

The company in charge was able to prove that the strikers had engaged in an illegal strike. The company was able to show that the strikers had engaged in an illegal strike. The company was able to show that the strikers had engaged in an illegal strike. The company was able to show that the strikers had engaged in an illegal strike. The company was able to show that the strikers had engaged in an illegal strike. The company was able to show that the strikers had engaged in an illegal strike. The company was able to show that the strikers had engaged in an illegal strike.

TALK KOREA RELIEF—Director General A. D. Morse of the International Labor Organization (ILO) has said that the Korean Relief Fund, which is being set up to deal with the relief of the Korean people, will be able to function in a more effective manner if it is able to secure the co-operation of the United Nations and the other international agencies.

The fund, which is being set up to deal with the relief of the Korean people, will be able to function in a more effective manner if it is able to secure the co-operation of the United Nations and the other international agencies.
SACRAMENTO—

**Hoods Spur Demands for Big Levee Improvements**

By E. F. PARK and H. H. CLARK, Business Representatives, Local 3

Public demand for immediate levee work is reaching the proportions where some action may be taken to strengthen the levees to meet the worst possible water condition. Not only would such action protect properties in the "hundreds of millions of dollars" forecast, but gleaning a little good from the good in the "rain" we are getting. Six different highway jobs in the State are in progress, and it looks doubtful if they will be finished in time. If we have good weather they would have been completed. It looks like the levees were raised early this year, making it effective. M&K Construction's $1 million project at Point Arena is expected to be finished before the next high water comes. The state is again considering the levees. There are two jobs similar to the Point Arena one. One is at Westport, north of Point Broke, and the other at Midland Point. At present, PGE is putting in 29.4 miles of levee, to supply electric power. This would be of the extreme importance. In a few weeks Arthur B. Smith, Contra Costa County maintenance engineer, who has been on the waterway for much time, may be called on to make an emergency survey. At Cloverdale the levees have been up and down for the last two years; every time they get ready to build something stops them. The only chance is to wait until they get through the two shoveling works. With the heavy flood coming in and the levees are needed by making earthwork and roads. One levee is at Cloverdale, and this is the one that has been up and down for the last two years. The levees there are down to the river bed. The state needed this work at Cloverdale to build the levee made by a $25,000 levee being built by the firm's equipment. In the state Lee Hunter, Hunter and Kibbey, have a record of nine weeks on the levee.
The deluge has been upon us and has passed, for the time. The Kings, Kaweah, Tule Rivers and smaller streams and tributaries surpassed all previous run-off records during this past storm, the Kings River at its peak flowing 100,000 c.f.s. against a previous high of 80,000, although much damage was avoided in the flood wake of these flood waters over the on-a-smaller-basis pay- ing way below the prevailing rate. E. F. Parker has taken a sub- scription to move his tent on the Tulare Freeway job and is at the present time living right opposite to starting a spread of poles and posts for "All". Alt superintending the project. John Blalock of Mokelumne was the successful bidder on a highway contract of about 10 miles of 40-foot bridge over a railroad.

Working conditions in this area, very dry, show about a large out work.

The next regular meeting for this guild will be held Thursday, December 28, 1960, at 8 p.m. at Oshie's Rendezvous, Tulare, Calif., USA.

**Senate Votes Union Shop for Railroads; Bill Urged by AFL**

Washington—The Senate voted on Dec. 11 to permit the union shop and closed shop or union shop on a non-union basis in the railroad and air lines industries. The bill then went to the House, where a similar measure has been pending for several months. The bill must pass in both houses before the session adjourns and the brokers will then have until Jan. 6 to bring the battle all over again to gain a union contract for the railroad industry.

The AFL convention in Houston in September telegraphed a vote of support for the bill. Balloting on the measure was held, no action was taken, and the unions representing their employees, but no action was taken. Without the present law, union shop agreements are abolished, but the organizing effort and the agreements will continue to be made under the AFL and independent Brotherhoods of Railroad, as they have been for the last ten years. The bill will win by a wide margin on the next vote.

Sing a sad song and dance for me.

**Too bad—too tired**

To register and vote.

---

**ABMS TAX ON WORK PROGRESS**—Treasure See, John Snyder (D) shows Chairman Robert L. Doughty (D, N.C.) of the House Ways and Means Committee, that company profits have climbed. He started the plan with some afirm- izing modifications. The Republicans are opposed to it; want heavier revenues in line with industrial growth.

Jupe Pluvius Says "Stop Work" to Boys Around S.F.

By PAT CLANCY and RUSSELL SWANSON
Business Representatives, Local 3

The past month has been very quiet as far as orders for men. We have heard that a lot of jobs are going to the Unions and the Continuing Education Committees, but the men who are working have been getting paid very little for their work. The Unions have been very active in trying to get the men back to work.

Wallace and Sons have been paid for work on the Bay Bridge and the Transbay Tunnel. The Unions have been working hard to get the men back to work and they have been successful in getting a lot of the men back on the job.

Use TV for Education, Labor Ask

Washington (L.P.A.)—H. W. Jones, president of the National Federation of Broadcasters, has paid a visit to the United States Senate, where he has been a witness for the broadcasting industry.

The visit was at the request of Senator Millard Tydings, who is chairman of the Senate Committee on the Communications. The Senate Committee on the Communications is investigating the broadcasting industry and has been very active in trying to get the broadcasting industry to work together to solve the problems of the industry.

The broadcast engineers and the broadcasting industry have been very active in trying to get the broadcasting industry to work together to solve the problems of the industry.

Honolulu

PAY INK IN HAWAII JOBS OPENING UP

By J. K. WARDWORTH
Business Representative

General Contractors, members of the General Contractors Association of Hawaii, have announced a 10 cent increase in the Union scale and have established wage rates for the Territory of Hawaii.

From the viewpoint of unions, it is about time they equalized some of the rates that have been paid union craftsmen for the past three years. The ununion and Davis-Bacon rates established since 1937 are higher than the rates have been paid union craftsmen since 1937. While this new raise a few unions will still be lower, the Esoteric Engineers, however, will be in higher in all classifications, too, being 10 to 20 per hour for carpenters and masons, 15 and over.

The Lasniko Homes project in Hilo, Hawaii costing $1,200,000 is now under way. We have been working very hard to get the men back to work and we have been successful in getting a lot of the men back on the job.

Personal

H. F. Smilgies, of Napavine, Washington, has been a witness for the broadcast engineers in the Senate Committee on the Communications.

The Senate Committee on the Communications is investigating the broadcasting industry and has been very active in trying to get the broadcasting industry to work together to solve the problems of the industry.
