Dollars and Ballots Can Win For Labor

To the Officers and Members of All Local Unions.

Dear Sirs and Brethren: 

October, November 2, is fast approaching. On that day many Congressmen and some of the Senators who voted for the passage of the infamous Taft-Hartley Act, a law designed to destroy the trade labor movement of this country, will ask the citizens of this Republic to return them to office. You have the right in your present capacity to deal with these enemies of labor and to elect a new and representative Congress.

You can do this by voting at the polls on November 2.

You are hereby authorized by the officers of Labor's League for Political Education to call a meeting of the members of your Local Union pledged to occupy and to make a personal appeal to them to return to office the members of Congress who are against free trade unionism.

Meeting will be held at the regular time.

IN MEMORIAM

Officers and members of the union express their sorrow on the passing of these brothers, all members of Local 3, and send their sympathies to those bereaved.

FRED RIFER

ERVING GRIFFITHS

union can be facilitated and made more convenient for them. This method, which has been approved by the Delegates at the recent annual meeting, entirely legal under the Taft-Hartley Act, is now being used successfully by the membership of a number of labor organizations. Under it, union members pledge $10 to $100 for the contribution of a specified amount to a labor league for Political Education, to be used by the League. The pledge is made, signed, and authorized, by vote also, the collection of these pledges from one member to the time he pays his regular union dues. This entire sum is at the disposal of the labor league for Political Education. Any one required to contribute is not required to be permitted or discriminated against. These pledgers are not to be kept separate and apart from union funds to be kept to be spent or become a part of the union's treasury. A receipt for each donation should be given each pledger. The pledge money contributed is collected and the contribution, together with the pledge, should be forwarded to the League's local union office.

If the method of facilitating contributions outlined in this letter is used, the collection of the amount pledged should be adopted by your union. Where labor is non-coercive, it is impossible for the American Federation of Labor to carry on a national political program unless the members of the American Federation of Labor are kept to be separated from regular union funds and to be kept by the labor league for Political Education.

"Whereas, the work of this League cannot be carried on by the voluntary individual contributions of working men not of this country because of the restrictions of the Taft-Hartley Act. Therefore be it"

The officers and members of this Union pledge a voluntary contribution of not less than one dollar to be kept separate sequence, m is i 11 i

The members of the American Federation of Labor are careful to know that the time of collection of the next administration of President Roosevelt is fast approaching.

To be voted for. This Political Education has been demanded the defeat of those that have not, that this is of vital interest, and of crippled children have also been defeated by the Senate 11 times in the past four years.

The Senate has a virtually anti-union majority. The State and County delegates are controlled by business leaders. The assembly bills which would have made the office of the governor, wages and working conditions less introduced. Attempts to improve these and of crippled children have also been defeated by the Senate 11 times in the past four years.

LOOK AT THE RECORD

Other example of this record is the senate's 1930 of, which would carry on the construction of a Federal housing which is necessary and other wage earners could afford to keep, and the 80th Congress criminally complied. In consequence, millions of average Americans are today unable to put down living quarters for their families, and there is no relief to be had. The only permanent solution of domestic legislation passed by the 80th Congress was the notorious Taft-Hartley bill which multiplied nearly all of the constructive labor legislation of the 80th Congress in the form of American labor emasculated during the administration of President Roosevelt.

The only public statement of the principles which were justly and a program now made recently is that he wants to return to office the members of the National Labor Union.

Calif. Ballot Issues, SF Propositions Are Listed on Page 12

The next meeting of the Technical Engineers—Local No. S.E.—will be held Friday, Oct. 10th, in the union offices at 1505 Market Street, San Francisco, Calif.

4TH QUARTER DUES ARE NOW DUE AND PAYABLE

All members in good standing are expected to pay their 4th quarter dues by December 1st. Your prompt payment will be greatly appreciated.

OFFICIAL NOTICE TO MEMBERS

SOME HAVE NOT VOTED

There is very little time left for voluntary contributions of the members who have not as yet devoted to the fund the support of this campaign to the United States Labor League. We wish to thank the members who have made their de-
THIS IS YOUR UNION

In order that there will be a better understanding within our ranks as well to outline the inner workings of Local Union No. 3.

First, let it be clearly understood that our union is, in every sense, a strictly AMERICAN organization and is domi
ted by American citizens. The members of the Executive Board are elected by all members of Local 3. The by-laws, as adopted by the Local Union, re
serve over the membership in that particular district. Your officers serve over the entire jurisdiction of Local 3. The by-laws, as adopted by the Local
Union, are there for the sole purpose of serving the members who can make an adjustment, providing the "best"
	is a fact.

There are offices distributed in as many localities, within our jurisdiction, as is practical. These offices are set up for the purpose of giving the best service possible to each and every member as well as to serve the contractors who em
ploy our members in the various localities.

Through close cooperation by and between the members and the representatives, a good job has been done. However,
our work is by no means done. There is still much work to be done, in fact, all we do is but a new job! This is important, since only by working together can we build a stronger and better Union. Surely all of us should be vitally interested. Low wages and good working con
ditions are the result thereof.

Naturally, it is not possible for your representative to be all over. Each representative has a large area to cover and
it is impossible for him to be everywhere and all ready and willing to assist at any time. The cooperation of the membership is essential due to the large jurisdiction of the Union. It is impossible to cover all violations of the working rules to the business represen
 tantative so that he can take these grievances up with the prop
er authorities.

Any member who sees any violations on the job should make a report to the nearest Union office of Local No. 3 and
in the event that nothing is done about it, the member should then request that a letter be written to the Home Office, San Francisco, either by post card or letter, and every effort will be made to make an adjustment, providing the "best"
is a fact.

In regard to our Union meetings, it is not possible to hold as many meetings in the various localities as we should. However, a great deal is accomplished by the monthly meetings and we strive to make them plentiful and as much complete as possible. As you all know, the regular meeting is held in San Francisco on the first Saturday of each month and is open to all members and those any Union matter they so desire. Local No. 3 has no dictatorship, nor dic
tators! When possible members should attend these meetings so that they can hear the reports of the business representatives who live over most of the Union's territory.

Only recently, Local No. 3 has taken over the Hawaiian and Pacific islands and we now have a branch office in Honolu
lus, (H.), Brother W. A. Wilusz, who was previously representative of former Local No. 553, is in charge of the office and is trying to do a good job. The island of Hawaii is a lot to be straightened out and the only way it will can be do it, and it will no doubt require a lot of work, time, and patience. However, Local No. 3 will continue to have all offices in Honolulu, and to do a good job, too.

Arrangements are being made to have proper storage facilities in the Pacific islands and to carry on as much Union activity as possible. Gradually we hope to see better wages and working conditions in the islands. We realize that much of the work will have to be done in the States, as most of the construction work that do work in the islands every chance they get. However, the cooperation of all brothers on the islands is essential.

Local Union No. 3 is the largest local in the International and we believe it's the best! We should do our utmost to keep it that way. The majority of the members of Local No. 3 are efficient and highly-skilled workers and they are the only type of members who can make a good Union.

In order to demand better wages and working conditions we must all work together. As a unified body we can win, for ourselves, or for the contractors, we must do our work and carry on in an efficient manner. Drinking has no piece on the Union's work. It is not the influence of alcohol, but the influence of liquor should be sent home immediately and should be reported to the Union, and the Union in turn should take proper action.

In closing, I wish to thank the members for their splendid cooperation in the past, and trust that in the future everyone will cooperate in the best interest of the Local Union. We must all do our share in order that the vicious Taft-Hartley law cannot destroy our Union. Remember, that is just what the senators and congressmen had hoped for. So far they have not been successful. It is the obligation of every Union member to vote in the coming election. November 4th, remember your Union. REMEMBER, THIS IS YOUR UNION.

VICTOR S. SWANSON

Draftsmen

BY AL BOYDMAN
Business Representative, Teachers Division No. 3, 5

The Technical Engineers Division is very much in the organization and negotiation field, with the Land Surveyors' Association holding chapter meetings to consider our contributions to be known shortly.

The time lapse on this deal has neared its limit, and we should have some results in the near future.

The wage scale adhes to the major con- tractors, with marked success on many fronts.

Several projects have already reached 30 per cent union membership and the first popula- tion report of the general construction industry on this report, the joint action of the Asso- ciated General Contractors and the Stone & Webster Engineers.

This agreement would cover all the part of the Operating Engi- neers' jurisdiction, with the possible exception of the scale on their Mass Landing Subcontract.

Rodney also works on the San Diego Freeway.

Brent M. Hills is a member of the operating engineers.

The policy of the Operating Engineers is to get all the work in and out of the city.

The technical engineers are not strictly bound to the waterfront, and are generally called upon by the waterfront employers to perform various duties.

By OTTO E. NEVER

Business Representative, Local 3

By the time this news article reaches you, I hope the weather will have changed for the better. The first part of the month's work has been interesting to the spectators. To be constructed.

The lumber industry here is working under the weather permits they will continue to do so. This week is good but of them, however, are already prepared for their winter logging. It seems the weather in the Northwest is in a somewhat of a rut. Expecting to move from the many lots, however, we hope to stabilize the situation.

SIGNED CONTRACT

The Klondike Logging Company has signed a contract and has laid out a logging camp which will start logging in a few days. They are also sporting the addition of a new logging cook on this well equipped outfit. Knowing the boys, I'll say it would be a very good job for a strong boy to shot an arrow over it.

The Klondike Logging Co. has oil trouble like everyone else. They should be through with their work on the night Art Ford has been set down at present, however, we understand that it won't be for long. They have not been able to do the job.

The men at the Northern Redwood Co. at Redding have advertised their intention to refuse to do the job. Some outfits pay from 25 to $100 per day for the job at the present.

Milb*ara Police Arrest Two Local Members on M&K Dirt-Hauling Job

By CHEY ELLIOTT and HARRY METZ

M&K ran into trouble on the Milb*ara quarry pit. The City of Milb*ara passed an ordinance prohibiting the hauling of dirt over city streets. To bring a test case to court the City of Milb*ara had to have a person/personed as members of Local 3.

The City is composed of the San Francisco Airport job and the Port of Oakland. The City has had many suits and also to hear your wishes to him for success in his private law.

We haven't had much news concerning the regular business representatives since the last report that except a few that are on the "out of work" list.

The current strike situation is being felt in the grading areas and quite a few of the members are out of work because of this.

Last month's issue of the News carried the story of Frank Lawrence's appointment as general publicist of the National Construction Trade Council. To the story this branch in this area has been caused by Frank Lawrence, and also to hear your wishes to him for success in his private law.

Several paper products have been more or less in a turmoil in the Bay Area. Many of you did not have much of a chance to get in the oil business due to the weather conditions, but now they will be able to get back to work. The weather is getting better and there will be a few more jobs available. The oil business is still very busy and there are many more jobs on the way.

We have heard from many of our friends who are still working in the oil business that there is a lot of work available. The weather is improving and there are many more jobs available. We would like to thank all of our friends who are still working in the oil business for their continued support.

We also want to remind everyone that the weather is improving and there are many more jobs available. We would like to thank all of our friends who are still working in the oil business for their continued support.

The meeting of the McPherson and District Company was held in the McPherson City Hall on Monday evening. A large crowd of residents attended the meeting. The President, Mr. McPherson, welcomed everyone to the meeting. The Secretary, Mr. Johnson, gave a report on the progress of the company's work. The Treasurer, Mr. Smith, gave a report on the financial condition of the company. The members present discussed various matters affecting the company's work, and it was decided to continue the work as planned.

The meeting adjourned at 9:30 P.M.

The Pacific Coast Aggregate Company has been producing rock and gravel for several years, and has been adding new machinery to its plant. The new machinery includes a rock crushing machine, a gravel washing plant, and a rock screening machine. The company has also been improving its facilities for producing rock and gravel, and has been increasing its output.

PACIFIC LANE

PIGS. The huge new Moss Landing Protective Dike project, totalling $36,000,000 to be spent around the Moss Landing harbor area, is now under construction.

Mr. Jack Beale, with the construction, works for the L&B Corporation, is building the dike. It will be 1,500 feet long and 48 feet high from the water. It will take five years to complete and will cost $10,000,000. When complete, it will help stop erosion of the Moss Landing harbor area from the Pacific Ocean.

San Jose - The new $36,000,000 project is expected to be completed by the year 2024. It will provide a safe harbor for ships and protect the city from storms.

Mr. Beale said that the project is a major development for the city and will benefit the local economy. He also said that the project will create many jobs for local residents.

The project is being funded by the federal government and the state of California. The construction process will involve digging a trench, building a dike, and then backfilling the trench with soil.

The project is expected to create 2,000 jobs during construction and 1,000 jobs during operation.

Mr. Beale said that the project will benefit the local economy and create many jobs for local residents.

Round-up of the News from Utah

By C. L. Caserlott, J. F. RILEY and C. R. Van Winkle, Business Reps, Local 3

On Tuesday, November 3, 1948, Labor has a date at the polls, remember? During the past two years restrictive and discriminatory legislation aimed at labor has been passed by our national Congress and State Legislature, aimed at destroying the working man's bargaining power. The policies of the National Association of Manufacturers have been successful. This is due to the airlessness and willingness to fight the ironing and serum of the people everywhere. There must remain alert and willing to fight this fight. The results of the past has organized definitely to destroy the work of the American working man.

On Tuesday, cheapest and worst of all, to fight the enemy in our offices on November 3rd. Turning round and trying to be a member of your family who either supports or has supported the cause, you are not going to be at home on that date unless you are belated.

Recognizing that many of our silent or unseen workers have been in the conditions of building and operating, the industries and methods which we could. We know that in our community there are many companies and organizations that are engaged to serve our support. However, in every case we were unable to present the facts in a clear manner.

In those cases we sent you cheek in checking the data. We had determined the labor record of the capitalistic industrial contractor, and then support our friends in the real labor front. If you are not pleased in conditions and methods of working.

Any additional pertinent information obtained will be notified to the industry and the public.

For information and guidance regarding matters below:

For the Platform: Democratic Party, generally liberal, labor-nominated, Tennessee Agricultural Act and other labor acts be enacted. Endorse and support the labor ticket.

Republican Party, conservative, silent or evasion on labor matters. Silent on Social Security, opposition;
promise tax relief, but to whom? Consumerism, no.

Sweeping up liberal-minded Republicans.

Presidential Candidates: Republican Thomas E. Dewey, governor of New York, has no labor record. He is the candidate of the industrialists.

Democratic Party: Harry S. Truman, good labor record. He is the candidate of the industrials.

National Labor: This is the year of the labor organization. This is the year for labor to lead.

Republican Party: David D. Wilkins, chairman of the party, is convinced that labor should be segregated from labor. He is a candidate for President. The primary will be held. The determining factors are Mr. Wilson’s record at the polls. Heterogeneous tickets.

Democratic Party: The convention in Salt Lake City is expected to be well attended. It is expected to be an important event in the political system of Utah.

The case for Senate Reapportionment, Proposition No. 13 on the Nov. 2 California ballot

MOKO COUNTY has 3,000 square miles, with 70 per cent of the land publicly owned. On the Sierra Nevada crest there are many peaks ranging from 10,000 to more than 13,000 feet, including White Mountain Peak, 11,451 feet high. Population, July 1, 1970, was 29,000, a decrease of 20 people from 1940, when it was 31,200.

INYO COUNTY has 10,000 square miles, with 96 per cent publicly owned, including Mt. Whitney, 14,496 feet, highest point in the U.S., and Denali Valley, the lowest, 270 feet below sea level. Largest city: Bishop, 19,000, and increase of 2,757 over 1960.

SAN FRANCISCO has 45 square miles, with highest points being Twin Peaks, 904 feet; Mt. Davidson, 912 feet; Mt. H_Inv, 903 feet. Combined city and county government. Publicly owned lands, including streets, parks, military areas, total 46 per cent. Population, July 1971: 785,000, an increase of 150,000 from 1960, and far above that at present.

Women's Guidance On Technical Jobs
Washington—The Labor Dept.'s women's bureau has just published a booklet outlining the job outlook for women in occupations connected with science. Lists the fields of biology, chemistry, engineering, physical sciences, mathematics, and social sciences.

Reeves and DEER CRICK OVERFLOWS, bridge and approaches—$800,000.

Route 131 to PACEWOOD CHEEK 390 miles running from $7,000,000.

KINGS COUNTY grading and surfacing 264 miles of county roads—$10,000,000.

MERCED COUNTY, including Mountain Street improvements—$98,000.

Men and women engineers are needed to work on construction projects. The outlook is bright for those who are interested.

Fresno—$30,000,000 Highway Budget is Approved; Allocations Made

By H. F. Peterson and L. K. Moore

The State Highway Commission has approved a budget of $30,000,000 for road construction in this district. The money will be allocated as follows:

TULARE COUNTY surfacing 7/8 miles on Highway 52, 1 mile south of Tulare—$24,000,000. 2 miles of Highway 96 for median strip improvements with Route 30, structures and channelization—$40,000.

ORANGE COUNTY—$1,000,000 for Highway 96—$2,000,000.

MADERA COUNTY grading and surfacing 3 miles of highways from Dry Creek to one-half mile south of Bakersfield—$40,000.

KINGS COUNTY grading and surfacing 264 miles of county roads—$10,000,000.

MERCED COUNTY grading and surfacing Highway 99 from Merced to Delhi—$1,000,000.

Surfacing of 2 miles of highway Route 137 between Higginest Creek and Los Banos—$20,000, right-of-way—$10,000.

MADERA COUNTY grading and surfacing 3 miles of county roads—$35,000.

P rivotal to the project is the ability to attract trained workers. The commission has already begun to coordinate its efforts with the various training programs available in the area.
