Operating Engineers help construct a state-of-the-art intermodal facility in Stockton that will attract major trucking companies and independent businesses.
Master agreement extension locks in good wages for 4 more years

I have always tried to adhere to the old axiom, “Live each day to the fullest because you never know what tomorrow will bring.” That familiar saying was certainly on my mind when Local 3 signatory employers asked me a few months ago about making some changes to the Master Agreement for Northern California.

Right now the construction economy is booming. Our construction hands are living each day to the fullest with gainful employment and, in many cases, plenty of overtime to fatten their paychecks. But a series of interest-rate increases by the Federal Reserve Board over the past year concern me. If the increases continue, I’m worried they could start to slow our private-sector work, to the point where you never know what tomorrow will bring.

Although public-sector work appears strong for at least the next several years, the private work picture could hit some bumps if interest rates continue to inch upward. For that primary reason, and several others, I decided to negotiate a four-year extension of the Master Agreement for Northern California. I decided it was best for our construction members to lock in some decent wage increases now while the economy is still hot. That way, if higher interest rates slow the private market, we’ll be in good shape.

The officers and I just completed a round of meetings during which the effected members overwhelmingly ratified the four-year extension of the California Master Agreement. The article on the next page explains the details.

The new agreement provides those working under the contract a 4.23-per-hour across-the-board wage increase over the four-year deal, $1.05 per hour beginning June 16, 2002, and $1.06 in each of the final three years. These are some good wage increases that all effected members deserve and can feel good about during this period of robust work opportunities.

Supplemental dues

Because of Local 3’s highly successful organizing program, which has taken our membership to a record high of more than 37,000 members, the employers offered 45 cents per hour in supplemental dues over the four years: 15 cents per hour in 2002 and 10 cents per hour in the remaining three years.

I want to emphasize that these increases do not come out of the wage increases; they are above and beyond the $4.23-per-hour raise. Also, keep in mind that, according to the new bylaws, the window dues for those working under the agreement will go down 86¢ per month from the formula for each 10 cents per hour paid in supplemental dues.

As Local 3 President John Bonilla has stressed in recent months in his Talking Points column, the union has launched an all-out campaign to preserve our equipment jurisdiction in the construction industry. To further enhance this effort, 1 cent per hour will be allocated to the Heavy and Highway Committee. I want to emphasize again that the 1 cent does not come out of the wage increases.

Apprenticeship

Another very positive provision of the new contract provides some long-overdue wage increases for our apprentices. Operating Engineers are the highest-skilled members of the construction trades, and in order to keep it that way, and to keep our employers competitive with the non-union, we have to continue to recruit, train and sustain a skilled workforce. The key to attaining this goal is to maintain a quality apprenticeship program. The younger members are the future of the industry.

For this reason, the employers and I agreed to increase the apprenticeship wage rates for POPs and Step 1 and Step 2 apprentices. POPs will now go from earning 45 percent to 55 percent of journey-level scale, Step 1 from 50 percent to 60 percent of journey-level scale, and Step 2 from 60 percent to 65 percent of journey-level scale. There were no changes for Step 3 and Step 4 apprentice wage rates.

Negotiating a contract is always a give-and-take process in which one side has to give if it also wants to receive. In our case, the employers wanted — and I agreed — to extend from 24 hours to 72 hours the amount of advanced notice the union has to give employers when the union intends to withdraw employees during a manning dispute. I think this is totally reasonable and gives both sides more opportunity to work things out when we don’t agree.

In closing, I want to thank all of those members who took the time to attend the ratification meetings and for ratifying the four-year extension.
Members approve 4-year extension of N. Calif. master agreement

Local 3 members overwhelmingly ratified last month a four-year extension of the Master Agreement for Northern California. The new agreement, effective June 16, 2002 to June 15, 2006, was approved by 93 percent of those who attended ratification meetings held in each Northern California district from Aug. 1-11.

Wages

The agreement includes a hefty $4.23-per-hour across-the-board wage increase over the four-year period of the extension: $1.05 per hour effective June 16, 2002; $1.06 per hour effective June 16, 2003; $1.06 per hour effective June 16, 2004; $1.06 per hour effective June 16, 2005. These increases will be allocated to wages or fringe benefits, or both, by the union.

Supplemental dues

Because of Local 3’s highly successful organizing program, the employers offered - and the members approved - supplemental dues to be allocated per year at the following per-hour rate: 15 cents effective June 16, 2002; 10 cents effective June 16, 2003; 10 cents effective June 16, 2004; 10 cents effective June 16, 2005. The supplemental dues rates are above and beyond the wage package; they do not come out of the wage increases.

Heavy & Highway Committee

In an effort to further enhance the construction industry and to preserve Local 3’s jurisdiction, 1 cent per hour will be allocated to the Heavy and Highway Committee effective Jan. 1, 2001. This amount is also above and beyond the wage package; the 1 cent per hour does not come out of the wage increases.

Apprenticeship

To keep the Operating Engineers the best in the industry and to keep Local 3 signatory employers competitive with non-union employers, apprentice pay rates will be increased effective Jan. 1, 2001 as follows: POP from 45 percent to 55 percent of journey-level scale; Step 1 from 50 percent to 60 percent; and Steps 2 from 60 percent to 65 percent. Step 3 remains at 70 percent of journey-level scale, and Step 4 remains at 85 percent.

Withdrawing employees

In addition to the above changes, the extension modifies Section 18.03.04, which currently requires the union to give employers 24 hours notice of its intention to withdraw employees during any dispute, complaint or grievance concerning any manning provision or Section 04.00.00 (employment). Under the new agreement, the amount of notice is changed from 24 hours to 72 hours by letter.

New equipment classifications

And finally, the extension adds several new equipment classifications: spider plow and spider puller (Group 4, two operators), concrete barrier moving machine (Group 6, two operators), self-loading chipper (Group 8A), microtunneling machine (Group 4), long-reach excavator (Group 3), foundation hydraulic rig, Fundex or similar; (Group 2), Tubex piles and Tubex grout injection piles (Group 2).

Dick Cheney is not our friend

It's becoming more obvious that electing George W. Bush president would create new barriers and cause major setbacks for unions everywhere. Our fight for better working conditions and a living wage is difficult enough with a Republican Congress. Imagine what would happen if both the presidency and both houses of Congress were controlled by Republicans. Imagine what would happen if Bush's running mate Dick Cheney was called to cast a tie-breaking vote in the Senate.

What if that tie-breaking vote repealed the Davis-Bacon Act? Even worse, what if Dick Cheney became president? Talk about a nightmare.

If you think this can't or won't happen, you may want to take a minute to review Cheney's anti-labor voting record (see related story Page 5). Since 1979, Cheney opposed the Davis-Bacon Act four times. In 1988, Cheney opposed federal leave for family workers. And in 1984-85, Cheney supported cuts in Medicare and raising the Social Security retirement age to 67.

Maybe you have kids. Dick Cheney is not their friend either. In 1979 he opposed creating the Department of Education, which provides funding for schools and underprivileged children across the country. He also voted against funding for Head Start, a program that provides aid to needy children in school. Believe it or not, Cheney was one of only 25 House members to vote against financial aid for struggling college students, and one of just eight to vote against child immunization programs.

If all this is news to you, don't be surprised. Many Americans aren't familiar with Cheney's record as a House member from 1978-1989. But now that you know, you can consider this on election day, which is less than three months away. Union members can have a significant impact on its outcome if they vote for candidates who support working families. George W. Bush and Dick Cheney are not pro-labor. They are not our friends.
LIKE FATHER, LIKE SON

Republican presidential candidate George W. Bush, like his father, the former president, is no friend of labor

Bush’s LABOR RECORD AT A GLANCE

- Opposes real minimum-wage increases
- Supports paycheck protection laws like Prop. 226
- Brags about Texas’ right-to-work status
- Tried to raid state pension funds
- Routinely vetoes pro-labor legislation
- Supports privatization of Medicare and Social Security
- Supports school vouchers

Former Presidents Ronald Reagan and George Bush used their executive powers and much of the federal bureaucracy to crush the labor movement for 12 consecutive years from 1981 to 1992.

This vicious anti-union crusade began with the firing of thousands of unionized air-traffic controllers in 1981 and continued relentlessly until 1992, when Bill Clinton defeated Bush in that year’s general election.

Before most working families realized what hit them, they had taken a disheartened journey toward lower wages, lost dreams and a lower standard of living. The once great American middle class was decimated by high unemployment, massive credit-card debt, huge federal budget deficits and the largest wealth transfer in U.S. history. When the Reagan-Bush era was over, the United States had gone from being the world’s largest creditor nation to the world’s largest debtor.

It has taken the Clinton-Gore administration eight years to repair the damage: to balance the federal budget, reduce the national debt and bring economic stability back to this nation. But now Bush’s son, George W. Bush, is running for president, and if elected, vows to resume where Reagan and his father left off. George Jr. wants to take working families back to an era most would prefer to forget.

Union members need only consider the younger Bush’s record as Texas governor and what he has said on the campaign trail to understand just how vehemently anti-union he is. Bush brags about Texas’ right-to-work status, has repeatedly tried to reduce state worker benefits, routinely vetoes pro-labor legislation, and is closely associated with anti-labor factions in Congress.

BUSH ON WAGES

Bush does not support real federal minimum wage increases. In an Aug. 24, 1999, interview with the Associated Press, Bush said he supports raising the federal minimum wage by a measly $1 an hour, but only if states can opt out, a condition that would render such an increase meaningless.

Bush attacked the Clinton administration in 1997 for ruling that Texas welfare recipients placed in public service jobs should be paid the federal minimum wage. Bush argued that workers should not be paid more than their monthly welfare payments of $188. Under Bush’s proposal, a welfare recipient who worked 40 hours a week would effectively earn an hourly wage of just $1.18. Many Texans wonder where the “compassionate conservatism” was in that idea?

BUSH SUPPORTS PAYCHECK PROTECTION

Remember Prop. 226, the 1998 California ballot proposition that attempted to silence workers’ voices by requiring unions to get permission from every member before using money for political purposes? Bush supports these types of laws, which have come to be euphemistically called “paycheck protection.”

At a Dec. 13, 1999, presidential primary debate in Des Moines, IA, Bush said: “I think we ought to have paycheck protection. I think we ought to say to the union members that you don’t have to contribute if you don’t want to, to campaigns and to causes that your union bosses decide you have to spend money on.” As president, Bush would likely support a national paycheck protection bill.
(continued from previous page)

**BUSH PROUD OF RIGHT-TO-WORK**

Bush constantly raves about Texas' right-to-work status. In 1998, for example, Oklahoma Gov. Frank Keating told the Tulsa World that Bush told him: "I can tell you why Oklahoma is so poor," Bush said. "You don't have right-to-work. You have high workers' comp and you tax everything." Keating went on to say that Bush is telling companies that are looking to locate in central states the same thing.

In an attempt to steal jobs from other states, Bush's Texas Department of Economic Development brags about the state's anti-labor business climate. Among the statistics cited on the agency's Web site is:

- "Texas is a right-to-work state with low unionization of the manufacturing workforce.
- The average manufacturing wage in Texas was $12.15 per hour in 1998, almost 10 percent below the U.S. average of $13.49."

Bush has said publicly that if elected president he would support a national right-to-work bill, which would make all 50 states open shop, meaning unions and employers would be prohibited from signing union security agreements.

**LOW WAGES, POOR FAMILIES**

Despite a booming job market, many Texas families still don't make enough to meet basic needs. According to a 1998 study by the National Priorities Project and Jobs With Justice, 79 percent of jobs in Texas' fastest-growing employment sectors — child care, home care, janitorial and waiting tables — paid on average more than $5.15 an hour. That's $6,200 per year for full-time, year-round work, according to a March 1999 study by the Center for Public Policy Priorities, "far below the poverty level for a family of four.

**BUSH ENDANGERS WORKERS' BENEFITS**

During the 1999 Texas legislative session, Bush tried but failed to raid the state's workers' compensation fund, which is used to help employers that cannot afford private workers' compensation insurance. He backed a bill to shift $400 million of surplus money from the workers compensation fund into the state's general fund. Four years earlier he cut $400 million in funding for the Teacher Retirement System by cutting the state contribution from 7.31 percent to 6 percent, even after Bush promised in his 1994 gubernatorial campaign to "oppose any effort to reduce contributions to the fund."

Although education reform is one of Bush's top campaign themes, he tried in 1997 to raid the Teacher Retirement System of $47 million to pay for an enormous tax cut for the wealthy. He also supported a bill to allow corporations to raid pension funds to finance mergers and acquisitions.

Under Bush, the Teacher Retirement System health plan, which provides more than 117,000 retired public school employees and their dependents with health care insurance coverage, will become insolvent this fall without a major overhaul and funding, according to a 1998 House committee report. The system, the report said, will need more than $2 billion to be solvent by 2008.

The sale of an Austin office building to a Bush business partner cost the teachers' pension fund $44 million. The building, which needed major structural repairs, was sold at a huge loss to Crescent Real Estate Equities, a real estate trust formed by former Bush business partner Richard Rainwater. Bush is also an investor in Crescent, but claims no knowledge of the deal because his holdings have been in a blind trust since his election as governor in 1994.

In considering Bush's labor record and his campaign platform, the questions union members will want to ask when they go to the polls on Nov. 7 is: Which candidate will best represent my interests in the White House? Is Bush the kind of president who will help me and my family maintain a healthy standard of living?

Next month: The final installment of this 11-part series will examine the presidential candidacy of Vice President Al Gore.

**DICK CHENEY'S RECORD**

The Republican presidential ticket of George W. Bush and Dick Cheney consists of two wealthy Texas oilmen who both went to Yale and avoided going to Vietnam. Cheney, who served in the House of Representatives from 1978 to 1989, proved he too is as anti-working family as Bush. In his 11 years in the House, Cheney:

- Voted to increase retirement age for Social Security to 67.
- Voted in 1985 against legislation that would have prevented divestment of Social Security funds.
- Voted against granting states funds to provide health insurance to the unemployed.
- Voted to allow construction companies to circumvent labor laws.
- Was one of just 21 House members to vote against a ban on police-killer armor-piercing bullets in Dec. 1985.
- Opposed extending aid to low-income home buyers.
- Voted against Head Start funding.
- Voted against the creation of the U.S. Dept. of Education.
- Opposed a call to release South African President Nelson Mandela after 23 years in prison and voted against economic sanctions that helped crush apartheid.
- Was one of 29 members who opposed the collection of hate crime data in 1988.
- Voted against the Equal Rights Amendment.
- Supported drilling for oil in the Arctic National Wildlife Refuge. Cheney's oil company, Halliburton, operates a facility in Duncan, Okla., that, according to the EPA, is one of the heaviest polluters in the country.
ONE OF OUR OWN

Debbie Smith, fringe benefits rep in the Reno District office, is among a surging corps of union members who are running for elected office this November

By Steve Moler • Managing Editor

It's not difficult to understand why elected representatives in Congress and in state legislatures so often favor business interests over working families. The vast majority of lawmakers are among the corporate elite - investment bankers, stockbrokers, financial advisors and corporate lawyers.

In the U.S. Congress, for example, 181 members are either bankers or businesspeople; another 172 are lawyers. The percentages in state and local bodies are similar. Women, who represent 51 percent of the nation's population, make up just 12 percent of the House and 9 percent of the Senate. The percentage of women serving in state legislatures is only slightly higher.

To better balance political power and strengthen the voice of union members and working families across America, the AFL-CIO, in conjunction with its affiliates, state labor federations and central labor councils, launched the 2000 in 2000 initiative in 1998. The program aims to get 2,000 union members elected to public office nationwide by the November 2000 election. As of last spring, the program had almost met its goal when some 1,970 union member candidates were identified.

One of the those candidates is one of our own. Debbie Smith, a fringe benefits representative in the Reno District office for 18 years, is running for Nevada Assembly District 30, a seat previously held by Democrat Jan Evans, who announced in February that she would not seek re-election for health reasons and then died on April 24. District 30 covers Greenbrae, portions of Sparks and southeast Reno.

"Quality education and issues such as health care and prescription drug costs, which affect working families, are very important to me," Debbie said. "As a wife, daughter and working mom, I believe I understand the issues that affect Nevada's citizens."

Debbie brings a wealth of valuable experience to her candidacy. She is one of the leading public education activists in the Reno-Sparks area. Her activities over the past 21 years have focused primarily on parent involvement.

In addition to her Local 3 job, Debbie worked three years for the Washoe County School District as a parent coordinator, a position in which she helped parents get more directly involved in their children's education.

She gained valuable legislative experience as a former president and board member of the Nevada Parent Teacher Association for eight years. During this time, she lobbied and testified in front of the Nevada Legislature numerous times on education and family issues.

Debbie has served on many advisory committees, including the Overcrowding Task Force, Budget Advisory Committee, Strategic Planning, Older Schools Improvement Task Force, Parent Day, and worked on several school bond initiatives. She also served on the statewide Goals 2000/Nevada 2000 and the task force for development of the 11th Grade Proficiency Examination.

She was appointed by Gov. Bob Miller in August 1997 as chair of the Council to Establish Academic Standards for Nevada public schools. Gov. Kenny Guinn reappointed her to the position last year. She was the recipient of the 1998 Mike O'Callaghan Unitec Way Teamwork Award, which is an award in collaboration with the Nevada State AFL-CIO.

Debbie has been married to Greg Smith for 26 years. The two have three children, Olivia, 22, Ian, 19, and Erin, 14. Olivia and Ian attend college and Erin enters high school this fall.

Debbie, a member of Local 29 of the Office and Professional Employees Union, has been endorsed by Local 3, the Nevada AFL-CIO, Reno Firefighters Union and the Nevada Education Association.

Local 3 urges all union members living in Assembly District 30 to vote for Debbie Smith on Nov. 7.

For additional information about Debbie's campaign, call (775) 331-0897. You can find her on the Internet at www.deb-
Keeping Our Political Edge
Several vital races in California hold key to maintaining and strengthening labor's political clout at the federal and state levels

24th Assembly District Rebecca Cohn (D) vs. Sue Jackson (R)

District description: Covers the heart of Silicon Valley, including Cupertino, Saratoga, Campbell, Los Gatos, and portions of Sunnyvale and San Jose, including Almaden Valley, Blossom Valley, Cambrian, Santa Teresa and Willow Glen.

When Assemblyman Jim Cunneen decided to run against Mike Honda for the 15th Congressional District, this district in the heart of Silicon Valley became a hotly contested race, pitting Democrat Rebecca Cohn, a health-care business consultant, against Republican Sue Jackson, currently the mayor of Monte Sereno.

Cohn has been endorsed by all the area’s major unions, including Local 3, because she advocates for working families. Her top priority in the Assembly would be to address Silicon Valley’s transportation needs, guarantee all children a quality education, and create more affordable housing.

Cohn has the state-level experience to deliver on her commitments. As the Legislature’s appointee to the California Industrial Medical Council, Cohn was instrumental in initiating the state’s Medical Examiner competency exam and developing treatment guidelines for common industrial injuries.

A recognized community leader, Cohn has participated in the Diversity Task Force of Joint Venture Silicon Valley and was selected by the Santa Clara County Board of Supervisors to serve on the County Domestic Violence Council. Committed to economic growth that benefits all Californians, Cohn was one of a select group of business leaders to attend the California State Economic Summit.

The labor movement believes Cohn is the kind of high-tech, highly experienced, labor-friendly candidate who can best represent the district.

28th Assembly District Simón Salinas (D) vs. Jeff Denham (R)

District description: Covers parts of Monterey and San Benito counties, the Watsonville area of San Cruz County, and parts of southern Santa Clara County.

With Republican Peter Frusetta terming out, this race is wide open, with Republican Jeff Denham running against Democrat Simón Salinas, who has been enthusiastically endorsed by Local 3 because of his very positive record in support of working families and organized labor.

Since he began his political career in 1989, when he was the first Latino elected to the Salinas City Council, Salinas has stood with working families. In his current position as a two-term Monterey County supervisor, he has spoken out for workers in labor disputes throughout Monterey County and has led efforts to provide adequate wages, benefits and union representation to home health care workers.

When he was an elementary school teacher, he served as a local representative of the California Teachers Association. He actively opposed Prop. 226, the initiative that attempted to silence workers’ political voices by requiring unions to obtain permission annually from individual union members to use dues for political causes.

As an assemblyman, Salinas would support only those economic development efforts that bring broad benefits to the community, including good wages and benefits. He also would work to prevent companies from using taxpayer dollars to interfere with union organizing campaigns. He would also ensure that companies with serious safety problems are barred from bidding on public contracts.

Salinas is a native of Salinas. He is one of 12 children of a migrant farmworker family and the first member of his family to attend college. He’s a graduate of Claremont McKenna College and Santa Clara University law school.

3rd Congressional District Bob Kent (D) and Doug Ose (R)

District description: Covers all of Tehama, Glenn, Colusa, Yolo and Sutter counties, and portions of Butte, Sacramento and Solano counties.

Two years ago, the Republicans snatched this seat away from the Democrats when longtime incumbent Democrat Vic Fazio decided not to seek re-election and Doug Ose defeated Sandy Dunn in the 1998 election. Now Bob Kent, a staunchly pro-labor Central Committee. Before that, Kent worked as a public health investigator and police officer in Monterey County.

The 3rd Congressional District represents a golden opportunity for the Democrats to win one of the six seats they need to regain a majority in the House. Fazio held this seat for 20 years, and with the district having slightly more registered Democrats than Republicans, Kent definitely has a good chance of winning. But a victory will require a large union household turnout on Nov. 7.

Bob Kent (D)
speaking out

Supervisors need formal training too

I have reported on Local 3's training programs and focused on members' skills as we attempt to provide our signatory contractors with able and efficient operators. This month I want to talk about first- and second-level supervisory training.

In today's market, union contractors bid more design-and-build projects. These contractors often hire young engineers just out of school to design and build these projects. These young engineers have plenty of book knowledge, but lack the field experience needed to efficiently direct the workforce.

In the past, contractors selected supervisory personnel from trade craftsmen who possessed skill and experience. These craftsmen were often Local 3 members.

Workforce performance in the field is critical to the success of any construction project. This kind of performance requires first- and second-level supervisors who can communicate with individual workers. Supervisors must also be able to plan and direct the expansion of the jobs to completion. Formal training can enhance the ability of supervisory personnel to improve its crew's performance.

I don't disagree that formal training of first- and second-level supervisors should normally be the employer's responsibility. Studies unfortunately indicate only 11 percent of construction companies surveyed acknowledge any type of training for supervisors. One study also claimed that 20 percent of job costs were due to lack of planning and functioning knowledge at the middle-management level. These studies came from management itself.

Labor and management are in this together. That is why joint committees have been so effective in training people to be productive workers. Over the years, unions and employers have had equal say in how apprentices should be trained.

The ultimate goal of training is to increase productivity, keep contractors in business, and make a profit that supports the company and its employees. For our economic survival, we must commit ourselves to this goal.

Local 3 members now eligible for new, no-cost insurance programs

Local 3 would like to introduce its members to American Income Life Insurance Company (AIL). Established and growing since 1951, its dedication to working people has made it the largest provider of supplemental insurance in the United States. It has earned the respect of unions nationwide because it is a 100 percent wall-to-wall Union Label insurance company.

A letter will be sent out this month to all Local 3 members informing them of the company's new accidental death and dismemberment (AD&D) coverage and health discount program provided to Local 3 members at no cost by AIL. Included with the letter will be an enrollment card. We ask that each member and retiree fill out and mail back the postage-paid card within 10 days in order to receive these no-cost benefits.

To briefly summarize the program, AIL is providing at no cost to each member and retiree a $1,000 AD&D policy, $500 for their spouse and $250 for each child under 19 years of age. In addition, a discount health program is available to all family members, which provides discounts up to 80 percent for vision, dental, chiropractic, hearing and prescriptions as well as other services.

Note: These supplemental benefits do not conflict with or replace any benefits currently provided by Local 3. They are in addition to your union fringe benefits.

The AD&D coverage is automatic for all members, retirees, spouses and minor children. However, you must return the yellow enrollment card to receive your AD&D policy and health services discount card, name your beneficiary and receive information about other programs and services.

Here are some of the many reasons why AIL is the insurance company of choice for unions:

• Supports the union movement both in deeds and words. AIL contributed $100,000 to help defeat Proposition 226 in California.
• Premiums are waived for members holding AIL policies while the insured member is on an authorized strike. Those members never have to pay those premiums back. AIL is the only insurance company with strike waiver.
• Maintains a food bank for union families in need.
• Representatives are active in union activities. They promote a "Be Union - Buy Union" philosophy and have been cited as an all-union company by the AFL-CIO Union Label and Services Trades Department.
• Supports pro-labor candidates and legislation.
• Provides scholarships, strike relief, food banks and supports many worthwhile union community causes.

American Income Life looks forward to working with the members of Local 3 while giving them a union choice for their insurance needs. For any additional information, please contact Amber at American Income Life, toll free at 1-888-252-3550. Do not call Local 3 or trust fund offices.
MISSION STATEMENT

Local 3 is committed to providing our employers and agencies with the highest skilled union members possible so the union can negotiate the best possible wages, fringe benefits and working conditions for our members. This cooperative relationship aims to improve the employer's competitiveness while raising the living standard and quality of life of union members and their families.

Local 3 is also committed to:

- **Electing politicians** who support legislation and policies favorable to union members.

- **Creating a level playing field** for employers in the public bidding process.

- **Building the highest quality infrastructure** for the public good.

- **Providing Local 3 members** with a full-service and convenient financial institution, the Operating Engineers Local Union No. 3 Federal Credit Union, to help facilitate members' pursuit of a higher standard of living.

- **Providing Local 3 members** with a sound pension and retiree medical plan so union members can retire with dignity and financial security.

- **Providing quality apprenticeship** and journey-upgrade training so Operating Engineers can be the best in their respective industries.

- **Improving the public education system** through the support of bonds and other financing of school infrastructure.
COMBINING PRESCRIPTION AND OVER-THE-COUNTER DRUGS CAN HAVE DANGEROUS CONSEQUENCES

Although mild and relatively uncommon, interactions involving over-the-counter drugs can produce unwanted results or make other medicine less effective: It's especially important to know about drug interactions if you take prescription and over-the-counter drugs at the same time.

The Federal Drug Administration offers the following examples:

- Some drugs can also interact with food and beverages.
- Drugs can also interact with health conditions such as diabetes, kidney disease and high blood pressure.
- Avoid alcohol if you take antihistamines, cold products with the ingredient dextromethorphan, or drugs that treat sleeplessness.
- Do not use drugs that treat sleeplessness if you take prescription sedatives or tranquilizers.
- Do not use prescription sedatives or tranquilizers.
- Check with your doctor before taking products that contain aspirin if you take a prescription blood thinner, or if you have diabetes or gout.
- Do not use laxatives when you have stomach pain, nausea or vomiting.
- Do not use cold or weight-control medicines with the ingredient phenylpropanolamine (PPA) if you're being treated for high blood pressure or depression, if you have heart disease, diabetes or thyroid disease, or if you take other medicine that contains PPA.
- Unless directed by a doctor, do not use a nasal decongestant if you take a prescription drug for high blood pressure or depression, or if you have heart or thyroid disease, diabetes or prostate problems.
- This is not a complete list. Read labels. Drug labels change as new information becomes available. That's why it's important to read the label each time you take medicine. Be sure to check with your doctor if you have any questions concerning the medication you take.

If dot com companies had been around in 1829, they would have competed to market Salicin, which had just been discovered and isolated from willow bark that year.

Salicin is the parent of the salicylate drug family, from which aspirin was later derived. Aspirin has proven to be a true wonder drug.

Felix Hoffman invented aspirin in 1897. Aspirin had been successfully used for arthritis and pain relief until about 1970, when British pharmacologist John Vane decided to study aspirin to see how it actually worked.
Credit union philosophy includes helping others with special needs

One of the joys of writing this column is the opportunity it gives me to hear from members who are pleased with the service they receive from the Operating Engineers Credit Union staff. I'm pleased to report two recent events that illustrate how our philosophy of helping others extends beyond the workplace.

One event was the surgery of Modesto Branch Supervisor Cindy Hardenbrook. She donated a kidney to her father. She is recovering and should return to work this month. Cindy thanks everyone for their get-well wishes. Her dad is doing well and says he feels like a new guy.

The second event was the Avon Breast Cancer 3-Day walk the last weekend in July. The event raised about $6.2 million for medical research, treatment and education. Dublin Branch Executive Secretary Pam Sanchez participated with more than 3,000 others.

"I walked for a variety of reasons," Sanchez said. "I currently have a friend who is fighting breast cancer. I felt the need to do this for her and for all the others this disease will touch."

The credit union had another connection to the walk. Judy Donohue also participated in the event. She is the wife of credit union Vice President of Finance Mike Donohue. Judy walked to honor her mother, who died from breast cancer. She also walked to honor her aunt and two cousins who survived breast cancer.

New ATM at Elko branch

The credit union's ATM network now includes the Elko branch. Members can make deposits, withdraw funds, get Visa cash advances, transfer between credit union accounts and check balances 24 hours at this ATM. The credit union has ATMs at its Alameda, Dublin and San Jose branches. It also has an ATM in Sparks, Nev., at the Greenbrae shopping center.

Take advantage of Visa low-interest rate

At this busy time of year, saving time is crucial. Using a credit card for purchases can save trips to the ATM for cash and make it easy to track spending during vacations and special occasions. This convenience does not have to cost you a lot. The credit union offers a low, fixed-rate Visa with a credit limit up to $10,000. There is no annual fee and no cash-advance fee. The card also features a 25-day interest-free grace period on purchases.

If you use other high-interest credit cards, consider what you could save with a credit union Visa gold card. For example, if you owe $3,000 on a credit card with an annual percentage rate of 19.00 percent and pay only the minimum balance due each month without making additional purchases or cash advances, you would pay $1,909.60 in total interest to retire the debt 26 months sooner.

To apply for a credit union Visa, or for more information about any of the credit union's products and services, please call (800) 877-4444. You can also visit www.oefcu.org for more information.

If you haven't joined the credit union, you can do so by completing a membership application and depositing a minimum of $5 into a credit union regular savings account. Obtain an application by calling (800) 877-4444 or e-mail us at memberservices@oefcu.org.

1. Judy Donohue, left, and Pam Sanchez relax after successfully completing the Avon Breast Cancer 3-Day Walk on July 30 in San Francisco.
2. Modesto Credit Union Branch Supervisor Cindy Hardenbrook, left, donated a kidney to her father.

Back-to-School Loan

Borrow up to $2,000 at a low rate of 9.90% APR* and take up to 12 months to repay.

Use the funds for any purpose.  

Offer expires 9/30/00

Operating Engineers help construct a state-of-the-art intermodal facility in Stockton that will attract major trucking companies and independent businesses

by Amy Modun

Right now it doesn't look like much: a huge slab of concrete in the middle of a dirt field. In the distance, two graders use a fluorescent string to make sure the ground is even while giant excavators scrape mountains of dirt under the scorching sun. The area is flat, dry and nearly desolate. It's perfect - if you're a train.

Burlington Northern Santa Fe Railway has contracted Granite Construction to excavate, pave, pipe and track the land into a state-of-the-art intermodal facility. When complete, this $33 million project in east Stockton will let thousands of trains and trucks transfer cargo to each other.

For San Joaquin County, this is great economic news. Major trucking outfits and independent businesses that normally go to smaller intermodals in the area will instead take their business to Stockton. Granite Construction's Project Engineer Sammy Cox isn't sure exactly how many trucks will visit the facility each week, but he thinks the number will be fairly high.

"There will be 922 parking spots for trucks," Cox said. "Depending on how much cargo each truck carries with it, the truck could stay parked for one to three weeks. We don't know for sure yet, but we think the parking lot will stay full most of the time."

"We've had a couple of permit and road problems that made things a little more difficult than we thought we'd have," Cox added. "But there have been no major snags, so far. Things are going pretty well."

1. A device attached to a motor grader reads the information from a remote laser then moves up or down according to the reading.
2. The edge of the track strip is 16 inches thick.
3. An operator moves a portion of the 1 million cubic yards of dirt during the excavation phase of the Stockton Intermodal Facility.
4. Grade checker Pam Phillips, left, and Beutel set the coordinates of a line to give a reference for the graders to follow.
5. A trimmer rests at the end of the day.
excavation. During the 8,800 cubic yards of dirt, the water to make the soil saturated consumed most of the site and is 1.3 inches thick for the past 20 days. A massive body of water has been formed by diverting water into the wetland area.

Due to the need to comply with NAIC guidelines, work with bones is being stopped. All bones are preserved in a secure, wetland area to ensure the preservation of the black snake. Samuel is optimistic about minor delays.

Foreman Chris said: "We've hit all the bone sites and made us build out of the way."
WORKERS WIN BIG WITH LOCAL 3 SUPPORT

"We will not rest until all workers in our jurisdictions benefit from the standards that Local 3 has fought for and established." - Business Manager Don Doser

Major victory at Patterson Sand and Gravel

Patterson Sand and Gravel and RMC Lonestar were targeted as part of a Local 3 organizing drive. From first contact with Patterson workers, it was clear they were unsatisfied with working conditions, low wages, and a lack of respect on the job. They were ready to change their situation.

After signing 85 percent of workers and electing an organizing committee, we immediately moved into action. In the next six weeks, workers petitioned management three times to demand better conditions and end harassment. After one worker was harassed, most of the crew marched on Patterson to demand justice. One worker said he had never seen everyone so united.

Hundreds of Local 3 members demonstrated our strength at other RMC Lonestar plants by wearing stickers and T-shirts in support of the Patterson movement.

On July 25, Patterson workers voted 33-2 in support of Local 3. After the vote, more than a dozen wives and children petitioned management for a fair contract.

Following the vote, Patterson filed objections to the election and refused to recognize the union and begin contract negotiations. On the morning of Aug. 11, 35 heavy equipment operators went on strike in response to Patterson's treatment.

In addition to establishing pickets, the equipment operators followed Patterson trucks, then picked them after the trucks reach their destination.

Patterson claims that union representatives threatened, coerced and intimidated employees during the election and engaged in improper electioneering.

Under the direction of Sacramento District Representative Frank Herrera, Patterson employees prepare for negotiations. We are sure they will be successful in raising standards to those of other Local 3 plants.

Solid as a rock at GraniteRock

Since the Bay Area GraniteRock workers went on strike to protest the company's unfair labor practices, the Organizing Department has supported these brave members. Actions include "Rallies for Justice" at GraniteRock's corporate offices. At these loud demonstrations, workers wear bandanas over their faces to protest illegal interrogations and harassment that has occurred at GraniteRock.

With the support of Business Manager Don Doser, President John Bonilla, Vice President Max Spurgeon and Treasurer Bob Miller, dozens of district representatives, business agents and organizers have hit the road and held strong at GraniteRock worksites in Northern California. We stand united with these brave members who hold the line. Our actions paid off when both sides reached a tentative agreement and the members ratified it on Aug. 1.

Workers stand up at Western Aggregates

Following the win at Patterson, workers at Western Aggregates approached Local 3 to be organized. On July 31, 85 percent of those workers marched with the union. We will keep you informed of events at Western Aggregates as these workers stand up for their rights.

7/11 Materials, CMI Equipment under investigation

Owners and management of 7/11 Materials in Stockton and CMI Equipment in Oakland are under investigation for violating the California Unfair Competition Act. Issues under investigation include overtime violations and environmental and safety laws. Both employers already face trial for violating federal labor law.

"Local 3 will not be satisfied until we retake our whole industry. The win at Patterson is a giant step toward realizing this goal." - Don Doser.
Most people come to work prepared, motivated and ready to reach their potential. One of our goals is to help managers understand that their job is not just to supervise, but also to motivate, liberate and enable those who work for them. Once you accept yourself, it is so much easier to accept other people and their points of view. You are the only person on this earth who can use your ability. Successful people build life with bricks that others throw at them. Local 3 members know that when your confidence increases, so does your competence.

Success is often a matter of working hard, being willing to learn and hanging on after others have let go. We all have two ears but only one mouth. Some people say this is because we should spend twice as much time listening instead of talking. Others say we have two ears because listening is twice as hard.

Work is always on a time limit and supervisors want you to be fast and accurate. They may not remember how quickly you got the job done, but they will remember how well you accomplished the task. Isn't that what we're about - getting the job done on time?

The road to success is always under construction. "I can't do it" never accomplished anything. "I will try" works wonders.

Daniel Hart has the honor of being the Apprentice of the Month. Daniel is an equipment operator from the San Jose District.

In the short time he's been in the program, Daniel has already achieved the highest level of respect and admiration from Foreman Rodney E. Moon at Norman B. Houge Inc.

"Daniel is an apprentice who is willing to give 150 percent at all times," Moon said. "In the 20 years that I have been with the Operating Engineers, I have never seen an apprentice like him."

Daniel has great people skills, works hard, asks intelligent questions and is always eager to learn. He even takes his work home with him. He is also prompt and a team player.

Outstanding apprentices like Daniel are what the apprenticeship program is all about.

Congratulations, Daniel. Keep up the good work.
TRAINING CENTER ACQUIRES NEW CRANE FOR RMTC PROGRAM

Construction efficiency and productivity have steadily increased over the years. This is mostly due to more effective use of bigger and better cranes. Design and safer use of new cranes also contribute to improvements. At Rancho Murieta Training Center, we strive to keep up with the industry in both areas of safety and equipment.

We recently acquired a Manitowoc 222 100-ton crawler crane. This machine comes with 150 feet of main boom section and 30 feet of jib. Its features include electronically programmed independent controls, joystick controls and air-conditioning for those hot Sacramento summers.

The crane is almost new; it only has 3,200 hours of use. With the new Manitowoc 222, we now have 16 cranes for the RMTC program. It will be available to journey upgrades and apprentices.

Two-week program covers crane fundamentals

The two-week training program for journey upgrades covers the following fundamentals of crane operation:

- Load charts
- ANSI 130.5 standards
- CFR 1926.550 regulations
- Principles of rigging
- Weight calculations
- Power line regulations
- Site planning and set-up
- Quadrants of operation
- Boom Assembly and disassembly
- Lubrication points and cold-iron checks
- Driving mobile cranes with dollies
- Hands-on crane operation

We offer crane classes every two weeks from September through March 2001. Successful completion of written and practical journey-level tests will grant the trainee journey-level status in respective classifications.

Classification and certification are similar but not the same

Classification means you have met Local 3 requirements to sign up for a specific type of crane tonnage for dispatch. The National Commission for the Certification of Crane Operators grants certification upon successful completion of written and practical examinations. To be eligible for the Certified Crane Operator test, you must have 1,000 hours of experience in operating, oiling, maintaining. Your experience must be within the past four years. You must also pass a Department of Transportation physical.

Classes are different for classification and certification. Both classes cover similar topics and material but have different requirements.

Prospective trainees must be ready and eager to polish their reading and math skills. They must be ready to invest in the necessary books to learn the craft. And they must complete the entire two weeks of training.

How to Apply

Contact your district dispatch office to sign up for classes.

The training center's new Manitowoc 222 100-ton crawler crane.

CHANGING THE WAY CALIF. WORKS

Business Manager Don Doser, left, receives an award from California Labor Federation Executive Secretary-Treasurer Art Pulaski at the federation's July 18 convention in Anaheim, Calif. Doser was one of six labor leaders honored for their vision and leadership in helping California workers win more union organizing campaigns.

The other five honorees were Walter Johnson, head of the San Francisco Labor Council; Shelley Kessler, executive secretary-treasurer of the San Mateo Labor Council; Carol Wheeler, executive director of AFSCME Council 36; William Waggoner, business manager of IUOE Local 12; and Mike Garcia, president of SEIU Local 1877.

HANGING TOUGH AT GRANITE ROCK STRIKE

About 60 Local 3 members carried out an unfair labor practice strike against Granite Rock (San Jose District) beginning on July 17 after the company proposed "intercraft transfer," which would have allowed a worker in one trade to work in another trade. After being on the picket line for a little over two weeks, the contract problems were worked out and the Local 3 members ratified a new agreement on Aug. 1.
REDDING PICNIC WAS PICTURE PERFECT

REDDING - The Redding annual picnic was held June 10 at River Park in Anderson. The weather was perfect - numerous oak trees provided shade for guests.

While some folks come and go, John Hinote has been involved in every picnic for the past 28 years. And no one can remember when Bob Currie wasn't stirring the bean pot and adding a few secret ingredients of his own.

Pit-roasted beef was the main course, followed by numerous raffle prizes.

Wilbur and Evie Chase, Sheila Montgomery, John Hinote, Becky Wilson and Nancy Bosley served on the help committee. We thank all volunteers who helped plan this event - their service is invaluable. We also thank Larry Lighthill for the cord of oak.

Events such as the Redding annual picnic remind Operating Engineers that they have more in common than work. We believe the Redding picnic will continue as long as Redding exists.

1. John Hinote displays his service award.
3. Picnic members feast on roast, beans and potato salad.
4. Volunteers served about 350 meals to hungry guests.
5. Redding District Rep. Monty Montgomery, left, presents John Hinote with a token of appreciation for his 28 years of dedication to the Redding annual picnic.
7. Wilbur and Evie Chase.
8. From left: Retired member Lew Burkhardt, Pat Pennington and Marysville Dispatcher Bing Pennington.
REDDING — Business Manager Don Doser said that every district must hold a forklift class so that operators will be certified by July 15. Redding District Rep. Monty Montgomery and Business Rep. Jay Bosley went to Rancho Murieta and took the teacher’s class. To meet members’ needs, Monty and Jay taught the forklift certification class in their district.

The Redding class was held Saturday June 17. Although 29 members signed up for the class, only 12 became certified. We commend those who took advantage of the training to improve their credentials.

REDDING — Over the past five decades, the following individuals have supported Local 3 through their membership. Redding appreciates their loyalty and participation. In the next two issues of Engineers News, we will honor each member with a short biography and photograph.

From left: Redding District Rep. Monty Montgomery, Jim Carey, Oliver Wilson, John Green and Merrill McCarthy.

JIM CAREY

Jim Carey began his career as an Operating Engineer in 1948. He worked for Splinter Brothers on a Guy F. Atkinson project in Atwater. Jim became a member of Operating Engineers Local 571 in Nebraska and soon after transferred to Local 3.

Jim’s last employment was with Syblom-Reid. He worked as a supervisor for the past 15 years of his career. He speaks highly of Don Reid and his father John.

Jim’s most memorable employment was with Morrison-Knudsen Construction. He worked on many jobs around the country, and he remembers it as a wonderful time of personal growth.

Jim says young people must learn to work and produce. He also says they need to be interested in more than payday and quitting time.

Jim and his wife Marjorie reside in Rancho Tehama.

OLIVER WILSON

Oliver Wilson began his career as an Operating Engineer in 1950. He worked for the Bollinger Company loading trucks in a pit. Bollinger Manager Lynne Moore took Wilson to the union.

Oliver’s last employer was J.W. Brashears in Redding. His most memorable times were spent at Patton Brothers Construction in the early 1960s.

Oliver advises young people to get a trade and stick with it. Oliver says that a person should learn grade-checking to become good on equipment. Oliver has fond memories of the time when the San Jose staff consisted of Buck Hope, Tom Stapleton and Helen Williams.

Oliver and his wife Marlene have lived in Redding since 1966.

JOHN GREEN

John Green became an Operating Engineer in 1950. He worked on a dam job in Fresno. During a vacation from his machinist job, he was offered an oiler job. He never returned to the machinist shop.

Around 1957, John started working exclusively in hot plants. He also did some crushing. For several years he worked for Frank Posser.

In 1985, John’s employer sent him to Las Vegas to set up a hot plant to sell at auction. Gail Easley was in town on behalf of W. Jaxon Baker. Not only did Gail buy the plant, he persuaded John to move to Redding and work for Jaxon Baker.

John retired in 1989. He enjoys his pension and believes that he couldn’t live without the help of Local 3. His advises young people to develop an interest in the work, stick with the union, and do their job.

MERRILL McCARTHY

Merrill McCarthy began his career as an Operating Engineer in 1943. He worked as a boilermaker in a shipyard. When he faced a pay cut, Merrill went to the old Oakland union hall. District Rep. Al Clem put him to work as an oiler on a truck crane. Later, Merrill worked on the Standard Oil plant in Richmond.

Merrill’s most memorable employers were E.T. Hass and MGM Construction where he operated underground equipment.

His advises young people to pay their dues and stay in the union.

CERTIFICATION OF ELECTION RESULTS FROM THOMAS HAVEY LLP

The election was conducted by the national accounting firm of Thomas Havey LLP. Its report, in part, contained the following:

We have monitored the Election Committees' verification of the eligibility of all nominees in the 2000 Election of Officers and District Executive Board Members.

Pursuant to Article XII, Section 7 of the Local Union Bylaws and Article XXIV, Subdivision 1, Section (c) of the International Constitution, since all candidates duly nominated were unopposed for election, the secret ballot vote was dispensed with and Robert L. Wise, Recording- Corresponding Secretary, cast one ballot for all unopposed candidates, who were then declared duly elected to their respective offices.

Installation of Officers and District Executive Board Members

In accordance with Article XII, Section 3(g) of the Local Union Bylaws, please be advised that the 2000 Installation of Newly Elected Officers and District Executive Board Members will be conducted at the Semi-Annual Meeting as follows:

DATE: Sunday, September 24, 2000
TIME: 1:00 p.m.
PLACE: Memorial Auditorium 1515 J Street Sacramento, CA

All members are invited to attend.

Honorary Members

The following retirees have thirty-five (35) or more years of membership in the Local Union as of July 2000 and have been determined to be eligible for Honorary Membership effective October 1, 2000.

Oakland gradechecking class starts Sept. 11

The Oakland District office and the Surveyors Apprenticeship Program jointly sponsor a gradechecking class. There will be a limited number of spaces for this intensive class. Our desire is for each participant to be qualified enough to sign the out-of-work list as a gradechecker by the end of the class.

Class starts Sept. 11 and meets every Monday at 7 p.m. with a possible weekend final exam. Please call the Oakland office to sign up.

### Fall Retiree Meetings - Don’t forget!

Retiree Association meetings have been scheduled for September, October and November.

The officers of Local 3 extend an open invitation to all retirees and their spouses to join us at the meeting in their area. Remember, you are the union.

Check the schedule and come on out to discuss the latest issues with your officers, credit union and trust fund representatives. The meeting will celebrate our unity. There will be plenty of fellowship and good refreshments. See you there.
FOR SALE: '87 Sea Ray boat, 25-ft cuddy cabin cruiser w/260 merc., new bottom 2 yrs ago, lowrance 775 fish finder, electric downriggers, 6-ft bimini, Porta-Plate, 2-car side door w/ new brakes. Berthed at Steele Park Marina, Lake Berryessa, asking $10,000 (707) 252-0210, #853892.

Operators Build Kamehameha Football Field, Athletic Facility

HONOLULU – Kamehameha schools currently provide Local 3 contractors Albert C. Kobayashi, Site Engineering, Ralph S. Inouye, Royal Contracting, Ron's Construction, Dick Pacific and Malcolm Drilling with more than $44 million worth of work. The schools provide more than $60 million of work in design.

Bernice Pauahi Bishop founded the Kamehameha schools. She is the great-granddaughter and last direct royal descendent of Kamehameha the Great. Three years after her death in 1887, the Kamehameha School for Boys opened with 37 students and four teachers. In 1894, the Kamehameha School for Girls opened. Today, three campuses on Oahu, Maui and Hawaii serve more than 3,550 students in kindergarten through grade 12.

Kamehameha operates 30 preschools that serve more than 1,000 students. A person must be of Hawaiian decent to attend the schools.

Today, Kamehameha schools own 365,123 acres of land in Kauai, Oahu, Maui and Hawaii. The schools' assets are said to be worth around $10 billion.

The photos below show Local 3 members working on the new football field and athletic facility on the Oahu campus. Kamehameha schools have always been involved in high school athletics. With the completion of the new facility, the school will have a foundation to continue this tradition.
Let's Rev It Up for the November 7 election at Local 3's Semi-Annual Meeting

Come learn about the candidates and issues of the Nov. 7 election and a chance to win this Harley-Davidson motorcycle.

Join your fellow union members in witnessing the swearing-in of new officers.

Listen to prominent guest speakers.

Watch visual presentations.

Win the grand door prize: a Harley-Davidson motorcycle.

* Free parking *

Lunch can be purchased from Memorial Auditorium concessions.

When:
Sunday, September 24, 2000

Where:
Memorial Auditorium, downtown Sacramento
1515 "J" Street

Time:
1 p.m., registration begins at 11 a.m.
