A river runs through it

Alternative Intake Project involves damming river, micro-tunneling pipe under Old River

ELECTION NOTICE
See page 28 for important information regarding the August 2009 election of Officers and Executive Board members.
For The Good & Welfare
By Russ Burns, business manager

The money is here; work is coming

It seems the latest buzz word is "budget." First, we focused on the California state budget which was at an impasse for weeks as construction projects across the state hinged on state funding to continue, to start up or to avoid being shut down.

Then, it was the federal stimulus package – a budget all its own. We heard it was supposed to be labor-friendly, but we waited, some of us skeptical, to see if President Obama would deliver on his promises.

Because of your work, brothers and sisters – your presence at recent political rallies and conferences to get the California state budget passed so that some $5.56 billion worth of construction projects could avoid being shut down – and because of your political mobilization to get Obama elected, infrastructure funding is looking up for labor. Obama is delivering.

In California, the planned shutdown of some 374 construction projects was averted, and that’s because of what you did – the times you marched at the state Capitol or called your legislators reminding them that they work for us. Proof of this effort is in this edition on page 10. While it’s not a perfect budget and layoffs at the state level continue, its passing has helped us for now.

At the federal level, because of the president we put in office, four of Bush’s anti-labor policies have been reversed. Obama is making it far easier to unionize workers and more likely that construction projects receiving federal dollars will be unionized.

Most importantly, his recently enacted American Recovery and Reinvestment Act contains a massive investment in infrastructure that will employ thousands of International Union of Operating Engineers (IUOE) members across the United States. Economists predict that 3.5 million jobs will be created or maintained through the package with more than $150 billion in construction activity included.

Highlights of the direct transportation and infrastructure spending include the following totals amounts with a breakdown of the four states in our jurisdiction:

- Highways and bridges: $827.5 billion
  - California: $82.6 billion; Hawaii: $125 million; Nevada: $201 million; Utah: $8213 million
- Transit: $88.4 billion
  - California: $81 billion; Hawaii: $43 million; Nevada: $49 million; Utah: $58 million

A resounding total of $93.3 billion is reserved for high-speed rail (which California voters approved last November) and Amtrak.

This money will help put our members back to work.

Another main highlight from the recovery package is that it includes prevailing-wage protections requiring that construction workers on federally funded projects receive Davis-Bacon prevailing wages. These wages will even apply on emergency construction projects, since after only weeks in office, President Obama rescinded the Bush administration’s policy of waiving the Davis-Bacon requirements.

If Obama makes good on passing the Employee Free Choice Act, which gives workers the right to unionize based on a majority vote, labor will gain even more ground.

It is through your efforts that all of these changes are taking place. At long last, after eight years of anti-union administration in Washington and decades of union struggle, we now have the opportunity to gain a foothold in the door, and brothers and sisters: We are ready for it.

However, our work is not done. The upcoming California Special Election scheduled for May 19 is necessary to complete the state budget and will include six ballot items that will need your attention. See page 11 for more details, and stay tuned for more information about how your vote in this election could directly impact your pocketbooks. Information will be forthcoming in the next edition of Engineers News, at your quarterly district meetings and through mailers.

Speaking of Engineers News, as you might have noticed, there is a change to the paper’s size this month. This change, which will save the union $35,000 a year, is one of several cost-cutting measures Local 3 has implemented during this financial crisis.

I would like to close by thanking you all for coming to the recent Semi-Annual. A photo spread of the event will be in the next issue. I saw a lot of familiar faces, met some new ones and enjoyed hearing what you all had to say. Until next month, please be safe, and again: Stay tuned for more information about the upcoming California Special Election.
Local 3 storms the Capitol, gets plenty of press

Through many rallies, conferences and events, Local 3 has been all over Northern California and the news for its heavy participation urging legislators to get a California state budget passed. These efforts paid off on Feb. 19. For more photos and information on these efforts, see page 10.

Activist John "Griff" Griffin is interviewed by ABC's Channel 7 News.

Local 3's Loretta McClinton talks to NPR at the Feb. 10 rally at the state Capitol.

OE3 supports safety campaign

While work picks up, Utah District Rep. Dale Cox asks drivers to slow down.

That's the concept behind a campaign announced in February to protect construction crews working alongside Utah's roadways, asking drivers to "slow for the zone."

A news cast on KSL-TV 5 in Utah featured one of our own - Cox - at an event promoting the campaign.

"We have men and women, fathers and mothers, grandparents and grandpas, uncles and brothers and sisters out there every day," said Cox, who also serves as Utah AFL-CIO executive board vice president.

According to the news station, 870 injuries and nine deaths were reported in Utah road work zones in 2007.

Work zone safety campaign sign.

Obama tips the scales in our favor

As of this writing, the officers and Trustees just finished our Trust Fund meetings - two days of intense information and discussion. Our funds have taken some big hits because of the economic crisis and the rise of unemployment - nothing you don't already know about, as I know some of your own investments took a hit. I haven't talked to a single person who hasn't been affected by the market. But the changes we made several months ago to our investments have set us up to make a good, fast rebound when the economy turns around. Business Manager Russ Burns is pulling out all the stops politically to get work done for our members throughout our jurisdiction, not only at our states' levels but also at the federal level. These changes will pay dividends when things turn around, and they will.

Speaking of meetings, the Western Conference and International Union of Operating Engineers (IUOE) workshops held in February were very informative. IUOE General President Vincent Giblin praised Local 3 for our efforts during these hard times and the ethical way we conduct ourselves in doing what is right. Giblin reported that the work picture across the country and in Canada is slow. He also reported that President Obama signed an Executive Order reversing Bush's ban on Project Labor Agreements (PLAs). This validates that PLAs do, in fact, finish jobs on time and under budget. Another Executive Order from Obama rescinded Bush's original order requiring companies to post a notice telling employees that they had a right not to join a union. With this news and the confirmation of Hilda Solis as labor secretary, labor is getting a shot in the arm when we need it the most.

By finally passing California's budget, many public-works projects will continue because of the hard work being politically active through rallies, phone calls and spreading awareness. Credit markets remain tight, and we need to sell bonds to fund projects. While working with Burns, Treasurer Bill Lockyer is pushing the backlog created by the stalled budget to get more funding for existing and future projects. To avoid this situation again - weeks of budget impasse - we need to make sure we vote at the May 19 Special Election. The ballot will contain several propositions designed to balance the budget and reduce its deficits. See more information on this on page 11 and in next month's edition of "Engineers News."

While the effects of these pro-labor events - Obama's executive orders, his nod to the Employee Free Choice Act and Solis' appointment - are happening slowly, pushing unions forward, the complete recovery from hard times will not happen overnight. However, these events are adding up in our favor, and most importantly they give us hope.

Nothing reminds me of hope more than young people with a dream. Vice President Carl Goff, some district representatives, business agents and I were recently involved in mock negotiations with Stanford University graduate students who have that hope of becoming project managers or being involved in labor-related fields. Others present at the event included Employers' Advocate President/Secretary of Construction Employers' Association (CEA) Mike Walton, professors and California Labor Relations members. These entities invite Local 3 every year to hold mock negotiations with students. It is an eye-opening experience for them, as we teach them what labor stands for and what real-life negotiations are all about. These students are the brightest Stanford has to offer, and we had some good discussion on why and how Local 3 has survived for 70 years. Thanks to the students and especially Walton for being a great host. We look forward to next year.

Speaking of students, please see our recent apprenticeship graduates on pages 4 and 13. We could all use some more training, so call your centers today, and stay safe.

IN THE NEWS

Talking Points

By Fred Herschbach, President

April 2009
Hoʻomaikaʻi — or congratulations — Hawaii graduates

The accomplishments of 15 Hawaii apprentices who completed the Joint Apprenticeship Committee (JAC) program as Construction Equipment Operators (CEOs) were honored at an event held Jan 31. Nearly 117 family members, contractors, union representatives and Hawaii JAC staff attended the event held at the Ala Moana Hotel.

JAC Administrator Pane Meatoga says this year's graduating class is an exceptional group and expects many to become key personnel for their companies. The Apprentice of the Year honor was shared by Keeley K. Bontog and Ian S. Garana. Both excelled in the time sheet category, communications with instructor/coordinator, job performance, meetings and Supplemental Related Training (SRT) attendance.

Business Manager Russ Burns was a keynote speaker at the event, as were Treasurer Kalani Mahoe and Trustee Chair Stan Osada. Singer Wellden Rakaohoa and local favorite The Koa Uka Band provided the entertainment.

Thanks goes out to all those who made the graduation ceremony possible.

From left: Graduate John Villaro, who currently works for Parsons, and his wife, Josie.

From left: Graduate lan Garana, Rec. Corres. Secretary James K. Sullivan and Joint Apprenticeship Committee (JAC) Instructor Dain Kamakaala visit before the ceremony.

From left: Graduates Morris Cagampang and Dwight Enriquez sport the leis given to each of the graduates.

JAC Instructor Hamona Dowell talks with graduate Dietmar Poelzing following the completion ceremony.

From left: Vice President Carl Goff, President Fred Herschbach and Business Manager Russ Burns congratulate Somerset Mao.

JAC Administrator Pane Meatoga and the apprentices of the year Keeley Bontog and lan Garana.

Malia DeVeria-Tgarta shows off her hard-earned certificates of completion.

Graduates and guests enjoy the local band and pupus before the ceremony.

From left: Financial Secretary Dan Reding and Treasurer Kalani Mahoe congratulate Corinna Kyle as she receives her certificates.
13th check on hold for now

I'd like to begin this month by thanking all of you for coming together at the last Semi-Annual Meeting in Vallejo and for all your efforts in rallying for the California state budget to pass.

It was a frustrating time for us all as we waited weeks for an agreement while watching construction projects put on hold and state workers go through furloughs.

I don't claim to be a politician, but I can recognize confused people when I see them, and I think it's safe to say the legislators had never negotiated a collective bargaining agreement with an adversarial contractor. They walked out of the negotiations at the end a bit upset with the outcome, realizing the negotiations at the end a bit upset with the outcome, realizing the negotiations had a place for the new money to go. But the plan was rejected by the management trustees at this point. It will be tied up for awhile, and again, I'm frustrated at all the hoops one has to jump through to get anything done, but that's how this stuff works.

We're continuing to do everything we can to get this thing passed ASAP, but like everyone else in every avenue of government, we're stuck bickering over where the money needs to go and where it's coming from. I'll let you know more on this as soon as I do.

Speaking of money, there are several propositions that will affect your own money in a Special Election being held May 19. We're combing over each and every one of these propositions and will come to a consensus regarding what is best for labor. We'll let you know our stance in next month's paper and at your district meetings (please plan to attend – a schedule is available on page 28 in this edition).

It's a crazy time right now politically. I remember being in the field and thinking none of this stuff mattered to me, but when a president can pass a $64 billion infrastructure package and a governor can hold a Special Election with your money at stake, there is no question politics plays a role in your lives. But you, brothers and sisters, can play a major role in politics too.
Straight from the manager’s mouth

Members, staff speak about their OEFCU experiences

When 2009 brings uncertainty, rest assured you can find certainty at Operating Engineers Federal Credit Union (OEFCU). You can rely on the safety of your hard-earned money with the Credit Union and on the certainty that we have money to lend. We make every effort to earn your trust and build cherished relationships that last a lifetime. Count on our commitment to provide excellent service every day.

The following excerpts are from OEFCU managers on how members like you have been supported with the Credit Union’s services and products:

“A member came into my branch today bearing goodies and a really sweet card, and I want to share the contents from the card:

‘I know it’s a part of the job, but I want to thank you for going the extra mile! Although I can understand the wait and process time for these issues, I appreciate you taking the extra time and effort in helping in the cause of my account being credited the 100 percent! Mahalo and have a great day.’

It really lifted our spirits here in the Hawaii branch knowing that our members appreciate us going above and beyond the call of duty to get the job done. The member had purchased a custom order of rims and wasn’t satisfied with the product. She shipped the product back in November and hadn’t received a refund by December. We stepped in and contacted the merchant on her behalf and worked directly with them to get the full refund for our member. We were unable to do a dispute due to the fact that the product was a special order. The merchant was willing to work with me and after calling several times, we got the full credit!”

– Hawaii Branch Manager

“A member came to me to discuss and question why her loan request for a Visa increase had been declined. To make a long story short, the member had been declined due to her bankruptcy, however, her concern was she had already had the bankruptcy when we originally approved her Visa two years ago, and since then her credit had improved. I reviewed her credit and her history with us and confirmed she had indeed improved her credit and paid us as agreed. I then went on to ask about the bankruptcy, so that I could get a better overall picture of her financial situation. I began to note the loan application with the additional details of the member and her needs and concerns, and in the end, she was able to get counter-offered a signature loan instead of a Visa. This gave the member what she needed, and she walked away more confident about us and her past situation.”

– San Jose Branch Manager

“Over the past 15 years, I have had the pleasure of speaking with numerous OE3 members. One gentleman from Dublin comes to mind from a call I received a few years ago. He had just left Fremont Ford with a brand new Ford Taurus. He was very happy, as this was his first new car in many years. He called me because his Credit Union had told him about our Mechanical Breakdown Insurance (MBI). He thought the $1,600 service contract quoted by the dealer was too high for a Taurus; I assured him it was. I worked up a quote and found our MBI to be about $750. I was able to give him higher coverage, the same deductible and more months and miles for $850 less than the dealer. Needless to say, he was ecstatic at saving over $800. Then he said something I have never heard before or since: He wanted my address so he could split the $800 with me and send me a check for $400. I remember it was January, because I thought of Valentine’s Day. I asked if he was married, and he said, ‘Yes, 45 years and counting.’ I also asked if he had any grandchildren, and he said that he did. I thanked him for his kind offer, however, I had to decline. If he really wanted to do something special with the $400 he wanted me to have, I asked him to take his wife out to a really nice dinner for Valentine’s Day and open a college fund for each of his grandchildren. I was totally surprised when approximately two hours later I received a call with a vehicle that was perfect. More surprising was that it would be delivered to my house in the morning. Overall this has been a pleasure instead of the chore that I expected. Kudos to your staff and the consultants and thank you.”

– Modesto Branch Manager

We are an 80,000-member, $800 million, union-founded and supported financial institution with a single purpose in mind – to assist you and your immediate family with a full spectrum of financial services and accommodations to fit your immediate and future needs.

If you have questions regarding any financial matter – home-equity loans, vehicle loans or modifying your current payment schedule, etc. – please don’t hesitate to call (800) 877-4444 for assistance or sound financial advice.
Charter member tells his story
100-year-old Morris remembers the beginning

Retiree Wayne Morris is "old as dirt" some might say - an appropriate phrase for his life, since as one of the oldest living Operating Engineers (on March 22, he turned 100), he has spent a lifetime longer than most will ever have, working in that dirt. Former Business Manager Vic Swanson organized Morrison in San Francisco in 1939, making him one of the oldest charter members of the union.

"Swanson signed up four of us, paid our initiation fees and our dues for a year at that time, which were 86," Morris said.

Morris grew up on a farm, and according to his son, Robert: "He worked all his life - hard work ... as a master grader, blade operator, anything you put him on."

"I worked on levees, dams, airports, highways, freeways, subdivisions, railroad grades, city jobs, county ones, state, federal, government, Army, Navy," said Morris. It starts to sound like a Johnny Cash song, but Morris could be the subject of many songs, as he is a straight-shooter, "a fourth-generation non-user of alcohol, tobacco and drugs."

Morris' son recalls that in the early days, an Operating Engineer traveled to the work. By the time he was 11 years old, the family had moved 22 times. They camped in the summertime in Truckee at Chester Camp, or the "boondocks."

"Kept us out of trouble," he said.

Staying out of trouble is important to his father too. His advice to apprentices: For the "younger ones" it's simple: "The union is a wonderful place for their future. Pay your dues, keep out of trouble and enjoy life after retirement. That is where the big advantage is, along with health and welfare."

At 100 years old, Morris doesn't have a lot of advice about living long, because: "It has a lot to do with heredity. I'm a country boy, ranch-raised, from large families," with many relatives who lived to 100 years or close to it.

He does credit his health to an active lifestyle - always "finding one way to get the job done," and to eating plenty of chocolate. He still lives alone and cooks his own meals. Up until last fall, he even did his own yard work.

"I still have a valid driver license but won't renew it for the safety of others, even though I still have the ego to think I can drive!"

No guarantee: No cooperation

By Art Frolli, business representative

I recently met with cities and counties employing our members in Northern California to talk about economic issues. In each case, employers stated they are experiencing budget shortfalls primarily due to a reduction in revenue streams. In most of these communities, a large portion of the General Fund Budget is based on sales-tax revenues. Since our overall economy has slowed and consumers are reluctant to take on more debt, the sales of large ticket items have drastically reduced, and income from sales taxes has declined.

This loss in revenue and the lack of adequate reserves has affected the General Fund portions of many municipalities’ budgets. To balance budgets, municipalities are reviewing employees’ salaries. During meet-and-confers, employers are proposing furloughs; ending future salary increases; returning contractual salary increases already received; shortening the work week; and suggesting employees incur the expense of paying a larger portion of their Public Employees’ Retirement System (PERS) contributions. Still, there’s been no guarantee that our cooperation ensures no layoffs.

Without this guarantee, employees – our union members – question their employers’ sincerity and the validity of these alternative salary-reduction proposals. Members fear they would only save potential job losses for a short time – layoffs would occur anyway. They believe it is the intent of their employers to lay-off part of the workforce no matter what concessions they agree to make. Therefore, these members are not willing to make any, and I don’t recommend that they should cooperate without some assurances from their employers. Members are willing to cooperate with their employers as long as they believe their employers have cut wasteful spending and “pet” projects from the budget before impacting employee salaries. Any cooperation is contingent on some kind of guarantee.

Protecting what we have

By Bill Pope, business representative

The national and state economy has certainly made an impact on the jurisdictions and members I represent. With the exception of the city of Cupertino, everybody is facing deficits this year and into the next several fiscal years.

The city of Cupertino currently has a balanced budget partly because Apple Headquarters is located within its limits. San Mateo County currently has a deficit of about $30 million. County administration has been exploring ways to eliminate this deficit, including raising fees, such as an airport rental-car tax and an alcohol tax. The county is suing its brokers to recover the money lost when Lehman Brothers went under.

The city of San Jose lost about $40 million this year, due to the economy, and is also exploring options to balance its budget and eliminate its $65 million deficit.

Unfortunately, the contract between Local 3 and the city of San Jose will expire in April. Negotiations have already begun. The Local 3 negotiating team has its work cut out for them, since the city wants to shift its costs for medical benefits, retirement benefits and salaries to the members. Additionally, the city wants our members to take days off without pay and give up some paid holidays.

The negotiating team members include Chief Steward Tom Reilly, Steward Cynthia Perez and members Heather Reiter and Jon Max Reger. They are committed to protecting what we have earned and getting a fair contract.
Standing up in Los Banos

By Doug Gorman, business representative

OES and the city of Los Banos always had a good working relationship. OES is the exclusive representative for police sergeants, dispatchers and Community Service Officer (CSO) units and is the representation service provider for the Los Banos Police Officers' Association (LBPOA).

Things ran smoothly until the city named a new police chief almost two years ago. Since then, working conditions have changed.

In response to these conditions, grievances were filed, and for the most part, the union prevailed in each one. Due to continued problems with the dispatchers/CSO units, Business Agent Fred Klingel joined me in co-representing the Los Banos units.

During contract negotiations for the dispatchers and CSOs in 2007, the city positioned itself for a run on our members' benefits. During sergeants' negotiations in 2008, we heard and saw the same thing.

In mid December of 2008, the city notified the LBPOA that the city was in a severe financial crisis, and a budget committee had been formed to lessen costs. This committee contained two city council members who were less than employee friendly!

I was notified of the city's plan to cut positions in our bargaining units and immediately demanded to meet and confer about the issue. On Dec. 30, 2008, Local 3 staff and membership met with the city and learned it was cutting four vacant police officer positions, three vacant CSO positions and two vacant dispatcher positions. The city was also looking at cutting one filled officer position and one filled CSO position.

Upon learning this, Local 3 asked for additional time to come up with funding ideas to avoid these layoffs. The city manager refused, and on Jan. 7, 2009, the Los Banos City Council voted to go ahead with the layoffs and abolish the vacant positions. That same day, the public safety bargaining units united and went in front of the council. Our members held an informational picket in the front of City Hall, and the local news media broadcast the situation to the Central Valley.

The following day, the city formally sat down with the units and discussed the layoffs. The units offered serious concessions to the city, but the city refused them. The city wants the employees to pick up the full cost of their retirement.

With the help of Public Employee Director Don Dietrich and business agents Klingel and Carl Carey, we have been fighting to save jobs and benefits in Los Banos. As of Feb. 2, our members are still employed. This couldn't be done without Dietrich's ability to negotiate and the unity of the POA, sergeants, dispatchers/CSOs and the fire department.

We now have strong community support, and recall petitions are being signed to try and oust the mayor and his two cohorts. The fight continues in Los Banos, as it will in other jurisdictions. The only way you can stop this is through unity and community support.

OES is proud to stand up with our brothers and sisters in Los Banos.

Public employees know politics

County Employees' Management Association (CEMA) member Mary Mitchell is a longtime friend and supporter of Superior Court Judge Diane Ritchie. Mitchell currently oversees the Santa Clara County Traffic Violations Department but had plenty of interactions with Ritchie while she worked as a clerk for the courts.

Ritchie's formal investiture as superior court judge occurred recently, and Mitchell was on-hand to congratulate her. Also on-hand as a speaker at the ceremony was 22nd District Assemblyman Paul Fong, who made it to the event after passing the California state budget that very morning.

Ritchie is heavily involved in the labor community (her father was a union member), so her win is also a win for us, as Local 3 endorsed and supported her during the campaign. We thank her in advance for all the work she will do for us, and we thank Mitchell for her political involvement.
Your efforts get budget passed

You listened, the press listened and finally, California’s legislators listened. And we have you to thank, brothers and sisters.

We gathered throughout the state carrying picket signs and demanding a balanced budget. We rallied in Fresno, Fremont, Sacramento and Lincoln. These efforts were broadcast on news stations, published in newspapers and posted online. Then, on Feb. 19, a budget was approved. While it’s not perfect, we are definitely in a better spot now that we have one. Its existence has prevented many construction projects from being shut down and promises more work in the future.

To prevent this stalemate from happening again, we ask you to take action once more. A Special Election will be held May 19 with six measures on the ballot that discourage this in the future. Detailed information about the ballot can be found at right.

You were successful before. Please help us be successful again!
Water project drenched with support

Periodically, throughout the year, members of Congress are in their home districts to be available for meetings with the people they are elected to represent. On Feb. 20, I had the pleasure of joining Yuba City District Rep. Dave Slack for a meeting with Congressman Wally Herger. Herger is in his 12th term representing the Second Congressional District of California, which encompasses our Redding and Yuba City districts. Equally noteworthy of his time in Congress is the total time he has lived in the district. Herger was born and raised in the area and attended local schools up to and including college. This longevity translates into a superior knowledge of the district, which is equaled by that of Slack, who has lived in the Yuba City area since birth. I greatly enjoyed their stories of times past and present, which provide a base upon which we will establish a solid working relationship. Two other participants in our meeting were Organizer/Business Rep. Ron Roman and retired Executive Board Member Dennis Moreland, both life-long residents of Butte County.

The main focus of our discussion was a water storage project that will recharge the underground water aquifer near Butte College in the dredger tailings of the Butte County Gold Fields. The project includes a series of four or five water storage facilities called after-bays that will be excavated near the natural streams in the gold fields such as Butte Creek. Each after-bay will store about 150,000 acre feet of water, which is not a huge amount individually, however, the total (of all the after-bays) will provide a significant amount of storage capacity.

Any project involving water draws the scrutiny of more government agencies than anyone really cares to engage, however, we will be able to build a coalition of supporters due to Moreland's position as a member of the South Feather River Power and Water District Board of Directors. Moreland is fully involved in discussions with a wide variety of potential supporters. The fact that we are in the midst of another drought is a powerful issue, which is very relative to his discussions. I am truly impressed with Herger's enthusiasm for the project. He provided good advice on the coalition building we will need for such an endeavor, and I greatly appreciate his willingness to assist us.

I must recognize and applaud the work Moreland has contributed to this project. His countless hours dedicated to provide potential jobs for the members of our union is truly a selfless act, and for that Mr. Moreland, I thank you.

For more union jobs created because of our water issues, please see story on page 16.

A final note for California members: As part of the California budget agreement recently signed by Gov. Schwarzenegger, a special election will be held May 19 to address financial issues. We will keep you informed on this issue and future issues as developments occur.

How do you suggest people save money during this hard economic time?

"Don't eat out."
- Scott Melchert, apprentice

"You have to work to save... I tell my guys: If you get an opportunity to work, take it. If it's a one-day or a two-day job, take it. That might be all you're going to get this year."
- S. Freeman, 18-year-member

"Retire later."
- Tom Schmidt, 17-year-member
Our industry’s future depends on your example

Across the country, Operating Engineers Local 3 is recognized second to none for having the best trained and skilled operators with a high quality of workmanship. At the Rancho Murieta Training Center (RMTC), we are dedicated to train, educate and successfully prepare our journey-level operators and apprentices throughout these challenging times.

In spite of an economic downturn and the growing list of companies going out of business or making cuts, there's still much to hope for.

The Obama Administration campaigned on increased infrastructure investments, and the Democratic chairs of the key committees in the House and Senate are committed to maximizing the flow of federal dollars to these vital infrastructure projects. Local 3 and the Joint Apprenticeship Committee (JAC) will greatly benefit from these policy initiatives.

While we can’t control the economy or other people’s attitudes, we can control ourselves.

To move forward into the new challenges of the future, we must first begin by owning responsibility. As dedicated union members and skilled craftsmen, we have some basic responsibilities. They aren’t complicated, but they are necessary.

Ten Commandments of Being the Best on the Job

1. Thou shall be on time every day.
2. Thou shall be, clean and sober at work.
3. Thou shall show up for work every day unless really sick.
4. Thou shall follow directions the foremen and supervisors have taken time to explain.
5. Thou shall put in eight hours work for eight hours pay.
6. Thou shall be productive all day.
7. Thou shall have a good attitude toward the crew, the contractor and the project manager.
8. Thou shall think about costs and control them as possible.
9. Thou shall take pride in quality workmanship.
10. Thou shall show respect and tolerance for everyone on the jobsite.

One more list for you:

The “Be” Attitudes of Being the Best Union Member

1. Be all of the above.
2. Be ethical and honest at all times.
3. Be willing to learn more (improve skills, learn more about your union and benefits).
4. Be willing to teach (especially the apprentices).
5. Be loyal to your union.
6. Be supportive toward your union.
7. Be respectful to your employer and co-workers.
8. Be a leader by example.
9. Be open to changes and improvements.
10. Be a team player and support teamwork.

I’ll close with some favorite sayings: “It’s not up to everyone else to make you the best. It’s up to you to change your attitude and become the best you can be.”

At the RMTC, we afford you opportunities to direct your success. The future is here, the question is: What will you do with it?

“It only takes one person to set that example in a church, a government, a company, a union or even on the jobsite. Be that person. Be that example. Do the right thing because you want to, not because you have to. Make that change. Our industry’s future depends on it.”

Getting our bearings

Place several books on a table and push. You will feel a large amount of friction or resistance to movement. Then place several pencils under the books, perpendicular to the direction of movement, and push again. The books now move easier; the pencils are acting as bearings to reduce friction.

There is no definite evidence, but this technology may date back to the construction of the Pyramids of Giza, just outside Cairo, Egypt, when logs were laid down under sleds.

Sliding contact between two surfaces causes friction, which is the force that works against movement. Friction also results in heat, as is evident on those cold winter mornings when you rub your hands together.

Bearings therefore reduce friction, which reduces heat and wear. Bearings also provide a replaceable surface; it’s more economical to replace the bearings than the gear or shaft. Bearings are also used to support loads.

Two bearings are used to support the shaft and gear. The weight of the shaft and gear create a load on the bearings. This type of loading, at a 90 degree angle to the center-line of the shaft, is referred to as radial loading.

As the shaft rotates, the shaft may move to the left or right along the center-line of the shaft. Bearings work against this movement, known as thrust loading.

As previously mentioned, the first bearings were constructed of wood. Common materials in use today include ceramic, sapphire, glass, steel, bronze and plastics.

The first reported patent for a bearing was awarded to Jules Suriray in 1869 for use on a bicycle. A carriage maker by the name of Henry Timken patented the roller bearing in 1898.

Sven Wingquist of SKF ball-bearing manufacturer is credited with the development of the modern, self-aligning design of the ball bearing in 1907.

There are many types of bearings for various usage:

- Jewel Bearing – turns a metal spindle in a jewel-lined pivot hole (watches)
- Fluid Bearing – supports loads on a thin layer of liquid or gas
- Magnetic Bearing – supports loads by magnetic levitation
- Flexure Bearing – allows motion by bending a loud element (door hinge)

Stay tuned for the article in next month’s edition, since the two most common types of bearings found in mobile equipment will be discussed.
RMTC celebrates apprenticeship graduation

The Rancho Murieta Training Center (RMTC) celebrated the accomplishments of 95 apprentices Feb. 28 at a graduation ceremony held at the Crowne Plaza in Concord, Calif.

In attendance to help celebrate included Business Manager/Tenth International Vice President Russ Burns, President Fred Herschbach, Vice President Carl Goff, Rec. Corres. Secretary James K. Sullivan, Financial Secretary Dan Reding, Treasurer Kalani Mahoe, Executive Director Kris Morgan, Director of Apprenticeship Tammy Castillo, Director of Training Dave DeWilde, apprenticeship coordinators, RMTC staff, employers, Trustees, subcommittee members, family and friends.

Stand-outs in the crowd included this year's five apprentices of the year – Construction Equipment Operator (CEO) Gurdaur Sing, Crane Apprentice Tim Shea, Heavy Duty Repair (HDR) Mechanic Derek Schunvel, Gradechecking Apprentice John Mitchell and Dredge Apprentice Matthew Hilton. The Supervisor of the Year honor went to Mike Rubke of Dutra Construction, who was featured in an Engineers News story in November. Jack Estell with Appian Engineering, Inc. snagged the 2008 Employer of the Year award.

Apprentices of the Year were nominated by their apprenticeship coordinators for their ability to go above and beyond the requirements of the apprenticeship standards. They were chosen after careful review of their timecards, on-the-job evaluations and ability to progress through the apprenticeship program in a timely manner.

Rubke was nominated as Supervisor of the Year because he took a sincere interest in these apprentices and spent a lot of time teaching them about the equipment on the job. He was truly a mentor for these young men and women.

Estell was nominated as Employer of the Year for his commitment to gainfully employ apprentices.

"It was wonderful; it was exciting; it was really a great ceremony for everyone," Castillo said.

Congratulations to all graduates and honorees, and thanks to the subcommittee members, who are an integral part of this successful apprenticeship. The program could not be where it is without their tireless efforts and commitment.

Dear Local 3 Apprenticeship/Joint Apprenticeship Committee,

As the proud parents of Allen Fry, Construction Equipment Operator and graduate of the Apprenticeship Program, we would like to commend all involved with the Completion Ceremony at the Crowne Plaza on February 28, 2009. We felt the committee did a superb job of putting together this ceremony from the detailed decorations, to the inspirational speeches. We thoroughly enjoyed the evening and enjoyed the entire ceremony. We were fortunate to meet a 4th generation family at our table, Michael Stroud and family who truly exemplify the family tradition of being an Operating Engineer! Keep up the good work of involving family and recognition for our apprentices. It is a tradition worthy of carrying on!

Again, thank you for a wonderful event.
Margaret and Charles Fry
Looking at Labor
By William Kalani Mahoe, treasurer

Obama’s stimulus plan means work

Aloha, Local 3 members.

Good news: President Obama signed the $787 billion economic stimulus plan into law on Feb. 17, and that plan includes money for infrastructure. Money has been put aside for the production of alternative energy; to modernize more than 75 percent of federal buildings; to improve the energy efficiency of 2 million American homes; and to equip tens of thousands of schools, community colleges and public universities with 21st century classrooms, labs and libraries.

Brothers and sisters, these projects mean jobs, and the most important thing right now is to get our members back to work. At this point in time, we don’t know if the stimulus package will be effective. Whether or not it will help get our country back on track is yet to be seen, but it is worth a shot. At least we can say that we now have a president in office who supports labor and is trying to get working men and women back to earning an income.

The Obama Administration says 3.5 million jobs will be created or saved over the next two years, including 400,000 in the construction industry. The stimulus plan includes the largest investment increase in our nation’s infrastructure - at least $100 billion - since the creation of the national highway system in the 1950s. The plan allots for highway and bridge work; high-speed rail, water projects; mass transit; and retrofit work to public housing, as well as other projects. This money is designed to fund ready-to-go projects that can get money into the economy quickly.

In Obama’s first speech to a joint session of Congress, he said, “While the cost of action will be great, I can assure you that the cost of inaction will be far greater.” Inaction in the work picture has cost union members greatly. Apparently, Obama understands this cost and is putting an end to it. With that said, we know we are taking steps forward to revive our economy.

On the lighter side . . .

Joke of the month

A little girl and a motorcycle

A 10-year-old girl was walking down the street when a man on a black motorcycle pulls up beside her and says, “Hey little girl, do you want to go for a ride?”

“No!” says the little girl, as she keeps on walking.

The motorcyclist pulls up beside her again and says, “Hey kid, I will give you $10 if you hop on the back.”

“No!” said the little girl and proceeded down the street a little quicker.

The motorcyclist pulls up to the little girl again and says, “OK kid, I will give you $20 and a big bag of candy if you hop on the back of my bike for a ride.”

At this point, the little girl turns to him and screams angrily, “Look Dad, you bought a Honda instead of a Harley, so you ride it!”

Funny Photo of the Month

They might look like excavators in the background, but a closer look will reveal what’s going on. For more information about the Funny Photo of the Month, please see Sacramento’s district report on page 24.
Understanding Medicare

What happens when I become eligible for Medicare?

Members and spouses covered with the Pensioned Operating Engineers Health and Welfare Trust Fund eligible for Medicare benefits must enroll in parts A and B of the Medicare program. Failure to enroll will result in the plan denying any charges that would have been paid by Medicare, regardless of whether the eligible member or spouse has enrolled in the Medicare program. Once the member or spouse becomes eligible for Medicare, the Pensioned Health and Welfare Trust Fund becomes the secondary payer. This means Medicare will pay on the charges first, and then the Trust Fund will pay the appropriate balance of covered charges, after Medicare has paid its portion.

Members and spouses eligible for Medicare benefits and on the Kaiser Plan must enroll in the Kaiser Senior Advantage Plan if they wish to remain with Kaiser. Once enrolled in the Senior Advantage Plan, all prescriptions must be purchased from Kaiser pharmacies. The American Diversified Pharmacies/RxAmerica Plan is not available to Kaiser Senior Advantage members.

What if I have Medicare, but my spouse isn’t old enough for Medicare?

If a spouse or member is not yet eligible for Medicare benefits, the plan will pay the appropriate portion of the covered expenses. As soon as the spouse or member becomes eligible to enroll for Medicare, they must do so or suffer the reduction in benefits described above.

Vacation pay semi-annual payout

For members not enrolled in monthly vacation pay transfers to the Credit Union, April is the deadline for requesting a check for the May semi-annual payout. Complete a semi-annual payout card and return it to the Trust Fund office (1640 South Loop Road in Alameda, Calif., 94502) before April 30 in order to have a check mailed May 15. If no card is received, and you have more than $60 in your account, your money will transfer to the Operating Engineers Federal Credit Union (OEFCU) May 31.

To maximize the accessibility of your vacation and holiday pay, you should set up a monthly Credit Union transfer. In this case, as funds become available, they will transfer to your Credit Union account on the 10th of each month.

A river runs through it

Alternative Intake Project involves damming river, micro-tunn

Story and photos by Jamie Johnston, associate editor

Under the river and through the woods, the “granddaddy” of jobs will go.

Called the Alternative Intake Project, this three-phase job is not only big in size – it’s also big news for the counties it affects. The last two phases of the project entail damming a section of Old River where a pump station will be constructed, drilling vertical tunnels – one that is more than 100 feet deep – and micro-tunneling more than 12,000 feet of 92-inch, cast-in-place pipes under the river, about 50 feet below the riverbed. When completed, water will be treated and pumped from San Joaquin County to bordering Contra Costa County. According to the Contra Costa Water District, it’s the most significant Delta drinking-water-quality project in the past decade. And that’s big news considering California is facing its third consecutive year of drought.

On the construction side of things, Stockton Business Rep. Steve Lopez says the labor-intensive project is unusual, as it calls for much larger pipe than he’s seen used before.

“I’ve seen it done but never at this size of pipe,” Lopez said.

The jobsite is unique, that’s for sure. Where the pump station is being constructed, crews work 50 feet below ground level, in an area where metal piles hold the river at bay while work is done. When the pump station is finished, the pile will be removed, allowing the river to return to its normal flow and fill the area back up, submerging much of what was built.

Also unique to this project, vertical tunnels were drilled on either side of the river – one 22 feet wide and 60 feet deep, the other 41 feet wide and 110 feet deep. Small-equipment operators were then lowered into the tunnels to remove excess dirt and prepare the area for crews that will drill pipe across and under the river.

Because these “access shafts” are so deep, a special technique had to be used, a process that has only been used twice in the United States before (only one other time in Local 3’s jurisdiction) called Cutter Soil Mixing (CSM). This requires a special drill. Malcolm Drilling is using the largest Bower makes, a B440. As the two large cutter wheels drill downward, they also mix concrete with native soil and water to create permanent retaining walls. Each trip down and back up takes about five hours, explains Malcolm Drilling Project Manager John Morgan.

Without these retaining walls, Lopez says the tunnels could easily cave in. If that happened, it would happen fast, putting operators at high risk.

CSM was introduced in the United States only three years ago, though Europe has been practicing it for some time.

Water-related work could be the wave of the future as politicians revisit a controversial canal proposed to siphon water from the Sacramento River and pump it to Southern California. Similarly proposed but denied in 1951, then later in 1982, the project is back on the books as California’s water problems worsen. A special task force appointed by Governor Schwarzenegger is considering costs, payment options, environmental concerns and the need for water down south. If approved, the project could break ground in 2011.

As California enters another year in drought, Butte County is also looking at water flow - or the lack of it - and ways to store the precious commodity for future use. (For more on this, read Political Director Tom Aja’s column on page 11.)
Eleven-year member Jason Maynard operates the concrete pump on the east side of the Old River project in Stockton.

Operator Jim Boswell pulls a small Bobcat out of a 65-foot, 22-foot wide tunnel on the east side of Old River.

Danny Boswell operates the BG40 drill on the Alternative Intake project, drilling more than 100 feet down as Catherine "Cat" Lytle removes dirt with a mini-excavator.

Member Mark Michelet climbs to the top of a Malcolm Drilling silo to measure the amount of cement versus water.

Danny Boswell operates the BG40 drill on the Alternative Intake project, drilling more than 100 feet down as Catherine "Cat" Lytle removes dirt with a mini-excavator.

ORGANIZING UPDATE: The long road to success

Exactly two years, three months and 16 days had passed since we first received information about a testing-and-inspection firm working within Local 3's jurisdiction from the south. It was November 2006, and unlike most reports of the non-union testing and inspection working on a job here and there, these reports were persistent and regular and seemed to come from everywhere, a scraper hand at one jobsite, a pump operator at another, all just old enough and far enough apart that the Technical Engineering business representatives covering the area often felt like they were roping the wind. The firm was identified as RMA Group, a 109-person, testing and inspection, geoscience and engineering firm from Rancho Cucamonga, Calif.

The big break came after several months of spreading the word and chasing every possible lead, when a member from Chico called with a tip. Then another member called to ask about a union job in that area. Who was covering it? They had to be union, right? The inspection firm (RMA) is working for a union contractor. Are they union? Well, yes — sort of. It was a union firm, just not with Local 3.

The work that followed was at times contentious and painstaking. The company's office and their inspectors were monitored, and the firm's clients were tracked so an organizing plan could be developed and implemented.

After working with several district representatives, including District 60's Dave Slack, District 80's Justin Dinton, District 04's Mark Burton and District 20's Pete Figueredo, as well as several industry associations, and following some valuable guidance from the Organizing Department, the RMA Group realized the value of working with Local 3 to build a home here in Northern California. On Feb. 17, 2009, RMA Group signed the 2008-2011 Northern California Testing and Inspection Association (NCTIA) Master Agreement. Please join us in welcoming RMA Group when you see them on the jobsite.

This is a perfect example of how teamwork and membership involvement come together to achieve positive organizing results. Strength in solidarity!

New Member Orientation Schedule

Your Local 3 officers encourage you to attend your district's New Member Orientation (NMO) meeting to learn more about Local 3 benefits. Designed as an introductory overview of the many aspects of Local 3 membership, such as Pension, Health and Welfare and dues, NMO has something for everyone. These meetings are not just for new members — any member can attend. Call your district office for more details.

District 01: Burlingame
- June 24, 5:30 p.m.
- Sept. 23, 5:30 p.m.
- Dec. 16, 5:30 p.m.

District 04: Fairfield
- May 27, 6 p.m.
- Sept. 2, 6 p.m.
- Nov. 18, 6 p.m.

District 10: Rohnert Park
- June 10, 6 p.m.
- Sept. 9, 6 p.m.
- Nov. 4, 6 p.m.

District 11: Nevada (Reno)
- May 20, 6 p.m.
- Aug. 19, 6 p.m.
- Nov. 18, 6 p.m.

District 12 Utah (Salt Lake City)
- June 3, 6 p.m.
- Sept. 2, 6 p.m.
- Dec. 2, 6 p.m.

District 17: Hawaii
- TBD

District 20: Oakland
- June 3, 5:30 p.m.
- Sept. 2, 5:30 p.m.
- Dec. 2, 5:30 p.m.

District 30: Stockton
- June 24, 6 p.m.
- Sept. 23, 6 p.m.
- Dec. 2, 6 p.m.

District 40: Eureka
- May 27, 5 p.m.
- Sept. 9, 5 p.m.
- Oct. 7, 5 p.m.

District 50: Fresno
- June 10, 6:30 p.m.
- Aug. 12, 6:30 p.m.
- Nov. 5, 6:30 p.m.

District 60: Yuba City
- June 3, 6:30 p.m.
- Sept. 2, 6:30 p.m.
- Dec. 2, 6:30 p.m.

District 70: Redding
- June 3, 6 p.m.
- Sept. 2, 6 p.m.
- Dec. 2, 6 p.m.

District 80: Sacramento
- May 6, 6 p.m.
- Aug. 5, 6 p.m.
- Nov. 4, 6 p.m.

District 90: Morgan Hill
- June 10, 6 p.m.
- Aug. 19, 6 p.m.
- Oct. 21, 6 p.m.
'Rosie' in real life

By Jamie Johnston, associate editor

You're right, Rosie - we can do it.

During World War II, the famous riveter challenged women to break down barriers, barge through stereotypes and join the workforce. Now, Local 3 has its own inspirational figures who are doing the same thing. Whether they're trying to or not, these women are motivating a new generation of women to join the largest construction union in North America.

In the 1970s, there were virtually no women operators in the union. By 1985, there were about 40. Today, Local 3 boasts a proud membership of 41,000 - 3,356 are women. According to statistics, 316 are operators. Women are working on cranes, on excavators, on backhoes and loaders. Seven-year member Rawneesha Roya is even working as a foreman.

Roya, who works for WR Forde, said: "It's a lot of pressure, but I like the challenge."

Fourteen-year member Boni Coburn also likes the challenge of construction work and calls it a dream job.

"I have always loved working in the dirt. I'd look out there and see all the equipment working and the dirt moving - it's just what I've always wanted to do."

While the numbers have grown dramatically, Coburn, an excavator operator for Dutra Construction, says she's often the only woman on a job and estimates the profession is still made up of about 90 percent men. But, this doesn't intimidate her.

"You get thick skin," she said.

When Annette Huesing-Ammasi first joined the union 20 years ago, she was the only woman on the job.

"It was very intimidating," she remembers. "You just do your job and do it the best you can." After accomplishing the tasks at hand, she said "they appreciate you more and more."

The District 17 member has watched the industry grow firsthand and is excited to see more and more women on jobsites. She encourages other women interested in construction to join Operating Engineers.

"Just stick with the program," she said. "You can do it ... you might even realize you can do it better."

That's what Lisa Brown did.

It's ironic that we feature the District 20 member, as it was a story like this one in the September 2006 Engineers News that inspired her to leave her desk job and join Local 3. A dispatcher for a crane company, it was Brown's job to send operators to construction sites. One day she finally decided, "There's no reason I can't do this."

Now a third-step apprentice, the 41-year-old mother-of-two operates backhoes, rollers, Bobcats - "anything else that needs to be operated." Making the career change was a big decision, but joining the union was "the best thing." Not only does it get her outside, but it puts her in the driver's seat of her professional life while offering benefits and a Pension.

"There aren't enough women in the construction field," she said. "It's an exciting and rewarding profession. You have to be smarter than the equipment. Don't be intimidated by it."

Brown credits a good attitude, the right perspective, a lot of determination and a strong support system of both men and women to her success in the field.

Kasey Herndon only joined Local 3 one year ago, but you'd never guess, as she could be called a poster child for the Operating Engineers.

At just 22 years of age, Herndon, newly-married to Foreman Mike Herndon, has it seemingly "all figured out." She loves what she does, what she's learned and what the union has done for her.

"When I was young, I wanted Tonka toys and did motocross, so it was natural for me to be an operator. I grew up around the industry and feel privileged to be in the union," she said. Herndon has committed the date she applied for the union to memory in the way one might recall an anniversary, because she worked hard to get where she's at - being a journey-level operator known for her talent on the D-8 dozer.

"I wouldn't be in any other union. It [Local 3] has the best benefits."

Third-step Apprentice Mina Liu agrees. While she's experienced some tough times on the job, she never lost sight of the main goal.

"It pays well. It feels good. It's a good job. It's fun. It's rewarding."

And as Rosie would say, "You can do it."
STOCKTON I Obama hits our roads running

Shortly after taking office, President Obama kept his promise to the American people by passing a much-needed stimulus package. This will put many people back to work in our states, cities and counties, because the plan includes funding for infrastructure projects and badly needed roads, highways, bridge replacements and repairs.

AM Stephens started a new project at the Tulloch Dam, pioneering a new road to the bottom of the spillway. Balfour Beatty is still going strong with the Camanche East Bay Municipal Utility District (EBMUD) pump station and pipeline project. Sierra Mountain Construction is working on the Tuolumne City sewer-treatment-plant upgrade. Sukut Construction and Southwest V-Ditch are working together on the Jamestown Landfill project. MCM and Teichert Construction worked through the winter on the I-4 bypass.

Other projects continue throughout the six-county area in the Stockton District. Some of the newer jobs scheduled to start this spring include: The Hwy. 12 overlay paving project in San Andreas with George Reed; a $5.3 million pipeline project in Plymouth with Mountain Cascade; a project under the Hetch Hetchy Project Labor Agreement (PLA) worth $90 million at the Tesla Portal in Tracy with PCL; and the rest of the Gardella Reservoir project in Chinese Camp with Ford Construction.

For journey-level operators wanting to take advantage of upgrade training (maximum three pieces of equipment) at the Rancho Murieta Training Center (RMTC), please sign up by contacting Dispatcher Tim Grimes at the Stockton District office at (209) 943-2332.

FAIRFIELD I Ghilotti Construction keeps members busy through tough times

Despite the current economic environment, Ghilotti Construction strive to uphold its core values, which are to provide the best quality and service to their clients while taking care of their employees. The company is currently working on a $20 million project for the city of Fairfield, which involves widening the existing I-80 North Texas Street overcrossing from two lanes to four, and relocating the existing on- and off-ramps. Crews will also realign North Texas Street and Nelson Road and extend Manuel Campos Parkway. There will also be massive relocating of the existing joint-trench facilities. Angelo Utilities is completing 5,000 linear feet of joint trench for telephone lines, cable television, electric and gas. Pacific Excavation Operator Joe Barnhart set a type-31 street light while operating a boom truck. Pacific's crew will place multiple streetlights to ensure safe, nighttime driving. On the dirt side of things, more than 200,000 cubic yards of material will be hauled away. About 20,000 linear feet of curb and gutter will be placed along with 62,000 square feet of sidewalk and 24,000 tons of asphalt.

Crane Operator Dwayne Reaves and fifth-step Apprentice Alfonso Reynoso are working hard for RM Harris Company on the overpass improvements. They are widening the current overpass by performing excavation and backfill next to the abutments for the retaining walls of the bridge. Both the city of Fairfield and Ghilotti, along with subcontractors Angelo Utilities and RM Harris Company, are working seamlessly to finish these long-awaited infrastructure improvements ahead of schedule.

Member Joe Barnhart operates a boom truck for Pacific Excavation.
FRESNO 1  We have a lot to be thankful for

Spring fever is upon us, so let's cut to the chase: "Where's the work?"

In Fresno, Granite Construction is widening Road 416 in Coarsegold; Bill Nelson General Engineering is working on the Recycled Water Transmission Main project in Clovis; Agee Construction will soon be working on the Santa Fe Street overcrossing in Visalia; JWT General Engineering, Inc. is widening 13th Avenue in Hanford; and Construction Development Systems (CDS) has a $6.2 million project at General's Highway in the Sequoia and Kings Canyon National Park. Yes, brothers and sisters, that is Area 2 pay! We will not let this economy crisis defeat us, for there is light at the end of the tunnel.

A special thank you goes to Louie the chase: "Where's the work?" and John Avila of Cal Valley General Engineering and Bobby Wilson for donating the GPS equipment for our advanced gradesetting classes. In addition, Top-Con of Fresno donated the base system and receiver. Instructor Carlos Padilla feels graduates of the class will have the experience for any job utilizing GPS, without hesitation.

This year marks an important event in Local 3's history. This is our 70th anniversary, and as we celebrate this monumental occasion, we owe our success not only to ourselves but to our retirees. Take a moment to reflect on just what an accomplishment this really is and what it took for us to get here. Before 1939, it was difficult just to belong to a union. Our government had many laws that protected the employers' rights more than the workers. But this proud, no-nonsense generation at the time said, "We're not going to take this anymore!" So, they rolled up their sleeves, tightened their bootlaces, and went to work for something they whole-heartedly believed in. They stood together as one voice against everyone, from the employers to the government. They made the ultimate sacrifice to better the lives of working men and women so that we could enjoy the pay and benefits we have today.

It is important for every card-carrying member to remember: It does not stop here. Just like those before us, we have a responsibility and an obligation to ensure that the next generation enjoys even better working conditions than we do. When visiting with retirees, shake their hands, thank them and assure them you will do your part to keep this great local going forward for everyone's sake.

Thank goodness we finally have a budget, and thanks to the following members who used their voices at a state budget rally held Feb. 11 to protest the lack of one. We ask these members to take a bow, for we sincerely appreciate their time and efforts: Danny Henry, Jesse Harper, Jason Daniels, Robert Ramos, Bill Bills, Daniel Swan, Crispin Bautista, Matt Sheehan, Jody Recek, John Newman, David Estrella and Curtis Sewell.

EUREKA 1 Eureka Crab Feed: A success, as usual

Retiree Abe Sousa is proud of the long-standing tradition of the famous Eureka Crab Feed, probably because he started it in 1961 at the Moose Lodge. Now, some 47 years later, it is one of the highlights of the area, the district and the union. Local 3 members, other union members, families, friends and politicians come from miles to eat crab from the Lost Coast. This year was no different. On Feb. 14, hundreds were in attendance, including 67-year member Harold E. Darewit, and retirees Brian Bishop, Bill Burns and Gene Lake — all former Eureka district representatives.

If you've never attended a Eureka Crab Feed, we suggest you consider doing so next year, as the food, dancing, music (provided by Swingin' Country Band) and raffle prizes are worth it.
ROHNERT PARK  I Show me the money: $12.5 million coming to area

Hopefully, by the time you read this, money will have returned for public-works projects. Even through the budget crisis, work continued on some key projects in District 10. Golden State Bridge is working at 10 Mile Bridge north of Fort Bragg. Ladd is working, weather permitting, at Confusion Hill. O.C. Jones is working at Santa Rosa Junior College and started the Hwy. 101 widening project between Santa Rosa and Windsor. Placement of K-rail and centerline underground drainage is underway; demolition work is being done by Heim Bros. and tree removal by Atlas Tree Service. Ghilotti Brothers and MCM are working on the Wilfred Avenue Hwy. 101 interchange. Some minor demolition work has begun, and PG&E moved utilities. Northbay Construction is waiting for the weather to break to start the Trinity Road/Hwy. 12 turn-lane project in Glen Ellen. Northbay also has a corridor-improvement project in Boyes Hot Springs on Hwy. 12.

With the stimulus package signed by President Obama, the Sonoma County area will receive $12.5 million for overlay projects. Its roads are consistently rated among the worst in the Bay Area. The money will be divided between the county, which will receive $5 million; the city of Santa Rosa, $3 million; Petaluma, $1 million; Rohnert Park, $710,000; Windsor, $503,000; and Cotati, Cloverdale, Healdsburg, Sebastopol and Sonoma, $421,000 for each. This money should be available by May 31 in time for this year's work season.

District 10 would like to thank members Randy Bryson, Darcy Harlan, James Spain and Apprentice Tyron Jones for their help in volunteering on the Valley Power picket line in Sacramento.

YUBA CITY  I School projects should keep members busy

The work picture for the Yuba City District should be a repeat of 2008. DeSilva Gates and MCM will be working on Hwy. 70. Teichert will start again at the Star Bend setback levee.

Local school projects should put some of our members to work with bond money from propositions passed for many much-needed improvements. Six school projects are underway in Yuba and Sutter counties, as well as six for the college districts.

Lorang Brothers will return to the Yuba Wheatland Canal project, as will McGuire and Hester, which will work on two of the three pump stations in this project.

Local school projects should put some of our members to work with bond money from propositions passed for many much-needed improvements. Six school projects are underway in Yuba and Sutter counties, as well as six for the college districts.

Lorang Brothers will return to the Yuba Wheatland Canal project, as will McGuire and Hester, which will work on two of the three pump stations in this project.

DeSilva Gates should start the $30 million Tudor realignment job this year and a shovel-ready project.

The Colusa/Maxwell power-generating plant project is in full swing with crews from many crafts.

Butte County has $25 million in road improvements at Hwy. 99 in Biggs to Hwy. 162 east and a four-lane widening job south of Oroville on Hwy. 70.

Chico-area road projects are still not completed, which means more work.

With our newly passed state budget and the federal stimulus, our work picture should improve, but it's been a long, hard road for our brothers and sisters at Unit 12 Department of Water Resources (DWR), Cal Fire and Caltrans. We now have a state budget and are working on a contract that will recognize the service and sacrifice of these brothers and sisters this year.

Apprenticeship Spotlight

Yuba City's Apprenticeship Spotlight is on Jessie Rigsby, a fourth-step crane apprentice, and Steve Hrones, a first-step crane apprentice. Both apprentices work for Foundation Construction on the Chevron Refinery in Richmond.
OAKLAND | Operators stay busy in Richmond, Alameda, Contra Costa County

Work continues to move forward in District 20. At the Chevron Refinery, Fluor's crew is starting to grow, while Bigge and ARB put crane operators to work on the project.

In Richmond, Disney Construction is going steady and making good progress at the Hilltop 1-80 overpass. Sukut has ramped up at San Pablo Dam with two shifts. Raito Inc. and D.J. Scheffler have also put members to work at the dam.

In the Livermore Valley on the I-580 corridor, work continues with American Civil Constructors (ACC) working on the El-Chorro overpass. Down the road, Marquez Pipeline has a new water-main installation job. Also in Livermore, Ranger Pipeline is finishing a 42-foot water main at Airway Boulevard.

In west Alameda County, there are also a few jobs going on. With two schools making progress and the Cargill Salt Plant in Newark, R.J. Gordon is putting a few members to work. In east Contra Costa County, the Gateway Generating Station finished in mid-February. Also in that area, Carone & Company is making progress at Pittsburg High School.

As we look to the spring with optimism, let's all be prepared to get back to work, work safely and put our best foot forward this season.

NEVADA | Projects underway in Reno and Elko areas

With spring in full swing, the hope of a prosperous work season this year is on everyone's mind. The work picture is starting out fairly well with projects like the Fernley Interchange, the I-80/ Nightingale overpass and the I-80/ overlay at Incline, all with Granite Construction. Other projects on the books include Reno Street Rehab Phase 1 with Granite Construction and Phase II with Sierra Nevada Construction, as well as work on the Truckee Meadows Water Authority flume with Reno Tahoe Construction (RTC).

Although the work picture is stable, many non-union companies are picking up projects. If you notice a non-union company working, please call the Reno Hall at (775) 544-4343 or (800) 972-6100, or Organizer Dwayne Killgore at (775) 745-5246, so we can monitor their activities. With organizing and contractor compliance, we can make sure our signatory contractors are competing on a level field. We cannot allow non-union contractors any advantages in today's economy.

We would also like to remind you of the New Member Orientations (NMOs) held each quarter. The next is scheduled for 6 p.m. Wednesday, May 20 in the Reno Hall, 1290 Corporate Blvd. This is an opportunity not only for our new members but for any member to become more familiar with how the union works, your benefits and what they mean to you and your family.

Also, mark your calendars now: Honor our retirees and enjoy some delicious food at our district picnic scheduled for Saturday, June 6 at the Lazy 5 Regional Park on Pyramid Highway in Sparks. Contact the Reno Hall for ticket information.

A video presentation of the March Semi-Annual Meeting will be held at the Reno Hall at 6 p.m. Wednesday, April 15 for members who were unable to attend the meeting in Vallejo, Calif. Two Best Buy gift certificates will be given away at the presentation. Dinner will be provided by Multi-Services Trust Fund.

From Elko

Old Man Winter hit us pretty hard in February and slowed things down, but it looks like it will be another good year in the Elko area for the mines. Gold is staying above $8900 per ounce.

Ames Construction will start full construction on the site prep and county road relocation job at Cortez Hills, which should take 2-1/2 years to complete. Also, Ames Construction has a job for General Molly, which will start again soon.

N.A. Degerstrom, Inc. is currently working at Rossi Mine, Twin Creeks Mine and Highcroft Mine near Winnemucca. The Spirit Mine job shut down for the winter.

Canyon Construction will be finished at Newmont soon, but the company continues to work at Blue Mountain. Crews will start a new job at Cortez Mine soon.

Sterling Crane is preparing for the Newmont and Barrick mines to shut down.

Frehner Construction is finishing jobs on I-80 near Battle Mountain and on I-95, near Lago's Junction.

Road and Highway Builders is working on the Pequops job on I-80 east of Wells.

We would like to remind and invite all construction members in the Elko area to our monthly membership meetings, held on the second Wednesday of every month at 6 p.m. at the Elko Hall, 1094 Lamorille Highway. We will also have a video presentation of the March Semi-Annual Meeting at 6 p.m. Wednesday, April 22, for members who were unable to attend the meeting in California.

If you have any questions about anything, please feel free to contact the Elko Office at (775) 753-8761 or Organizer Allen Strong at (775) 544-4343.

Be safe out there.

Apprenticeship Spotlight

This month's spotlight highlights third-step Apprentice Chris Stiebel, who is in the grading and paving program and working on the I-580 project for C.C. Myers.
MORGAN HILL I Hollister bypass finally open

RGW completed the Hwy. 152/156 flyover bypass outside Gilroy/Hollister, and Granite Rock/Pavex completed the Hwy. 25 bypass around Hollister worth about $45 million. Delta Excavating is working on the recycled water irrigation pipeline running across Hollister. Heading north, RGW is working on a bridge replacement off Hwy. 152 outside Gilroy worth more than $5 million. HSR began a road-widening project south of Mt. Madonna. Morgan Hill has a skate park project under construction with Robert A. Bothman, Inc. at the Centennial Recreation Center.

A phrase often heard: “You are either part of the problem or part of the solution.” Please try to be part of the solution during these tough times, and help us stay strong as a union. If you are out of work, visit the Rancho Murietta Training Center (RMTTC) to stay on top of your skills, or call the Hall at (408) 465-8260 about classes such as gradesetting or Hazwoper training. You can also volunteer at the Hall. You should also have time to attend your district meetings. You can pick up beneficial information at these events and visit with your fellow brothers and sisters. Thank you to all the members who came to our quarterly district meeting in March – we’ll see you again June 3.

Congratulations go to Martin Herman of Granite Rock/Pavex for receiving his 25-year pin and Henry “Hank” Matoza of Hollist er for receiving his 60-year pin. Many thanks to both of you for your years of service.

Last but not least, don’t forget the District 90 picnic on Saturday, June 6 at Christmas Hill Park in Gilroy, home of the Garlic Festival. The event is from 11 a.m. to 3 p.m. There will be plenty of food, fun and games. Bring the whole family. Tickets are available at the Hall, 325 Digital Drive. Hope to see you there.

SACRAMENTO I Funny Photo of the Month: Sacramento Zoo demo/renovation

The type of economy most of us are used to means a new work season for Local 3 members would start right about now. But as we all know, this has been anything but a normal beginning to a new year. With an uncertain economy, political changes and the third year into a drought, we have all had to make adjustments to how we deal with our business and our personal lives.

With our new, labor-friendly president passing a stimulus package and California finally getting a budget, there is hope that we will build our way out of this mess. One thing is for sure: This adversity has inspired many of our members to get involved by coming together at rallies and voicing their opinions on how our political leadership has handled business. From all of the staff at District 80, we thank the volunteers who helped during this time.

Also, a reminder: Our Second Annual Sporting Clays Shoot will be Saturday, April 25. (See flier on page 27.) This is one way we can contribute to the OE3 Scholarship Fund and get our members and their families together. This is a fun shoot that members of all skill levels can attend. Be sure to fill out the flier and get your money in by April 17.

As far as the work picture goes, there are many bids on future work in the system. It’s just a matter of time before these jobs get our members back to work. It looks like the Thunder Valley Casino project will resume. It’s set for completion by July 2010.

Granite Construction’s $44 million 1-80 Colfax concrete-overlay job is beginning and could employ about 25 operators.

DeSilva Gates is working on the concrete median barrier and overhead signs on 1-80 starting in West Sacramento to the river and Hwy. 50 from the 50/80 split to Watt Avenue.

Teichert has the cold plane and surface project in Placerville on the Carson River overcrossing to the Sawmill Road undercrossing, worth about $4 million.

Nehemiah is working on the Hwy. 50 High Occupancy Vehicle (HOV) lane extension from El Dorado Hills Boulevard to Bass Lake Road.

In Citrus Heights, there is a proposed widening project from Sunrise Boulevard to Hazel Avenue.

Balfour Beatty is keeping members working at the Freeport Intake and Vineyard Water-Treatment Plant projects.

The Sacramento International Airport should get going, but at the time of this writing, the situation could change.

Times might be tough, but signatory company McGuire and Hester is still volunteering some work as part of a demolition/renovation job at the Sacramento Zoo. What’s at stake? Giraffes. A handful of members are putting in pads for a new giraffe barn, while demo-ing the old one as well as an old hippopotamus barn. Apparently it’s a musical chairs at the zoo. Members are also putting in new pads for a presentation area.

McGuire and Hester donated about 85 percent of its time, labor and equipment. The project should continue for another few months.

Jackhammer Operator Barry Rap demos an old hippopotamus barn at the Sacramento Zoo to make way for a new giraffe barn.

Member John Hardy Jr. cleans up debris from the old hippopotamus barn at the Sacramento Zoo.
BURLINGAME I Hospital, Devil’s Slide and bypass put members to work

In San Mateo County, Turner Construction is the general contractor under a Project Labor Agreement (PLA) for the $500 million Mills Peninsula Hospital project. A few of the signatory companies building the hospital include Malcolm Drilling, J.J. Albanese Construction, Sheedy Drayage and Cabrillo Hoist. This project will employ dozens of Local 3 members before its completion in 2010.

The Devil’s Slide project is still going strong with Kiewit Pacific drilling tunnels through solid rock for north and southbound lanes on Hwy. 1 south of Pacifica. The work is steady, and the hours are good. Kiewit will keep dozens of Local 3 brothers and sisters employed at the site for the next two years. Also in San Mateo, Joint-Venture (JV) Balfour Beatty/Shank broke ground on the $50 million Crystal Springs Bypass Tunnel on Polleuax Road. The water tunnel is part of the $10 billion Hetch Hetchy retrofit, which is under a PLA.

HAWAII I Haleakala Highway provides work in Maui

One of the few projects still active on Maui is taking place on the Haleakala Highway. Hawaiian Dredging is working on the $6.2 million project, which entails adding two lanes to the highway and converting the road to white pavement. Hawaiian Dredging subcontracted Maui Paving to prep a five-mile stretch of the highway and cold plane 1,050 feet a day until it’s finished. Hawaiian Dredging will concrete-pave it.

Congratulations to our recent apprentice graduates. Details can be found on page 4.

UTAH I Honorary member has history to tell

Spring has sprung, and work has picked up in Utah.

The wet winter held up work on light rail projects in Salt Lake Valley as well as on the Commuter Rail from Salt Lake to Provo. Kiewit-Clyde joint-venture projects in American Fork and Salt Lake are utilizing operators to get jobs back on their targeted completion dates. Kiewit is also calling operators for the power-line project from Salt Lake to the Idaho state line. Granite has picked up a paving job in Davis County and two taxilanes at the Salt Lake Airport. Geneva Rock has work along the Wasatch front. Bonding issues on a waterline have held up work for DC Transport & Excavating and MVC Construction on projects in the Heber Valley. DC Transport & Excavating starts work on the Myton job. W.W. Clyde has worked at the Water Treatment Plant in Duchesne all winter, and as soon as the snow is gone from the high country, the company will finish the Browns Park project.

Frehner Construction picked up a riprap job at the Montezuma Creek Bridge and will finish crushing for a paving project in Green River.

The state released funding for transportation projects that were put on hold in December. This funding, as well as the stimulus money for transportation projects from the federal government, should put our Operating Engineers to work this summer.

It is a great privilege to work for the membership of this union. Recently, Senior Business Rep. Kit Morgan had the honor of delivering service-award pins to Wright "Coleman" Seal, a member of Local 3 for more than 63 years. Seal, 91, joined Local 595 in Panama in 1941 and worked on several road and street projects, including a project that involved tearing out the rails along the Panama Canal and reinforcing the rail bed with armored plate, as well as an Air Strip for P-40 Fighter Planes in Casa Largo, near the Costa Rican border, prior to the U.S. entering World War II. He returned to the United States and transferred into Local 3 in 1944. He was drafted into the Navy shortly thereafter and was assigned to the "Sea Bees," a Navy construction unit, because of his construction and equipment experience. After returning from the war, he worked for several local contractors: Thorn Construction, W.W. Clyde & Co. (for 14 years), Strong Co., Jim Reed (for four years), Gibbons & Reed (for eight years) and Morris & Kudson (for eight years). He worked on projects all over southern and eastern Utah and the Elko, Nev. area and was recognized as a top finish blade operator. Seal now possesses 25-, 30-, 35-, 40-, 45-, 50-, 55- and 60-year service pins and a 50-year gold watch. We want to thank him for his many years of participation in Local 3.
REDISON I Fix-5 Partnership could ‘fix’ work picture

Spring is here, and work is picking up. With the new state budget and federal stimulus package, local municipalities and elected officials are holding meetings to discuss how to get the most funding from the state and federal government for local construction projects.

The hottest topic for us is the Fix-5 Partnership. We worked with local officials in 2007 to try to get the initiative passed. Unfortunately, it wasn’t the right time, and the issue sat dormant for the majority of 2008. Now, because local agencies are fighting for state and federal dollars, the Fix-5 Partnership has been revived. Fix-5 would establish local funds through a traffic-impact fee on new residential and commercial buildings. It would also match state and federal funds to expand I-5 to three lanes from Corning to Shasta Lake City. This is a huge project that would benefit our members. We need your help to make this happen. Please call the office at (530) 222-6093 and put your name on the Voice of the Engineer (VOTE) activist list to attend the city and county meetings in support of Fix-5.

Above and at left: Ford Construction Company, Inc. works on the waste-water treatment plant at High Desert State Prison in Susanville.

Some of the new work in our area includes: Hwy. 299 in MacArthur with J.F. Shea Company; Hwy. 299 in Weaverville with Ron Hale; Leavitt Lane Bridge in Susanville with Q&D Construction; and the Coleman Fish Hatchery in Anderson with Shimmick Construction.

We want the dirt
We want the dirt.

Work is not always pretty for an Operating Engineer. A job can be dusty, a site can be muddy, a project can entail moving dirt and sand. But while it may not be the most glamorous profession, their efforts are vital, and their skills are unmatched.

In the spirit of the Discovery Channel’s hit TV program “Dirty Jobs,” a show that highlights hard-working men and women and the jobs they do day to day without complaining, Engineers News wants to recognize OEJ members who do the same. But we need your help.

Who do you think has the dirtiest job? An oiler? A mechanic? Or is it a jobsite that needs your help? We need your help to make this happen. Please call the office at (530) 222-6093 and put your name on the Voice of the Engineer (VOTE) activist list to attend the city and county meetings in support of Fix-5.

Operating Engineers Local Union No. 3
70th Anniversary Commemorative Book

Dear Members, Retirees, and Friends of Local 3:

Operating Engineers Local Union No. 3 and M.T. Publishing Company have joined together to produce a special commemorative volume in honor of the 70th Anniversary of Local 3 founding. A special committee has been authorized by the Officers of Local 3 to head up this exciting project.

The book will feature a written history, historic and current photos, and materials submitted by union members themselves. Members are encouraged to submit photos of historic projects, special events, memorabilia, and personal accounts of important events in Local 3’s history.

In the spirit of the Discovery Channel’s hit TV program “Dirty Jobs,” a show that highlights hard-working men and women and the jobs they do day to day without complaining, Engineers News wants to recognize OEJ members who do the same. But we need your help.

2009 picnic season

It's picnic time again! Gear up your families and your appetite for this year's district picnic events.

Listed below is the schedule for 2009. Please note: The Retiree Picnic is on Saturday, May 30 at the Rancho Murieta Training Center (RMTC).

Fairfield District 04: Saturday, April 4
Rohnert Park District 10: Sunday, April 26
Fresno District 50: Saturday, May 2
Stockton District 30: Sunday, May 3
Uta District 12a: Saturday, May 9
Sacramento District 80: Saturday, May 16
Retiree Picnic: Saturday, May 30
Nevada District 11: Saturday, June 6
Morgan Hill District 90: Saturday, June 6
Hawaii District 17: Honolulu, Sunday, June 7
Yuba City District 60: Sunday, June 7
Hawaii District 17: Maui: Saturday, June 13
Burlingame District 01: Sunday, June 14
Oakland District 20: Sunday, June 28
Redding District 70: Saturday, July 11

District 04: Fairfield
Saturday, April 4, 8 a.m. - 1 p.m.
Cordeia Fire Station
2155 Cordelia Road
Fairfield
Menu: Pancakes, sausage, bacon, eggs, hash browns, coffee and juice
Cost: Retirees – free, children under 10 – $82, adults – $88 in advance, $10 at the door
Other Information: Breakfast served from 9-11 a.m.; kids' entertainment from 9:30-10:30 a.m.; raffle starts at 11 a.m.

District 10: Rohnert Park
Sunday, April 26, 8:30 a.m. - noon
Santa Rosa Veterans' Memorial Building
1351 Maple St.
Menu: Pancakes, eggs, bacon, sausage, orange juice and coffee
Cost: Retirees – free, children under 12 – free, adults – $8
Other Information: Pancake Breakfast and Motorcycle Show

District 50: Fresno
Saturday, May 2, 8:30-11 a.m.
Clovis Memorial Building
Menu: Omelets, pancakes, bacon, sausage, juice and coffee
Cost: Retirees – $8, children under 10 – free, adults – $8

District 30: Stockton
Sunday, May 3, 11 a.m. - 4 p.m.
Mieke Grove Park (off Eight-Mile Road and Hwy. 99)
Lodi
Menu: Tri-tip, asparagus, beans, salad, bread, hot dogs, nachos, ice cream and drinks
Cost: Retirees – $8, children 10 and under – free, adults – $8 in advance, $12 at the door; admission at gate – $8 per car
Other Information: Lunch served from noon – 2 p.m.

District 12: Utah
Saturday, May 9, 11 a.m. - 4 p.m.
Draper City Park
Menu: Barbecue
Cost: Retirees – free, family – $80, adults – $8

District 50: Sacramento
Saturday, May 16, 11:30 a.m. - 4:30 p.m.
Elk Grove Rotary Park
Menu: Chicken, tri-tip, hot dogs, hot links, beans and salad
Cost: Retirees – free, children under 12 – free, adults – $80
Other Information: Lunch served from 12:30-2:30 p.m.
DISTRICT MEETINGS
All meetings convene at 7 p.m.

JUNE 2009
1st District 04: Suisun City
Veterans' Memorial Building
427 Main St.

2nd District 01: Burlingame
Transport Workers' Union
1521 Rollins Road

2nd District 11: Reno
Operating Engineers' Building
1200 Corporate Blvd.

2nd District 20: Martinez
American Federation of Labor
1304 Román Way

3rd District 12: Salt Lake City
Veterans' Memorial Building
427 Main St.

3rd District 90: Morgan Hill
Veterans' Memorial Building
453 Hughes Ave.

4th District 30: Stockton
Operating Engineers' Building
325 Digital Drive

4th District 40: Eureka
Best Western Bayshore Inn
3000 Broadway

5th District 10: Rohnert Park
Operating Engineers' Building
6225 State Farm Drive

5th District 30: Stockton
Italian Athletic Club
3541 Cherry Lane Drive

5th District 50: Clovis
Veterans' Memorial Building
435 Hughes Ave.

5th District 80: Sacramento
Operating Engineers' Building
3920 Lennane Drive

5th District 70: Redding
Operating Engineers' Building
20308 Engineers Lane

6th District 17: Honolulu
Kalakaua Intermediate School Cafeteria
821 Kalakaua St.

6th District 17: Kona
King Kamehameha Kona Beach Hotel
75-5660 Palani Road

7th District 17: Kauai
Veterans Memorial Building
1919 B St.

7th District 17: Hilo
Hilo ILWU Hall
100 W. Lamishima St.

7th District 17: Maui
Hilo ILWU Hall
100 W. Lamishima St.

8th District 17: Hilo
Hilo ILWU Hall
100 W. Lamishima St.

8th District 17: Kona
King Kamehameha Kona Beach Hotel
75-5660 Palani Road

11th District 17: Kona
Kalani Intermediate School Cafeteria
821 Kalani St.

12th District 17: Maui
King Kamehameha Kona Beach Hotel
75-5660 Palani Road

OFFICIAL ELECTION NOTICE:
NOMINATION RULES FOR THE ELECTION OF OFFICERS AND EXECUTIVE BOARD MEMBERS

Recording- Corresponding Secretary James K. Sullivan, in compliance with the Local Union Bylaws, Article XII, Section 2(b), publishes the following notice:

• NOTICE OF RIGHT TO NOMINATE:
  Article XII, Elections, Section 2(j)
  Eligibility of Members to Nominate: Every member of the Parent Local Union and its subdivisions, except Subdivision R (registered apprentices) and except for owner-operators of an entity that employs Operating Engineers, who is not suspended for non-payment of dues preceding the first nominating meeting, shall have the right to nominate.

• NOMINATION FORMS
  Article XII, Elections, Section 2(e)
  Nominations shall be in writing and signed by one or more nominators giving the last four digits of each nominator's Social Security number and registration number in the following form:

  NOMINATION FORM

  Nominations shall be in writing in the following form and shall be delivered by the nominator to the Nomination Committee at the meeting on instructions of the presiding officer.

  We hereby nominate ________________________________

  Registration No. ____________________ Social Security No. ____________

  For ____________________ (Insert Office or Position) (last four digits only)

  Signature ____________________ Social Security No. ____________

  Registration No. ____________________

  ____________________ (last 4 digits)

  ____________________

• NUMBER OF NOMINATORS REQUIRED
  Article XII, Elections, Section 1(a)(b)
  The minimum number of nominators required is 200 for a candidate for office.

  Article XII, Election, Section 1(c)
  The minimum number of eligible nominators required for District Member of the Executive Board is five members from the District.

NOMINATION MEETINGS FOR THE 2009 ELECTION OF OFFICERS AND EXECUTIVE BOARD MEMBERS

• See the schedule at left for the location of the regular District Meetings where nominations will be made:

  ALL MEETINGS WILL CONVENE AT 7 P.M.
In 1997, the Local 3 Election Committee voted to add members’ registration numbers to the address labels for Engineers Necess.

Having the member registration number on the Engineers Necess label makes it easier for you to properly fill out and return the election ballot with the correct information.

Operating Engineers Local Union No. 3 Scholarship Foundation

Giving gifts that last a lifetime

A charity is only as strong as its contributors want it to be, and the Operating Engineers Local Union No. 3 Scholarship Foundation is no exception. Today the foundation is strong both financially and in the support it receives from Local 3. It has grown substantially in the last several years, with much of its success due to an increase in donations from members, friends of labor and the employer community. Most contributions come in the form of traditional cash donations, but some have chosen more creative methods. Because of tax considerations, some donors are able to give a gift that is greater than they thought possible. These gifts help build the strength and future of the scholarship foundation and allow the donor to experience giving the gift of a lifetime. The Operating Engineers Local 3 Scholarship Foundation offers a variety of ways to contribute:

- Cash gifts in any amount to the general scholarship fund.

- Merit sponsors and memorial and honor gifts. You can contribute to the Scholarship Foundation in the memory or honor of a loved one, friend or colleague or to commemorate a special occasion. The Foundation will acknowledge your gift to the person(s) you designate and will provide written acknowledgement of your gift and the amount. A $500 minimum is necessary to establish a named gift, and there are three donation levels:
  - Merit: $500
  - Second-place academic: $85,000
  - First-place academic: $86,000

- Bequests. Gifts made through your will allow you to retain control of your assets during your lifetime and distribute them as you wish upon your death. Many people choose to include a gift to the Operating Engineers Local Union No. 3 Scholarship Foundation. The most common types of bequests are leaving a fixed dollar amount or specific property. A charitable bequest may reduce your estate tax. Consulting an attorney is advised any time you make or change a will.

- Securities. There may be an advantage to giving marketable securities – stocks, bonds or mutual funds – instead of cash. In some cases, you may receive a charitable deduction on your taxes, as well as avoid taxes on capital gains. Consult your financial adviser for details.

If you would like more information on donating to the Scholarship Fund, or if you have questions, please contact the Rec. Corres. Secretary James K. Sullivan, at (510) 748-7400.

Honorary Membership

The following retirees have 35 or more years of membership in Local 3 as of February and are eligible for Honorary Membership effective April 1.

MEETINGS & ANNOUNCEMENTS
April 2009 | 29
In loving memory: Harold Dean ‘Missouri’ Batye
June 21, 1938 – Jan. 6, 2009

Harold Dean “Missouri” Batye hailed from a small Midwestern town in the “Show-Me-State,” where he joined the Operating Engineers in 1957 when he was just 17 years old. He joined because his father, Harold, was a die-hard member, as was his brother, Dewayne.

In 1964, he moved west to California where he earned his nickname because of his origin, his accent and his cowboy boots and hat.

On the job, he was known as one of the best scraper hands to ever climb into the seat, and many young scraper hands spent hours riding on the fender of a 637 while he taught them his trade. His stories would draw the whole crew to his side as they ate lunch. His motto was: “Never back up for your check; always give a hard days work for a good days pay.”

He stayed active in the union and was a member of Local 3’s Grievance Committee for six years.

He leaves behind a wonderful legacy of union members in his sons, nephews, and sons-in-law. Operating Engineers Local 3 salutes you, Missouri. You will be remembered. You will be missed.
FOR SALE: Field mechanical tools, air impacts from 9/4-inch to 1-inch, specialty C tools, heavy duty truck trash container, air hammer. Everything needed for on-site repairs and major overhaul—pulleys, micrometers, torque wrenches, all Snap-On, Mac. C.O.D. Call (916) 577-5487 for testing tools for computer vehicles. Combating economic stress:
Everyone's going through it

By Mandy Jessup, managing editor

Whether you're fortunate enough to be working right now or you're on the out-of-work list, it is impossible not to be affected by the current market. We are exposed on a daily basis to bad news about the banking crisis, falling housing prices, rising consumer debt and declining retail sales. This news does not help consumers' confidence or their stress levels. Working in an industry that succeeds based on funded projects and economic booms means you're at an even higher risk for dealing with great emotional burden.

Collett's Brett Jordan is working right now but knows times are lean for the industry. He keeps his mind off economic stress by "starting plenty of projects at my house," and urges those not working to save money and stay busy in any way they can. The worst thing to do, according to him, is sit in front of the TV.

Six-year member Jose Flores commented: "There is no money right now - no money for contractors, no money for jobs." He knows people who are losing their homes after they've been laid off. Norberto Gonzalez worries that as long as the work picture remains grim, he may have to tell his daughter that she will have to help pay her Penn University tuition. She was even an Operating Engineers Scholarship Fund first-place winner, but college tuition is high as ever and keeping right in line with inflation.

Retiree Bill Marshall advises people to save 10 percent of their money and "tighten their belt." His friend and fellow Retiree Ken Bettis suggests people not buy new cars and learn how to depend on themselves and "prepare for something like this."

Forty-nine-year member Paul Yeoman said: "Quit spending money on stuff you don't absolutely need until this is over."

"This is the worst I've seen," he said about the economy.

Money and the state of the economy are two of the top sources of stress for 80 percent of Americans, according to the American Psychological Association (APA's) 2008 stress in America survey. Psychologists claim that while there are some unknown effects in every economic downturn, our nation has experienced recessions before (as has our union).

The APA offers these tips to help deal with stress about money and the economy:

- Identify your financial stressors and make a plan. Write down specific ways you and your family can reduce expenses or manage your finances more efficiently. Then commit to a specific plan and review it regularly. If you are having trouble paying bills or staying on top of debt, reach out for help by calling your bank.
- Recognize how you deal with stress related to money. Instead of turning to alcohol or drugs (which will negatively impact your pocketbook and your health), try taking a walk. Plan and cook a meal at home with your family instead of eating out. The key is to use this time to think outside the box and try new ways of managing your life.
- Get involved in healthy activities through your local church, your child's school or YOUR UNION. District meetings are a great way to meet other members who may share your anxieties and are a great source of information about your union. For a schedule of these meetings, see page 28 in this edition.
- Realize you are not alone in your fears and that economic swings are a natural part of life.

From left: Retirees Bill Marshall, Dave Jordan, Paul Yeoman, Bill McHenry and Ken Bettis have a thing or two to say about dealing with stress in an economic downturn. They've been though it before.
