

DOSER BRINGS "RAT PATROL" TO WEST COAST WORLD TRADE CENTER WORK CONTINUES OPERATORS MAKE HISTORY AT "THE GEYSERS"

By DON DOSER

> Business Manager

Looking back; Looking ahead The work, the progress and the prosperity continues

As the year draws to a close, I'd like to take this opportunity to highlight four areas of progress Local 3 has made. I think you'll agree that we have a lot to be proud of. I want to thank you for your continued support and involvement. Without your help and loyalty, Local 3 would not be enjoying this tremendous success. Here are some of the many accomplishments we've made in the past five years.

Training

- Instituted comprehensive annual winter training for all staff.
- Developed grassroots organizing training at district offices.
- Launched Community Action Teams to mobilize members.
- Initiated regular HAZMAT training for members.
- Developed labor history classes.
- Created erane and forklift certification programs.
- Provided winter journey-level upgrade training.
- Led major improvements in apprenticeship program, including new training sites in Hawaii and Nevada.

Organizing

- Led Local 3 membership increase of more than 5,000, bringing overall membership to almost 42,000.
- Signed more than 100 new contracts.
- Increased Organizing Department from one to 15 employees.
- Launched the first West Coast Rat Patrol.
- Established COMET training.
- · Established Health Care division.
- Recovering market share in rock, sand and gravel shops.

Politics

 Early supporter of Gray Davis' successful run for governor.

- Increased contributions to political action committees.
- Sponsored the election of Democratic majorities in the state Senate and Assembly, including the Assembly Speaker.
- Provided guidance to governor when he signed Senate Bill 40, the first increase in unemployment benefits in nearly a decade.
- Lobbied in support of a measure that asks voters in March 2002 to approve Proposition 42, which would earmark gas taxes for highway construction projects.
- Launched CAT program well ahead of 2002 election season.
- Supported passage of Proposition 35.
- Helped elect five Congressional representatives in Local 3's jurisdiction.
- Established member Volunteer Recognition program.

Business Operations

- Ensured Local 3 is on sound financial footing.
- Hired key professional staff and assigned competent officers to oversee operations.
- Implemented long-range strategic plan.
- Started Engineers Publishing, a for-profit program to help offset department costs.

As you can see, we've enjoyed some prosperous years. With your help, I expect this trend to continue. The Local 3 staff works hard to represent you; I'd like to thank them, the field representatives and the organizers for the long hours they've put in to keep our members satisfied. Each day we're working toward our goal of getting the industry 100 percent organized in 10 years. Let's keep up the good work. With your continued support and involvement, we'll reach our goal in no time.

I'd like to wish the entire membership of Local 3 a happy holiday season.

Engineer News (ISSN 176-560) is published monthly by Local 3 of the International Union of Operating Engineers, AFL-CIO; 1620 South Loop Rd., Alameda, CA 94502. Periodical postage paid at Alameda, CA and additional mailing offices. Engineers News is sent without charge to all members of Operating Engineers Local 3 in good standing. Non-member subscription price is \$6 per year. POSTMASTER: Send address changes to Address Change, 1620 South Loop Rd., Alameda, CA 94502.

Nurses strike to improve health care; take break from unsafe conditions

RENO, Nev. – Christy Collins, a Washoe Medical Center registered nurse for 17 years, found while on strike that she could indulge in certain basics that during her work shift usually were impossible:

"At least I can take a coffee break, go to the bathroom and have lunch," Collins said as recent knee surgery slowed her pace while she carried a sign that read, "ON STRIKE."

More than 100 nurses and pro-worker supporters from Nevada and Northern California joined Collins during a 24-hour strike that ended at 6 a.m. Thanksgiving Day.

Their prescription: increase public awareness of unsafe workloads, long hours without breaks and unfair labor charges pending against WMC, Northern Nevada's largest hospital. They also urged hospital bureaucrats to resume good-faith negotiations, which began nearly three years ago.

WMC officials largely ignored the concerns of the striking nurses, choosing instead to hire temporary, non-local replacement nurses and extra security to ensure strikers stayed off hospital grounds.

The nurses, fighting to improve conditions, pay and benefits for nearly 700 WMC colleagues, nevertheless received boosts to their morale. These included:

Money and commitment: Local 3 Business Manager Don Doser, speaking at a morning press conference, pledged the nearly 40,000member union spread among six Western states would support the nurses until victory in right-to-work Nevada. Putting money where his heart is, Doser promised to help the nurses financially for each work day missed due to the strike.

"We will stand behind our nurses and their efforts to improve Nevada's worst-in-the-nation nurse-population ratio," Doser said to applause.

Attention-getting "rats:" Local 3's new Rat Patrol (for more, see Organizing, Page 7) was out in force, delivering a squad of organizers and their taxi-cab yellow sedans and vans. Parked near WMC's entrance, the patrol included two 12-foot, inflatable rats, symbolizing employers who exploit workers. The Rat Patrol drew amused stares from passers-by – who often stopped to ask questions.

"That's exactly the reaction we wanted," Doser said.

Love and flowers: Striking nurses beamed as they juggled flowers with their picket signs. They said the flowers were mementoes of encouragement from Dr. Charles Johnson, a popular obstetrician. Every nurse who worked the day and night shifts prior to the strike received one, they said.

"We think it was very sweet," 21-year nurse Beeky Chavez said. Never mind what the striking nurses think of hospital bureauerats.

Project labor agreement for UC Merced facing scrutiny

MERCED, Calif. – It should soon be decided whether expertly trained professionals – or opportunists – will help build one of the biggest government projects to hit California's Central Valley: The University of California, Merced.

The stakes are enormous for the long-awaited campus, the first UC in the booming region. And the results could deeply impact our Valley members for years.

Ground breaking is scheduled for the spring of 2002. Residents have been campaigning years for the campus, and Gov. Gray Davis has pulled out the stops to fast-track its construction.

Governor Davis also is a strong supporter of project labor agreements, which would set wages, hiring practices and work standards for the initial \$400 million phase of site preparation and construction.

Some claim higher costs - but are they?

Anti-worker forces, however, claim PLAs result in higher costs – yet they fail to mention that existing prevailing-wage regulations for government projects require that salaries for union and non-union workers be equal.

More important, as you brothers and sisters know, union projects also deliver quality craftsmanship by trained, safety-conscious professionals who possess pride, integrity and enough guts to be stand-up unionists.

Davis and fellow Democrat Kerry Mazzoni, his secretary of education, said they value union labor and support the construction of UC Merced under a PLA.

Unfortunately, PLA opponents were encouraged when President Bush earlier this year signed an executive order prohibiting PLAs on certain projects.

As a result, UC regents are expected to consider by January whether to construct UC Merced under a PLA, or simply go to the lowest bidder. A working group is meeting with trades people and contractors to review options.

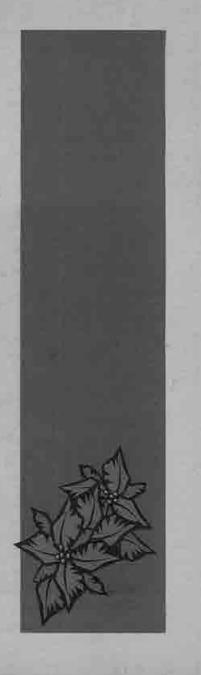

Rest assured, members, Operating Engineers will push to be heard and make damn sure regents know that a federal judge in early November followed up his preliminary injunction last spring by formally overturning Bush's order.

Judge Emmet Sullivan essentially said the president lacked the authority to preempt federal protections under the National Labor Relations Act. Our thanks to the AFL-CIO Building and Construction Trades Department for pursuing the lawsuit.

We also will not be shy about reminding regents how we deliver high-quality work, usually on time and often under budget.

By JOHN BONILLA President

FEATURE

From flush to flash Local 3 Operating Engineers key to historic project at The Geysers

By Ray Sotero, associate news editor

LUCERNE, Calif. – Argonaut Constructor's Steve Lydon and his crew are more than just ahead of schedule for an environmentally friendly project that is literally and figuratively breaking new ground.

He and a dozen or so Operating Engineers are making history as they rush to complete a \$30 million project known as Basin 2000, an addition to a state-of-the-art, innovative pipeline to a natural steamfield that Kiewit Pacific built in 1997.

"We're 80 days into a 540workday project and we're 45 percent complete," Lydon, pipeline superintendent and a 19-year Local 3 member, said proudly during a Nov. 13 interview at his Lake

superintendent and a 19-year CROSSING PATHS: Local 3 member Jack Lowe sets a creek crossing.

County jobsite three hours north of San Francisco. "The hard part is stuff like utility crossings, utility access and traffic control" which now are mostly complete.

Other challenges include digging trenches below water level, pumping flooded work areas and trenching through rocky ground.

Despite those hurdles, Lydon said his two crews combined lay an average of 1,800 feet of pipe per day.

LOADING UP: Workers load debris from trenching. Opposite page shows Lake County portion of projects affecting The Geysers. Inset is the Sonoma County portion.

Team effort

Lydon attributed much of the progress to his crew, support from Argonaut, and Parnum Ready Mix, which set up a portable batch plant nearby to supply the slurry cement backfill used along Hwy. 20.

"The plant operators and drivers have been working closely with the pipe crews, which has proven to be a key to the high-production levels," Lydon said.

Lydon and his workers are nearly doubling the length of the first phase of the Lake County project, which includes a 30-mile pipeline moving treated effluent from three Clear Lake communities to a power-harnessed steamfield known as The Geysers.

The Operating Engineers broke ground this summer on phase two, which will add 20 miles of pipeline and two pumping stations to collect effluent from five additional communities, according to information cited by Rohnert Park Business Rep. Greg Gunheim and Mark Dellinger, former resource manager for the Lake County Sanitation District.

Similar but separate

In August 2000, after years of hearings, Mountain Cascade of the Bay Area launched a similar but separate project for Santa Rosa and three nearby Sonoma County cities. Ford Construction of Lodi and Steve P. Rados of Santa Ana continued work this year. This \$154 million project will lay 41 miles of pipeline to move treated wastewater to The Geysers.

Both the Lake County and Sonoma County projects should be completed by late 2002.

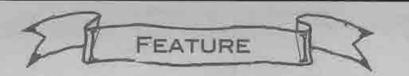

"It's complicated but they're two different projects going to the same spot," Gunheim explained.

The dual projects are designed to recharge the world's largest natural steamfield by moving treated wastewater to The Geysers' 30-square-mile region straddling the two counties.

An an overall cost of roughly \$220 million, the undertaking is part of the world's first effluent-to-electricity system that's also solving a myriad of local urbanization problems. Those include inadequate percolation of water to the steamfields, sewage-treatment limits, economic stagnation and a partial building moratorium around Clear Lake, California's largest in-state basin of fresh-water.

As important, supporters said the two-county undertaking is an example of multi-district cooperation.

Indeed, the venture is drawing international attention for its unique problem-solving approach to producing electricity efficiently while solving a multitude of technical, legal and environmental issues.

It's also creating dozens of well-paying short-, and long-term jobs, Rohnert Park District Rep. Joe Tarin said.

"It's a win-win project that's good for the environment, the community and the taxpayers," Gunheim said during a tour of Lake County construction.

"It took decades to get to this point, but it comes

NW Treatment

Lakeport

with a big-time payoff," fellow Business Rep. Jim Killean said during a similar site visit in Sonoma County.

Here's what preceded the project:

For centuries, The Geysers released scalding steam heated by molten, 450-degree rocks nearly five miles below the surface. After one failed attempt during the 1920s, the super-heated steam was finally harnessed in 1960 to drive power-generating turbines.

By 1987, dozens of generators were powered by The Geysers, generating nearly 2,000 megawatts of electricity, enough to serve the daily needs of 1.9 million people.

Unfortunately, 75 percent of the hydrogen sulfide gas-ladden water was lost to evaporation during power generation, depleting the region's aquifer – with a corresponding decrease in generated power, which dropped to about 880 megawatts.

In an attempt to resolve that issue, officials began recharging the underground cauldron with creek water, but steam pressure continued to diminish.

An innovative breakthrough

The turnaround began with Lake County's completion of its \$45 million pipeline to pump treated wastewater and water from Clear Lake into The Geysers.

About the same time Santa Rosa began moving in the same direction.

After years of hearings, lawsuits and \$21 million in taxpayer-funded environmental studies that concluded the venture was safe, Santa Rosa and the three cities agreed to build the pipeline up a 3,300foot climb to Calpine property and the steamfield.

Once the pipeline is at its site, Calpine, a San Jose, Calif.-based power firm that owns most of the region's power plants, will connect 18 miles of distribution lines now under construction.

When completed, nearly 20 million gallons of treated wastewater will be pumped into The Geysers daily from both the Lake and Sonoma county projects. Taken together, the two county projects are expected to add up to 50 years to the productivity of The Geysers, expected to produce nearly a total of 1,000 megawatts of electricity.

It would also expand sewer capacity, end the building moratorium, increase fresh water for California's Bay-Delta, and help keep Clear Lake and the Russian River clean by preventing sewage overflows during wet weather.

Clear Lake

"The community liability of wastewater is being converted into the sustainable community asset of electricity," Dellinger testified

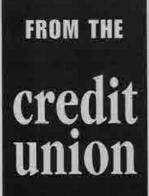

DUAL PIPES: Local 3 operator Dave Wilson lays dual pipes.

during a hearing. "Rather than view sewage and other wastes as liabilities, communities may find that one stakeholder's problem is another's solution."

By ROB WISE **Credit Union Treasurer** å Local 3 Recording **Corresponding Secretary**

Local 3's own credit union, the Operating Engineers Local 3 Federal Credit Union, has a well-earned reputation for going above and beyond the call of duty for its members.

The most recent example of this is the credit union's response to the Soldiers and Sailors Relief Act. This National Credit Union Administration act calls for credit unions to lower the interest rates on loans already taken out by credit union members called to active military duty.

The National Credit Union Administration requires lowering the interest rates on these loans to six percent annual percentage rate. Your credit union is doing more by adjusting the interest rate on consumer and Visa credit card loans taken out by members before being put on active duty to zero percent annual percentage rate for the first six months of assigned active duty.

The rate becomes six percent annual percentage rate after the first six months and continues at that rate until the member is discharged from active duty.

Your credit union also offers an interest rate of six percent annual percentage rate on mortgage loans that have already been taken out by members before they were called to active military service.

In this season of giving, OEFCU would like to acknowledge with the deepest gratitude all those who have given so much for our country. In support of these individuals a contribution of \$50,000 was made by your credit union to the Local 3 Disaster Relief Fund.

A money-saving resolution

As 2001 draws to a close, if you are thinking about your New Year's resolutions, here is one that could save you both money and time if you carry it out: Contact any OEFCU branch or use the credit union Web site <oefcu.org> to request a checking application. The credit union's no monthly service fee checking account could save you money month after month if you now pay checking service charges or have to maintain a high balance to avoid charges.

Just as important, you will avoid sending a monthly service fee to a non-union financial institution. Such institutions are under no obligation to keep from bankrolling anti-union efforts. If they are stockholder rather than member-owned organizations such as your credit union, their first obligation is to stockholders, not union members.

You will save time as a OEFCU checking account member with free access to a 24/7 Internet branch where you can transfer funds between your OEFCU accounts, check balances, download information to Quicken money management software and more.

Your checking account information will be available to you when you are ready, and not just at monthly statement time. As a checking account member you are also able to choose low-cost online bill payment.

With the price of stamps set to go up, why continue to pay bills the old fashioned way? From the security of the credit union's Internet branch you can pay almost any bill. You can set up payments ahead of time for convenience when traveling or working long distances from home.

Another great way to save time is with the Visa Check Card that comes with your no-monthly-service charge OEFCU checking account. Use the card just like cash at any store that accepts Visa or where you can use an ATM card.

You won't spend extra time in line writing checks or getting out your ID. The Check Card can help you avoid time in holiday shopping lines when you use it for shopping on your favorite Internet sites. For more information about becoming a credit union member, contact any OEFCU branch.

First target: 7/11 Materials Coming soon to abusive, union-fighting employers near you: Local 3's new 'Rat Patrol'

Business Manager Don Doser, in his never-ending quest to do what's right for Local 3 members, has repeatedly shown he's not afraid of new and innovative ideas.

As part of that goal, he has launched the 'Rat Patrol,' Local 3's new fleet of ugly yellow sedans and vans adorned with human-sized, color images of rats - a symbol of employers

"The primary purpose of our new

'Rat Patrol' is to shine a floodlight on

employers who continue to blatantly

organize under federal law."

who exploit their workers.

Doser deemed this necessary because some employers ignore, fight or play dumb after their

workers exercise their legal right to organize. In short, certain employers refuse to comply with federal law providing workers the right to organize. In some cases, this foot dragging goes on for years.

Believe me, when blatant abuses occur, Doser will not hesitate to order the Rat Patrol to, "Go sic 'em."

Case in point

The Rat Patrol's first dispatch came in the day Local 3 took delivery of the modified police vehicles. The first target: 7/11 Materials, a rock plant based in the east Stanislaus County community of Waterford. The firm has unfairly put its employees through hell since workers began to organize more than three years ago. Despite repeated efforts to force 7/11 Materials to do the right thing, its officials have used almost every delaying tactic known to its high-priced lawyers to fight its union-minded employees.

Clearly, 7/11 Materials was a job for the Rat Patrol. Doser issued the order. Organizers, dressed in rat suits, followed the owner of 7/11 Materials into a cafe. He quickly left. The Rat Patrol followed him to a nearby 7/11 Materials batch plant in Modesto, where a non-union driver blocked in one of the Rat Patrol cars. A

brief verbal confrontation ensued. Sheriff's deputies arrived. No one was hurt and no citadisregard the rights of their workers to tions were issued but Local 3 made - Business Manager Don Doser its point.

'Our mission is to get to the employer," Special Rep. Doug Corson said. "We target employers who for

unreasonable amounts of time have

stalled, procrastinated and downright refused to negotiate in good faith.' Mission accomplished, at least partly, according to Corson's assessment; within hours, the CEO of the corporation that

oversees 7/11 Materials spoke with Corson and then set up a face-toface meeting with Doser that took place Nov. 2. Additional discussions are pending.

"It could be considered progress, although we don't consider it real progress until we get a contract signed," Corson said. "The Rat Patrol was very effective in disturbing this guy's business and his way of life."

I look at it this way: Organizing has been going on for three years at 7/11 Materials, with little to show for it. Doser sends in the Rat Patrol - and within two days the top man called Doser and wants to talk.

Versatile organizing tools

The Rat Patrol will have many uses, including the obvious ones of organizing and job actions. The vans can serve as mobile offices, and are able to carry several organizers and their equipment.

The sedans are similar to those issued to law enforcement agencies, and come complete with high-performance engines, factory spotlights and public-address systems. Doser later had special on-board cameras and video recorders installed. Never before has this been done to help organize unions in the West, and this should help rejuvenate frustrated workers.

Yep, the Rat Patrol will be hard to miss. Please support its members, and give a hand when you can. Similar to our law enforcement brothers and sisters whom we represent, Local 3 organizers use these vehicles to help bring seabs to justice.

NEWS FROM fringe benefits

By CHARLIE WARREN Director

Happy holidays From Fringe Benefits staff to members: Thanks for your involvement

Happy Holidays and a wonderful new year to each of you. We would like to thank Operating Engineers and their families, as well as union staff, for their participation and cooperation during the

> The pre-retirement and Retiree Association meetings were well attended, and I think we all learned quite a bit. It takes the raising of many different points of view to ensure that Local 3's benefit programs meet the needs of members and their families.

Special thanks

A special thanks to the heads of our retiree chapters for diligent work during the year.

They are: Walt Geyer, Jack Short, Burt Cunningham, Leon Calkins, Gilbert Anderson, Earl Faria, Bill Seemann, Mario Dumlao, Ernest "Rocky" Leroy, Bob Daniels, Tom Hester, Al Dalton, Ernie

Sutton, Norman Smith, Bob Taylor, Mike Kraynick, Bob Yturiaga, Virgil Blair and Ephraim "Sonny" Bergau.

We hope 2002 will be a prosperous year for all, and we look forward to working with you.

Women's health

Did you know that your plan, as required by the Women's Health and Cancer Rights Act of 1998, provides benefits for mastectomy-related services? This includes reconstruction and surgery to achieve symmetry between the breasts, prostheses and complications resulting from a mastectomy, including lymphedema.

For information call the Trust Fund office at (800) 251-5013 or (925) 676-3828. Those enrolled in Kaiser should call its information number.

Claims processing - actives in California and all retirees

Claim forms received in the Fund office are first examined to determine whether pertinent information has been included. Information necessary to process a claim includes fully itemized bills, claim forms, physician's diagnosis and, if you have more than one group plan, the other insurance carrier payment sheets.

If all information necessary for processing has not been included, the Trust Fund office will request this additional information from the employee or the provider of service (such as the hospital or physician) and the claim will be held until the required information is received.

The Trust Fund office requests this information by sending a letter to the employee or the provider of service. If you receive a request for additional information, you should attach the requested information to this letter and return it to the Trust Fund office as soon as possible.

If you have questions, please call the Trust Fund office or your Fringe Benefits Service Center.

New dietary guidelines

The 2000 edition of Dietary Guidelines makes 10 recommendations, a change from the seven in past editions. To ease understanding, the recommendations are placed in three groups:

Aim for fitness:

- · Aim for a healthy weight.
- Be physically active each day.

Build a healthy base:

- · Let the food pyramid guide your eating choices.
- · Choose a variety of grains daily, especially whole grains.
- · Choose a variety of fruits and vegetables daily.
- · Keep food safe to eat.

Choose sensibly:

- Choose a diet low in saturated fat and cholesterol and moderate in total fat.
- · Choose beverages and foods to moderate your intake of sugars.
- · Choose and prepare foods with less salt.
- · If you drink alcoholic beverages, do so in moderation.

3

Jay Bosley joins **Safety Department**

The Safety Department is pleased to announce the addition of Jay Bosley to its staff. Bosley joined Operating Engineers in July of 1967. He worked for Gordon H. Ball at that time. He spent considerable time with Granite Construction's Watsonville Branch, both as a dirt hand and foreman.

Some of you may remember Bosley as the San Jose-area dispatcher in 1971. He was the Apprentice Safety Coordinator, and the Oakland area Apprenticeship Coordinator from 1972 through 1974.

Bosley returned to working for Local 3 in 1993 as a business representative in the San Francisco district. He has served as an organizer, and business representative in the Sacramento and Redding areas. Prior to San Francisco, Bosley set grade for RGW in Sacramento. Bosley brings a great deal of knowledge, ability and experience to the department.

New rounds of safety classes

The Safety Department has just started the rounds for the eight-hour and 40-hour HAZMAT classes for the last quarter of 2001, and below is the schedule for the first quarter of 2002. Notices will be sent to all of the students that are due during that period.

The exact location of the eight-hour classes for Eureka, Fresno, San Jose, and Yuba City has yet to be determined. All other classes will be held at the district offices.

First quarter 2002 **HAZMAT class schedule**

Students must contact the Safety Department (510) 748-7400 to register for 40-hour classes.

The cost of the eight-hour refresher classes is \$30 for nonmembers of the Operating Engineers. There is no cost for Local 3 members.

The cost of the 40-hour classes is \$250 for sponsored members of Operating Engineers and \$300 for non-members. There is no charge for operators on the out-of-work-list.

Recent graduates of a 40-hour HAZMAT class at Rancho Murieta Training Center are, from left: Jerry Procopio, Ryan Brown, Justin Souligny, Melvin Berebgue and Kenneth Ewan.

HAZMAT classes, FROM THE first quarter 2002 Forty-hour classes safety dept. BRIAN BISHOP Director

Teaching Techs:

Graduation continues despite stressful times

The year 2001 is one we will never for- 1997-2001 CHIEF OF PARTY get. Sept. 11 changed the way we see life and is changing the way we live. Yet in our troubled time we have come together and our differences have helped unite us as a group with a goal and desire for justice. We will not be afraid.

On Sept. 16 the NCSJAC had its first graduation in four years on the Hornblower yacht. Our graduates had a great time and it marked a milestone for us: our 40th anniversary as a training center.

1997-2001 CHAIN-LEVEL GRADUATES

The list below is the graduates from the Surveyors Apprenticeship Chain-Level Program from 1997 to 2001:

David Beardsley Eric Bergesen Alston Breakefield **Heath Briscoe** John Brunetti Marc Brunetti Steve Cogan Dennis Cronin Larry Daly Jesse Davis **Robert Fernandez** Sean Finn **Miguel Gonzales Derrick Harley** Floyd Harley Jr. Steve Highland Keith Johnson Matthew Jordan Michael Kuykendall Daniel Larmay Octavia Linarez Jesus Martinez Duncan McCormack Connie McCray David McMurdo **Glenn Meadows** Johnnie Mechikoff Alfonso Montiel David Nelson **Richard** Ortega Sabrina Paulson Jeffery Phillips Mark Powell Jorge Ramirez David Rau Matt Sampson Ian Schoneman Stephen Shrover **Raymond Smith** Rodney Stewart II **Daniel Sublett** Les Sula Julie Trevino Joey Waller Fred White Erik Wiley Shane Wilson Michael Wrath Seth Young

GRADUATES PARTY CHIEFS

The following are graduates from the Surveyors Apprenticeship Party Chief Program from 1997 to 2001:

David Beardsley John Cabral Sean Finn Jason Krane Dave McMurdo **Rex Meins Richard** Ortega Al Pope Octavio Senda Oetavio Soria Derek Taaning Gary Warman Steven Young

Also in attendance were: Darrell Lewis, administrator, Southern California Joint Surveyors Apprenticeship Committee; Bud Ketchum, Operating Engineers Union Local 3 Engineers technical engineers business representative; Paul Schissler and Gerry Orme, retired; Mark Reschar and Mike Aha, Meridian Technical Services.

Our graduates worked hard and we appreciate their dedication to complete the program. The staff at the NCSJAC wishes the graduates well in the years to come.

Al Pope

One of our graduates was Al Pope, a.k.a. Big Al. He is going through a lot of personal health problems at this stage in his life and in talking to him 1 know why we as a nation and society will not be afraid. He is

positive about his circumstances and about life in general. His motto is never give up and always look to the good. We at the NCSJAC wish Al and his family well.

Al Pope plys his trade.

Scholarship Contest Rules for 2002

Applications are available at district offices and credit union branches

The Local 3 officers and Executive Board understand that the workplace is rapidly changing, and many of the jobs in the future will require new skills that can be attained only with a good education. Local 3 is dedicated to giving our young people the opportunity to succeed in tomorrow's jobs by providing them with the chance to further their education and training. For this reason, Local 3 awards annual scholarships to sons and daughters of Local 3 members.

ACADEMIC SCHOLARSHIP

Four college scholarships will be awarded to sons and daughters of Local 3 members. Two scholarships of \$3,000 each will be awarded to the first place female and male applicants. Two scholarships of \$2,000 each will be awarded to the runner-up female and male applicants. These scholarships must be used for study at any accredited U.S. college or university.

Winners also receive an additional \$500 per year from the Scholarship Fund for the second, third and fourth years of college, provided they remain full-time students.

The Academic Scholarships will not impose restrictions of any kind on the course of study. Recipients may accept any other grants or awards that do not rule out scholarship aid from other sources.

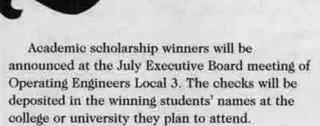

WHO MAY APPLY

- Sons and daughters of members of Local 3 may apply for an Academic Scholarship. One parent of the applicant must be a member of Local 3 for at least one year immediately preceding the date of the application.
- Sons and daughters of deceased members of Local 3 are eligible to apply for the scholarships. The parent of the applicant must have been a member of Local 3 in good standing for at least one year immediately preceding the date of death.
- The applicants must be senior high school students who have, or will be, graduated at the end of either: 1) the fall semester (beginning in 2001) or 2)the spring semester (beginning in 2002), in public, private or parochial schools who are planning to attend a college or university anywhere in the United States during the academic year and who are able to meet the academic requirements for entrance in the university or college of their choice. Students selected for scholarship must have achieved not less than a "B" average in their high school work.

Applications will be accepted between January 1, 2002 and March 31, 2002.

AWARDING ACADEMIC SCHOLARSHIPS

Upon receipt of the application and required forms, Local 3 will not exercise any choice among the various applicants or indicate in any way that one applicant should be favored over another. Based on factors normally used in awarding academic scholarships, the University Scholarship Selection Committee will submit to the Local 3 Executive Board recommendations for finalists. The list of potential winners and their qualifications will be reviewed and studied by the Executive Board and the scholarship winner selected.

All of the following items must be received by March 31, 2002:

- The application, to be filled out and returned by the applicant.
- Report on applicant and transcript, to be filled out by the high school principal or person he or she designates and returned directly to Local 3 by the official completing it.
- Letters of recommendation. The applicants should submit one to three letters of recommendation giving information about their character and ability. These may be from teachers, community leaders, family friends or others who know the applicant. Please submit all letters of recommendation with the application.
- Photographs. A recent color photograph, preferably 2 inches by 3 inches, with the applicant's name written on the back. The photo

should be clear enough to reproduce in the *Engineers News*.

• Media information. Provide the name, address and phone number of the applicant's local newspaper for the purpose of sending a press release on behalf of each winner.

RANDOM-DRAW SCHOLARSHIPS

In addition to the four Academic Scholarships, Local 3 will also award 20 \$500 "Random-Draw Scholarships." The names of all applicants will be entered into a drawing to be held at the July Executive Board meeting. Applicants need not be present to win. The scholarships are available only to the sons and daughters of Local 3 members.

GENERAL GUIDELINES FOR RANDOM-DRAW SCHOLARSHIPS

- Sons and daughters of Local 3 members may apply for the scholarship. One parent of the applicant must be a member of Local 3 for at least one year immediately preceding the date of the application.
- Sons and daughters of deceased members of Local 3 are eligible to apply for the scholarships if the parent was a member of Local 3 for at least one year immediately preceding the date of death.
- Sons and daughters of Local 3 members who plan to attend college or trade school are eligible to apply. They will not be judged on academic qualifications. All applicants who apply for the Local 3 Academic Scholarships and do not win will automatically qualify for this drawing.
- Applications will be accepted until March 31, 2002. Previous winners are not eligible to apply.
- Winners will be determined by a random drawing to be held at the July Executive Board meeting. Applicants do not need to be present to win.
- The money will be funded when the college or trade school confirms the winner is a full-time student.

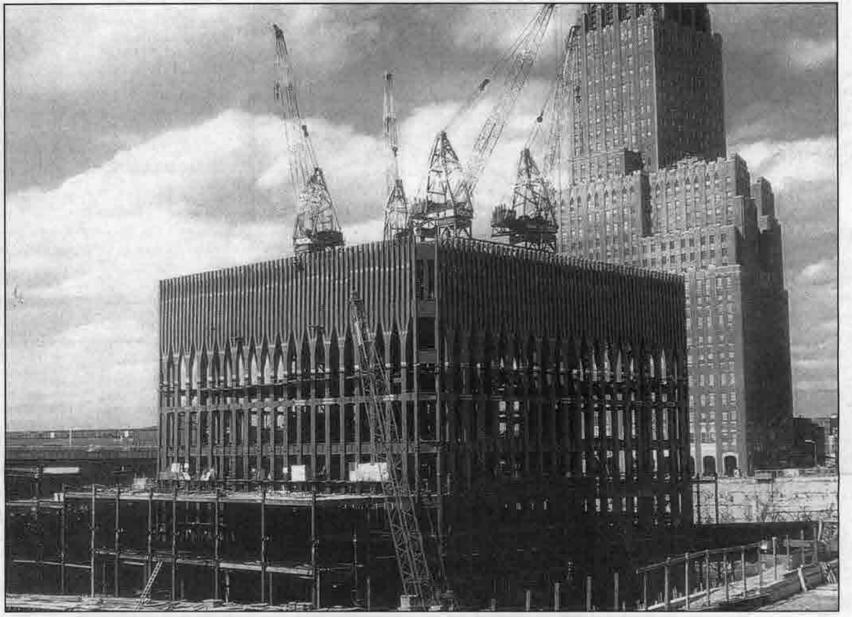

WHERE TO GET APPLICATIONS

Academic and Random-Draw Scholarship applications are available at your district office or credit union branch office. It is the responsibility of the applicant to submit the application on time to:

Robert L. Wise

Recording-Corresponding Secretary Operating Engineers Local Union No. 3 1620 South Loop Road Alameda, CA 94502-7090.

Yokes and typical fascia framing for the steel for Tower No. 1.

1 Libertiy Plaza and Century 21.

By Amy Modun, Managing Editor

The images of Ground Zero that Americans were bombarded with immediately following Sept. 11 have waned into the background of news reports. The cleanup coverage has, for the most part, been significantly reduced in recent weeks. But for the volunteers who still begin their day at the threshold of hell, the images of death and despair remain all too real.

About 300 Operating Engineers, from Locals 14 and 15, continue to sift through the nightmare that is spread across Lower Manhattan. Even among the ironworkers, carpenters and other trade personnel, the Operating Engineers have perhaps the most grueling task: uncovering the layers upon layers of wreckage. There is no escape from the sights, sounds and even smells of death. But despite the sadness, the grim work continues.

The good news is that the clean-up effort is progressing ahead of schedule; 25 excavators and 12 cranes working around the clock have already removed 40 percent of the debris, 359, 229 tons as of Oct. 1. Of this amount, only 66, 797 tons is steel. Supervisors estimate that everything will be down to gr than eight weeks. After this point, it will ta nine months to deliver the city a clean, dry

At the south graph. materi Tower

Slurry wall still shaky

The major obstacle remains the slurry v structure that surrounds the basement of t Trade Towers and keeps the Hudson River ing lower Manhattan. Surveys have determ nearly 50 percent of the seven-level basem was leveled as a result of the impact of the towers.

In mid-October, workers began installing anchors to stabilize the 3-foot-thick, 65-foo forced concrete perimeter walls of the 11-aear bathtub substructure. The design of the tion of the tieback installation along West Sbeing developed.

left is the SW corner of the WTC Complex at Liberty and West streets. The PATH tube, which has been removed, is shown diagonally across the photo-Next is the temporary construction bridge used for trucks to haul excavated al out of the site. To the right is the beginning of the erection of steel for the No. 1 (North tower).

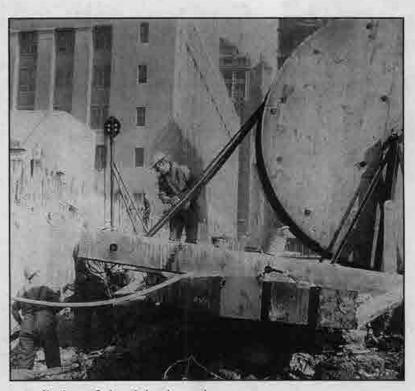

ide in less te another excavation.

vall, the ne World from floodned that ent structure collapsed

, tieback t-deep reinre rectilinnext seetreet is still Also an area of concern is the wall near Liberty Street where a 200-foot-long and 30-foot-wide hole exists in the basement. The hole renders the wall unstable, and already it has slipped two inches in just a couple of weeks.

To stabilize it, five rows of tieback are needed beginning 10 feet below street grade. Each 300-ton capacity anchor is 85 feet long from the inside face of the wall to the top of the rock and socketed 35 feet into rock. Crews are drilling the new anchor rows 2 feet above existing sleeves installed during the WTC's original construction.

From drilling machines on the backfill, crews excavate 10 feet and then core a hole through the slurry wall for each anchor. Crews work in a leapfrog pattern so that too much of the wall isn't exposed at any given time. This work is done from 7 a.m. to 7 p.m., seven days a week. Right now there are no estimates about when this task might be complete.

Installation of the tieback tendons.

This shows the arrangement for drilling of tiebacks at Vesey Street, where second-level tiebacks are being drilled. This is necessary if the walls are to be resupported by tiebacks.

CATbox update Community Action Team members prepare to pounce on statewide traffic congestion

Feline fever...catch it!

5 MJO

Ensuring sound state policy that serves all Californians plus provides jobs for Operating Engineers - is a primary goal behind a high-priority item for Community Action Team members. MAJI NOITAN MILAJON TEAM

California's March 5, 2002 primary election is just around the corner and CAT members already are working hard for passage of Proposition 42. Known also as the Traffic **Congestion Improvement** Act, the ballot measure's passage is crucial to Local 3 members and their families.

If approved, the proposition would provide up to \$1.5 billion in yearly statewide construction projects and improve public transit funding aimed at reducing traffic congestion and upgrading state and local transportation systems.

Toward that end, CAT Member Captains are moving an education piece and soliciting comments from members in preparation for the March election.

Among the highlights of CAT's education campaign:

- Prop. 42 provides traffic relief with no new taxes. Instead, it requires the existing sales tax on gasoline be used to fund street, road, highway and public transit improvements.
- · Motorists pay state and federal excise tax on gasoline and diesel fuel, which are used primarily for transportation improvement projects. Most of the sales tax on motor fuels, however, goes to the state general fund, where it is spent on many programs unrelated to transportation.
- · California has a huge backlog of transportation projects that are not being built for lack of funding. Prop. 42 would provide an additional \$1 billion to \$1.5 billion a year in funding that will get many of these projects off the shelf and underway. These are prevailing wage jobs that will go primarily to union workers.
- Some public-employee unions oppose Prop. 42 because they don't represent the variety of highway maintenance and public works employees that Local 3 does. Our diversity helps give us a big-picture view of how Prop. 42 will help union members in both private and public sectors.

Proven effectiveness

In other CATty news, Stockton District Rep. Tom Aja took it in stride as onlookers were floored during a Nov. 15 meeting to organize CAT members. That's because Steve Lopez Jr., 44, a lube engineer for Modesto-based George Reed Construction and Local 3 member since 1980, surprised most everyone when he announced he had signed up 28 CAT volunteers; members willing to put their time where their union needs them.

"Steve is quite obviously a preacher of the faith," Aja said. "He's at every meeting and has always been an active member. I don't call him; he calls me. He's one of my go-to members."

Cindy Tuttle, director of political training, said the Stockton meeting was one of the most exciting yet, thanks to Lopez.

"He (Lopez) said he fell short of his goal - he wanted 30 volunteers," Tuttle said. "We all just roared."

In Utah, CAT members hit the streets roaming for two mayoral races. They won in South Salt Lake City, electing mayor union-friendly Wes Losser, a former union tile setter.

In nearby Sandy City, Utah, Trish Beck lost by fewer than 2,000 votes. She remains, however, a state representative and will continue in that role supporting the interests of working families.

Victory is sweet.

What is a CAT Volunteer?

Answer:

CAT volunteers, or activists, are irreplaceable extensions of CAT Member Captains; their "troops," so to speak. They do what needs to be done, such as making calls, walking precincts, handing out fliers. Not necessarily Local 3 members, they can be a spouse, sibling, parent, neighbor or friend. "Our volunteers and activists can be anyone willing to help us do all the work that must be done to get out our pro-worker message, especially before the March 2002 primary," Cindy Tuttle, director of political training, said. "As long as they're willing to support working families and donate one hour or 100 hours, their help is needed and welcome."

Post-Sept. 11 blues?

Take stock of your life - it's the only one you'll have

When two dozen Operating Engineers attended a recent alumni picnic for recovering addicts, I was amazed – and proud – that they were willing to share their stories in order to help fellow union brothers and sisters.

Today, with the holidays upon us and many examining their lives in the post-Sept. 11 world, 1 can think of no better way to offer help and potential guidance to anyone struggling with alcohol or drug dependency.

We were gathered at the bucolic home of Azure Acres, a fully accredited addictionrecovery treatment facility nestled in a heavily forested, 30-acre site outside Sebastapol in Sonoma County. Held under the guise of a picnic, the annual event is more a chance for program graduates to touch base, catch up on the lives of their friends, and perhaps hear again how depressed some people must become before they're ready to honestly face their addiction.

As any successful graduate knows, it is this road that must often be taken before people can change.

This year, after our barbecued burgers, chicken, hot dogs and sumptuous salads, Tiffany talked about years wasted letting her mind drift in the fog of drugs, neglecting herself and her daughter. If there was a sadder story preceding recovery, few of us have heard it. The fact she lived to talk and share her story with others after years spent abusing her health was testament to her inner strength and the resilience of the human body. Inner strength, indeed, is

what the Operating Engineers displayed. Most voluntarily gave permission for me to use their names, although only first names are here.

Here is some of what they had to say:

JOSE: Since joining Local 3 in 1974, Jose has risen to superintendent. But he couldn't have done it without first going through ARP, he said, and he encourages others not to hesitate to enter a program that offers a 28-day program.

"Don't be afraid to ask for help," he said. "That's what ARP and our union is there for."

ELROY: A member of Local 3 since 1972, Elroy, 51, drives a scraper in the San Jose area. He attributes his father for urging him to join the union, and he's glad he did. The benefits and pay are excellent, but it was its compassionate drugrecovery program that he believes saved his life. He asks that all members, "Be a brother and sister on and off the job."

JENNIFER: She would not give her real name, but, at 36, she conceded as the wife of a longtime Local 3 member that she is grateful the union allowed both her and her husband to go through the 28-day, drug-recovery program. "It gave me back my life," she said. "I didn't have much of one before. I feel things (more) now. I love being alive and productive."

To others worried they may need help, she says, "If you feel helpless and your life is unmanageable, call ARP."

DON: He's 39, a member since 1990, and said ARP allowed him to continue an education that led to hucrative promotions. "Take advantage of all the ARP help you can," he said. "It will change your life."

ED: A 39-year-old journeygrade level Operating Engineer and union member since 1980, Ed said the pay and benefits of union membership are "awesome" and that being sober is great. "ARP has given my life back to me and my family." SAM: A mechanic since 1976, Sam, 45, said one of the best parts about being in the union is that he works with qualified professionals. Still, without ARP, he said he would not be alive today. "If you have a problem, don't be afraid to tell and get help."

KIMO: An Operating Engineer from Hawaii, Kimo, 39, said he's always wanted to be a heavy equipment operator because the career is "good for me and my family." Words of advice to fellow workers? Stay sober.

TOM: A backhoe operator and Local 3 member since 1984, Tom, 39, said the best part about being in the union is because brothers and sisters can be relied on during times of need, and that ARP gave his life new direction. "When I called on them, they responded," he said.

LEE: A 49-year-old driller out of Rohnert Park, Lee joined Local 3 in 1995. "For me, it was the benefits; ARP, in particular, changed my life" it gave him a life and freedom he had never known, he said.

"If you think you have an addiction problem, then you've got one," he said. "Call ARP."

Those are the words of your fellow brothers and sister. They know what it's like to hit bottom. During the holidays many of us are particularly susceptible to the blues, or "excessive" living. If you think you have a problem, or want to talk to someone in confidence, please call. We can help with admission, detoxification, rehabilitation and offers treatment for you or your spouse.

In short, if you or someone you know needs confidential help, the first step is as close as the nearest phone.

(Uwe Gunnersen is director of the Addiction Recovery Program, which provides confidential help to members and dependents who suffer from alcohol and drug addiction. He can be reached at (800) 562-3277; from Hawaii, call (808) 842-4624. Information can also be found at the Local 3 Web site, <OE3.com>. Go to the left navigation bar and click on Addiction Recovery Program.)

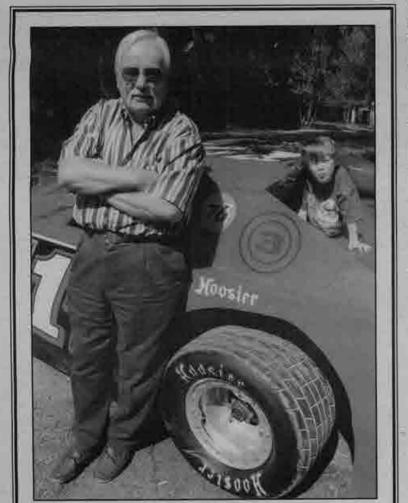

FROM THE

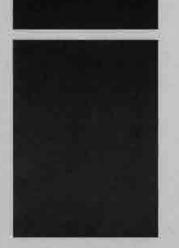

RACING TO RECOVERY: Uwe Gunnersen, director of Local 3's Addiction Recovery Program, stands by a late-model race car sponsored by Local 3 and driven by Jay Edens of Santa Rosa. Edens' son, James, 4, sits by the rear window above one of several Local 3 signs and stickers that adorn racer No. 17, which competes on 3/8ths-mile dirt tracks throughout Northern California and the Central Valley. Edens, a threetime champion, said he brought his 650-horsepower car to the annual graduates picnic at Azure Acres in Sonoma County as a way of saying thanks for three years of Local 3 support.

Apprenticeship builds long-lasting careers

At a time when foreign competition and rapid technological changes have heightened America's need for production workers, the ability of our youth to move smoothly from school to challenging jobs is declining.

Apprenticeship to career argues for instituting apprenticeship to later life and the supporting of a family.

Our progressive outreach and recruiting activities at the various high schools, junior high schools and job fairs have shown that most young people between 18 and 20 who do not go to college are confined to a narrow range of jobs or unskilled jobs. This then leaves the individual with little sense of career or direction until they reach their mid-20s.

These years, which could be spent learning practical skills needed to survive in an industrial society, are often self-indulgent in aimless activities. The result is a sense of isolation and hopelessness that often precipitates a cycle of dead-end, marginal jobs from which many never escape

Such wastefulness poses both a human and an economic threat to our way of life as unemployment increases, while skilled jobs remain unfilled and erucial services decline.

A sense of purpose

If we're ever going to refine the transition from high school to a career in construction, we're going to have to start by giving our future apprentices a sense of purpose, something that is beyond themselves, bigger than themselves and more powerful than the bottom-line dollar signs on a paycheck

A discussion I held recently with one of our 20-year-old apprentices, whom I'll call Joe, showed that he had held a string of unrelated unskilled jobs: a shoe firm, a gas company, a paper box factory, driving a truck, and a day laborer.

Joe has been an Operating Engineers apprentice with a signatory firm for more than a year now and plans to stay. Joe explained that previously he had only been interested in earning money but now he had a "sense of respon-sibility." Joe now sees the value of the training, skills and knowledge that the apprenticeship offered him.

Our mission

Our mission has and always will be to sup-ply the industry with skilled craftspeople through apprenticeship training and journeygrade level upgrade training through advanced apprentice training.

But the real responsibility is achieved when the tangible training is partnered with intangibles such as initiative, determination, drive and team building.

May 1 suggest apprentices make the most of this time. Make this phase of your training a rock-solid foundation for the next step of your career as a journey-level operator. Then, as you see up-and-coming apprentices, give to them some of the guidance you received, and share lessons you learned. The strength of our union depends

2002 objectives

This past year we have seen strange and horrific events - everything from a new president elected under a legal and political cloud of controversy, to a new war with enemies cloaked in ideologies whose objectives include the destruction of the American way of life through mass terrorism and biochemical assault.

Like everyone else in this country, some of you may have asked yourselves: Who are we now and where are we going?

Well, we are Operating Engineers. And despite a few setbacks, we have proven time and again that though some may bring down our structures they cannot keep us from rebuilding.

Where are we going can be answered with another question: What are our objectives?

Our objectives

We have and will continue to provide CCO certification to our crane operators

We have and will continue to offer gradesetting courses at the RMTC and in the districts. We have and will continue to emphasize

safety, both personal safety and equipment safety We have and will continue to be Operating

Engineers - the best in the industry. We will continue winter training, and we

will expand our training ground. We will answer the construction demands and search for the best ways to provide you

with those operating skills necessary to meet those demands. We will continue to focus on developing

highly skilled Operating Engineers because that is who we are

We have two Potain tower cranes

The Rancho Murieta Training Center has acquired two portable Potain Tower Cranes. It

is critical that Local 3 crane or erators are certified on the new equipment as soon as possible. The official protocol has been established below. Operators may apply for either class, based on his or her level of experience as a erane operator. Applications are available from the district or they may be ordered from the RMTC directly.

Class I: Crane operators with at least 1,000 hours of erane-related experience.

1. Practical testing will be scheduled upon receipt of written application and returned to RMTC by fax, mail or hand delivery.

2. Operators will be schedu ed for a 2-hour course. Topies will be:

Cold iron checks. Operational controls.

Maneuvering eab up and down. Securing cab.

Operating remote controls.

Operating hard line.

Smooth crane operation.

Class II: Crane operators with fewer than 1,000 hours of crane-related experience.

The RMTC has adopted a protocol for certifying competency based on CCO requirements to certify.

1. Training will be scheduled upon receipt of written application.

2. One refresher class will be scheduled upon receipt of completed application.

3. One proctored written exam:

4. One proctored practical exam.

5. Certification of successful completion.

FROM SAN JOSE

By District Rep. Fred Herschbach

SAN JOSE, Calif. – The work picture is still good. A couple of the jobs that are in the foothills around the valley have been cut back so they can get the environmental controls in place before winter hits.

The \$64 million Hwy. 101 job that RGW does from Bernal Road to Cochrane Road has been bumped up from about two years to December 2002. That means more hours for our brothers and sisters.

The \$400 million, 600 megawatt Metcalf Power Plant in south San Jose breaks ground in November 2001. This should provide good hours for between 30 and 75 Operating Engineers through the winter and possibly longer. We also have peaker plants being built in Gilroy, Watsonville and King City. Because of the good relationship Doser has built with Gov. Gray Davis, the power plants will be built with union labor.

Get involved

Because the election season is approaching, Doser and the officers have created Community Action Teams, or CATs, to help get members more involved, so please give us a hand.

If you have moved recently please contact our office for a change-of-address form. This will enable us to update our records and you can register to vote.

Don't forget free gradesetting classes are Tuesdays from 6:30 p.m. to 8:30 p.m. Instructor Mike Holthouse is doing a great job helping our members. If members in the south part of the district, such as the Santa Cruz and Salinas areas, are interested in gradesetting, please voice your request. If enough requests are made we'll set something up.

FROM THE districts

FROM FRESNO Former Fresno District Rep. Ron Wilson awarded 50-year watch

By Bob Wilson, grievance committee member

FRESNO, Calif. – Former District Rep. Ron Wilson last August received his gold watch for 50 years Local 3 membership.

Wilson was born July 18, 1918 in Prosser, Wash. Shortly thereafter, Wilson's recently widowed father and his six siblings left for California, arriving first in Friant and eventually settling in Clovis, near Fresno. Wilson attended Clovis Iligh School where he was a star tailback and competed in track and field, namely the 100-yard dash.

In 1937 he clocked 9.9 seconds in the 100 at the West Coast Relays at Ratcliff stadium.

In January of 1941 Wilson joined the Army and was sent to the 7th Division, 17th Infantry Regiment at Fort Ord in Monterey, Calif. The unit's first battle on a tiny Island named Attu in the Aleutian Islands would become their most famous. The battle of Attu would be distinguished as the only battle of the war fought on U.S. soil. At that time the Aleutian Islands were part of the Alaskan Territory. Although the Division would go on to fight other famous battles at Kwajalein, Leyte, and Okinawa, Attu would become the trademark of the 7th Infantry Division. It was considered that if a soldier had come through the battle of Attu he was an "Attu man" and had been through something.

After the war Wilson went to work for Fresno County building and maintaining county roads. It was there that he first got to run equipment. The first blade he ran was pulled by a tractor and all the controls were manual in those pre-hydraulics days. It was used for mixing oil. In 1950 while working for Fortiers Construction, Wilson joined Local 3 and eventually went into business with his brother Cliff.

Retired Fresno District Rep. Ron Wilson is presented with his gold watch by current District Rep. Mike Brown. Wilson's son, Bob, and daughter-in-law, Yolanda, look on.

> When that partnership ended in the late 1950s, Wilson went out and bought his first blade and traveled throughout the state during the freeway building boom of the 1960s and '70s.

In 1982, Wilson was appointed district representative of District 50 in Fresno and served until his retirement in 1990.

Of all the jobs and positions he has had over the years, Wilson says the one he liked best was that of a blade operator.

Nevada Operating Engineers Apprenticeship winter/spring classes

FROM THE districts

Work remains promising in some areas

STOCKTON, Calif. – As the end of the year approaches, the Stockton District has begun to experience a noticeable decline in work activity; however, there are some areas that do provide hope for work through the winter months.

Goodfellow Brothers has resumed work on its Hwy.108 job around Sonora after being shut down a few weeks because ancient artifacts dating back 6,000 to 8,000 years were discovered. We were greatly relieved when this issue was resolved, and we hope the work will continue into December with about 20 Local 3 hands working on a scaled-down crew. Mozingo Construction works as an underground sub-contractor moving utility services.

In the mountain counties, rock plants run at peak production, keeping many members busy meeting the demands of contractors trying to finish jobs or prepare for winter.

Dell Engineering and George Reed Construction both perform work on Stockton Street and Lower Sacramento Road in Lodi. The paving should be completed soon, leaving only punch-list items

to complete the job. Also in Lodi, two new 18 screen theaters and a three-level parking structure are being built by F&H Construction.

Granite Construction just completed paving Hwy. 12 from Hwy. 99 to Lower Sacramento Road. The work on expansion of off-, and on-ramps at I-5 and Hwy. 12 will continue into the winter.

In Stockton, Teichert Construction, DSS and Granite Construction work on the new Morada Ranch subdivision. This project will keep several brothers and sisters working until next summer, weather permitting.

The Manteca area continues to experience growth with several new subdivisions under construction, with DSS Construction performing most of the work.

DSS is also working on the next phase of the Spreckels Business Park. To accommodate development, the Manteca wastewater treatment plant has an expansion project scheduled for bid in early November. Similarly, the Tracy treatment plant will be expanded.

KG Walters from Santa Rosa is starting a \$5.5 million project to keep pace with growth.

Stanislaus County is also experiencing development in Patterson, Turlock, Modesto and Oakdale. Teichert's Turlock division has kept many of our members working throughout the area. A majority of the projects have been in the private sector, but they also have worked on several public works jobs.

Al Waggoner and Clyde Wheeler have kept hands busy this season working throughout the area.

Personnel changes

October was a month of change for the Stockton District Office. Doug Corson has been appointed special representative to Business Manager Don Doser. I am proud to announce Doser has chosen me to follow Corson as district representative in Stockton. Corson's shoes are big ones to fill, and it will take a lot of hard work to do so. I would like to thank Doser for his confidence in me, along with the rest of the officers for their support.

- District Rep. Tom Aja

FROM WYOMING Local 3 sponsors first regional skill-upgrade classes in 19 years

By Business Rep. Norm Montgomery

CASPER, Wyo. – Operating Engineers Local 3 is proud to have provided members in Wyoming and South Dakota with the union's first heavy equipment upgrade training for journey-grade level and apprentice operators in 19 years.

With the support of Business Manager Don Doser, Treasurer Bob Miller, the rest of the officers of Local 3 and the Apprenticeship Trustees, we conducted intensive training opportunities at our Casper training site for four journey-grade level operators and one apprentice.

The five trainees were put through two weeks of job-related functions on multiple pieces of equipment.

The trainees performed a land-leveling task on the motor grader and self-loading scraper, back-fill task on an old catch basin with the loader and dozer, and they pioneered a road in from the upper elevation

From left: Apprentice Lea Boevers and Ken Bailey, an instructor, stand by a loader during a break in a recent training and upgradetraining class held in Wyoming.

of our training site to the lower.

We would like to thank Lea Boevers, Don Patton, Darlene McHenery, George McCormick and Lee Davey for participating in our upgrade training session. Each of our participants said they were pleased with the training received during this class.

Special thanks also to Phil McChesney, training administrator out of Utah's Local 3 office, for instructing the class.

Free training opportunities

We wouldn't want anyone to miss out on a job dispatch because he or she wasn't prepared. Here are ways we can help:

Our next two-week class will begin Dec. 3 and will focus on gradesetting. This is an entry-level class and will be the first of a comprehensive three-part course during the next 12 months.

From Jan. 1-18, 2002, we will have our 40-hour HAZMAT class, and everyone is encouraged to participate. We are in discussions with a company that will need six to eight Operating Engineers that are HAZ-MAT certified, and this course will satisfy that requirement.

We will also hold an eight-hour refresher class on Saturday, Jan. 19, 2002, for those that have already taken the 40-hour class.

Our next equipment class is scheduled for March 4-15, 2002. This class will offer training on the blade, dozer, self-loading scraper, conventional scraper and backhoe. Please remember seats are limited. To enroll, contact Buisiness Rep. Norm Montgomery at (307) 265-1397.

Best wishes

On behalf of Doser, the officers and staff of Local 3, we in the Casper office wish everyone a merry Christmas and a safe, prosperous new year.

(Editor's note: The following is an unsolicited letter from the only apprentice to graduate from the first upgrade training class held for the Wyoming/South Dakow region in 19 years.)

Oct 19, 2001

To the officers of Local 3,

For the past two weeks I have been attending Local 3's upgrade training in Casper, Wy. I have enjoyed learning new techniques on various pieces of equipment, including a dozer, scraper, blade and loader I found my instructors professional and intelligent I appreciate learning from journey(grade level operators) who have real field experience

i would recommend this training program to any one who wishes to improve their skills or learn to operate something new Whether one has experience or is new to the profession, there is always more to learn and room for improvement

After all, versatility is key to continuous employment and future opportunity.

Sincerely,

Lea Boevers, Apprentice

FROM THE

districts

FROM SACRAMENTO Construction picture still strong in Sacramento

SACRAMENTO - There is quite a bit of twin 24-inch water main to be used for work in the Sacramento District, much of it in Davis.

MCM is building a new \$2.2 million bicycle and pedestrian overcrossing in Davis. Also in Davis, Teichert

Construction works on city overlays. Ford Construction works at UC Davis on the

cooling towers.

Granite does about \$8 million in work in Woodland widening Road 102 and Main Street

In Natomas, Teichert has a large portion of the 11,000 lots that are expected to be built during the next several years.

I also would like to ask all journey level operators to take an apprentice and teach him or her some of the many tricks and skills learned along the way to help with her or his career.

- Business Rep. Louis Fusaro

FROM ROHNERT PARK Siri Grading & Paving keeps Local 3 operators busy

ROHNERT PARK, Calif. - Siri Grading & Paving keeps about 10 of its 15 Operating Engineers busy working five/10s and an eight on their Wetlands Mitigation Project at Todd and Llano roads in Santa Rosa.

As of this writing workers are about 75-percent complete, with the 36 human-made ponds covering about 25 acres.

The mitigation will create vernal ponds so that development can proceed elsewhere in the county.

Thanks to the good weather and skilled operators, we are ahead of schedule by at least one month," Max Riggs, Siri Grading foreman, said.

Siri Grading & Paving has about \$4 million on the books right now. The projection for Siri Grading & Paving is even bigger and better yet for the next year.

Changing of the guard

The district bids adieu to District Rep. Russell E. Burns after about a year in Rohnert Park and wishes him well in his new assignment as district representative in Fairfield, District 4.

The Rohnert Park staff last month welcomed Joe Tarin as new district representative. Tarin is a longtime member of Local 3 and brings with him years of expertise as a business prepresenative in Oakland, an organizer in California and Nevada, and most recently was assistant district representative in San Francisco. Tarin is a hard worker with a can-do attitude.

Important reminders: Meet, save money and vote!

Remember the district meeting in Lakeport at the Lakeport Yacht Club on Dec. 6. Also, District 10 now has for sale the new 2002 KZST Entertainment Guides and the 2002 Sonoma Express books. Cost is \$20 each. Please come by or call the district office to reserve your copy.

As the rains will arrive shortly, remember to keep current your record on the out-of-work list. Some of you have outdated home phone numbers and addreses. Please be sure to call and notify the office. New voter registration forms are available on request.

> - By District Rep. Joe Tarin and Business Reps. Greg Gunheim and Jim Killean

∎FROM UTAH■

Operating Engineers SLC Rail Constructors ahead of schedule

By Business Rep. Dale Cox

SALT LAKE CITY - The University Light Rail Transit Project remains about eight months ahead of schedule and is expected to finish in time for the 2002 Olympic games thanks largely to the hard work of 60 Operating Engineers, a review shows

Overall, the project is estimated to cost about \$118 million, with between \$75 million and \$80 million earmarked for construction.

Phase 1 of the project is complete and includes utility relocation of water, sewer and storm-drain lines affecting more than 200 residents and 130 businesses. Also provided was a new 43-inch storm drain, more than 1,500 feet of a new 36-inch water main, and placing underground existing telephone, fiver optic and electrical lines.

Phase 2 is about 95 percent complete and includes road widening for a six-lane highway. A major challenge during this phase included construction of a 20-foot high retaining wall and raising three lanes of existing road by up to 10 feet.

In addition to the normal logistics of this task, phase 2 required workers to maintain four lanes of traffic through this area during the reconstruction. Traffic signals at 13 intersections are in the process of being replaced and updated. In addition to that installation, automated traffic-loop detectors are being installed for computerized synchronization of automobile and train signals

Rick Jones, a Local 3 member nearly five years, performs on-the-job maintenance amid the dust and noise alongside the light rail project.

Phase 3 is about 85 percent done and includes laying 2.3 miles of dual track. Major milestones completed include connection of new track with an existing (and in-use) light rail system. Tracks and switches were placed in the busy Main Street intersection to allow future transfer of trains from the existing North/South line to the University line.

Phase 4 is the placement of four transit

stations, or stops, installation of the overhead power lines, and system integration and testing. Foundations for the transit stations are in place and the structures were set before the end of October.

SLC Rail Constructors is a joint venture between Flatiron Structures, Stacy & Witbeck and Geneva Rock

This project has been successful for both SLC Rail Construction and Local 3 members. About 60 Operating Engineers are working this project from start to finish and were a contributing factor to the project's success, officials said.

Along with other union crafts, we look for-ward to dealing with Salt Lake Rail Constructors on the next phase of Light Rail.

Upcoming training sessions

There will be an eight-hour HAZMAT refresher class on Friday, Jan. 4, and Saturday, Jan. 5, 2002. There also will be a 40hour class Jan. 7-11. On Saturday, Jan. 12, there is another eight-hour HAZMAT class at the Salt Lake City hall beginning at 7 a.m. each day. Call to get on the list if interested. There is a limit of 30 per class.

In addition, we will be doing NCCCO crane certifications in early 2002. Check with Phil McChesney, training coordinator, at (801) 596-7785 or come into the union hall if you need crane certification.

Local 3 honors faithful members

We have 3,252 35-year Honorary Members with gold cards and about 157 members who next year will receive a 50-year gold watch. Our 50-year members will be announced in the July 2002 edition of Engineers News. Operating Engineers Local 3 wishes its members and their families happy holidays and a prosperous new year. We especially want to recognize the following members with 51-plus years of membership.

Election of market and geographic area committee members

Business Manager Don Doser has announced the election of Market and Geographic Area Committee Members at each of the regularly scheduled district meetings in Northern California and Reno during the first quarter of 2002.

- Eligibility rules are as follows: 1. Members must live in the committee's geographical
 - area. 2. Members must make a living working in the industry

 - Members must be an "A" Journey-level grade operator.
 Member must be in good standing
 Members cannot be owner-operators.

No member shall be nominated unless they are present at the meeting and accept the nomination and, if elected, assume the position.

No member is allowed to serve more than two consecutive terms on the Market and Geographic Area Committee. The schedule of the meetings in which these elections will be held appears in the adjacent district meetings listing.

2002 Grievence Committee Election

Recording-Corresponding Secretary Robert L. Wise has announced that in accordance with Article X, Section 10 of the Local Union Bylaws, the election of Grievance Committees shall take place at the first regular quarterly district meeting of 2002. The schedule of the meetings in which these elections will

be held appears in the adjacent district meetings listing.

CARRY YOUR DUES CARD

Recording-Corresponding Secretary Robert L. Wise wishes to remind all members to carry their paid up Local 3 dues card. When attending a semi-annual, quarterly district or special called meeting of the union, your paid-up dues card is proof of your good-standing status as a member of Local 3 and your right to vote in meetings or participate in union business.

HONORARY MEMBERS

meetings & announcements

FROM THE districts Hawaiian Crane & Rigging sets lift record with 'flying' fish

HONOLULU, Hawaii – God knows, I always wanted to write that Hawaiian Crane & Rigging set some sort of hoisting record. Being on an island 3,000 miles from the nearest inhabited land mass and well away from the action of the "big boys," I had given up any aspirations of ever writing that Hawaiian Crane & Rigging lifted anything of "record" or "world's largest" proportions.

My dreams came to fruition when we were contracted to hoist a 120 meter carp kite weighing 600 kilograms for the Japanese Festival, which commemorates cultural ties between Hawaii and Japan. It is not often that we are asked to hoist a load that hangs in a horizontal attitude, having a dimension greater than a 747 jumbo jet aircraft.

The festival was held in Kapiolani Park in Honolulu, and our park usage permit allowed for only one day. If the earp failed to fly that day, tens of thousands of dollars would have been spent for naught, not to mention disappointing thousands of spectators.

For generations, Kazo, a city of 68,000 located in eastern Saitama, Japan, has been prospering from its sewing business, and today is known throughout Japan for producing more than half of the country's koinobori, or carp kites. The giant carp took 1,500 Kazo residents months to create. Measuring 120m long and 40m around, this giant carp is the world's largest. It weighs 600kg and has a 10m-diameter mouth and 9.5m-wide eyes.

Approximately one year went into the planning. Careful review and translation had to be done of the empirical and model studies (including wind tunnel testing of a smaller model) at a leading university in Tokyo. After careful analysis, we converted the anticipated horizontal force into the equivalent vertical force to size the crane.

The crane to be used was a 350-ton Krupp 7300 configured with 163 feet of main boom and 183 feet of lugging jib. During the flight we would carefully monitor our anemometer to ensure that the predetermined wind speed limit of 15 miles per hour was not exceeded.

Throughout the day of the lift, the wind pattern was carefully monitored. On the morning of the lift, the wind was blowing in the exact wrong direction.

As the crane was set up adjacent to high trees and power lines, we were not in a position to swing with the load. The wind was blowing into the crane.

As the day progressed, however, the wind pattern fortuitously changed 180 degrees. To the delight of our client and

The carp kite is shown flying during Hawaii's recent Japanese Festival.

more than 2,000 spectators, we gave the signal to hoist – and the carp flew.

The crowd cheered, children gazed in awe and amazement, grown men cried and strangers hugged. The festival was a success.

It is hard to describe the emotions associated with the Flying of the Giant Carp, knowing the inordinate amount of work involved and being subject to the whims of Mother Nature. The joy of seeing the carp in the air transcended all cultural barriers.

(Editor's note: The above article is reprinted with permission from Hawaiian Crane & Rigging's 2001 newspaper, Lifting Letter. The author, Kerwin Chong, is director of engineering for signatory contractor Hawaiian Crane & Rigging.)

District 17 teams with communications firm

After several executive-level meetings, Local 3's District 17 in Hawaii has established a working relationship with Sandwich Isles Communications. District Rep. Harold K. Lewis, along with Assistant District Rep. Colin Kaalele and Allan Parker, stabilization fund administrator, met with SIC's CEO Robert Kihune, President Al Hee, Vice-Presidents Gil Tam and Randy Fong, and committed to providing qualified operators through our signatory contractors and the required training for directional drilling equipment.

SIC, founded in 1995, is a rural telecommunications company that has an exclusive agreement with the Department of Hawaiian Home Lands to provide telephone service to the agency's 69 parcels covering about 200,000 acres and located on the six major Hawaiian Islands.

\$35 million down; up to \$600 million to go

So far, the firm has spent \$35 million in facilities, digital switching and related equipment and services. The next phase of construction includes the installation of 1,500 miles of stateof-the-art fiber optic network in the ground, which is expected to cost more than \$150 million.

Another \$70 million will be spent laying down the submarine portions of the network. The total cost of construction, installation and operation of the system is expected to be between \$400 million and \$600 million, all within the next three to seven years. The all-fiber optic cable network will be independent of any existing networks owned and operated by other providers in the state of Hawaii. The undersea portion of the network will connect the six major Hawaiian Islands with primary and alternate routes.

The land portion of the network will be an all-underground infrastructure and will have primary and alternate routes as well, making the entire system redundant.

The network will feature the latest technology and greatest number of fiber in the state with exceptional bandwidth capacity. Users of the system will suddenly have access to all that the online world has to offer, including cutting-edge communications, distance learning, telemedicine and e-commerce opportunities.

"I see nothing but pluses and opportunities for all involved by our newly formed cooperative effort with Sandwich Isles Communications," District Rep. Lewis said. "The training opportunities presented here could not have come at a better time, considering our plans to proceed with the construction of our new training site.

"SIC's commitment to go union certainly is another plus for our membership. To be in on the ground floor and looking ahead at the almost limitless possibilities that this system will have to offer is truly exciting. I'm looking forward to a long and fruitful relationship."

OPERATING ENGINEERS LOCAL UNION NO 3 ALAMEDA, CA

CA DECEMBER 2001

Every bargaining unit needs a Merry Stevenson

By Charles Smith

Like many others, Merry Stevenson thought she could take care of herself when she went to work in government service. And for the most part, she could, even if she was just four feet, 10 inches tall. The day came, however, when she realized that she would be better off joining the union, where she could get some help fighting what she perceived as a hostile work environment and, in return, aid the efforts of others to improve working conditions throughout the Lake County bureaucracy.

"I joined the union when I started having trouble with a supervisor," Stevenson said. "He talked down to people and he said some really bad stuff to me."

Not only did Stevenson join the Lake County Employees Association, which has been affiliated with Local 3 for more than 25 years, she trans-

ferred from her job preparing complicated documents for delinquent tax sales of real property just before an important tax sale by the county tax collector.

"That guy pissed me off so bad I transferred to mental health," Stevenson said. "When the tax sale date came, my replacement never showed and she never came back because the job was so complicated and the supervisor was such a jerk. It left them in a heck of a mess."

In the 20 years with Lake County, Stevenson has signed up more than 100 new union members, made sure that the employees where she worked had their grievances addressed, and shared with union members the information about bargaining and other issues that affected the terms and conditions of their employment. She was a diligent steward and active in LCEA, sitting on the Board of Directors for many terms. She had a fairly simple philosophy: "I don't take any (stuff) off anybody, don't care who you are. You have to be firm and stand up for what you believe in, and if you say something, you have to back it up. And if you give your word, you have to follow through."

At the bargaining table, Stevenson made some co-workers nervous because she preferred direct talk and action to subtle maneuvering and finesse. Recognizing her value, the Local 3 business representative sat next to her in negotiations, encouraging her to be calm until it was time for bluntness. It was the bargaining table version of good cap/bad cop.

When she retired in October, management literally sighed in relief. Two months prior to her retirement, she

NEWS FROMTHE **public** employees

by STEVE BOOTH director of public employee division

Konsdorf promoted; Ruelas joins staff -

This writer has three important developments to report this month. On November 1, Business Manager Don Doser promoted Paul Konsdorf to Assistant Director for the Public Employee Division. Paul will assume primary responsibility for supporting members and staff for our law enforcement members and will assist the director in day-to- day administrative duties with the division. Paul is a former police officer with the Modesto Police Department and an 11-year staff veteran with the union. Paul's expertise will greatly enhance our delivery of quality representation services to all our members but especially those in law enforcement units.

On November 12, Ron Ruelas joined our staff. Ron is assigned to represent our public works unit in the City of San Jose. Ron brings 21 years of experience as a trade unionist to our organization. He is well trained and has experience as a union organizer and business representative with another trade union. During the month of November, Ron worked with Don Dietrich, the agent formerly assigned the unit, and our stewards to accomplish a smooth transition. Don was recently reassigned to represent most of our law enforcement units in Santa Cruz and Monterey counties. Although it is somewhat old news at this point, Governor Davis' signing in October of AB 616 is big news for many of our public employee members. Ironically, critics in the Capital told us through most of the summer that the bill was DOA in the Legislature. Fortunately, those predictions were inaccurate. AB 616 provides new retirement formulae for miscellaneous members of the Public Employee Retirement System. These formulae allow for retirement benefit improvements of up to 33 percent above the best benefits currently available.

The three new formulae now available include 3 percent at age 60, 2.7 percent at age 55 and 2.5 percent at age 55. Obtaining these benefits will require negotiation with the public employers as contracts come open and will increase both the employer and employee contributions to retirement. The employee contribution would increase from the current 7 percent to 8 percent upon implementation of one of the new formulae. Our staff have been training on the new benefits so that they will be prepared to present proposals in this regard at bargaining tables as our contracts open for renewal.

CEMA improves retirement benefits for members

By Tom Starkey

CEMA members recently ratified a tentative agreement with the County of Santa Clara on significant PERS improvements. The county has agreed to make changes to the PERS contract to provide for single highest year and the 7 percent employer-paid member contribution (EPMC) treated as special compensation. These benefit improvements will count as a member's single-highest year of salary for retirement calculations and will boost reportable salary by 7 percent, which will improve the monthly retirement benefit for members.

In exchange for these PERS improvements CEMA agreed to an extension of the MOU for two years with a new expiration date of Aug. 15, 2004. The first year of the extension the county agrees to provide a

salary increase of 6 percent and provide 1 percent for realignments, which will be negotiated in the spring and summer of 2002. The second year of the extension the county will provide a cost-of-living increase with a minimum of 3.5 percent and a maximum of 5.5 percent based on the Bay Area consumer price index. The period the CPI will be determined is from April 2002 to April 2003.

CEMA president Elaine Larson said at the recent membership ratification meeting that pension benefits are a priority within CEMA. We now will focus on additional improvements when we negotiate our next

MOU in 2004." Past president of CEMA and Fleet Manager Richard Simons said county's economy in the next two years will have nearly 10 percent in guaranteed salary growth on top of the 5 percent we just received. Keith Garvey, CEMA political action director, said that the key to our great MOU extension agreement was CEMA's direct political lobbying of the board of supervisors and the coordinated work with all other county labor unions.

It is expected that the PERS enhancements will not be effective until late January or early February of 2002. Safety members of CEMA in the Probation and Parks Department of the County recently received 3 percent at 50 retirement benefits and similar cost of living adjustments.

A bit of collective bargaining history -

By Dick Delaney

These initials are used all the time to describe the relationship of unions and employers. Collective Bargaining, CB, is the process used to establish the "wages, hours, and working conditions" of organized workers. This process obviously describes negotiations as a group rather than an individual.

Federal legislation in the early days of Roosevelt (1933) established the National Labor Relations Board, NLRB, as the agency to provide a framework for establishing legality of collective bargaining. Prior to this legislation, union members faced the risk of committing criminal conspiracy if a strike would occur.

Many groups were excluded from this federal law. Public employees, hospital workers and agricultural workers were specifically excluded. This led to some strikes to establish CB, especially in the hospital industry. There was a strike in Chicago in 1959 at four hospitals to establish CB, but it failed because of united opposition by all the hospitals in the Chicago area. Finally, several years later, hospitals were included in the law.

Public employees were forced many times to use the strike to establish CB. School teachers used the slogan "CB Now" in many cities mainly in the mid-West and East Coast to rally the teachers. The American Federation of Teachers led this drive and forced the more conservative NTA to make CB part of their policy. The Baltimore teachers union struck in 1967 and as a settlement the Maryland state legislature quickly passed legislation to establish CB in Baltimore city.

This tactic was replicated many times.

With these high profile teacher strikes, public employers were embolded to move for CB also. In the industrialized states where unions had considerable political clout, legislation was passed to provide CB for public employees. In California, the Myers Milias Brown Act (MMBA) was passed in 1968. This provided for local jurisdictions to establish their own procedures for establishing CB.

NEWS FROMTHE **public** employees

Don't cross words with Merry Stevenson

continued from page 1

was written up for alleged insubordination because she asked the Auditor's Office a question about how Health Administration was supposed to record certain transactions and for talking to the County Administrator about problems in Health Administration. Merry was not happy with the way the department was being managed, and she wasn't going to be kept quiet by threats of discipline.

When she and the Operating Engineers business representative demanded the write up be removed from her file, her supervisor sent word through the Personnel Department that it would be removed only if she kept her promise to retire. They saw her signature on a personnel action form. Although her retirement date had been set for months, management didn't seem to believe she was really going to leave.

"You don't want to cross swords with Merry Stevenson," said Larry Fabisch, president of the Lake County Employees Association. "She doesn't waste much time getting to the point, and she is very plain-spoken about what is right and what is wrong, and it usually doesn't matter whether she is speaking to an officer of the association, a department head

or a member of the Board of Supervisors. She can be very persuasive, if only because you know she is not going to go away until she gets what she wants."

And she doesn't go away quietly, either.

Concerned that the Mental Health Department is mismanaging a state grant to provide children's mental health services at schools throughout Lake County, she has spent the first few weeks of her retirement preparing a complaint to the Lake County Grand Jury, marshaling witness accounts and telling the story to anyone who will listen.

"I hope they don't think I'm just going to dry up and blow away," Stevenson said to a visitor at her Kelseyville home, which she shares with her husband, Bob, a road maintenance worker for Lake County and a former LCEA steward.

Stevenson's 20-year career with Lake County began in 1981 with the Tax Collector. She transferred to Mental Health before becoming the head account clerk for Health Administration. She retires with retiree health benefits and an increased PERS pension that she helped negotiate.

"The dog that doesn't fight for its bone doesn't deserve it," Stevenson said. "I would advise everyone who works in government service to join the union if one exists, or to form a union where it doesn't. And don't just sit back and wait for the union to take care of you. The union is everybody taking care of each other, and that takes at least some small sacrifice like going to meetings and speaking your mind."

Stevenson also has expectations of association officers and stewards. "They have to have guts enough to get involved and stand up for what they believe is right and the rights of the employees. If they can't bother to take a stance or to express themselves as to how they feel or to fight management, then they have no business being a director or a steward."

"Like I said, you don't cross swords with Merry Stevenson," LCEA President Fabisch said. "Every bargaining unit needs a Merry Stevenson. We'll miss her even though our meetings will be quieter."

A good word goes a long way

By Jim Hansen

Hello from South Dakota. We started with nothing and have grown to 10 bargaining units in Western South Dakota, all because of good words spoken about Local 3 and the work it does. Under Steve Booth's direction, Local 3 is taking on the biggest union-busting firm that operates in South Dakota. This union-busting firm has demoralized the people in South Dakota for years.

Local 3 is also taking on the sheriff of Pennington County and his union-busting attorney. We gaining are support throughout Local 3's jurisdiction in western South Dakota. The employees in Western South Dakota have heard of us and the work Local 3 does for its union brothers and sisters. They have been calling their friends in the bar-

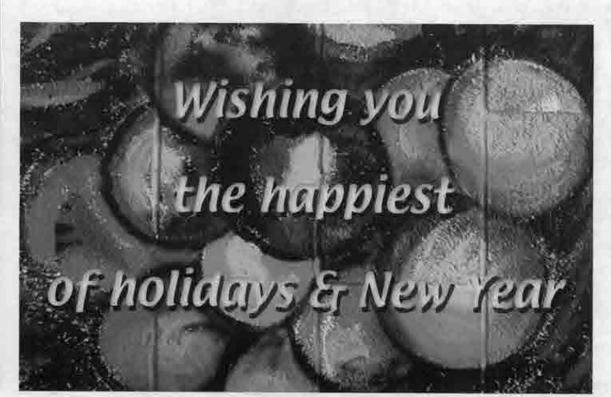

gaining units we have and are asking questions. Thanks to them, we've gone from zero public employees units to 10 with another election at the end of September 2002 with the City of Belle Fourche. The City of Belle Fourche first called the union-busting attorney and asked for advice. The city thought this would back Local 3 off. Instead, Local 3 advised the employees of these kinds of tactics and the city changed their attitude. I was advised by some officials in the cities and counties for which we have bargaining agreements, Belle Fourche was asking for advise and they were told to stop wasting their money on the union-busting attor-

OP

ney. The City of Belle Fourche stopped its campaign against Local 3 and is letting the employees vote their wishes.

We are back into negotiations with several of our units, and we are working on acquiring better benefits for those units. The best advertising we have is a satisfied Local 3 member.

Remember: A good word goes a long way. It's what helps Local 3 grow in South Dakota.
