What's going to happen to Medicare?

The Medicare Scare

Time is running out for an ailing Medicare system. How is it going to affect you?

IMPORTANT BYLAWS NOTICE

Please turn to pages 18-21 for important information and a sample ballot regarding the upcoming Bylaws mail referendum vote. Please read this material carefully. Your Officers encourage you to participate in this very important process.
DON'T FALL FOR THE SOCIAL SECURITY-MEDICARE CON GAME

Now that President Clinton's impeachment trial is over, Congress is very likely going to switch its attention to two issues extremely important to union members and their families—reforming Social Security and Medicare. Unfortunately, the debate is being tainted by one of the biggest con games ever imposed on the American people.

Wall Street and the insurance industry, backed by pro-business congressional representatives, are peddling plans to "save" Social Security and Medicare from bankruptcy through a system of private investment accounts. Under these proposals, American workers would be allowed to take portions of their Social Security and Medicare payroll taxes and invest the money in personal retirement and medical accounts of their choosing.

The concept sounds irresistible on the surface, but lurking below the initial euphoria is a con game that, if fallen for, could cause serious financial harm to millions of hard-working Americans and even our economy.

Wall Street and the insurance industry have been waging a very clever lobbying and public relations campaign based on an old marketing trick: Grossly exaggerate the potential threat of a large-scale crisis—-or create one that doesn't even exist—then sell your product or service as the solution to the overblown or phony crisis. This tactic reminds me, in some respects, of how contractors made a small fortune during the height of the Cold War in the late 1950s and early 1960s by exploiting the threat of nuclear war to sell underground bomb shelters to frightened Americans.

Wall Street and the insurance industry are using a similar ploy to dupe the American people into believing that Social Security and Medicare are about 81 percent in the dire financial shape as some would like you to believe. Government figures released in January show that Medicare spending has slowed significantly, from an average of 10 percent annually over the past decade to less than 3 percent last year, the first time ever that Medicare has grown more slowly than the federal budget. As a result of Medicare spending curbs, the trust fund will remain on solid footing for about 10 more years, at which time some reforms will be required to keep the program strong for the next generation of retirees.

HOW THE CON GAME WORKS

So why do we keep hearing so much about the inevitable demise of Social Security? Because Wall Street and the insurance industry, armed with studies from pro-business think tanks like the Gato Institute, have been poisoning the mass media with grossly inaccurate projections of Social Security's ultimate insolvency.

Those studies are based on the assumption that the economy will grow an average of 1.5 percent a year after inflation for the next 75 years. That's a ridiculously low figure when you consider that 1.5 percent is only half the annual rate the economy has actually grown for the past 75 years. Even during the Great Depression the economy grew more than 1.5 percent annually. If the economy grows at a mere 2.2 percent, Social Security remains solvent indefinitely, at 2.5 percent—is still slower than the 7.5-percent average—-the program runs a surplus.

So why is there all this doom-and-gloom prognostication about the system's imminent collapse? Wall Street and the insurance industry have deliberately created a false sense of crisis to baffle the American people into replacing the existing systems with costly private investment accounts.

You can hardly blame them for trying. Wall Street and the insurance industry stand to get rich real quick by privatizing Social Security and Medicare. It's estimated that in the first 12 years of privatizing Social Security, Wall Street investment houses, independent stock brokers and insurance companies would reap around $240 billion in fees and commissions from maintaining private accounts for about 148 million Americans.

(continued on page 3)
WORKERS LOSE WITH PRIVATIZATION

This enormous get-rich-quick scheme would come at a terrible cost to workers and their families. Every privatization proposal for Social Security calls for some combination of raising the retirement age (to as high as age 70 or 72), drastically reducing benefits (some plans by as much as 48 percent), and slashing or eliminating cost-of-living adjustments. One plan would reduce the maximum guaranteed benefit to just $410 a month.

Studies show that privatizing Medicare, in which workers would be allowed to put some or all of their Medicare payroll taxes into private medical accounts, would raise the eligibility age to 67, lead to higher premiums and more out-of-pocket expenses for retirees. One of the biggest proponents of private medical accounts is the man who helped bankroll the Anti-Worker Initiative Prop. 226 campaign, J. Patrick Rooney, whose insurance company, Golden Rule, stands to earn hefty fees and commissions from privatizing Medicare.

ROLLING THE STOCK MARKET DICE

Social Security, like your Local 3 pension, guarantees a certain level of monthly retirement payments for life. Privatizing Social Security and Medicare would replace guaranteed benefits with those dependent on the ups and downs of the stock market. During last summer's stock market crash, in which the market lost as much as 10 percent of its value in one quarter, Social Security remained totally unaffected. Change the system to private accounts and you better hope you don't retire when the stock market is down.

One of the most ardent supporters of the stock market, James J. Cramer, a prominent New York-based money manager, wrote in a Feb. 1 Washington Post editorial: "I can't think of a dumber idea than the government putting any of our Social Security funds into equities."

RUINING OUR ECONOMY

He correctly pointed out that if we take the privatization plunge we could end up like Japan, which has been mired in more than a decade of recession largely because the country's stock market received too much support from the government. When Japan's artificially inflated stock market began its dramatic fall beginning in the early 1990s, many Japanese found themselves in deep financial trouble. We don't want Japan's problems to become ours.

The need to privatize Social Security and Medicare is based on false assumptions and false logic. "Saving" Social Security and Medicare assumes something needs to be rescued. The truth is Social Security will remain sound for decades to come, while Medicare could be fixed with some prudent fine-tuning, privatization not being one of the solutions.

If there are no swimmers in danger of drowning, why do we need a lifeguard? Why should we let a small group of stock brokers and insurance salespeople get rich at the expense of millions of American retirees.

As the Social Security and Medicare debates heat up, I encourage you to write to your congressional representatives and let them know how you feel about reforming Social Security and Medicare.

DIR aborts attempt to slash prevailing wages

Gov. Gray Davis continues to keep his campaign promises to labor. His appointees at the Department of Industrial Relations (DIR) will cease the Wilson Administration's attempt to change the method of determining prevailing wages for public works jobs.

The DIR has notified the state's Third District Court of Appeals that all legal efforts pertaining to the State Building and Construction Trades Council's March 1997 lawsuit will be discontinued. The Building Trades Council, along with the Teamsters and several contractors associations, filed the suit to foil Wilson's plan of instituting a weighted-average method to determine prevailing wages—a plan that would have slashed wages by up to 20 percent.

During his campaign, Davis promised to restore the established modal rate when elected. A Senate bill has already been introduced that will make the modal method a state law. SB 16 is scheduled for a hearing in the Senate Industrial Relations Committee on Feb. 24.

By bowing out of the lawsuit, Davis has put another nail into the anti-prevailing wage coffin.
THE MEDICARE SCARE
Time is running out for an ailing Medicare system. How is it going to affect you?

by Jennifer Gallagher
Associate Editor

As the bulk of our nation’s population grows older, the future of its second-largest social program is in doubt. Medicare, created in 1965 as a way to provide health care to aging Americans, is running out of money. And, like Social Security, elected officials from both sides of the political fence are scrambling to find a way to fix it before it’s too late.

Unfortunately, there is no easy answer to the Medicare problem. Neither Democrats nor Republicans want to risk alienating legions of voters by cutting benefits or raising taxes. The White House has offered its own suggestion: using 15 percent of the anticipated budget surplus to bolster the program’s dwindling finances. Although that would provide temporary relief, it only prolongs the inevitable - that the Medicare trust fund could run out of money unless the current system is revamped.

The majority of Local 3’s retirees are covered under the Pensioned Health and Welfare Trust Fund, so the Medicare crisis is not as urgent as for other retired Americans. If there was a reduction in Medicare benefits, the union’s trust fund would adapt to accommodate retired members affected by the change. But for the millions of older Americans not covered by such a plan, changing the Medicare system could be detrimental to the health of their wallets.

Medicare commission
To address the Medicare problem, Congress and the White House created a 17-member bipartisan commission that first met in March of 1998. Charged with the daunting task of finding a solution, the panel has held hearings where various interested groups have offered suggestions on how to preserve the system that 38 million elderly and disabled people currently rely on.

The commission is approaching the March 1 deadline when it must present its findings to Congress and the president. Sen. John Breaux (D-La.), one of the commission’s co-chairs, released a draft of his recommendations on Jan. 22. The document also outlines what the commission sees to be the major flaws in the current system:

- Insolvency - This is the most talked about Medicare issue. As an entire generation approaches retirement, the number of beneficiaries will double from the current 38 million to 77 million Americans. Medicare’s Hospital Insurance (HI) trust fund is expected to run out in 2008 unless changes are made to the system.

- Inadequacy - Since prescription drugs are excluded from Medicare, benefits cover only about half of the health care costs of the plan’s beneficiaries. As medical costs soar, this means higher out-of-pocket costs for a group with limited income. The program also doesn’t compare to health care programs available to working people and their families, as the quality and range of services offered are limited by outdated policies.

- Inefficiency - The government’s payment system is inefficient, often delaying payments to providers. This affects the quality and timeliness of services given to the plan’s beneficiaries.

- Inequity - Benefits may vary depending on where a Medicare recipient lives. For example, in California, Medicare will cover a beneficiary’s dental and prescription benefits if that person belongs to an HMO. But in Nebraska, that option is not available. Any change to the system will
Choose your own plan

Breaux's proposal suggests that a redesign of the entire Medicare system is required to address the issues and make the plan more economical and user-friendly. And although some of the proposed ideas seem logical, his main idea of essentially privatizing the Medicare system seems to benefit insurance companies more than the individual.

His recommendations include combining current government protections with private insurance plans, modeled after the existing Federal Employees Health Benefits Program (FEHBP). The government would essentially pay the majority of the premium to an insurance company, with the individual providing for the difference.

Medicare recipients would be able to choose health plans from insurance companies that bid for the right to offer services, but would also be able to choose the original Medicare fee-for-service plan. A Medicare board would oversee both options, and would negotiate the premiums with the insurance companies. But privatizing health care coverage would remove much of government's control over a much-needed social program.

On the positive side, Breaux's plan would provide guaranteed financial assistance for low-income Medicare recipients and would require that high-income beneficiaries pay a higher percentage of their premiums.

Medicare changes affect everyone

This is not an issue that can be solved overnight. Breaux's plan is a blueprint of what the commission may ultimately recommend, but there is much discord among panel members as to the best way to move forward. Whatever plan is presented to Congress on March 1 will only be the beginning, as it will take years to implement any dramatic changes to such an expansive program.

Even though changes to Medicare won't affect them as much as other groups, union members still need to be aware of the problem. Medicare's future could involve more out-of-pocket expenses than current beneficiaries incur and the age at which people are able to receive coverage may increase from 65 to 67. For many people, this will leave a larger gap between retirement age and Medicare eligibility - a problem even for those union members that retire early but don't have pensioned health and welfare coverage.

If the system is allowed to go bankrupt, entire communities could be affected, not just those individuals covered by Medicare. Inner-city hospitals often rely on Medicare payments just to stay in operation. If funds run out or even run low, many hospitals will be forced to close, affecting not only the elderly and disabled, but everyone who lives in the area.

Medicare is not just a problem for aging Americans - it's a problem for all Americans.

The Facts About Medicare

FACT #1
Medicare Goes Broke in 2008

The Balanced Budget Act of 1997 (which also created the Medicare Commission) ensures solvency of the Medicare Part A trust fund for the next 10 years. But, without reform, the trust fund goes bankrupt in the year 2008.

FACT #2
Medicare Spending Affects Other Programs

Annual Medicare expenditures will climb from $207 billion, last year, to between $2.2 and $3 trillion by the year 2030. As a result, Medicare spending will become a much larger part of the federal budget, potentially affecting the funding of other important programs such as national defense, justice, health and safety and environmental protection.

FACT #3
Beneficiaries' Out-of-Pocket Costs to Rise

As the Medicare system itself faces financial troubles, Medicare beneficiaries also face higher costs. Today, beneficiaries pay nearly 30 percent of their health care costs from their own pockets. In 1995, those costs averaged $2,503 per person to pay for premiums, services and products not covered by Medicare. In the future, out-of-pocket costs are expected to rise.

FACT #4
77 Million Baby Boomers to Enter Medicare

Medicare must be strengthened and improved to handle the increased demand of 77 million "Baby Boomers" (people born between 1946 and 1964) who will begin entering Medicare in the year 2011.

FACT #5
Fewer Workers Per Retiree to Fund Medicare

As the number of new Medicare beneficiaries rises sharply, there will be significantly fewer workers per retiree to fund Medicare.
PREPARING FOR THE NEW MILLENNIUM

Local 3 bylaws changes aim to strengthen collective bargaining, ensure long-term financial stability and keep the union on the cutting edge of technology for the 21st century.

Staying on the cutting edge of technology is a challenge just about every worker and organization in this country struggle to meet in today's high-tech oriented work world. Employees have to regularly attend seminars and classes - or even go back to college - just to keep pace with the lightning-quick speed with which technology is advancing. Companies, large and small, have to invest substantial sums in new technology just to stay competitive.

Labor unions are no exception. To improve service, expand membership, and maintain a strong presence in the political arena, unions also have to invest substantial resources in new computers, communications systems and other high-tech equipment.

Local 3 has always done a fairly good job of using the latest computer technology to keep its business functions operating smoothly and efficiently. But the union wants to take the process of improving its computer operations and other functions a step further. In addition to being able to continually upgrade its technology, Local 3 also wants to improve overall efficiency, provide better member service, ensure its long-term financial stability, and respond more quickly to political and economic opportunities.

In order to attain these ambitious objectives, Local 3 has to first change the union's bylaws. With the exception of the sections dealing with dues and initiation fees, the Local 3 bylaws haven't been updated or revised since they were first written 38 years ago. Many of the current bylaws provisions have become obsolete and are now in need of revision.

Business Manager Don Doser and the other officers, in consultation with the rank-and-file Bylaws Committee, decided last year to overhaul the bylaws in two stages. During a round of special-called and district meetings last July and August, the members approved by close to a 90-percent margin changes to Articles V and VI, the two sections of the bylaws dealing primarily with dues and initiation fees. The second phase, amending the remaining sections of the bylaws, will be carried out in a mail referendum beginning in late April.

Engineers News began a series of articles last month explaining the proposed changes. The February article provided a broad overview of the changes. This month's article will focus on explaining the changes to the bylaws that will help the union stay on the cutting edge of technology, ensure its long-term financial stability and enhance its collective bargaining.

The original union bylaws written in 1961 established six Special Funds, which were designed to meet specific financial needs or provide a service to the members. The six Special Funds currently in existence today are the Defense Fund, Hardship Strike and Lockout Fund, Good Standing Fund, Death Benefit Fund, Local Building Fund, and the General Welfare Fund.

The Special Funds have served their purpose well over the years, helping the union and its members through many difficult times and situations. However, some funds have become obsolete or redundant and, therefore, costly to administer, while others need to be established to allow the union to modernize.

Below is a summary of the proposed changes to the Special Funds and how the changes will benefit the union:

- **The Defense Fund** - Remains the same.
- **Hardship Strike and Lockout Fund** - Allocation of dues will be slightly increased in order to build more reserves in the fund. This will give the union a more effective bargaining tool in negotiations with employers.
- **The Good Standing Fund** - Renamed the Good Standing Procedures, and all benefits will be administered out of the General Fund. In order to avoid abuse and overuse of the fund, no member will be able to draw more than 2500 for eligible members. Remaining in good standing, where dues are paid within 30 days of their due date, will ensure eligibility.
- **The Building Fund** - Renamed the Capital Maintenance and Technology Improvement Fund. Because the union's buildings and real estate are now owned and administered by the Local 3 Building Holding Association, the old Building Fund is no longer needed. The new Capital Maintenance and Technology Improvement Fund will go a step further in providing Local 3 with the financial resources to enhance the technological capacity of the union.
- **The General Welfare Fund** - Renamed the Emergency Welfare Fund. Money from the Emergency Welfare Fund will be used in emergencies and in cases when the union or its membership suffers severe financial hardship. The fund will continue to ensure the long-term financial stability of the union.

Published on page 20 of this month's Engineers News are voting instructions and a sample ballot regarding the upcoming mail referendum to amend the union bylaws. Local 3 members will receive the same information by mail in late April. Members will be asked to read and evaluate the resolution and vote whether to approve the changes.

Doser, the other officers and the rank-and-file Bylaws Committee have worked many long hours drafting the bylaws revisions. They believe a "Yes" vote on the resolution will make it easier for Local 3 to conduct union business, streamline administrative functions, improve benefits, give members more work opportunities, and provide for the union's long-term financial security.
NEW ORGANIZER IN HAWAII

I would like to take this opportunity to introduce myself. I am the new organizer in Hawaii. My name is Clyde K. M. Eli Sr., and I am very honored to be a part of Local 3.

My family was one of the first settlers to move here back in the 1930s. My father is Daniel A. M. Eli, who retired from Technical Field Data as a licensed land surveyor. My mother is Audrey M. Eli, who works in the personnel office at Daie store.

I was born in Honolulu on June 4, 1966. I attended elementary school at Our Lady of Good Counsel before moving on to Nanakuli High and Intermediate. I met my wife, Stacy, in December 1984, and we got married on August 17, 1986. This year we will celebrate our 14th anniversary. Stacy works at Waianae Inter. School as a part-time teacher. We have three children: Stacelynn, 14, Clyde K. M. Jr., 13, and Cory K. M., 7.

My family and I reside in Nanakuli on Hawaiian homestead land, where I have learned to live a simple life as my grandparents did in Kalapana on the Big Island. We raised pigs (and still do), cleaned yard and learned how to kalua pig (cook in underground oven), which I still do today.

I have held every odd job you can think of, from bagging groceries at Daie store to chasing cows at Mountain View Dairy. I started working at age 14 every summer with my dad as a chain man in surveying. From there, I worked for Mountain View for five years, went on to being a laborer for Kiewit Pacific, then worked my way into being an operator foreman for Kiewit for two years.

I went on to being a heavy equipment operator for Kiewit for eight more years. I also own a public address sound system that I ran as a side business. I set sound systems up for Hawaiian Entertainment or any other entertainment from Dennis Pavao to Natural Vibrations. At first, it started off as a side business then turned into a hobby.

As you can see, I am very proud of my family. I credit my mother and father for pushing me to do things on my own, knowing what is right and wrong, and instilling the true values of life and my culture. I hope I can pass that on to my children.

- Clyde K. M. Eli Sr.

TRENCHLESS HAWAII JOINS LOCAL 3 FAMILY

Six months ago I read an article in the Hawaii Business News about trenchless machines and the different companies that use this type of equipment in Hawaii.

One of the companies of interest to me was Trenchless Hawaii, a subsidiary of Alaska Boring and Drilling. I called Trenchless Hawaii and spoke to the owner, Jay Frawne, to set up an appointment. My purpose in talking with Frawne was to sign his company to a Local 3 agreement so he could hire skilled operators.

I'm pleased to announce that we were successful in signing Trenchless Hawaii on Jan. 29. Welcome Trenchless Hawaii to the House of Labor.

- Kalani Mahoe

NEW ORGANIZING INCENTIVE PROGRAM

Local 3 continues this month with its newly established Organizing Incentive Program, which is designed to help the union enhance its ambitious organizing program. Union members who help the union organize may be eligible to win prizes, such as organizing T-shirts and union dues credits.

Here’s how the incentive program works:

• You must be a Local 3 member, but not on the union’s payroll.

• You must initiate an organizing drive by either calling Local 3’s toll-free organizing hotline at 1-800-ORG-NIZE, or through personal contact with an agent or organizer. You must be “logged in.”

• If your contact results in enough signed authorization cards to file a National Labor Relations Board election petition, you get a special black “ORGANIZING” T-shirt.

• If your contact results in an election win and a signed contract, you get one week’s dues credit for each new Local 3 member of that bargaining unit.

• T-shirts and dues credits will be presented at quarterly district meetings.

Organizing Outreach ’99 Schedule

Mar. 5 Oakland 8 a.m.
Mar. 10 Utah 8 a.m.
Mar. 31 Santa Rosa 8 a.m.

Note: Information about class location will be provided when you sign up at your district office.

ORGANIZING OUTREACH ’99 CONCLUDES THIS MONTH

Local 3’s Organizing Outreach ’99 is winding down, with a few more classes remaining in March. The outreach program, in which members take a “hour-trip” training class to develop special organizing skills, has been a huge success. Classes focus on how to talk to non-union workers about the advantages of being union, then how to call Local 3 at 1-877-ORG-NIZE so the union can follow up.

It’s not too late to sign up at your district office for the remaining classes. Information about the location of the classes will be provided at the time of sign up. Classes can also be arranged for evenings and weekends. We must keep our union the biggest and the best. With your help, we will accomplish this goal.

UTAH DISTRICT LAUNCHES ‘SERVICE TO ORGANIZING’ PROGRAM

New plan expected to enhance organizing and improve membership service

The Utah District ushered in the New Year with two important staff changes. First, longtime Business Rep. George Stavros was promoted to district representative following the retirement of Kay Leishman. Second, organizer Reid Davis, who spent most of 1998 as an organizer in the Bay Area, has been reassigned to the Utah District as a full-time organizer.

Utah, a right-to-work state, presents numerous challenges for the Salt Lake City office. Among the district’s priorities is to establish a “service to organize” program, which will allow for improved internal organizing in Local 3’s bargaining units in Utah using a team approach.

A recent Local 3 study indicates that roughly 37 percent of employees working in Utah bargaining units are non-members. “Service to organize” is expected to substantially improve those numbers by incorporating and balancing training, organizing, politics and service into a comprehensive model of union representation.

Emphasis will be placed on improving contracts and grievance handling, increasing memberships and voter registration; and getting members more involved in politics. All areas will include upgrading training for Local 3 staff, job stewards and members.

By raising the level of service to the highest degree possible, organizing opportunities, both internally and externally, will be created. The service concept is rank-and-file oriented and designed to build a union that our members can take pride in.
Spring ahead with funds for your special projects

With spring - and longer workdays - just around the corner, now is a good time to consider a home equity line of credit from the credit union. During the upcoming busy season you will probably be looking for ways to save time. The home equity line of credit fits the bill - you apply once, then upon approval may draw on the funds for up to 10 years. That way, rather than spending your time on financial paperwork, you are free to focus on your kitchen remodeling project, room addition, or backyard pool. And of course you are not restricted to using the funds for home improvement.

Equity is the difference between what you owe on your home loan and your home's market value. The credit union has home equity loans of up to 100 percent of the equity you have in your home. Lines of credit up to $100,000 are available with no points, origination fee, or annual fee required. The credit union will also pay the first $400 of closing costs. To learn more, request a "Home Equity Line of Credit" brochure from any branch, or call 1-800-877-4444.

Meet your home ownership goals affordably

Purchasing a new home can be challenging, but the credit union's real estate staff uses its experience to make home buying transactions less stressful for members. Local 3 member Bruce Manning appreciated the help he received from the credit union during a recent home purchase. "We were very pleased with the service the credit union staff gave us," Bruce said. "They assisted us with getting things done on time and kept us up to date." He added that the rates offered by the credit union were "as low as I could find in the area."

The credit union offers competitive fixed and adjustable rate loans with a variety of terms to match a range of home buying needs. No-point loans are available. The credit union's newest real estate brochure answers common questions about financing or refinancing your home with the credit union. You may request a copy at any branch or by calling 1-800-877-4444.

Take advantage of your credit union benefit

Over the course of your life as a financial consumer, banking with the credit union instead of with a bank could save you hundreds, even thousands, of dollars. Consider for example what you pay for the "privilege" of checking with a bank. How much do you pay each month? Must you keep a very high balance in your checking account to avoid fees? The credit union offers the convenience of big bank checking without the big fees. Request a checking account brochure from any branch to learn more. If you are not yet a credit union member, you may also request a membership application from any branch or by calling 1-800-877-4444. Or e-mail the credit union from its Web site, www.oefcu.org.

Surveyors look to have busy year

by ANDY MULLEN
directory, technical engineers division

It looks like 1999 will be another banner year, with many firms looking for qualified surveyors.

New contracts for the Fresno area were negotiated, ratified and signed. With the implementation of supplemental dues, the members can enjoy a reduction in window dues. Many thanks to our members for understanding that the supplemental dues will benefit all Local 3 members.

Kiewit has some new projects in the works. The field office in Paso Robles has begun work on the company's fiber optic project, and some surveyors have already been put to work. The company has also started on Cal Train's 40-mile track upgrade on the Peninsula.

Complements to the personnel at the San Jose Water Company, both rank-and-file and management, for their attendance and attention at the negotiation and ratification meetings.

The Tech Engineers Division is proud to announce that Director Andy Mullen was selected to attend the Harvard Trade Union Program in Cambridge, Mass.

WHERE PHILO BLAKE KILLED THE BEAR...

...and surveyors are trained in reading legal property descriptions, even those that are old and seemingly outdated. I recently came across the following legal description of land on file in a certain Connecticut county seat for a parcel of land conveyed in 1812. This humorous piece should reassure our surveying apprentices that land descriptions have always been a little hard to read.

"One hundred and forty-seven acres, 3 rods and 19 rods after deducting whatever swamp, water, rock and road areas there may be included there in and all other lands of little or no value, the same being part of said deceased's 1,280 acre colony grant, and the portion hereby set off being known as near to and on the other side of Black Oak Ridge bounded and described more in particular as follows, to wit:

Commencing at a heap of stone about a stone's throw from a certain small clump of alders, near a brook running down off from a rather high part of said ridge, thence by a straight line to a certain marked white birch tree about two or three times as far as from a jog in the fence going around a ledge nearby, thence by another straight line in a different direction around said ledge and the Great Swamp so called, thence in line of said lot in part and in part by another piece of fence which joins onto said line, and by an extension of the general run of said fence to a heap of stone near a surface rock, thence as aforesaid to the hem, so called, and passing around the same as aforesaid, as far as the Great Bend, so called, and from thence to a squarish sort of a jog in another fence, and so on to a marked black oak tree with stones piled around it, thence by another straight line in about a contrary direction and somewhere about parallel with the line around the ledge and the Great Swamp, to a stake and stone bounds not far off from the old Indian Trail, thence by another straight line on a course diagonally parallel or nearly so with Fox Hollow run, so called, to a certain marked old cedar tree out on a sandy sort of plain, thence by another straight line in a different direction to a certain marked yellow oak tree on the off side of a knoll with a flat stone laid against it, thence after turning around in another direction and by a sloping straight line to a certain heap of stone which is by pacing just eighteen rods and about 1/2 rod more from the stump of the big hemlock tree where Philo Blake killed the bear, whence to the corner begun at by two straight lines of about equal length which are to be run in by some skilled and competent surveyor so as to include the area and acreage as hereinbefore set forth."

by George Whitmore
First Aid and adult CPR review

Local 3 recently held a special first aid and CPR class for Gordon N. Ball Inc. at the union's Alameda headquarters. The class, which lasted about eight hours, met the requirements of the American Red Cross. This class was geared toward CPR for adults, but the Red Cross also offers classes directed toward CPR for children and infants.

A large number of us have had CPR and first aid at some time, but as the years pass we forget a great deal of what we were taught. This article contains a short review of the currently recommended procedures as recommended by the American Red Cross.

The most important thing that you can do during an emergency is to call 911. Do not hang up until the person on the other end tells you it is okay to hang up. Be sure to include the following information in your 911 call: phone number, address, your name, number of victims, condition of the victims, what happened, and what help is being given. Always call 911 if the victim is unconscious, bleeding severely, has chest pain or pressure, has trouble breathing or is breathing in a strange way.

How do you know if a person is conscious? Ask them a question. If they can respond, they are conscious, have a pulse and are breathing.

The American Red Cross advises using the "3 Cs" of Check, Call and Care.

1. Check the scene and the victim. Do not put yourself in danger. 75 percent of all victims in a confined space are rescuers.
2. Call 911 or your local emergency number.
3. Care for the victim.

The care that you give to a victim depends upon the conditions found during your check of the victim. You must get permission and advise the person of your training. Only then can a conscious person give you permission to help. Do not give care to a victim who refuses it. If the unconscious person is a child or infant, you should obtain permission of the supervising adult when one is available. If the condition is serious, permission is implied if a supervising adult is not present. Permission is also implied if a victim is unconscious or unable to respond.

Most states now have Good Samaritan laws, which basically state that when a citizen responds to an emergency and acts as a reasonable and prudent person would under the same conditions, Good Samaritan immunity generally prevails. This legal immunity protects you, as a rescuer, from being sued and found financially responsible for the victim's injury.

You should not attempt rescue breathing unless you have taken an approved first aid and CPR class. The rescue breathing is one breath about every five seconds. You should give the victim enough air to make their chest rise but not the stomach. After giving the rescue breathing for about a minute, recheck the victim's pulse and breathing.

If the pulse is absent, begin CPR. This calls for 15 chest compressions, where the chest is compressed about 2 inches, in about 10 seconds. Then give two more slow breaths. You keep up this rhythm for about a minute and then recheck the pulse and breathing. Stop CPR if you are replaced by another rescuer, if EMS personnel arrive and take over care of the victim, if you are exhausted and unable to continue, or the scene becomes unsafe.

The American Red Cross course covers the above material, plus material dealing with choking and other breathing emergencies, sudden illness, caring for burns, splints, sprains and strains.

OSHA standards require at least one employee on each construction job site be certified in first aid and CPR. If you would like to attend a class, please contact the Safety Department in Alameda in writing. We hold classes when we receive enough interest. At this time, we are certified to teach classes in the Bay Area, the Sacramento area, and Humboldt County.

Class members try out their techniques.
USE OF METHAMPHETAMINES
IS MORE DANGEROUS
THAN YOU THINK

Once in a while an urgent bulletin comes across our desk warning us of a new health hazard or even of a new and promising treatment regime for a difficult to manage disease. This time the bulletin came from Dr. Alan I. Leshner, director of the National Institute on Drug Abuse. It was not about a new and terrible disease or a wonderful discovery — it was instead more sad news about an addictive toxin called methamphetamine.

This toxic chemical has been around for many years. It has destroyed many families and killed numerous users. So what warrants an urgent bulletin from a national authority like Dr. Leshner?

The use of this drug, in its various forms, is rapidly spreading and increasing. It is a powerfully addictive stimulant that causes serious health conditions including memory loss, aggression, violence, psychotic behavior and, ultimately, heart and neurological damage. It also contributes to the transmission of infectious diseases, most notably hepatitis and HIV/AIDS.

Users of this drug often reassure themselves in an infantile, deceptive fashion that it won’t happen to them. They think they are careful, that they know what they’re doing or that they aren’t addicted. Let me just review some of the frightening facts for you and your family.

We are talking here about a deceptively innocent looking, white, odorless, bitter tasting crystalline powder that can easily be dissolved in water or alcohol. It can be efficiently manufactured in illegal laboratories that have a tendency to blow up when least expected. The ingredients are quite inexpensive and available over-the-counter.

There is, however, a great variation in the process and chemicals used. This means that the final product you buy may not be methamphetamine at all, but rather a highly altered chemical mixture with some stimulant-like effects. This makes it difficult to predict and determine the toxicity of what you purchased or manufactured. The resulting psychological and physical consequences tend to be unpredictable and can be quite devastating. Why not just try playing Russian Roulette?

This devil’s concoction comes with many names: speed, meth, chalk, ice, crystal, crank, fire and glass. It can be orally ingested, smoked or snorted, but is increasingly being administered intravenously. This, of course, significantly increases the risk of contracting a variety of serious infectious diseases that you would not want to tell your mother about.

Here are some of the early signs of being under the influence of methamphetamine:

- excited speech, decreased appetite, increases physical activity, dilated pupils, and compulsive cleaning and grooming.
- frightful facts for you and your family.
- We are talking here about a deceptively innocent looking, white, odorless, bitter tasting crystalline powder that can easily be dissolved in water or alcohol.
- It can be efficiently manufactured in illegal laboratories that have a tendency to blow up when least expected.
- The ingredients are quite inexpensive and available over-the-counter.
- There is, however, a great variation in the process and chemicals used. This means that the final product you buy may not be methamphetamine at all, but rather a highly altered chemical mixture with some stimulant-like effects.
- This makes it difficult to predict and determine the toxicity of what you purchased or manufactured.
- The resulting psychological and physical consequences tend to be unpredictable and can be quite devastating.

- This devil’s concoction comes with many names: speed, meth, chalk, ice, crystal, crank, fire and glass.
- It can be orally ingested, smoked or snorted, but is increasingly being administered intravenously.
- This, of course, significantly increases the risk of contracting a variety of serious infectious diseases that you would not want to tell your mother about.
- Here are some of the early signs of being under the influence of methamphetamine:

If you are looking for help at your local hospital emergency room, I can assure you that there is currently no antidote or drug to treat an overdose of — or an addiction to — methamphetamine. You will need to go through a withdrawal characterized by drug craving, depression, poor sleep, and increased appetite.

Now, if you are sick and tired of being sick and tired, we can help you. Just give us a call and we will work with you to stop your addiction.

For more information from the National Institute on Drug Abuse call: 1-800-729-6686 or visit www.nida.nih.gov.

How the merger of Tenco Tractor and Holt Bros. will help the new company, Holt of California, train its mechanics to stay on the cutting edge of technology

The purpose of merging two successful companies is usually to wind up with the best of two organizations. That’s precisely what’s happening with the merger of two Northern California Cat dealerships: Tenco Tractor Inc. of Sacramento and Holt Bros. of Stockton.

When the two longtime Central Valley distributors joined forces on January 1, the merger opened the door for numerous business opportunities for the new company, Holt of California. The merger will undoubtedly permit Holt to grow faster and provide better service to its customers. But there’s more to the merger than just increased growth potential and improved service.

Merging Tenco and Holt Bros. is going to help Holt of California deal with one of the biggest challenges facing today’s heavy construction industry – how to keep its skilled workforce on the cutting edge of technology. Who remains competitive in today’s construction industry depends in large part on how a company copes with the breakneck speed with which technology is changing.

Today’s Caterpillar engines and hydraulic systems are so packed with electronics, they can tell a mechanic precisely what ails them. A mechanic in today’s Cat shop routinely uses advanced diagnostics to find potentially costly equipment problems before the rig breaks down, saving contractors and dealerships big money. Mechanics analyze equipment fluids for telltale signs of trouble like a physician evaluates a patient’s blood. Handling the new technology requires mechanics and parts personnel to have more knowledge and skills than ever before.

The merger of Tenco Tractor company in an excellent position with the advanced training industry’s rapid technological changes.

Holt of California is committed to skills training. Human Resources is also going to be the new company. Joining Waugh on the training team will be the full-time trainer at Flagstaff, a position the company is hoping to fill with a person skilled in training mechanics and parts personnel to handle the new technology.

“Now that we’ve joined forces, we’re in a better position to provide the best training possible,” said company vice chairman and CEO of Tenco. “We’ll...
and Holt Bros. puts the new plan to provide its employees needed to keep pace with the innovations.

Reshaping the way it conducts business, Holt Bros. is also upgrading its apprenticeship program. The new system, Beatie said, will be more formal and technical, requiring apprentices to progress through various formal steps, which include rigorous skills.

A good example is mechanic Gary Williamson of the Pleasant Grove shop. Known as one of the best transmission specialists around, Williamson can share his knowledge and experience with mechanics at the Stockton and Los Banos shops. Mechanics with specialized training and skills at the Stockton and Los Banos shops can, in turn, provide assistance to those at the other shops.

"It's a win-win situation for everyone involved," Beatie said. "Not only do our customers benefit, but so do our employees."

Holt of California is also upgrading its apprenticeship program. The new system, Beatie said, will be more formal and technical, requiring apprentices to progress through various formal steps, which include rigorous skills.

Holt of California's overall training package - both its advanced training and apprenticeship program - will greatly enhance the company's ability to meet the technological challenges of the approaching millennium.
PENSION PROCESSING TIME TABLE

Be sure to carefully review the following time table. When you're ready to file your application for retirement, remember to apply early and to allow for a period of six to eight weeks from the time you stop working to the time you receive your first pension check.

Applications should be submitted to the trust fund office at least 90 days prior to retirement date. Your application will be valid for one year.

- Application is received at trust fund office.
- Receipt of application will be acknowledged within a week to 10 days.
- The member's work history is researched and a "paystub" letter is sent to the member.
- The member stops working, signs the paystub letter and submits it to the trust fund office along with a copy of the member's last three months worth of pay stubs.
- About three to four weeks later, the trust fund will send an award packet to the member.
- The member must complete and return the award packet to the trust fund office.
- Within three weeks, the trust fund will send the first check to the member. This check will include all payments retroactive to the effective date.

Retiree Association and pre-retirement meeting schedules

Retiree Association meetings have been scheduled for March. This is an open invitation to all retirees and their spouses to join us at the meeting in your area. Your input at these meetings is vital. We look forward to seeing you there.

Also, operators age 50 or older but not yet retired are urged to attend any of the upcoming pre-retirement meetings. Spouses are welcome, too. Come on out and discover how the retirement plans can work for you.

Schedules for both Retiree Association and pre-retirement meetings can be found on page 22.

Did YOU help build Treasure Island?
Or the 1939-40 World's Fairgrounds?
If so, we know someone who would like to talk to you. A Master's student at Stanford University is making a documentary film about the history of Treasure Island and would like to interview people involved in the island's construction.

Please contact Vanessa Warheit at (650) 233-0805 ext. 2 or by e-mail at vanessaw@stanford.edu.
You can also contact the San Francisco Building Trades Council at (415) 467-3330.
Contract negotiations going smoothly for both sides

ROHNERT PARK - The Rohnert Park business representatives have completed three of the four pending contract negotiations with the drilling contractor. We are currently starting negotiations with Howard Gravel Company, Inc., out of Eureka.

Negotiations have gone well for both the union and the employer. During the course of negotiations, there has been good faith bargaining on both sides and no attorneys were involved. Honesty, integrity and harmony prevailed and employers and employees are all satisfied with their new three-year agreements.

Everyone is looking forward to another busy work year in 1999.

Notes from Tech Engineers

If the weather allows, the out-of-work list should be trimmed down to the bare bones very soon. The upcoming spring season should be a busy one and some of you may have already received calls from prospective employers looking to increase their rosters. Make sure your dues are up to date and that your certifications and licenses are current.

Good-bye to a dear friend.

From time to time, we have all been fortunate enough to work with some extraordinary people. These people possess talents or skills that simply set them apart from the rest. The Rohnert Park District is sad to report the passing of one such legendary operator, Joe Riley, on Jan. 5.

Joe was one of a kind, a proud Irishman and union man, who was known as a “Hickman extraordinary.”

I first heard stories of Joe’s almost superhuman abilities on the blade about five or six years ago, before I had the pleasure of meeting and working with him. The tales I heard came from several different sources but had one common theme — that Joe had an exceptional ability to cut the grade.

In December 1997, Joe was presented with his 35-year pin.

I raise my glass in your honor, Joe. You will be missed.

ABOVE PHOTO:
Pictured at the December 1997 District Meeting are District Rep. Gary Wagnon, Tech Engineers Rep. Gerry Orme, Financial Secretary Darell Steele, Doug Reed, Joe Riley and Recording-Corresponding Secretary Rob Wise.

Housing developments flourish in Central Valley

STOCKTON - District 30 housing developments continue to be on the rise. There is $4 million worth of work to be done at Saddle Creek development. Award Homes Inc. has filed a letter of intent and has put a $10,000 deposit in with the City of Lathrop for a proposed 2,000-home project that could also trigger growth in the 3,000-home Mossdale Village project.

Construction on Califia, the development formerly known as Gold Rush City that was featured in the March 1998 issue of the Engineers News, also begins this year.

Along with highway overlays, freeway development and flood-protection projects, 1999 looks to be another promising year for Local 3 members.

We are pleased to announce that Stockton Business Rep. Tom Aja has been selected as the San Joaquin County Central Labor Council’s new secretary-treasurer. Tom replaces Jim Beno, who has taken over other duties at the council. Although Jim’s shoes will be hard to fill, I have every confidence that Tom will do an exceptionally fine job.

District Rep. Dave Young
A new voice for a new year

SACRAMENTO - For those of you who have called recently to get on our out-of-work list, you probably heard an unfamiliar voice. That is because long-time dispatcher Beverly Hagg retired as of Jan. 29. Dennis "Tiny" Freeman, a former member of the Sacramento District's Grievance Committee, has taken over dispatching duties. We welcome Tiny and wish him the best of luck in his new position.

Beverly gave several years of wonderful service to the Sacramento District and will be missed by the members and staff more than words can say. I'm sure many of you have great stories about Beverly. If you'd like to share them, please call Tonic or Kathy in our office. We might put them in our next Engineers News article.

Work picture

It's snowing in the High Sierras, so the only work happening in the Tahoe region is snow removal. Work is expected to pick up in El Dorado County. Perini picked up a job in South Lake Tahoe, and in Tahoe City, Sierra Pacific Electric has just a job out for bid guaranteed to go union. To ready members, the work season is almost here.

Blue Iron started its $1.7 million storage facility for the city of Sacramento at the U.C. Davis Medical Center. The project entails excavating, grading and setting the structure.

Granite Construction has picked up a $5 million panel replacement job on I-80 between Penryn and Newcastle. Operators will have to work double shifts on this project, and Granite expects to employ 40 to 50 of our members.

Granite had about 10 to 15 operators working through the winter on the Elk Grove crossing on Bond Road. Diamond Creek will start employing 40 to 50 operators to install 72-inch pipe and complete all roadways, curbs and gutters.

Ford Construction is still working on the wastewater treatment plant and this year will get a good start on its $1.7 million, 168-inch interceptor pipe project on Elk Grove-Fair Oaks Road in Sacramento.

F.G.I. just started its $7.7 million grade separation project on Power Ira Road and Falcon Blvd. The company will be hiring five to 10 operators for this job.

Ladd is still clearing at the Foresthill job site. The company is also lobbying Placer County to allow two work shifts this spring. This will allow Ladd to cut the project time in half and will help with traffic problems.

Sylton Reid picked up the Foothill Water Treatment Plant in Newcastle.

The Wolf Creek Interceptor Phase 4 in Grass Valley is coming up to bid. The project is estimated at $1.85 million. There have been three non-union and two union bids.

We would like to thank all the members and their spouses for coming to Teichert's meeting about its new mining site located about 4 miles north of Lincoln. The project will create dozens of new local jobs and will generate $2.4 million per year in economic benefits, including $1 million in school revenues. Placer County officials are expected to release the environmental review of the project, followed by a round of town hall meetings for the public. Please make sure you attend these meetings to support Teichert and project union jobs. A big thanks to Teichert for supplying food and drinks for the meeting.

FROM RENO

RETIRED IN HELL

The Staff and members of the Reno District 11 congratulate and wish Rita Griffith a Happy Retirement!

After 18 years, you deserve it!

Members are invited to stop by the office on Tuesday, March 30, 1999 to say good-bye to Rita
San Mateo County Government Center gets new building

At the San Mateo County Government Center in Redwood City, an additional building is being constructed by Turner Construction Co. The new five-story addition will mean more space for the San Mateo County Sheriff and the Department of Public Works. Huskey Crane & Rigging of Stockton is also working on the building, hanging the precast with the company's new Manitowac 888. Local 3 member Dan Hudson, pictured above left, is the operator and his son, Carl, is working as the oiler.

Sheedy Hoist is doing the vertical engineering with member Rich Fargo on the manlift, pictured above right.

Oakland District Office

The Oakland District office would like to express its condolences to Local 3 member Mark T. Bean on the death of his son, Mark Andrew Bean, on Sept. 29, 1998.

Also, our condolences to the family of James C. "J.C." Ross, 65, of Comstock, who passed away Jan. 20 in San Antonio, Tex. He was born Dec. 21, 1939 in Tologa, Okla. Ross retired from Granite Construction Company in Livermore, Calif., after 25 years of service. He was a member of the Oddfellow Lodge and the Del Rio Chamber of Commerce.

Rohnert Park District Office

The Rohnert Park District office wishes to express its sincere condolences to the families of the following departed:

Congratulations to the following:

James Hall and his wife, Regina, on the birth of their daughter, Jamaica Marie Hall, on July 9, 1998. James works at Northbay Construction.

Joel Duckworth and Jennifer Green on the birth of their son, Willis Morris Green-Duckworth, on Nov. 11, 1998.

Walter Spain and his wife, Traci, on the birth of their son, Logan Walter Spain, on Jan. 5. He weighed 7 pounds, 1 ounce.

James Barrett and James Detels on the birth of their son, James Walker Detels-Barrett, on Jan. 21. He weighed 7 pounds, 2 ounces, measuring 19 1/2" long.

Sacramento District Office

The Sacramento District office would like to express its condolences to Clyde Kemp on the passing of his wife, Irene. We would also like to send our condolences to Walter Miller on the passing of his wife, Anna.

Also, our condolences to the families of the following recently deceased members: Ray Ruport, Oct. 18, 1998; George Lockhart, Nov. 5, 1998; Frank Reese, Nov. 15, 1998; Bernard Cullen, Dec. 11, 1998; Fred Arnold, Dec. 31, 1998 and Lawrence Lowery, Jan. 12.

LOCAL 3 OKAY WITH Y2K

Business Manager Don Doser announces that Local 3 is nearing completion on a program to prepare the union's computer system for the arrival of the new century, a phenomenon commonly referred to as Y2K. The union will bring up its mainframe computer July 31 as if it were the year 2000 to see if all systems are go. If there's any problems, the union will have five additional months to iron out any last-minute glitches.

Local 3 has actually been working on the Y2K problem since early 1996. "We've known for quite a few years that we needed to tackle this problem," said Business Manager Don Doser. "Every time we reprogrammed the system for any reason, we set the new program up to accommodate four-digit years." The union's billing systems, Doser added, is already able to accept payments for the year 2000.
OFFICIAL NOTICE

BYLAWS RESOLUTIONS - MAIL REFERENDUM VOTE

Attention of all Members of Operating Engineers Local Union No. 3, is directed to Article XIV, Section 2(a) and 2(b), of the Local Union Bylaws, as printed on pages 68 and 69, as listed below:

ARTICLE XIV

Section 2:

(a) All resolutions to amend the Bylaws, and all motions under New Business to come before a Semi-Annual Meeting, shall be presented to the Local Union Executive Board at its regular meeting preceding the Semi-Annual Meeting; shall be sent by registered mail, return receipt requested, addressed to the Local Union Executive Board; shall be received not later than December 1st or June 1st, as the case may be; shall be considered at its regular meeting preceding the Semi-Annual Meeting; the Local Union Executive Board shall report thereon to the Members at the Semi-Annual Meeting; the motions or resolutions submitted to the Local Union Executive Board shall be placed on the agenda of such meetings; and such agenda, including a copy of all such resolutions and motions, shall be printed or duplicated and made available to each Member at the start of the meeting.

(b) Resolutions to amend the Bylaws, other than Articles V and VI and any part thereof, if adopted by the Semi-Annual Meeting, shall be read at the Special or District Meetings following the Semi-Annual Meeting, and, within thirty (30) days after the last such meeting, submitted to a referendum vote of the Membership, said referendum vote to be conducted by a firm of nationally known certified public accountants as chosen and directed by the Local Union Executive Board (see opposite page for meeting times and dates).

In addition to the Article quoted above, the following procedures were adopted by the Bylaws Committee on October 20, 1998 for conducting a mail referendum vote on proposed Bylaws Resolutions.

(1) A mail referendum vote of the Membership of this Local Union shall be conducted during the period of April 19, 1999 through May 11, 1999, under the supervision of the Bylaws Committee and a nationally known firm of certified public accountants, selected by the Executive Board, with such other technical and legal assistance as may be provided.

(2) The mail referendum vote shall be conducted by a committee known as the Bylaws Committee, composed of one (1) Member from each District and the six (6) Constitutional Officers of Local 3. The District Member was nominated and elected by secret ballot at the January, February, and March 1998 quarterly District Meetings by vote of those Members present.

(3) The Bylaws Committee shall be responsible for the conduct of the mail referendum vote, and specifically, for the preparation of the list of eligible voters, showing the Member’s name and last known address as it appears on the records of this Local Union; the preparation and printing of the ballots, and giving official notice of Bylaws Resolutions as printed in the Engineers News not less than fifteen (15) days prior to the mailing of the ballots to eligible voters.

The Bylaws Committee shall cause a sample ballot to be published in the March and April edition of the Engineers News preceding the mail referendum vote, and to be promptly posted in the District Job Placement Centers.

The Bylaws Committee shall deliver the list of names and last known addresses of eligible voters, and cause the printer to deliver the ballots and envelopes to the nationally known firm of certified public accountants chosen by the Local Union Executive Board, which firm shall rent a post office box to which the ballots shall be returned.

(4) The certified public accountants shall mail the ballots and return envelopes to the eligible voters on Monday, April 19, 1999, and shall open the post office box for the first and last time on May 11, 1999 at 10:00 a.m.

The certified public accountants shall remove the returned ballots, count the same and certify the results in writing to the Bylaws Committee.

The Bylaws Committee, or a sub-committee thereof, shall be present at the mailing of the ballots, the opening of the post office box, and the counting of the ballots.

The Bylaws Committee shall make certain that adequate safeguards are maintained so as to protect the secrecy of the ballots.

(5) The certificate of the certified public accountant shall be published in the June edition of the Engineers News following the mail referendum vote.

(6) Every Member who is not suspended for nonpayment of dues as of April 16, 1999 shall have the right to vote. No Member whose dues shall have been withheld by his or her Employer for payment to the Local Union pursuant to his or her voluntary authorization provided for in a collective bargaining agreement shall be declared ineligible to vote by reason of any alleged delay or default in the payment of dues by his or her Employer to the Local Union.

BYLAWS RESOLUTIONS
MAIL REFERENDUM VOTE

In accordance with the Official Notice of Bylaws Resolutions as adopted by the Bylaws Committee on October 20, 1998: "The certified public accountants shall mail the ballots and return envelopes to the eligible voters on Monday, April 19, 1999, and shall open the post office box for the first and last time on May 11, 1999 at 10:00 a.m."

In an envelope marked "OFFICIAL BALLOT," you will receive a business reply envelope with voting instructions. When you receive your Official Ballot envelope, open it, and remove the contents. Follow the voting instructions. When you have made your choice and marked the ballot card accordingly, place the ballot card in the secrecy envelope, seal it and insert it in the business reply envelope.

IMPORTANT: Remove stub from ballot card before placing it in the secrecy envelope. After you have sealed your ballot card in the secrecy envelope and in the business reply envelope, you must sign your name and enter your Social Security number or Register number on the reverse side of the business reply envelope or your ballot will be voided (not counted). Your signature will only identify you as an eligible voter, but in no way indicates how you voted.

You must deposit your ballot in the mail so that it will be received no later than 10:00 a.m., May 11, 1999 at the P.O. Box in Alameda. You should vote and mail your ballot early. Ballots arriving in the P.O. Box after this time and date will not be counted. Do not mail dues payments or any other material with your ballot.

If you have a foreign address, you will not receive a business reply envelope, but will be required to pay the necessary postage yourself, since under present regulations it is impossible for the Local Union to arrange otherwise. In the event you do not receive a ballot by April 26, 1999 or your ballot is destroyed or lost, you should call Thomas Havey LLP at a toll free number 1-800-560-1826. This service will be available 7 days a week, 24 hours a day until May 7, 1999.

Mailing label contains member registration number

The member registration number on the Engineers News label makes it easier for you to properly fill out and return the election ballot with all the correct information.
**HONORARY MEMBERS**
The following retirees have thirty-five (35) or more years of membership in the Local Union as of January 1999, and have been determined to be eligible for Honorary Membership effective April 1, 1999.

- Douglas B. Barringer
- Howard Bayers
- Carl D. Black
- David Burch
- Franklin D. Callahan
- Jerry Deusenberry
- Ronald Farrell
- Hugh M. Floyd
- John Gonzales
- William Gregory
- James Holway
- Remon E. Hopkins
- William S. Jose
- Jens Knudsen
- Max J. Lennon
- Donald P. Longacre
- Thomas M. Lowe
- Harold D. McGuigan
- John C. Miller
- Jake Miiasikian
- M.G. Orear
- Don M. Perry
- Leslie Riggs
- Frank P. Rios
- Joseph E. Sabela
- Mervin Santos
- Lewis Shrdar
- Jack Solus
- Fred L. Wilson
- John W. Wood
- James T. Yamauchi
- Kiyoshi Yoshimoto

* Effective January 1, 1999

**CORRECTION**
In the February Engineers News on page 9 under Deceased Dependents, the newspaper listed "Marie Allen, wife of Phillip Allen." This was incorrect. It should have read: "Ruth Allen, wife of Phillip Allen." We apologize to the Allen family for this mistake.

**Deceased Dependents**

- Amelia Amann, wife of Patrick Amann 12-09-98
- Leola Burton, wife of Leland Burton 01-01-99
- Virginia Henderson, wife of Harvey Henderson 01-17-99
- Bertha Smith, wife of Vincent Smith 12-04-98
- joy Wagner, wife of Lavern Wagner 01-18-99

**Departed Members**

Our condolences to the family and friends of the following departed members: (Compiled from the January 1999 database)

- Thomas Aguilar
- Fred Arnold
- Oliver Atkinson
- Forrest Bigler
- Orvel Bird

**NOTICE**

**ELECTION OF MARKET AND GEOGRAPHIC AREA COMMITTEE MEMBERS**

Business Manager Don Doser has announced the election of Market and Geographic Area Committee Members at each of the Northern California and Reno regularly scheduled district meetings during the first quarter of 1999 with eligibility rules as follows:

1. Must be living in the Committee’s Geographical area
2. Must be working/making a living in the industry in that area
3. Must be an "A" Journeyperson
4. Must be a member in good standing
5. Cannot be an owner operator

No member shall be nominated unless they are present at the meeting and will accept the nomination and the position, if elected.

No member is allowed to serve more than two (2) consecutive terms on the Market and Geographic Area Committee.

The schedule of the meetings in which these elections will be held appears on page 19 under “District Meetings.”

LOCAL 3 TO AWARD 20 $500 'SPECIAL SCHOLARSHIPS' AT JUNE 17 SEMI-ANNUAL MEETING

In fall 1998, Operating Engineers Local Union No. 3 and the Local 3 Federal Credit Union held their third scholarship fund raiser, the T.J. Stapleton Invitational Golf Tournament, which netted about $38,000 for the Scholarship Fund.

Due to the overwhelming success of this event, Local 3's Executive Board has decided to award 20 $500 "Special Scholarships." These awards will be given in addition to the two $3,000 and two $2,000 Local 3 College Scholarship Awards given annually to the sons and daughters of Local 3 members. The winners of the $3,000 and $2,000 awards will receive an additional $500 per year from the Scholarship Fund for the second, third and fourth years of college, provided they remain full-time students.

For the Special Scholarships, the names of all applicants will be entered into a drawing to be held at the June 17 Semi-Annual membership meeting. Applicants need not be present to win. The Special Scholarships are available only to the sons and daughters of Local 3 members.

The Executive Board knows that the workplace is rapidly changing and many of the jobs in the future will require new skills that can be attained only with a good education. Local 3 is dedicated to giving our young people the opportunity to succeed in tomorrow's jobs by providing them with the chance to further their education and training.

Local 3 would like to thank all golf tournament participants and scholarship contributors for their generous donations.

General guidelines for awarding the 20 $500 Special Scholarships

1. Sons and daughters of Local 3 members may apply for the scholarships. The parent of the applicant must be a member of Local 3 for at least one year immediately preceding the date of the application. Sons and daughters of deceased members of Local 3 are eligible to apply for the scholarships if the parent was a member of Local 3 for at least one year immediately preceding the date of death.

2. Sons and daughters of Local 3 members who plan to attend college or trade school are eligible to apply. They will not be judged on academic qualifications. All applicants who apply for the regular Local 3 College Scholarship Awards and do not win will automatically qualify for this drawing.

3. Applications will be accepted until June 1, 1999. You may get an application at your district office or any credit union branch.

4. Winners will be determined by a random drawing to be held at the June 17, 1999 Semi-Annual membership meeting. Applicants do not need to be present to win.

5. The money will be funded when the college or trade school confirms the winner is a full-time student.
