Engineers News (ISSN 1069-2185) is published monthly by Local 3 of the International Union of Operating Engineers, AFL-CIO; 1620 South Loop Rd., Alameda, CA 94502. Periodical postage paid at Alameda, CA and additional mailing offices. Engineers News is sent without charge to all members of Operating Engineers Local 3 in good standing. Non-member subscription price is \$6 per year. POSTMASTER: Send address changes to Address Change, 1620 South Loop Rd., Alameda, CA 94502.

PERATING ENGINEERS #3

For The Good & Welfare By Russ Burns, business manager

Fighting for more than a contract

As we enter the month of December and reflect on the year, it's important to also reflect on the current status of the striking members of Valley Power. Their battle has been a grueling testament to upholding strong union ideals as they enter week 22, almost six months on the line. Through labor trials, negotiations, rain, sun, rallies, harassment and the unending pounding of feet to pavement, these Local 3 members endure. It is worth pausing to reflect on that this holiday season and just what a labor strike really means to this organization.

Strikes became important during the industrial revolution when mass labor was essential to factories and mining. Many workers were exposed to unfair labor conditions and meager pay. Today, most U. S. citizens are protected from unregulated industry by labor laws, which can be in large part directly attributed to the labor movement. Over the course of history, many workers have fought and died for these very protections. The striking workers at Valley Power have taken on such a fight, as Local 3 strikers have in the past.

Operating Engineers has a long history of supporting its members in their struggle to maintain fair wages, benefits and working conditions. Many of you will recall the strike in 2004, when the Operating Engineers, Teamsters, Laborers and Machinists joined forces to obtain a fair contract for the good of all. The solidarity exhibited during that strike showed that more important than the outcome of any strike is the process of the struggle, which brings together union members in a true kind of brother and sisterhood. While we may all talk around the idea of solidarity, its true meaning is made most apparent when members band together, literally walking shoulder to shoulder, for the great purpose of us all - respect, acknowledgement and justice. These members have sacrificed much in the name of this vision.

That being said, I would like to take this opportunity on behalf of Operating Engineers Local 3 and the brothers and sisters on strike at Valley Power, to thank all those individuals and organizations who have given so generously of their time by joining our members on the picket line and for so generously contributing much-needed dollars to help support this strike. Some organizations that have donated include the International Union of Operating Engineers, Operating Engineers Local 39, International Association of Machinists Local 1781, North East California Building and Construction Trades Council and Monterey/Santa Cruz Counties Building and Construction Trades Council. Hundreds of individual members have also donated at the Credit Union or at district meetings. We cannot continue the fight without you, and your efforts are appreciated.

If you've been keeping up with the long list of local union supporters and elected officials who have marched with the Valley Power strikers or written letters to the company, you know that a labor strike encompasses more than just union members – it encompasses the greater public. Community awareness about Local 3 and the benefits it offers members is a valuable tool in maintaining our strength in this strike and future strikes.

It is important to remember what a strike really means to our union and any union. A strike represents the fundamental purpose of unions, which is banding together to secure respectable wages, working conditions, health care and a pension that allows workers to retiree with dignity. Unions have been striking to protect this right for centuries. The striking workers of Valley Power are fighting not just for their own contract to be honored, but for the rights of workers everywhere to be honored. Their fight is our fight on a much larger scale – it is the fight of the working class to be recognized and respected, and it is a fight started hundreds of years ago – a fight that ever continues.

With this in mind, I wish you all a safe and happy holiday season and a prosperous new year. This holiday season, I hope you will take the time to reflect on all the good things in life and think about helping out those less fortunate.

January Engineers News will be delayed

Due to the election of delegates and alternate delegates to the 37th Annual International Union of Operating Engineers (IUOE) Convention, distribution of the January edition of *Engineers News* will be delayed.

IN THE NEWS

Survey reveals operators rank in top 10 most satisfying jobs

A survey conducted by the General Social Survey (GSS) at the National Opinion Research Center at the University of Chicago found 64 percent of Operating Engineers nationwide said they were very satisfied with their jobs. The 2006 GSS is based on interviews with randomly selected people who collectively represent a cross-section of Americans. In the current survey, interviewers asked more than 27,000 people questions about job satisfaction and general happiness. Clergy (with 87 percent satisfaction), firefighters (80 percent) and physical therapists (78 percent) topped the list, while apparel-clothing salespersons, handpackers/packagers and food preparers (24 percent) and Laborers (except construction) ranked lowest at 21 percent.

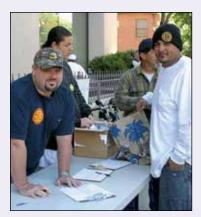

Members get out the vote for Newsom

Nearly 100 Local 3 members helped get out the vote for San Francisco Mayor Gavin Newsom at a recent campaign event hosted by the San Francisco Labor Council. Operating Engineers attended the event with

other labor-council several affiliates. including the Carpenters, Laborers, Machinists and Service Employees. Members kicked off the day with a rally, where Newsom thanked the crowd for "acting locally" in his campaign and rounded out the afternoon with a get-out-the-vote (GOTV) precinct walk. Thanks to all of our journey-level members, apprentices and their families for coming out - we appreciate your involvement and support.

San Francisco Mayor Gavin Newsom addresses a crowd of union supporters from the San Francisco Labor Council.

From left: Burlingame Dispatcher Craig Thompson and Journeyman James Rosas sign in at the Gavin Newsom GOTV campaign in San Francisco.

From left: Local 3 Treasurer Dan Reding, San Francisco Mayor Gavin Newsom and Burlingame District Rep. Ken Oku at the Oct. 13 campaign event.

Talking Points

By Fred Herschbach, president

Get ready for a good season in 2008

I just finished attending the last round of Bylaws meetings, and the members were very involved, as we had good turnouts at every district. As is always the case with this proactive membership, you have spoken with your votes, and the changes are good for the local as a whole.

Speaking of the local as a whole, Local 3 hosted this year's Western Conference in San Francisco in October. The conference is a way for our brother and sister locals to get together and share ideas, strategies and visions, and this year was as good if not better than year's past, as we swapped a lot of good information during the sessions. I met with many labor colleagues and got some good ideas about the direction their particular locals are taking regarding health care, pensions and negotiated contracts. With the innovative direction of International Union of Operating Engineers (IUOE) General President Vince Giblin, we all got great ideas on health care, organizing and training - ideas we hope to utilize in our own local. It is a great experience to sit in on those meetings and conferences surrounded by people with the same labor vision Local 3 has. It proves labor's aim is not dying at all but is gaining ground through strength, mobilization and the "meeting of the minds," which is what this conference was all about.

Work season is slowing down, and as most of you know, this is the time to upgrade your skills, and call your local district office to get on the list for Journey-level and Supplemental-Related Training (SRT). There are many classes offered and some you can find listed in this edition of *Engineers News* on page 7. We have some new equipment out there at the Ranch, so please take advantage of it.

At the last round of Retiree meetings, it was good to see some friends I haven't seen for a long time. We had good conversations about how they tutored me when I was struggling to be the Operating Engineer I needed to be. We reminisced about the old days when the rains hit, and we were off work for two to three months at a time and would meet down at the unemployment office to get our checks. We talked about how we worked hard during the work season and saved up for the winter, and how we did it all over again the next year. Times have changed over the last 10 to 15 years, and work has been there to go and get as much as we wanted. With work slowing down, let's try and pace ourselves and get ready for a good season in 2008. It's important to remember how difficult times used to be, especially for the retirees who brought us where we are now. The officers are putting a lot of pressure on the politicians to get Proposition B bond money in the pipeline for 2008.

With the new year approaching, and the holidays just ahead, let's be hopeful for this next go around of work. In closing, I'd like to give a note of appreciation for former District 90 Dispatcher Joe Morrison. His loyalty to the membership and his dedication to the union will be missed as he retires. While he battles his illness, may he be in our utmost thoughts and prayers this holiday season.

From my family to yours, have a happy holiday and be safe.

Quarterly Financial Report to Members 9/30/2007

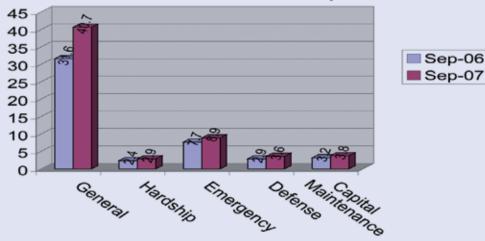

Local 3's financial results for the first nine months of 2007 met expectations, reflecting continued strength in the economy and more specifically, construction spending. As of Sept. 31, the union has 40,453 members in good standing – up 878 from this time last year.

The Bylaws changes to Article VI were ratified by the membership this summer, resulting in the first-ever dues reduction for Local 3 members and thereby, lower dues revenue to the local. These dues changes, which started in the third quarter of this year, will save Local 3 members around \$5.3 million on an annual basis.

Local 3 staff has developed a comprehensive budget for 2008, enabling much-improved financial controls and planning as we move forward. Reflected in this budget are the dues-rate reduction enacted in 2007 and the officers' commitment to our two highest priorities:

- **Trust Fund performance:** Within the 2008 OE3 Budget is an allocation of additional professional-staff resources committed to improving the management of the OE3 Pension and Health & Welfare Trust Funds. With the welfare of all Local 3 families in mind, a commitment to improved fund management and performance is currently and will continue to be our top priority.
- **Responsiveness to members:** In recognition that Local 3 is in the service business, additional resources have been allocated to improve our responsiveness to the membership. District offices have been given the directive, the training and the resources required to better support our members in the field.

Looking at the overall work picture, we are all concerned about the economy as we hear the news relative to the mortgage- and real-estate markets. For Local 3, this will impact our private-sector work with a slowdown in residential construction; however, infrastructure projects continue to come online. In California, a number of highway projects are starting or coming soon, and refinery and dredging work look strong. In Nevada, gold mining and infrastructure work is offsetting the slowdown in housing and highway work. Utah is holding its own as well; rail, pipeline and golf-course work have offset a decline in housing projects. Hawaii's work picture is strong with a large Disney resort project and federal infrastructure projects.

2006	10.5%	7.5%	81.3%	
YTD 07	7.1%	7.5%	n/a	

Commentary:

Despite difficult markets in July and early August, the third quarter ended on a positive note thanks to a strong recovery in September. Through Sept. 30, the plan earned a net investment return of approximately 7.1%. If this performance is continued through the fourth quarter of 2007, the plan will earn well above its 7.5% target rate of return.

The plan's funded status declined at the end of 2006, as the fiveyear actuarial smoothing method for plan assets included one remaining year of significant negative returns. As the impact from the poor performance in 2002 is removed from the calculation next year, the funded ratio should improve markedly, assuming the remaining quarter of 2007 holds no major negative surprises.

Notes:

1) The Funded Ratio is the value of assets used for the annual pension plan valuation divided by the present value of accumulated plan benefits.

2) 9/30/07 results are preliminary and un-audited.

Credit Union

By Rob Wise, Credit Union secretary/financial officer & recording - corresponding secretary

The importance of financial literacy

Making thoughtful and informed decisions about your finances is more important than ever. As your Credit Union, we feel we should provide you with as much information as we can to ensure your financial success. The following are just a few of the trends that demonstrate the importance of financial literacy:

- 1. Social Security used to be seen as a major source, if not the major source, of retirement income. Now it serves more like a "safety net" that will provide enough only for survival, not enjoyment.
- 2. We are living longer. This means we must accumulate more funds before retirement to cover living expenses over a longer time.
- 3. The financial environment is changing faster. Bull markets, Bear markets, rising interest rates, falling interest rates and the increased visibility of finances in the press can make creating and following a financial path difficult.
- 4. There are more financial options. Hundreds of credit-card options, several types of mortgages and IRAs and the ever-growing number of investment options further complicate financial decision-making.
- 5. There are more choices for financial services today than ever before. Banks, credit unions, brokerage firms, insurance firms, credit-card companies, mortgage companies, financial planners and online financial-service companies are all trying to earn your business.

We understand all these factors can make things more confusing and cause high levels of financial anxiety. Here are a few things you can do to become more successful:

1. First, make sure you are as informed as possible about your finances. After all, you are the one who has to live with your decisions.

- 2. Second, try to find a financial institution or financial adviser who is knowledgeable, trustworthy and someone with whom you can work comfortably. They cannot make all your decisions, but they should help you put your situation into perspective and help you evaluate your options.
- 3. Third, try to develop good financial habits. Paying attention to how you spend your money will probably lead to some ideas on how to save more. Over time, your savings can make a difference in your future financial lifestyle.
- 4. Fourth, make sure to do the "easy" things. Enrolling for direct deposit of your paycheck and using some form of automatic-savings plan will help you accumulate funds.
- 5. Finally, try to develop a financial plan. It does not have to be complicated or extensive. In fact, you may want to tackle one part of your finances at a time, such as looking at all your insurance needs. Breaking a financial plan into workable pieces can make it easier.

It is never too early or too late to improve your financial literacy. In fact, if you avoid major mistakes and do some of the most basic things, you will find yourself on the road to controlling your financial future. Our member-care representatives at the Credit Union are prepared to assist you with any of your financial needs. As your union Credit Union, we want to make sure you make the right decisions when it comes to finances; whether comparing loan rates to purchasing a home or car or looking for the best return for your investments, we take your financial success personally.

Your officers, Executive Board members and your Credit Union staff wish you the best of holidays and lots of financial success in 2008.

Dear Editor:

I am writing you this letter to apologize for my actions in my class picture from the JAC where I was giving an inappropriate gesture in the September 2007 issue of *Engineers News*. I know how it may have looked; it was not my intention to have disrespected myself and the others in my class. I am so lucky to have been part of this great Union and get such great training. It is with all of my heart that I am truly sorry for my actions. I have not been the best person in demonstrating the optimism that we apprentices should have and display through the years.

Once again I am truly sorry and ask that the staff and members of Local 3 please forgive me for my actions.

Sincerely, Jonah Towe Reg# 2632932

Dear Editor:

Regarding the California mega-bond funding, Attorney General Jerry Brown argued in a suit filed in opposition to the use of the highway fund monies, we as operating engineers spent millions of dollars to get passed. He argued that unless counties in California could build highways without using earth moving equipment and cement, and once built, that people would not drive on these highways. Then the only legal use of the funds would be to promote mass transit, transit villages, pedestrian trails and bicycle paths. We as union members spent time and man hours to get that bond measure passed, and the liberal Attorney General of the state is attempting to circumvent the will of the people by not allowing the counties to spend the money to build roads. It is time to rethink the kind of mindset that aligns union labor with liberal Democrats. We need to be more selective about who we support. The liberal wing of the Democrat Party is anti-business, anti-private property and will be the death of the free enterprise system in this country.

Mike Vercruyssen Reg# 1191249

Fringe Benefits By Charlie Warren, director

Best of the holidays to all

On behalf of all of us in Fringe Benefits, we hope you will be able to spend some quality time with family and friends this holiday season. Be sure to give a call during the holidays to those engineers struggling with their health. They will appreciate it.

Thanks to all members and spouses who attended the recent round of Retiree Meetings, where we had some 90-year olds there too, as always! Almost all retirees claim that some regular exercise, especially dancing, keeps them going. Our officers certainly appreciated your attention to the Bylaws changes and all your constructive comments about the benefit plans. We look forward to seeing you next time, probably in April 2008. I would like to give a special thanks to our Chapter Chairmen: Sonny Bergau, Virgil Blair, Alban Byer, Leon Calkins, Leo Cummins, Burt Cunningham, Mario Dumlao, Ken Green, Bill Marshall, Gary Morthole, Myron Pederson, Bill Seemann, Jack Short, Norman Smith, Abe Souza, Bob Taylor, Marin Vallejo and Bob Yturiaga.

Again, best of the holidays to you, your family and friends. Take care of each other, and remember, the holidays are tough on the diet, so some moderation is probably in order. Like we sometimes say here in the Fringe Benefits office, let's start with dessert so we won't each too much for dinner!

2008 Pre-Retirement Meetings

It's never too early to plan for your retirement and learn a bit about the excellent plans we have. Join us at the meeting in your area. We'll have plenty of time to discuss the pension, retiree medical and annuity plans with you and your spouse. All meetings convene at 7 p.m. See you there.

27 years and still standing

By Abraham M. Fontanilla, business representative

Building Inspector John Casey, a 27-year member of Local 3, received his 25-year pin this year. On a routine job sweep, I met John working on a project in Marin. During our conversation, he mentioned this year was his 27th in the union, a fact that ignited my efforts to make sure he received his 25-year service pin. Along with six other recipients who received pins ranging from 25 to 35 years, the pin was presented to John by Business Manager Russ Burns, Vice President Carl Goff and Treasurer Dan Reding during District 10's First Annual Hot Cakes and Hot Rides Breakfast in July. Unfortunately, John was not properly recognized because of an unintentional error in the September issue of the *Engineers News*; therefore, it is OE3's duty to fix the mistake. While on the phone with John, I asked him to tell me about one of his first projects – a true milestone to demonstrate the start of his career as a building inspector. When he said the Post Montgomery Center, which consists of One Montgomery Tower and the Crocker Galleria, I jumped at the opportunity to cover a historic landmark of San Francisco and Non-Destructive Testing (NDT), which John had primarily used to perform quality assurance on all structural steel applied to the center, and most of all, ensure John's hard work was acknowledged.

John utilized a testing method to find internal flaws within the steel welds called Ultrasonic Testing, a process in which sound is manipulated and conducted through a medium (in this case, steel). When the sound (during its travel through the weld) is interrupted by an inclusion or separation that discontinues a consistent sound wave, it is reflected back to the source, pin-

pointing the imperfection. An indication is produced by the intensity of the reflection and the distance taken for the reflection to return. This is a simplified explanation of a complex testing method that can be conducted in many different ways. Though ultrasonics have been used for more than 40 years, it is still a leading component in NDT, and with its ability to outlive other methods that have come and gone, it has also progressed in development, making efficiency and accuracy common.

The Post Montgomery Center site is a story within itself. During the California Gold Rush, San Francisco was a budding city thriving with commerce. In 1862, the Lick House, a popular inn used by travelers and locals alike, was built where the Crocker Galleria now resides. The name creates an imagination of tastes indulging only what that time in history offered San Franciscans; it was considered "The finest hotel west of the Mississippi River." When the 1906 earthquake hit, the Lick House and other, smaller adjacent structures were destroyed. Three years later, the First National Gold Bank was erected at One Montgomery Street (due south of the flattened Lick House) to accommodate the

relocated First National Bank of San Francisco, founded

Inspector John Casey looks up in approval at the Crocker Galleria in San Francisco, one of the first projects he worked on as an inspector with Local 3.

in 1870. Then in 1925, Crocker Bank, which was founded in 1883, took vacancy where the previous bank resided.

In 1982, the Post Montgomery Center was built in place of these pioneering buildings. Taller, bigger and stronger, the center was designed with the capacity to withstand greater forces than anything the city had experienced through its seismic past. One Montgomery Tower now stands where the prominent banks once stood. The adjoining Crocker Galleria, with its three levels of retail space, is topped with glazed barrel-vaulted, steel-arched ceilings. Young John Casey with his Ultrasonic Testing (UT) equipment began his career testing welds applied to the columns, girders and beams built within the center. These structural elements were designed to support 38 stories of office space and used to transfer static and live loads to its grounded foundation base. Performing quality assurance on welds for structural steel is critical in any construction, as it ensures proper workmanship and public safety.

Within a relatively short period of time, commerce in San Francisco has grown tenfold from the ground up. With superior engineering and the use of outstanding special inspections, structures will get larger and safer for the masses to occupy. As John celebrates his 27-year anniversary and his first accomplishment as an inspector, he and the Post Montgomery Center stand together, upright and proud over the historic grounds amongst an ever-changing city of business. He is one of many Operating Engineers who have contributed to San Francisco's extended history.

Public Employee News By Don Dietrich, director

Practice good work ethics

We defend members in adverse employment actions, such as termination, on a daily basis. Once in a while, we get a case that is completely fabricated and has absolutely no merit. The majority of the time, the cases involve member conduct that is cause for disciplinary action. The only question becomes what is the appropriate discipline?

Each employer has a list of conduct that is cause for discipline in the Collective Bargaining Agreement (CBA) or in the personnel rules and regulations. Here is a brief list of conduct that, if proven, will always lead to discipline:

Coming to work under the influence of drugs or alcohol, dishonesty, conviction of a felony, committing criminal acts while on duty, theft, immoral acts, such as engaging in lewd acts with minors, prostitution, failure to come to work without notice, insubordination, physical altercations at work and falsifying payroll records.

The bottom line is if you come to work every day like you are supposed to and do your best for the period of time you are getting paid, you will most likely have a civil-service job until you retire.

If you don't come to work or don't engage in work functions during the period you are getting paid, or you refuse to follow the direction of your supervisor or commit a criminal act or come to work drunk, you should expect disciplinary action. If you develop a pattern of misconduct, or if your behavior is so bad (i.e. punching a co-worker or selling drugs out of your work truck), you should expect to get fired if you get caught.

Both your employer and union have a right to expect you to show up to work on time and complete your assigned work to the best of your ability. While we will try to mitigate disciplinary action for misconduct, the union does not condone coming to work drunk or on drugs, as this places all other union members in jeopardy; we don't condone physical violence in the workplace, and we expect you to show up and do your assigned work. So please come to work on time and do your best – the union can always defend that.

If it weren't for bad faith ...

By Alan Elnick, business representative

Most of us are old enough to remember that old Willie Dixon blues refrain: "If it weren't for bad luck, I would have no luck at all." With so much happening in the area of labor relations in Alameda County, we might modify that refrain to: "If it weren't for bad faith, there would be no faith at all."

Labor relations - particularly as it affects the county's employee supervisors, managers and confidential employees – rely on the maintenance of good-faith relationships to make things work. We enter into Memorandums of Understanding (MOUs) and other contracts based upon existing sets of conditions and with the understanding that when change is necessary, such matters are the subject of open and free discussions among representatives of the county and the employees' recognized bargaining agent. In such circumstances, employees benefit by being able to rely on economics and other terms to plan their personal lives, and the county employer benefits with a workforce less deterred by uncertainty and conditions that allow for the civilized management of fiscal and service affairs. When the implied trust required in good-faith relationships breaks down, with it goes the sense of security that allows for successful government operations, and an environment of fear and loathing sets in. Rivalries, self-indulgent theories of fairness, and generally destructive intra-group competitions arise to thwart the purposes of the government agency – in other words, the process of implosion begins.

Mass resignations in the Human Resource Services Agency in the last two years imposed discouragement on the ability of the Alameda County Management Employees' Association (ACMEA) to continue its work with prior good-faith understandings upon which we have trusted. Both the created vacuum and unseasoned replacements make it difficult to resolve what would normally be mundane issues.

In a recent example, the auditor-controller changed a policy regarding items that could be reimbursed under the Cafeteria Benefit Plan available to ACMEA-represented employees. The agency had every opportunity to inform ACMEA of the intended change, and in fact, other organizations were notified of the change. It may be coincidental, but the notices went out during ACMEA's negotiations where the county eliminated the Tools and Technology Reimbursement Program and added the amount to the Cafeteria Plan. ACMEA-represented employees who had formerly received reimbursement from the Cafeteria Plan found themselves denied or put before unnecessary hurdles for reimbursement. When confronting the problem, ACMEA was told the auditor's action stemmed from IRS rules. This simply is not the case, as it is a change in the county's policy, and it needed to be discussed with ACMEA. While we await a return to discussions on the matter, a grievance was filed to remedy the existing denials. The greater problem is the breakdown in trust, for nothing we have negotiated is safe without the threat of a fight.

Clovis employees unite to fight for their rights

By Doug Gorman, business representative

A couple of months ago, I wrote an article about issues our public employees are having with the city of Clovis. This article was sent all around and posted on association billboards throughout the city, which attracted a lot of attention.

In the past, the city has always decided the Cost of Living Adjustments (COLAs) it would pay and never budged on this point. Before beginning negotiations for our salary re-opener this year, I was called into the city manager's office and told the city didn't have any money because of the housing crunch and that COLAs would not happen. The city came to the table with 3 percent. This bothered our team, since two contracts ago, the city paid the Public Employees' Retirement System (PERS) contribution of 7 percent. The city told the Clovis Public Works Employees' Association (CPWEA) that since Clovis is not a charter city, it could no longer pay the employees' contribution to PERS. Everyone knows this isn't true, including our members, as this happened before they joined OE3. The union's request this year was for the city to pay for the employees' contribution to PERS. The city again countered with the same 3 percent and told us it had no authority to go any higher. We went to impasse, and a state mediator came down to work out a solution. When the mediator spoke with the city, he was told the city had no authority to go past 3 percent. Thus, we remain at impasse.

Board members of the association met with three council members, and the city came back to the table – only to offer us the same 3 percent we had already turned down. Currently, the city has refused to impose its last, best and final offer.

The good thing that has come from all of this is the police, fire, public works and the city employees have begun meeting and discussing how we can get the city to respect the rights of its employees. Things are changing in Clovis!

Antioch public employees support Valley Power strikers

By Carl D. Carey, business representative

Within the public-employee sector, going on strike is something we all have the right to do but very seldom use. For the most part, we can usually agree on issues and avoid having to go out.

As we all know, being on strike is stressful to the employees who are on the line fighting for fairness from their employer. If you have kept up with the news, our members at Valley Power Systems North. Inc. in San Leandro have been on strike since July 10. I have been honored to walk the line with these brothers and sisters in support From left: Howard Falk (a of their efforts to bring the employer back to the 60-year retired Carpenter) table and negotiate a fair contract.

and Howard's son, Richard

In discussing this issue with some of our Falk, with the Antioch members who work for the city of Antioch, Shop Employees' Association. Steward Rich Falk asked about what could be

done to support these striking members during their time of need.

Antioch Employees' Association President Larry Munn, Vice President Jim Tucker and Shop Steward Rich Falk went to their membership asking for support for the Valley Power strikers, and on Aug. 31, Falk presented a generous check to Chief Steward Adan Molina for the strike fund. An added bonus was that Rich's father, Howard Falk, a 60-year union member with the Carpenters accompanied his son and offered his support as well. After presentations, District 20 fired up the barbecue and cooked nearly 30 pounds of Kinders Tri-Tip that was also donated in support of our striking brothers and sisters.

This struggle continues. For those of you who read this (especially those in public employment), if you have the means, please lend your support to our striking brothers and sisters. Anything you can donate will be greatly appreciated. Donations to the Valley Power Strike Fund can be made at any branch office of the Operating Engineers Federal Credit Union (OEFCU).

Union welcomes new members from Pershing County

By Dan Venters, business representative

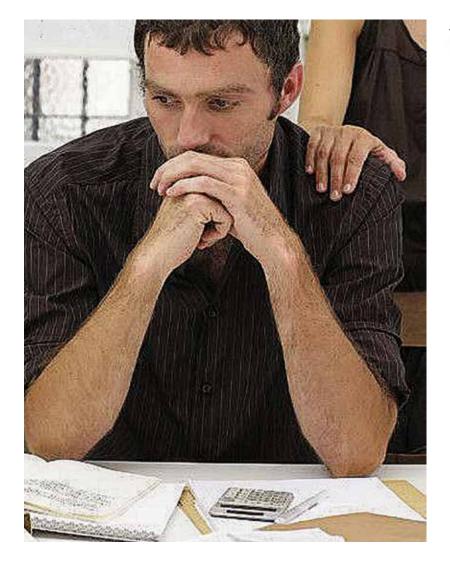

The Reno District 11 office welcomes our new brothers from Pershing County Law Enforcement Association (LEA) into Operating Engineers Local 3. Public Employee Director Don Dietrich and Business Rep. Dan Venters met with the association June 15, 2007 in Lovelock, Nev., and they agreed to become members of Operating Engineers.

Our new members were already in negotiations on a contract with Pershing County, and Local 3 joined them at the table on July 23. After several meetings without reaching an agreement, Local 3, Pershing County LEA and Pershing County decided on mediation. The mediator brought the parties together Sept. 14, and we were able to settle on a three-year contract with the following wage-package breakdown: 2 percent retro to July 1, 2007, 2 percent in October 2007 and 3 percent in April 2008, October 2008, April 2009, October 2009 and April 2010. With a satisfactory evaluation, employees will also receive a 21/2 percent step-increase on their anniversary each year.

In closing, the Reno staff wishes everyone a happy holidays, and hopefully Santa will bring everyone what they need and want this season.

Since joining Local 3 in June, members of the Pershing County Law Enforcement Association settled an agreement that includes wage increases through 2010.

You're Certainly Not Alone.

This home mortgage rate thing has turned some OE members lives upside down. Homes going into foreclosure, families living month to month , barely meeting their home mortgage payment. Seemed like a good idea at the time ...the low or no down payment, that "adjustable" rate ... nobody expected this.

To our union brothers and sisters we say" There IS light at the end of the tunnel ... and your Operating Engineers #3 Credit Union is holding the lamp!"

Right now, we know you've got your home loan with some other lender. The guestion is, are you keeping up with your current mortgage payment, and if not, would you be safer and better off with a refinanced "fixed" or long term mortgage that OEFCU may be able to offer, that keeps your monthly payments low AND starts building some home equity?

If you have guestions that need answers, we're a phone call away. We're your union credit union, founded over 30 year ago, for no other purpose than to help our union members and their families make a better life by providing financial assistance, when and where we can, when they need it. www.oefcu.org

We're available to you M-F 7am to 7pm, Sat 7am to 11am PST 877 516-8657

Member Jorge Barragan operates the batch plant for Cemex on the same jobsite as Vulcan Pleasanton.

From left: Members Mike Durke and Jeff Roy work on the late shift at the Vulcan Materials Plant in Pleasanton.

From left: District 60 Business Rep. Ed Ritchie, Ray Vargas, Rowdy McWilliams, Jerry Malcolm, Memo Vargas, Manager Russell Woods and Ron Teesdale. This crew is responsible for the entire mining, blasting, crushing and loading of rock at the Spring Valley Quarry.

Eighteen-year Loader Operator Abel Rodriguez went through the Apprentice Program and is pictured here at the Rinker Materials Plant in Cache Creek.

From the

Quarries keep members a

Story and photos by Heidi Mills, managing editor and Mandy Jessu

Yuba City - Carl J. Woods

At Carl J. Woods' Spring Valley Quarry in District 60, members' 10- to 11-person crew is responsible for the mining, sizing and distribution of what is called "true blue" or granite blue dyrite rock, ranging in size from ³/₄ base to 2 to 3 tons. During the busy season, Local 3 members are responsible for loading 40 trucks per day with rock generally used for levee protection. Onsite at the shot-rock quarry, clean piles of differently sized rock sit in waiting above the pit where the rock is mined. Stages of work include mining, blasting, hauling, crushing and loading.

According to Russell Woods, grandson of owner Carl J. Woods, "Nowadays, you need a fully skilled team for this kind of work – I keep them only if they can run three sticks," which is why the company recently signed the Master Agreement, ensuring he gets those skilled workers.

Sacramento – Rinker

The Rinker Materials/Cemex Plant in Cache Creek covers 1,800 acres and employs about 14 Local 3 members. The plant provides concrete mix and asphalt for roads, highways, foundation and fill dirt. The material is gathered from the pit by a clamshell dredge and then travels to the plant via miles of conveyor belt. From there, rock is screened, cleaned, crushed

From left: Mechanics Clint Wilborn, Curt Williams, Seth Love and Al Hughes work in the repair shop for Vulcan.

Night-shift Op Couchman, Do Peters and Jare

nd materials on the move

p, associate editor

or melted to form asphalt or mix for concrete bedding, backfill materials or pipe covering. The "mix" of asphalt or crusher-dust binder is formulated into an exact science and much of the plant is computer-operated from control towers. The plant is on schedule to load 1.4 million tons of material a year or 750 tons an hour.

Pleasanton – Vulcan Materials

The Vulcan Materials Pleasanton Plant in District 20 is one of the primary reasons Vulcan is considered the nation's leading producer of construction aggregates. As the hub of the company's Western Division, the 1,200-acre plant is divided into several distinctly different sections, the largest being the asphalt plant. Other sections include a batch plant, crusher, landfill-recycle, stockpile area and repair shop. Vulcan also shares space at the site with Cemex, which operates a batch plant near the main entrance. All of these sections combined keep nearly 30 Local 3 members employed on around-the-clock shifts, six days a week.

Products produced at the plant include asphalt, rock aggregate, base material, concrete aggregate, manufactured and natural sand and re-crushed concrete. These materials provide essential infrastructure materials used in nearly all forms of construction.

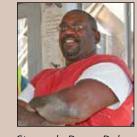

According to Plant Supervisor Bill Papka, the crew in Pleasanton works hard and keeps at it until the job is done.

Heavy Duty Repairman (HDR) and Welder Jesse Delatorre has been at the Rinker Plant for two years and is a nine-year member of Local 3.

From left: Hot Plant Engineer Bill Dougherty and Boxman/Oiler Tim Shipman keep everything at the asphalt-plant part of the Rinker facility running smoothly from the control tower.

Steward Dave Dokes oversees the rock plant at Rinker Materials Plant in Cache Creek.

Jim Dixon oversees the Cemex Redi-Mix portion of the Rinker Materials Plant.

At the Rinker Materials Plant in Cache Creek, member Mike D'Aurizio operates the clam-shell dredge with a 20-yard bucket. He makes 320 loads a day or 7,000 to 8,000 tons of clay variable on a normal day.

erators at Vulcan Pleasanton include, from left: Gilbert Montantes, Jimmy nnie Richardson, Charles McGuire, Shawn Geanui, Scott Duterte, Joe Luna, Ryan d Love.

Five-year member Ben Rasmussen works at the hot plant for Rinker and switches tasks between loading trucks and keeping the bins full. He is also a mechanic.

YUBA CITY | Good hands keep Granite going

Teichert is the low bidder on the Feather River Setback Levee Project with a bid of \$62.8 million – \$12 million less than the second-lowest bidder, DeSilva Gates.

The fall season brought rain to District 60 and Solid Waste Environmental Program (SWEP) regulations for opened ground, soils and water-runoff abatement. The rain also brought the seasonal winding down of work.

Desilva Gates is hard at it on the Teesdale Weir Project and should finish soon. The company's Plumas Arboga Interchange at Hwy. 70 keeps hands steadily working and should continue, weather permitting.

At Hwy. 149, Granite is wrapping up loose ends with paving and retuning for next year, and the same is true for the company on Hwy. 20 near Smartsville. About 100,000 pounds of explosives and more than 200,000 tons of material moved and good union hands keep Granite ahead of schedule on Hwy. 20 with a completion date of July 2008.

Cemex Patterson Sand and Gravel received its mining permit extensions Oct. 2 – giving the company an additional 326 acres to mine and securing 44 good union jobs. The Hwy. 70 Widening Project should be bidding soon and will need large amounts of product from the aggregate

producers in District 60.

Teichert, Granite, Baldwin, Kino SRI, Carl Woods and other producers in District 60 keep members working all year and expect only moderate slowdowns or short layoffs for this winter season.

Congratulations to 30-year member Al Lopez and quad raffle-winner Kevin Schmidt.

Al Lopez

Kevin Schmidt

FAIRFIELD | District supports Timm, Shamansky and Tilley

On Oct. 20, the Fairfield District held a precinct walk for City Council Candidate Chuck Timm and Fairfield-Suisun School Board candidates Pat Shamansky and Helen Tilley. The Voice of the Engineer (VOTE) team was

Front row, from left: Emile Milford Jr., Rafael Rodriguez, Andrew Burton, Yasmine Trujillo, Dispatcher Felicia Ramos and Fairfield City Council Candidate Chuck Timm. Back row, from left: John Hickory and Samuel Staton.

out in full force proving that mobilized members know how to get it done.

Rain has come early this year putting a slight damper on the earth-moving jobs. In American Canvon off Hannah Court, Heide & Williams is working when possible to complete the dirt work. The company is working big hours to try to beat the weather. J&M and Hudson Excavation

are finishing the underground work after Independent Construction completed all the dirt work off Columbus Parkway in Vallejo. Argonaut has the Veterans' Memorial Park on Broadway in American Canyon, which should continue well into next year.

We still have a lot of work at the Kiewit Waterman Water Treatment Plant

in Fairfield. Two brothers are onsite operating cranes: Greg Lee operates the 3900 Manitowoc, while Don Lee provides his skills operating a tower erane.

Down the street from the Fairfield District hall off Beck Avenue, DeSilva Gates recently broke ground on the Mission Solano project. Richard Young is onsite gradesetting and Arnulfo Regalado prepares the project for grading.

Shasta Constructors continues working on the bridge project off Cordelia Road with members Casey McCoy, Stan Green, and Chris Coughlin.

Tony Parkinson is operating a blade for Top Grade at the State Fund Project in Vacaville along with Matt Frost operating the roller. Sal Mendoza for Preston Pipeline is getting the underground laid out and done. Another signatory on the project is DeVincenzi with member Doug

Nott keeping the mechanical pours on schedule. With the winter season here, let's all remember to

give ourselves additional time for any adverse weather conditions. Give yourself ample time to let the windows defrost before hitting the highways, and always remember to tell the ones you love how much they mean to you.

John Brown.

ROHNERT PARK | It's all politics

Ghilotti Construction and MCM Construction keep many hands busy on the Hwy. 101 widening project through Santa Rosa. Funding for the project was made possible by the passage of Measure M in November 2004. This measure marked a major shift for transportation improvements in Sonoma County.

The next portions of the Hwy. 101 project will begin construction in spring 2009 and include the Wilfred Project (Rohnert Park Expressway to Santa Rosa Avenue) and Project No. 2 North (Steel Lane to Windsor River Road). Project No. 3 Central (Old Redwood Highway to Rohnert Park Expressway) and Project No. 4 (Sonoma/ Marin Narrows) could start in 2010. The total cost for the four projects is estimated at \$1.09billion.

How did we get more than a billion dollars worth of work? In May 2004, a sales tax measure for transportation improvements was placed on the November ballot. Once this expenditure plan, Measure M, was on the ballot, political work began in District 10. Volunteers placed signs throughout Sonoma County, made thousands of phone calls and spent hours passing out literature. On Election Day, their efforts paid off, as Measure M was approved by 67.2 percent of voters.

At the state level, the Rebuild California Bond measures were placed on the ballot in the general election of 2006, and again our district volunteers went to work rallying support for these important transportation bonds. Again, we prevailed in securing funding to put jobs in our district.

The point is that it's all politics. We must secure funding for our projects through the political process, and we have to elect laborfriendly politicians at every level of government who are sensitive to our issues and will work for our membership. To accomplish that, we all have to get involved. Next year will be an exceptionally busy political season, with many seats up for grabs at every level of government, and we need your help to elect our friends and unseat our opponents. Please get involved volunteer a little time.

We'd like to congratulate three pin recipients 60-year members James Johnson and Dean Hyder and 25-year member Joel Lanstra.

60-year member Dean Hyder.

25-year member Joel Lanstra.

From left: Treasurer Dan Reding, 60-year member James Johnson and Financial Secretary Jim Sullivan.

Brown on his years of Local 3 service.

SACRAMENTO | I-80 work to improve traffic flow in Sacramento/Placer County

Although the work picture in the Sacramento District is not as promising as in previous years, there is a lot of work for some members who form the "core" for companies in the district.

Some of the ongoing projects include the Courtland Sewer Project for \$12.7 million. This project includes two pumping stations and 53,000 feet of eight-inch pipe. Mountain Cascade is currently working on this project and will soon begin Phase I of the Freeport Pipeline.

Steve P. Rados is going strong with Phase II of the \$58.5 million Freeport Pipeline that includes 6.7 miles of 84-inch welded-steel pipe. Steve P. Rados is also working on the Northwest Interceptor Project in Citrus Heights with Anderson Drilling and Vadnais Drilling under Old Auburn Road.

There is a lot of work on Hwy. 99 and the vicinity, with Teichert at Florin Mall doing site improvements and starting work on the Promenade Mall Project at Grantline and Hwy. 99. In the same area, RGW has opened the new bridge over Hwy. 99 and is building the interchanges.

Rudolph and Sletten completed wall pours and slabs for the high rise at 500 Capitol Mall, and the steel is being put into place.

The east side of District 80 is active with Independent Construction and Diablo Grinding on several road rehabs in Davis. At U.C. Davis, Tidelands Construction is busy with a utility and roadway-improvement project.

In the Folsom area, Kiewit Pacific was awarded the \$50 million Spillway Project.

In the eastern portion of District 80, the work picture turned from great to bleak. With the exception of a couple of variance approvals, all dirt work in the Truckee area, including Northstar, is suspended. The monitoring allows earthwork between May 1 and Oct. 15.

More than 200 members working at Northstar have acquired 1,500 to 2,000 hours. Some have been working seven days a week, 10 to 12 hours a day, trying to wrap it up for the season. Union employers that will most likely return next season include Teichert Heavy and Highway, Syblon Reid, **Q&D**, Sierra Nevada Construction, Aspen Development, Par Electrical Contractors, Yubacon and Granite Construction - Reno.

Work on I-80 beginning at Riverside is part of a four-phase project. Granite Construction had the lion's share of Phase I. The work on I-80 East between Riverside and Miner's Ravine east of Hwy. 65 will continue through 2011 and probably 2012.

The work on I-80 consists of interchange improvements, ramp extensions and constructing High Occupancy Vehicle (HOV) and auxiliary lanes intended to improve the flow of traffic in Sacramento and Placer County. The project will cover 5.8 miles. Three of the four phases are funded.

To the north, the Lincoln Bypass on Hwy. 65 will be bid this coming spring with work beginning in 2008. This will be a 12-mile, four-lane freeway that will bypass the city of Lincoln from Industrial Boulevard north to Sheridan, Calif. The project should be completed by the end of 2013.

Congratulations to the following pin-recipient members: Johnny Tiner, Mac Tiner, Everett Beckwith, Ramon Sanchez, Tom Gomes, Wray Eggleston, Steve Fredricks, Bill Gibson and Patrick Quinn.

Tom Gomes

Patrick Ouinr

UTAH | Pipeline work at every angle in District 12

The work picture in Utah looks good this winter and spring with ongoing work and work to be bid in the next few months. Ongoing work in the private sector is still holding strong.

Ames Construction is putting in pipe on its Talisman and Victory Ranch projects and also has work in the Vernal area on a tar-sand project in the preliminary stages. The company is hoping to put a crew together around the first of the New Year to strip overburden to get to tar sands in Oregon.

MVC Construction picked up a project in Heber on a golf course building roads and doing underground.

JB Gordon also has work in the Heber area on the new Wasatch High School in addition to subdivision work.

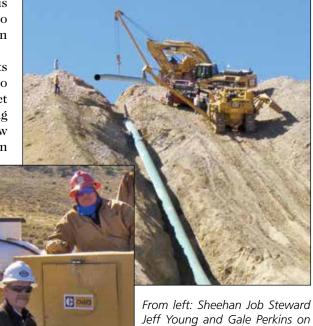

W.W. Clyde is working on subdivision work around Jordanelle Reservoir and will have pipe crews working through spring of next year. The company is also putting in a hydroelectric plant at the base of Jordanelle.

DC Transport also has pipe crews working on water lines around Jordanelle.

Delhur Industries is working on a dam project in LaPoint. The company has kept the crew going since August and hopes to finish this month.

PNK Constructors finished widening projects in the Vernal and Duchesne areas and has a job at Deer Creek Dam in the Heber area working on the next phase of the dam retrofit at the base.

It has been a stellar year for gas and petroleum pipelines. Sheehan Pipeline will be close to finishing up around the first of the year on a 126-

the 126-mile project from Jensen, Utah to Rock Springs, Wyo.

mile project from Jensen, Utah to Rock Springs, Wyo. This job covered steep terrain in Utah, and we take our hats off to the Local 3 members working all summer on this pipeline. Well done!

U.S. Prairie Pipeline keeps crews running on a 34-mile pipeline in the Morgan area. This equally challenging pipeline will continue work through next spring. Our members working this pipe have placed boring-machine drilling in some areas that are dangerously steep, so we're proud of the members working safely on this job.

In addition to these jobs, there is a petroleum

line from north Salt Lake City to Las Vegas scheduled to be bid this month. Pipeline work in Utah is booming. If you are interested in learning pipeline, there will be a class in Reno Jan. 7 through Feb. 15 of next year. Give us a call at the hall for more information at (801) 596-2677.

On this note, we'd like to remind you if you are a journey-level operator in need of upgrade training, please call and schedule some time at the training site at (801) 596-7785. We have two excellent trainers, Randy Thacker and Rick Bringhurst, and we encourage you to use them to your advantage.

Thanks to everyone who attended our recent district and special-called meetings. This union is all about the membership - you have a voice, and the more you are involved, the stronger our union will be.

Lastly, it's that time of year again when we spend time with our families and enjoy the holiday season. Everyone is happy and healthy, and we count our blessings.

It's important to remember those not so lucky, such as families with children in the Primary Children's Hospital and similar institutions. Therefore, we are hosting our Third Annual Operating Engineers Local 3 District 12 Holiday Toy Drive this year.

While you are out shopping this season, pick up an extra toy or two, and bring it to the hall at 1958 W.N. Temple in Salt Lake City or give it to a business representative. Your donated toys will be delivered to the Primary Children's Hospital in Salt Lake City in mid-December and will bring a smile to a child's face come Christmas morning.

Wray Eggleston Steve Fredricks

Bill Gibson

EUREKA | As weather worsens, think Crab Feed

Hello from the North Coast.

We hope everyone had a wonderful Thanksgiving, and we wish everyone happy holidays and a joyous new year.

The rains have begun, and work is slow, so it's time to think CRAB FEED. It will be here before you know it, so let's make plans soon. This year's Crab Feed is Saturday, Feb. 16 at the Eureka Elks Lodge, 445 Herrick Avenue. We will provide all the fresh Dungeness crab, salad, pasta and bread you can eat. We will also have chicken available for those who have shellfish issues. Also, back by popular demand is Dr. Squid. This band was so well received last year, we have tweaked the hours of the feed a bit to allow more dance time. Let's get "crabby" with it!

The work picture is looking good next year with the much anticipated PG&E Power Plant kicking off in April 2008. We will also have more bridge work in McKinleyville and Fortuna along with the St. Joseph Hospital job in Eureka.

Happy new year, and be safe.

Steve, Carol, Joel and Art

BURLINGAME | Apprentices get busy with VOTE in District 01

San Mateo County is still busy as winter approaches with Devil's Slide tunnel and bridges and a housing development in Pacifica.

About 16 Operating Engineers on the Devil's Slide project are working as mechanics, drillers,

From left: Business Manager Russ Burns, 50-year honoree Bill Henley, Pearl Henley and Vice President Carl Goff.

haul-truck operators and more. Drilling began in November and will really get going in a couple of months when Kiewit Pacific Co. starts up the second tunnel. Disney Construction is progressing nicely on two bridges that will connect the northbound and southbound tunnels back to Hwy. 1 at the north end of the project.

Menu:

Cost:

Feed

Special rates available at:

Another major project in District 01 is a housing development in the northern section of Pacifica. Stevens Creek Quarry is onsite with about 13 operators. This is one of the bigger dirt jobs in the county, due to a lack of open, developable land.

The \$17 million combination sewer/water storm job in Hunter's Point with Lennar Corp. and Ranger Pipelines is also keeping members busy.

Apprentices in District 01 are staying busy on the job and in the Voice of the Engineer (VOTE) program by precinct walking and phone banking for Gavin Newsom for San Francisco Mayor and Local 3 member Dave Wong for Sheriff. Participants included: Apprentices James Baumann and Tim Shea from Sheedy Crane; Jim Bertolini from Stevens Creek Quarry; Jared Christenen from Proven Management; Steven Escobedo from R&L Brosamer; Daniel Huls from Andreini Bros.; Richard Fischer, Matt Marsili and Nolan Smith from Interstate Grading and Paving; Victor Flores from Granite Excavation and Demolition; Heavy Duty Repair (HDR) Apprentice Brian Gavigan; and Crane Apprentice Desheng Bian. Many thanks to everyone who took part in these actions.

The San Francisco District staff would like to congratulate 50-year honoree Bill Henley and wish every member and their families a happy and safe holiday season.

MORGAN HILL | RGW keeps stiff safety standards

In the Morgan Hill District, we've all driven over Hwy. 152 to Los Banos. It can be a little nerve-wracking. There are some people on our roads who make driving over the pass a scary drive. If you live nearby or in Gilroy, you've

Twenty-eight-year member Casey Bargas sets grade on the Hwy. 152/Los Banos job in District 90.

probably seen and heard a lot of ambulances, fire trucks and helicopters go up that stretch of Hwy. 152 from Hwy. 156 to Hollister, but RGW is doing a great job fixing that problem. The crew and staff of RGW are working hard to complete the job in a timely manner, but most importantly, as dangerous as it is to work on a narrow highway, RGW is keeping the safety standards at a high level to make sure everybody working onsite goes home to their families every day.

Crewmembers onsite include Foreman and Blade Operator Carlos Barahona, Finish-Blade Operator Isaias Aguilar – a 26-year member – David Moreno on the fergy and Roller Operator John Larkin. Twenty-eight-year member Casey Bargas is one of the gradesetters onsite who makes sure everything fits.

Also onsite is Griffin. The company is working in tight quarters but getting it done and being safe at the same time.

Everyone and every company onsite deserve thanks, as the project will ensure that a lot of motorists can have a safe drive through the pass, and the project will save a lot of lives in the future.

Retiree honored

Filbert J. Munoz retired in 1994. In 1999, Granite Construction called Filbert to ask him if he would return to work for them, and he said "ves."

Filbert is a 50-year member working on a job that has 20 percent grades he walks up and down all day. When the Morgan Hill District gave Filbert his 50year watch, he said he loved the fact that Granite keeps calling him to come back to work each vear.

50-year member Filbert Munoz.

Filbert attended the first Local 3 Apprenticeship class in 1964.

The Morgan Hill District honors him this month for his years of service.

OAKLAND | District celebrates many births

District 20 is pleased to announce new additions to the Local 3 family: Second-step Heavy Duty Repair (HDR) Operator Kenneth Edgecombe Jr. and his wife, Nicole, welcomed Victoria Marie Edgecombe Sept. 6.

Second-step Construction Equipment Operator (CEO) Apprentice Keith Butler and his wife, Reva, welcomed Brandon William Butler Sept. 28.

First-step Apprentice Joseph Chiapero and his fiancee, Stephanie Haigtt, welcomed Dominic Elias Chiapero Sept. 29. All are doing well!

In other news: District 20 congratulates CEO Apprentice Michael Fuller II on completing the Apprenticeship Program and becoming a journey-level operator Oct. 15. Michael works for Mountain Cascade.

Work continues in the district with the new Hwy. 4 Bypass connecting Hwy. 4 to Vasco Road and the Trilogy Retirement Community in Brentwood.

Operator Sam McDonald works for Mountain Cascade on the Trilogy Retirement Community in Brentwood.

Gradechecker Eric Hermus works on the Hwy. 4 Bypass.

HAWAII | Big Island has big work

Members of Isemoto Contracting work on the new highway at Hokolia on the west side of the Big Island of Hawaii. They include, front row, from left: Loader Operator Gabriel Pelekane, Truck Operator Jason Leleiwi, Sheepfoot Operator Kenneth Kihei, Foreman Aaron Uemura, Lube Service Mechanic Tommy Gaspar, Truck Operator John Kalua'u, Hoptoe Operator John Sauer, Truck Operator Kapena Kaneshiro, Chief of Party Chad Alcos, Truck Operator Ashley Stone, Dozer Operator Bully Grace and Excavator Operator Hano Grace. Back row, from left: Excavator operators Newton Leslie and Russell Tam, Dozer Operator Kaleo Kihei, President Fred Herschbach, Business Manager Russ Burns, Truck Operator John Knolls, Gradesetter Sean Seril, Truck Operators Lonn Iona and Steven Iona and Big Island Business Rep. Bruce Brumaghim.

NEVADA | AAA baseball brings new stadium to Reno

With the winter season here, the work picture has slowed down. A few projects are still underway from earlier in the season, including **Road and Highway Builders** (RHB) on the Carson Bypass and Hwy. 50, **Sierra Nevada Construction** on the intersection improvements at Pyramid Highway and La Posada and **K. G. Walters** on the water treatment plant in Fernley.

Q&D Construction was recently awarded a project on Hwy. 50 at Spooner Summit. The Truckee Meadows Water Authority had four projects out to bid, and three were awarded to union contractors: **TW/RTC** Construction, **Cruz Excavating** and **Petersen Construction**. Sierra Nevada Construction was awarded the Galena Creek Park Complex and the 2007 Sewer Rehab Project for the city of Reno. At the time of this writing, the weather is cooler but nothing major has set in yet. Weather conditions will determine how well these projects flourish during the winter.

There is good news for the baseball fans in our community, as AAA baseball is coming to Reno with a new, \$50 million stadium as its home. The stadium will be constructed under a Project Labor Agreement (PLA) between the Board of County Commissioners and the Building and Construction Trades of Northern Nevada. It is the first PLA of its kind to be implemented in our part of the state.

We would like to congratulate member Lisa Schwebke on winning a 2007 Toyota Camry. She donates blood at the Unity Church of Reno, which takes part in the blood drive for United Blood Services of Northern Nevada.

During the drive, people could donate twice over a four-month period and be entered in the drawing for the car. Lisa said she received a call from United Blood Services stating she won a gallon of ice cream. Then they announced she won the car. She didn't expect to win, so it came as a very pleasant surprise. Once again, we congratulate her and thank her for her contribution to the community.

Member Lisa Schwebke recently won this 2007 Toyota.

As of this writing, Elko has had two snow storms since Labor Day, but the snow melts in a hurry. Private work continues in Elko and Wendover. **RHB** continues work on I-80 east of Wells.

The prevalent jobs in Northeastern Nevada are with contractors working at gold mines. Gold went up to about \$750 per ounce and seems to be staying there. This will keep the mining companies expanding or opening new properties, thereby creating new projects.

District 11 signed a shop agreement with

Partridge Equipment and Repair. The company is working in the Elko area doing heavy-duty equipment repairs for **Sterling Crane**. We welcome them onboard.

Congratulations to member **Glenn Jones** on receiving his 25-year pin. He operates a Caterpillar 14M motor grader for **RHB** on a Hwy. 50 job in Hazen. Glenn plans to retire mid-2008 and is proud to have been given the opportunity to operate this state-ofthe-art equipment. It took Glenn a short bit of time to get used to not having a steering wheel, but he got it "dialed in" and is doing a great job finishing with the 14M. Good luck to you, Glenn, and keep up the good work.

our Dec. 6 district meeting at 1290 Corporate Blvd. and our Elko monthly meeting on Dec. 12 at 1094 Lamoille Highway.

Last but not least, the District 11 Reno and Elko staff wishes all of you a safe and happy holiday season.

Tom Gallagher receives his 40year pin from Business Manager Russ Burns.

Glenn Jones receives

FRESNO | Apprentices get good hours in District 50

The contractors' pencils have been sharpened, and more projects have been awarded.

Teichert Construction was awarded projects in Merced County for intersection widening and concrete paving; Foster & Sons General Engineering has work on the federal asphalt-concrete overlays at various locations in Fresno County; the wastewater treatment plant expansion in Tulare will be constructed by W.M. Lyles Co.; and Floyd Johnston Construction has pipeline work in Clovis. The Hwy. 180 east project is scheduled to go to bid by next month – the start of a happy new year!

To help celebrate the holidays and to lift spirits, District 50 will host Breakfast With Santa, Saturday, Dec. 15 from 8 a.m. to 11 a.m. at the Fresno District office. Join us for pancakes, eggs, sausage and a whole lot of "Ho-ho-ho's!" This event will be in addition to our annual toy drive.

In the past, we donated new toys to places such as the Children's Hospital of Central California and the Craycroft Youth Center of Fresno. This year, our Fifth Annual Toy Drive will benefit the little ones of Local 3. Bins will be available at the district office for anyone who would like to give a new, unwrapped toy to help with our efforts.

Congratulations to the following apprentices for their efforts and advancements in their apprentice careers: Daniel Juarez, Ted Hernandez Jr., Michael Arredondo, Garrett Collins, Vance Eslick, Mike Phillips, David Verbera, "Buddy"

Lloyd Lawson, Shawn Lewis, Mark Rodriguez, Kyle Mittel and Richard Bentley.

In Solidarity, Unity and Brotherhood, we look forward to seeing everyone at the specialcalled meeting, Dec. 5, at the Clovis Veterans' Memorial Building.

"Buddy" Lloyd Lawson

Shawn Lewis

STOCKTON I Keyes ethanol plant in full swing

The Stockton District had a slow start this season; however, work has picked up. Several large projects are scheduled for release, including the more than \$80 million Joseph Gregie High School.

Teichert Construction is working on a stretch of the Golden State Highway Project in Turlock and is also widening a four-way intersection in

lening a four-way intersection in downtown Waterford. George Reed has large street removal and overlay projects in the Ripon, Stockton and San Louis areas.

The second phase of the Modesto Water Treatment Plant is finally underway with excavation work by **Rockin R** Grading.

The ethanol plant in Keyes is on schedule. Crane Operator A liquid processing tank is lifted at the Keyes ethanol plant in District 30. **Tyler Elliff** and Oiler **Cory Heyer** for **Precision Crane** use a 200-ton crane to make a 50,000-pound roof lift on one of the last fermenting tanks, while Crane Operator **Bruce Hargis** operates a Grove 900E to lift processing tanks onto their final mounts. **Maxim Crane** is also onsite and uses a 235 Lieberr with Crane Operator **Brandon Ballard** and Oiler **Luke Volonte** making large lifts of liquid processing tanks onto their platforms.

Honorary 40-year member **Roger McCarthy** recently received his service pins. Roger has worked for many contractors over the years, including **W.M. Lyles** on 262 miles of national defense cable, **H.C. Price** on the Sherman Island Project and **Hood Construction** on various jobs. Roger lives in the Stockton area and is enjoying his retirement.

On the political front

The presidential primaries are in full swing. If you are not registered to vote, you can call any district office and they will gladly mail you a registration form. Remember: Your voice can be heard loudest when you vote. The Operating Engineers Voice of the Engineer (VOTE) program is an important tool to help get the vote out. Get involved with your union.

REDDING | Fix-Five Project ahead: What can you do to help?

With winter upon us, District 70 would like to wish everyone a safe and happy holiday season and new year.

Even with the slow work picture in District 70, we have exceeded our number of dispatches from last year. The work was not as good as we hoped for, but we held our own. Hopefully the state will release more infrastructure bond money, and with the city work and county and federal-agency work, we will have a better work picture for next year.

Some of the positives from 2007 include helping **Tullis**, **Inc**. get its new rock source, which will employ a good number of brothers and sisters for the next 30 years. We also signed eight new companies, which will improve members' chances of finding work. When getting the rock source and other projects approved, we need to remember the people who helped us in our efforts when it comes time to vote. We also need to remember those who stood against us.

Two current issues we are working on include the wind farm on Hatchet Ridge in Burney and the Fix-Five Project. If approved, the wind farm will be worth about \$250 million. The Fix-Five issue entails adding one northbound lane and one southbound lane on I-5 from Corning to Mountain Gate. This will be done by putting a development fee on new housing within the interstate corridor. The current cost of this is about \$1,800 per new unit. If you look at other areas where they have waited for the state or federal government to do all the funding (acting reactively rather than proactively), the costs have skyrocketed. This project done

over time will be worth about \$600 million. You can follow this issue on the Fix-Five website at www.fixfive.org. This project will be done by votes in the local county boards and city councils. We will be

Tullis, Inc.

In closing, we would like to remind everyone to check their out-of-work registrations and re-register every 84 days. Again, happy holidays, and be safe.

DISTRICT REPORTS

2007 SEMI-ANNUAL BENEFIT DISBURSEMENTS

As a continuing commitment to membership education and fiscal transparency, Business Manager Russ Burns and the officers publish semi-annual benefit disbursements for the OE3 Health and Welfare Funds.

This administration has taken multiple steps to provide better Health and Welfare service to the members, including cutting vendor and internal costs, which translates directly into lower costs for you, and allocating fund investments to provide maximum returns. We closely monitor all aspects of your Health and Welfare Funds to ensure you get "the most bang for your buck."

The following chart covers disbursements from Jan. 1, 2007 through June 30, 2007.

Footnotes

Medical - Includes regular and Kaiser medical (including Kaiser Drug), Chemical Dependency, Hearing Aids, Physical Exams, Medicare Reimbursement. 2

Nevada Prescription Drugs - Provided through RxAmerica (ADP) but not included in Request for Proposal (RFP).

Hawaii Prescription Drugs - Provided through HMSA, except Kaiser participants whose prescription costs are included in the Kaiser premium 3

Utah Prescription Drugs - Provided through BlueCross/BlueShield of Utah. 4.

Other benefits include: Life Insurance, Burial Benefits, and for P'ed, No. Nevada, Hawaii, and Utah Weekly Disability, Vision Care,

OE Health & Welfare and Public Employees regular plan and Kaiser participants receive prescription drug benefits through RxAmerica (ADP). Pensioned 6

Health & Welfare participants who are in Kaiser and other HMOs receive prescription benefits from Kaiser or the other HMO.

Pensioned Health & Welfare Prescription Drug cost is the claims paid minus the Medicare subsidy of approximately \$5.3 million

Total prescription costs are less than stated in discussion because of the Medicare subsidy. Rebates and audit recoveries are not included here.

No. Nevada is on a fiscal year of 9-1/8-31, so the numbers above are for 9-1-2006 thru 2-28-2007.

Operating Engineers Local 3 Scholarship Contest Rules for 2008 Applications available at district offices, Credit Union branches and online at www.oe3.org

The Local 3 officers and Executive Board understand that the workplace is rapidly changing, and many jobs require skills that can be attained only with a good education. Local 3 is dedicated to giving our young people the opportunity to succeed by providing them with the chance to further their education and training. For this reason, Local 3 awards annual scholarships to sons, daughters, stepchildren and foster children of Local 3 members.

ACADEMIC SCHOLARSHIPS

Four college scholarships will be awarded to children of Local 3 members. Two scholarships of \$3,000 each will be awarded to the first place female and male applicants. Two scholarships of \$2,000 each will be awarded to the second place female and male applicants. These scholarships must be used for study at an accredited U.S. college or university.

Winners also receive an additional \$1,000 per year from the Scholarship Fund for the second, third and fourth years of college, provided they remain full-time students.

The academic scholarships will not impose restrictions of any kind on the course of study. Recipients may accept any other grants or awards, which do not rule out scholarship aid from other sources

WHO MAY APPLY

Children of Local 3 members may apply for an academic scholarship. One parent of the applicant must be a Local 3 member for at least one year immediately preceding the date of the application.

Children of deceased Local 3 members are eligible to apply for the scholarships. The parent of the applicant must have been a Local 3 member in good standing for at least one year immediately preceding the date of death.

The applicants must be senior high school students who have, or will be, graduated at the end of either: 1) the fall semester (beginning in 2007) or: 2) the spring semester (beginning in 2008), in public, private or parochial schools who are planning to attend a college or university anywhere in the U.S. during the academic year and who are able to meet the academic requirements for entrance in the university or college of their choice. Students selected for a scholarship must have achieved not less than a B cumulative

average in their high school work.

Applications will be accepted between Jan. 1, 2008 and March 31, 2008.

AWARDING ACADEMIC SCHOLARSHIPS

Upon receipt of the application and required forms, Local 3 will not exercise any choice among the various applicants or indicate in any way that one applicant should be favored over another. Based on factors normally used in awarding academic scholarships, the University Scholarship Selection Committee will submit recommendations for finalists to the Local 3 Executive Board. The list of potential winners and their qualifications will be reviewed and studied by the Executive Board and the scholarship winners selected.

Academic scholarship winners will be announced at Local 3's June Executive Board meeting. Checks will be deposited in the winning students' names at the college or university they plan to attend.

Applicants who are not selected for an academic scholarship will automatically be eligible for OE3 Merit Scholarships, which are awarded through a raffle drawing; therefore, only one application is required. Merit Scholarships will be awarded at Local 3's July Executive Board meeting. Applicants need not be present to win.

INSTRUCTIONS

All of the following items must be received by March 31, 2008:

- 1. The application and essay are to be filled out and returned by the applicant.
- The report on the applicant and transcript 2. is to be filled out by the high school principal or person he or she designates and returned directly to Local 3 by the official completing it.
- 3 One to three letters of recommendation giving information about the applicant's character and ability. These may be from teachers, community leaders, family friends or others who know the applicant. Please submit all letters of recommendation with the application.
- A recent photograph, preferably two inches 4. by three inches, with the applicant's name

written on the back. The photo should be clear enough to reproduce in the Engineers News.

The name, address and phone number of the applicant's local newspaper for the purpose of sending a press release on behalf of each winner.

OE3 MERIT SCHOLARSHIPS

In addition to the four academic scholarships, Local 3 will award 20 \$500 Merit Scholarships through a raffle drawing to be held at Local 3's July Executive Board meeting. Applicants need not be present to win.

OE3 Merit Scholarships are available only to the sons, daughters, stepchildren and foster children of Local 3 members. One parent of the applicant must be a Local 3 member for at least one year immediately preceding the date of the application.

Children of deceased Local 3 members are eligible to apply for the scholarships if the parent was a Local 3 member for at least one year immediately preceding the date of death.

Children of Local 3 members who plan to attend college or trade school are eligible to apply. They will not be judged on academic qualifications. All applicants who apply for the Local 3 academic scholarships and do not win will automatically qualify for this drawing. A second application is not necessary.

Applications will be accepted from Jan. 1, 2008 to March 31, 2008. Previous winners are not eligible to apply.

The money will be funded when the college or trade school confirms the winner is a full-time student.

WHERE TO GET APPLICATIONS

OE3 Academic and Merit Scholarship applications are available at the local's district offices, Credit Union branches and online at www.oe3.org. It is the applicant's responsibility to submit the application to the address below, which must be received no later than March 31, 2008:

> Robert L. Wise **Recording-Corresponding Secretary Operating Engineers Local Union No. 3** 1620 South Loop Road Alameda, CA 94502-7090

OFFICIAL ELECTION NOTICE: NOMINATION RULES FOR THE ELECTION OF DELEGATES AND ALTERNATE DELEGATES TO THE 37th IUOE CONVENTION

Recording-Corresponding Secretary Robert L. Wise, in compliance with the Local Union Bylaws, Article XII, Section 2(b), publishes the following notice:

NOTICE OF RIGHT TO NOMINATE:

Article XII, Elections, Section 2(i)

Eligibility of Members to Nominate: Every Member of the Parent Local Union and its Subdivisions (except the Registered Apprentice Sub-division and except for owner-operators of an entity that employs Operating Engineers), who is not suspended for non-payment of dues preceding the first nominating meeting shall have the right to nominate. (*Constitutional Amendment, 2003 Convention*)

NOMINATION FORMS:

Article XII, Elections, Section 2(e)

Nominations shall be in writing and signed by one or more nominators giving each nominator's Social Security Number and Register Number in the form following:

NOMINATION FORM MULTIPLE NOMINATORS

Nominations shall be in writing in the following form, and shall be delivered by the nominator to the Nomination Committee at the meeting on instructions of the Presiding Officer.

We hereby nominate _	Regis	ter No
Social Security No. XX	<u>X</u> - <u>XX</u> , for	
	(Insert De	legate or Alternate Delegate)
Signature	Social Security No. XXX-XX	Register No.

<u> ллл-лл</u>
XXX-XX

NUMBER OF NOMINATORS REQUIRED:

Article XII, Elections, Section 1(a) and Article XIII, International Convention Delegates, Section 1(a)

The minimum number of eligible nominators required for a Delegate or Alternate Delegate based on the Local Union Membership (excluding Registered Apprentices) on August 31, 2007, of 40,366 is forty (40).

INTERNATIONAL CONVENTION DELEGATES

Article XIII, International Convention Delegates, Section 1

Delegates and Alternate Delegates to the International Convention other than the President, Vice President, Recording-Corresponding Secretary, Financial Secretary, Treasurer, and Business Manager (who shall be Delegates by virtue of their election to Office) shall be nominated and elected in the same manner as provided in Article XII of these Bylaws, except that:

- (a) Eligibility shall be the same as that for a Constitutional Officer other than Business Manager.
- (b) Except as provided in (e) of this Section, the Election Committee shall be nominated and elected at the regular quarterly or special District and Sub-district Meetings in the months of September, October and November of the year next preceding the election.
- (c) Each Nominee shall have the right to list one of the following after his or her name on the ballot: his or her Office, or his or her Position, or his or her collective bargaining agreement classification.
- (d) Except as provided in (e) of this Section, nominations will be held in the month of December, and the election will be held in the month of February.
- (e) When the International Convention is to occur during the year next following an election of Officers under Article XII of these Bylaws, the nomination and election of Delegates and Alternates to such International Convention shall take place concurrently with the nomination and election of Officers.
- (f) Where there are no more candidates nominated for Delegates and Alternate Delegates than are authorized by the Local Union Executive Board, the secret ballot election shall be dispensed with and the Recording-Corresponding Secretary shall cast one (1) ballot for all the unopposed candidates for Delegates and Alternate Delegates, who shall then be declared duly elected.

RULES GOVERNING THE ELECTION OF DELEGATES AND ALTERNATE DELEGATES TO THE 37TH IUOE CONVENTION AS APPROVED BY THE LOCAL UNION EXECUTIVE BOARD ON AUGUST 19, 2007.

Rules governing the Election of Delegates and Alternate Delegates to the 37th International Union of Operating Engineers Convention as approved by the Local Union Executive Board on August 19, 2007.

In addition to the Business Manager, President, Vice President, Recording-Corresponding Secretary, Financial Secretary and Treasurer who are Delegates by virtue of Article XIII, Section 1 of the Operating Engineers Local Union No. 3 Bylaws, there shall be thirty-seven (37) Delegates and three (3) Alternate Delegates elected.

The names of the Candidates shall be arranged in descending order based on the total number of votes received by each of them. The Candidate receiving the highest number of votes shall

be at the top of the list, the Candidate receiving the least number of votes at the bottom of the list, and they shall be numbered in descending order, one (1) through the total number nominated and eligible for Delegate and Alternate Delegate.

In the event that two (2) or more Candidates receive the same number of votes, their names shall be arranged in descending order based on the length of membership in Operating Engineers Local Union No. 3. The tied Candidate who has been a member of Operating Engineers Local Union No. 3 for the longest period of time shall be listed above the tied Candidate who has been a member for a shorter period of time, and they shall then be numbered as in this Section provided, and the Candidate with the next highest number of votes shall receive the number next following the number assigned the tied Candidate who has been a member of Operating Engineers Local Union No. 3 for the shortest period of time.

The Candidates, numbered one (1) through thirty-seven (37) shall be declared elected as Delegates. The Candidates for Alternate Delegates, numbered one (1) through three (3) shall be declared elected as Alternate Delegates.

Each Alternate shall serve as necessary. The Alternate with the highest number first, and the Alternate with the lowest number last.

In the event the average number of members on which the Local Union has paid per capita tax for the year ending September 30, 2007, has increased sufficiently to entitle the Local Union to an additional Delegate, the Alternate with the highest number of votes shall be designated as Delegate, and likewise if the average membership has decreased to the point the Union is entitled to a lesser number of Delegates, the Delegate with the lowest number of votes would become first (1st) Alternate and the Delegate who had been third (3rd) Alternate would no longer be a Delegate.

ELECTION OF DELEGATES & ALTERNATE DELEGATES TO THE $37^{\rm th}$ IUOE CONVENTION

Keeping track of serving sizes

Many people think bigger is better. We are so used to value-sized portions – especially in restaurants – that it is easy to eat more than our bodies need. Eating smaller portions will help you cut down on calories and fat (and might save you money too). Here is a 1,600-calorie-perday sample menu adapted from the National Heart, Lung, and Blood Institute (NHLBI) that includes sensible portion sizes:

Breakfast

¹/₂ cup oatmeal
2 English muffins with 1 tablespoon low-fat cream cheese
1 cup low-fat milk
³/₄ cup orange juice

Lunch

2 ounces baked chicken (a little smaller than a deck of cards) without skin Lettuce, tomato and cucumber salad with 2 teaspoons oil and vinegar dressing ½ cup rice seasoned with ½ teaspoon margarine 1 small whole-wheat roll with 1 teaspoon margarine

Dinner

 $3 \ \text{ounces} \ \text{lean roast} \ \text{beef} \ (\text{about the size of a deck of cards}) \ \text{with} \ 1 \ \text{tablespoon beef gravy}$

- $^{1\!\!/_2}$ cup turnip greens seasoned with $^{1\!\!/_2}$ te aspoon margarine
- 1 small baked sweet pot ato with $\frac{1}{2}$ teaspoon margarine
- 1 slice cornbread
- 1/4 cup honeydew melon

Snack

2 ½ cups low-fat microwave popcorn with 1 ½ teaspoons margarine

Tip: Try keeping a food diary. Writing down what you eat, when you eat and how you feel when you eat can help you understand your eating habits. You may be able to find ways to make your eating habits healthier. You can also use your diary to plan weekly menus, make shopping lists and keep track of recipes you would like to try.

You don't have to give up fast food

"Habit is habit and not to be flung out the window by any man but to be coaxed downstairs one step at a time." - Mark Twain

It's everywhere – statistics claiming that Americans have more body fat now than any other population, and we all know it's due in large part to the amounts of fast food we – as a culture – consume. After all, fast food was invented here. Dr. Steven Aldana, a professor at Brigham Young University, states: "Fast food eaters consumer more dietary fat and saturated fat ... have more body fat, and they eat fewer vegetables." The typical Western diet is largely composed of red meat, French fries, refined flours, butter, processed meat, high-fat dairy products, few fruits and vegetables and sweets and desserts - all the kinds of foods associated with fast food. No wonder we're all so over-weight!

While this may seem like doom and gloom, (to add more bad news to the pile is the proven fact that excessive consumption of the above-mentioned foods contribute to chronic diseases and health-care costs), there are ways of *still* eating fast food and *not* eating unhealthily. You may just have to change your *habits* and your order, but as fast-food chains are sued due to health claims and the continual links between saturated fats and heart diseases, more fast-food restaurants are onboard the healthy plan, which means you can be too. The following restaurants are a few of the healthier options now making conscious efforts to eliminate trans fats from some or all of their foods:

- California Pizza Kitchen
- Chick-Fil-A
- Panera Bread
- Ruby Tuesday

Consider visiting them instead of their "fattier" competitors, and pay attention to fast-food labels, as many states, such as California, now require fast-food restaurants to label their foods.

Safety By Guy Prescott, director

Winter 2007 / 2008 Safety Training Schedule

To sign up for classes:

In CALIFORNIA, call your district office or the Rancho Murieta Training Center (RMTC). California classes start at 7:30 a.m.

In NEVADA, call the Training Center. Nevada classes start at 8 a.m.

In UTAH, call the district office. Utah classes start at 7:30 a.m.

The following class schedule is also posted online at www.oe3.org.

40-hour HAZWOPER

Alameda	Dec. 3-7
Utah	Jan. 21-25
Nevada	Feb. 25-29
RMTC	March 10-14

Eight-hour HAZWOPER Refresher

Nevada Training Center hosts Volvo Equipment

Demonstrating a unique partnership between an apprenticeship program and a national corporation, Local 3's Joint Apprenticeship Training Center in Wadsworth, Nev., hosted a two-week training program for Volvo Construction earlier this summer.

The training involved Volvo's western regional dealer and sales representatives, as well as the company's newest line of heavy equipment: a 210C excavator, an A35 articulated hauler and an L90F wheel loader. Demonstrator Operator Danny Jones said the hauler and loader are upgrades on previous Volvo models, but the excavator line is new to the company.

Throughout the week, Jones and representatives from Arnold Equipment, Mathews Machinery and Clyde West spent the first half of their days in the classroom reviewing the controls and functions of the new equipment, and in the afternoons, they took to the field for some hands-on training.

Jones said the training center's "sand box" and modern classrooms provided the ideal setting for the courses: "We have everything we need here."

According to Local 3 Administrator Greg Smith, Volvo's visit proved successful in more ways than one, since several Local 3 apprentices and journey-level operators had the opportunity to test out the new equipment while it was onsite. Smith called it a "win-win situation" for the company and the Apprenticeship Program: "Volvo had all the space and facilities they needed, and we got to test the latest and greatest in construction equipment ... we look forward to working with them again soon."

The 210C excavator is a part of Volvo's newest line of heavy equipment.
