**Engineers Move to SF Home**

**Big Winter Slump**

**In Jobs Eases as Weather Improves**

One of the longest winters in years has had its effect on jobs, among other things, and engineers have felt it probably more than any other type of workers, although reports I've heard from Alice L. Aiken, Nevada jurisdiction of Local 3 indicate the big freeze is about over.

After the unprecendented snows have come the rains and thaws in turn. The showers have come on highways, recreation, industrial and school buildings. Only the tunnel stiffs have gone right on raining.

During this seasonal display do we notice that engineers are in the vanguard of those individuals with many wasteful jobs either out of paper or waiting for work. Just how much, if any, they will be affected by the "recession" which appears to be having its effect in the larger cities is yet to be learned. Even if they are, the slack will probably be taken up by another firm which is more than likely on this job for several years to come.

Reports from Local 2 business agents indicate that this month, but at present time it seems as if the situation is one that is not readily to be whitewashed down. A problem, however, is that these conditions have better prospects than city areas, although the latter cases are still the same.

As usual, the weather is not good, also Utah.

So go out and stretch the mus-"les; brothers; go as it gradually if you've been fairly tired this very long.

**Altermeyer Asks Stronger Old-Age Relief Program**

Washington—Congress was as-"cribed no time to adopt part of its program of relief of home relief was contemplated as the administration opened its case for liberalization of the public as-"stance program, including federal aid to states for the general relief of the destitute.

Along these lines, Altermeyer, Social Secu-"rity Commissioner, told the House Ways and Means Committee that direct assistance to the needy should be made on a "state and local basis" and that the same should be done immediately.

**Nebraska Firm on 'Unfair' List**

Word comes to Local 3 from Leon S. L. S. S. A. E. of the Western States Conference of Engi-"neers that Phoenix Engineers Local 628, has placed the Peterson Bros-"hers Compeny of Grand Island, Ne-"braska, on their "unfair" list.

**ATTENTION: Members Employed by AGC of Northern California**

In order to protect your rights under the Master Agreement, and avoid shortages of pay, termination or broken shifts, all grievances must be reported to your Business Represen-"tatives IMMEDIATELY. WITHIN TEN DAYS AFTER THE GRIEVANCE OCCURS, AS YOU WILL ONLY BE ABLE TO HAVE YOUR COMPLAINT ADJUDICATED UNDER THIS DUE DATE FROM THE DATE OF RECEIVING SUCH COMPLAINT.

The new address, to be noted by all members, is 474 Valencia street, San Francisco 3, Mission 8. The telephone number will remain the same as these ash held by the union, namely, Elnickoff 1-5166 for Local and Underhill 2-1132 for Local 3.

Local 3 has been located in San Francisco for many years of service. Local 39 has been on the same street for over 30 years. Local 39 is near 19th street, and is centrally located between the two main labor temples, at 2639 19th street and 2900 Guerrero street.

Local 39 has been active in San Francisco for many years of service. Local 39 has been on the same street for over 30 years. Local 39 is near 19th street, and is centrally located between the two main labor temples, at 2639 19th street and 2900 Guerrero street.

**Anti-Labor People Backing Move to Kill Pension Law**

The present effort to repeal the liberalized pension law ap-"proved by California voters last November is underhanded and is backed "by the same in-"terests that are always op-"posed to any social legislation and the workers, ac-"cording to the Ko-"lum's Committee for Old Age Security. W. A. Lincoln, President of the Engineers Union, was asked recently to speak on the subject of pensions, and he replied, "The Administration is trying to deceive the public by saying that pensions are necessary for the aged. We have just heard what the Administration is trying to do, and we are determined to stop it at all costs." Lincoln stated that the Administration's proposal is not based on sound economics, and that the country would be better off with a system of non-contributory pensions, rather than a system of contributory pensions. He also stated that the Administration's proposal is not only unfair to the working class, but also to the poor and the aged. Lincoln concluded by saying that the Administration is trying to deceive the public, and that the country would be better off with a system of non-contributory pensions, rather than a system of contributory pensions.

**Wcouc'muc the 'Wake, GUAM ATTACK?**

Were you employed in Guam or other South Pacific Islands during the attack by the Japanese? If so, please report your experiences immediately.

A letter sent to Building Trades Council by Secretary C. H. Han-"dley of the California State Fed-"eration of Labor's serial information.

"Are we eager to find out if the employers had any control over the contractors involved before the war?" This question was asked by Han-"dley. The employers, it was said, were not interested in the war, and they did not want the war to interfere with their work. The employers also said that they were not interested in the war, and that they did not want the war to interfere with their work. The employers also said that they were not interested in the war, and that they did not want the war to interfere with their work.

**Official Notice to Members**

**NEW ADDRESSES—EUREKA OFFICE: The Eureka office will move from the present location to the Eureka Building, 102 Eureka St., Eureka, in a week or ten days.**

**COLUMBUS OFFICE DISCONTINUED: All members, and contractors, in the Columbus area are requested to contact the San Jose Office, 102 North Herbert St., P.R.O.D.U.I., Columbus 15, for all information desired in that territory.**

**STAYING IN MILITARY? MEETING:** The next meeting of the Technical Engineering will be held Friday, 6 p.m., March 31, 1949, at the Tully Office, 517 Valencia Street, San Francisco, California.
Voluntary Health Move by Employer

Given High Praise

Maryville, Ill.—It is too seldom that we find contractors who voluntarily are willing to interest themselves in the general welfare of their employees, as we are glad to print the following letter of the H. Earl Parker Company.

The principal of our enterprise is that the dependents of our employees are of vital importance to us; therefore, after an extensive review of various proposals we have made arrangements with the Occidental Life Insurance Company of California to underwrite a cooperative group insurance program for employees and dependents. All employees and their dependents are entitled to Life Insurance, Hospital and Surgical Benefits, Medical Care and Diagnostic X-Rays, with Laboratory Examination as described in this paragraph.

"We are happy to make a substantial contribution in order to keep the cost within the means of every employee. It is in our sincere hope that each of you will avoid percent of this opportunity to obtain valuable insurance protection which will offer some peace of mind and security in your and your family.

Sincerely yours,

H. E.RALD PARKER"

The above benefits are far reaching, beyond the individual employee, to every member of his union. All of these are guided. What is good for the union card is good for the individual.

Health and sickness strike the union card and devotion to the task of making member- cards and devoted to the task of making member- card. The union card must remain a guarantee because membership implies numbers aware of the union card. If such laws are passed there will be no chance of the people coming to realize that by banding together they can have successful health insurance.

The labor movement is a federation of unions prescribing the rules and conditions on which workers hold union cards and devoted to the task of making membership optional. The corporation insurance can make these gestures been trying to find out the people see the people in industries, freedom to make these decisions overgestures been trying to find out the people see the people in industries, freedom to make these decisions overgestures been trying to find out the people see the people in industries, freedom to make these decisions.

In responsible living accept the responsibility of making decisions which determine their standards of living. For those who work in industries, freedom to make these decisions comes only through union cards.

The union card is the badge of a free worker—the outward sign that the holder keeps the faith with likeminded workers.

"Mine is better!"

Report of last meeting

The meeting was called to order at 8:14 p.m., President Chancy presiding. Ball call showed all officers present.

A synopsis of the Executive Board Minutes of February 16 and March 23 read and the action recommended by the board approved as read.

A letter was received from the Citizens’ Committee for Old Age Pensions regarding Amendment No. 15 to the State Constitution. It was moved and seconded to refer to New Business, that the propositions in which they result.

Lettt and cards of thanks were received from Mrs. Carroll Purvis, Elizabeth Baumanhardt and family; and William Speers. Received and read.

Resolutions of Candidacy for office were adopted and printed.

The following Resolutions were referred decided: Lionel L. Brown, Kenneth F. Trevison, Artie B. Cox, F. B. Baughman, Nilla Still and Russell Forrester.

Resolutions of the Trustees was accepted as read.

The Business Agents gave their usual reports which were accepted as given.

Union New Business, the letter regarding Amendment No. 12 from the Citizens’ Committee for Old Age Pensions was read. It was told that the California State Federation of Labor had gone on record as opposing the proposition being considered. It was regular moved and seconded to enter this recommendation to the 80th Congress. There was a general discussion regarding manufacture of dried milk. It was brought out that the milk was produced in the basic top of dried milk. It was regularly moved and seconded the Rec- of the General Secretary-Treasurer was read by President Chancy.

We are being no further Business to come before the meeting, it adjourned.

Successfully submitted.

C. P. MATHEWS, Secretary.

ST. PETER AND THE SCAB

I ought to go a large reward, have never grumbled, I’ve never grumbled, I’ve never mixed up with union

But I can’t help going my way to win

So open, St. Peter, and let me in

I’m not going to let my chief off

Despite his high office he had to wait

He said he was a fiery gale in his

St. Peter is tiring this gate, sir.

I’ve kept you and your gift of gold

You gave us what is known on earth as a scab

Therehow he rose in his stature tall

And pressed a button on the wall,

"Hit the 5th of month."

"I’ve never mixed up with union

I can’t help going my way to win

I can’t help going my way to win

I can’t help going my way to win
San Jose—Salinas Branch (Closed) 2 Men to Work Out of San Jose Area

By M. G. "MICKEY" Murphy and JOE RILEY

constructor

We presume by now that most of the brothers in the southern part of this territory are aware of the fact that the Salinas Branch has been closed, and that about the same amount of efficiency can be obtained, at far less expense, by two men working out of the San Jose office. Knowing this, we do not intend to labor any further on the subject, and we are sorry about it, but we are certainly they will welcome this news. This office has been closed due mainly to the fact that many of the larger projects in operation have now been completed, namely, the Los Gatos-Santa Cruz Highway, the Stockton-Torrent 7200, and the dam at Jensen Del Armo.

Knowing the closing of the Salinas office will be a disappointment to many of the workers, we feel that the management of the company has done the right thing. There is a large pipeline in the works in the Camp Cuts area of the Central Valley, and the construction of the Central Valley Canal Red Clays is about to begin. Whatever your location, you are bound to benefit from the rerouting of the stockton job, weather permitting. We will keep you posted on this development.

As you know, this job is located just a few miles from the Stockton freeway job. The employer will call the meeting for the purpose of discussing the conditions of the Central Valley Canal Red Clays, and the continued condition of the Stockton job. We will keep you informed of any developments.

As a result of the rerouting of the stockton job, the company has been able to keep the workers from the Salinas branch busy on other projects. The company has been able to keep the workers from the Salinas branch busy on other projects. We will keep you informed of any developments.

The company has been able to keep the workers from the Salinas branch busy on other projects. We will keep you informed of any developments.

San Francisco—Work Picking Up in Shor Re, Jobs Going Underway

General work conditions are steadily improving in this area with the out-of-work list gradually being reduced. Although the weather is still mild, work will pick up in the near future.

On the Parkside Road, several new construction contracts have been placed by the fact that there is plenty of work. Raymond Concrete File Corporation, has started a new job involving concrete building and driving steel piles. E. Winkle has a portion of the job, erecting the large sparseness building on the side of the road. Their general contract has been signed by the city. Judie, the contractor, has several steel handling jobs on this job, one crane crew now being busy. F. A. Smith and C. W. Black are setting up a permanent concrete plant to take care of jobs like this, which will run for over a year period.

Johns Brothers' job on the new buildings in both of the Lagoon and College areas is due to be started soon. Peaks is rather lagging down at present due to the weather, but there is a large job, most of the excavation work now being done by Bill and Son and Foss, the concrete has been done by E. G. & F. Smith and the remaining excavation work Foss. Being done, John Knowles is setting up a permanent concrete plant to take care of all this concrete work which will run for over a year period.

SACRAMENTO—March 15, 1949

By ED PARK

Business Representative, Local 3

As we go to press working conditions are still very bad in the Sacramento area. It is still a hard time for the majority of the workers and will continue to be so for some time. The situation is not as bad as it was at the beginning of the year, but it is not as good as people would like it to be. The situation is still a matter of concern for many workers.

Marysville—MOUNTAINS OPENING UP AS WEATHER BETTER; PUSH TUNNELS

By WM. G. WACO and LES COLETT

Business Representative, Local 3

In the Marysville area, the weather has improved, and many workers have returned to the job. The weather is expected to remain good for the next few weeks, and the workers are looking forward to a good season. The weather is expected to remain good for the next few weeks, and the workers are looking forward to a good season.

February 15, 1949

The Sacramento Valley is now in the middle of the winter season, and the weather has been quite cold and snowy. The workers are having a hard time getting through the winter, but they are still working hard to complete the job.

Five leading American vegetable crops—sweet potatoes, sweet corn, early potatoes, peas, watermelons, snap beans, cucumbers and cabbage—are being grown in the Sacramento Valley. The weather has been quite cold and snowy, and the workers are having a hard time getting through the winter, but they are still working hard to complete the job.

They are...
In a job we all enjoy, as we usually have a considerable amount of freedom to select the type of work that suits our tastes, the men of the B-Sorenson Contracting Company are doing an excellent job in the construction work now being carried out for the San Leandro Bay levee.

Many of the men have been with the company for a number of years, and they have a great deal of confidence in their ability to complete the job on time and within the budget. The company has a well-organized team of experts who work closely together to ensure that the project is completed successfully.

The work involves the construction of a new levee, which will provide protection against flooding of the surrounding area. The project is expected to be completed within the next few weeks, and the men of the B-Sorenson Contracting Company are dedicated to ensuring that it is done safely and efficiently.

The company has a strong commitment to quality and customer satisfaction, and they are always looking for ways to improve their processes and services. They are proud of their work and are eager to exceed the expectations of their clients.

The B-Sorenson Contracting Company is located in the San Leandro area, and they have a number of other projects in the works. They are always looking for new opportunities to expand their business and are committed to delivering high-quality services to their clients.

**MERCED STREAMS GROUP JOB WILL MOVE FAST, ARMY SAYS**

By H. T. PETERSON and LYNN MOORE

Business Representatives, Local 3

We have been informed by the Army Engineers that the Merced Streams job will move fast, according to their completion. They expect to call for bids in the near future on the Bear Creek Dam and other pertinent work on the San Joaquin River and a highway job. This job is to start in the early spring.

Operations on the Pile Flume has been suspended temporarily, except for required operations. However, work onMono Dam is making steady progress. The cofferdams upon completion of their diversion flume are expected to be completed within a few weeks. The Bureau of Reclamation advised that the elevation of the Delta Mendota Canal will be raised 17 feet by the Delta-Mendota Canal Improvement Act.

**CALIFORNIANS**

Artesia Nevada Construction Co. has been awarded a contract for the construction of part of the new highway between Artesia and Bermejo. Work is expected to start soon.

**Surfacing Between Merced River Wee; Required $10,000,000**

The Bureau of Reclamation is planning to surfacing between Merced River Wee; required $10,000,000. They have made the necessary application and have been awarded the job.

**Job Papier Whose Price Seeks Jobs: $39.00**

The Bureau of Reclamation awarded a contract for another $39,000. It is expected to start soon.

**MUD TO GET FROM ONE FACTOR ATTEND CULTIVATION**

The Bureau of Reclamation advises that the mud to get from one factor attends cultivation.

**INCREASE; STRONGER PROFITS; JOB WILL EMPLOY A LOT OF ENGINEERS**

The Bureau of Reclamation advises that the increase; stronger profits; job will employ a lot of engineers. A new office is being set up to handle the increased work.

**THREEMILE CANYON GROUP JOB**

The Bureau of Reclamation advises that the threemile canyon group job is moving slowly due to the weather and other conditions.

**Surfacing Between Merced River**

The Bureau of Reclamation is planning to surfacing between Merced River Wee; required $10,000,000. They have made the necessary application and have been awarded the job.

**Job Papier Whose Price Seeks Jobs: $39.00**

The Bureau of Reclamation awarded a contract for another $39,000. It is expected to start soon.

**NEVADA BROTHERS Battle the Snow; Sign Up AGC**

By H. L. "Cary" SPENCER

Business Representatives, Local 3

The A. G. C. Agreement for the State of Nevada has been signed by the Nevada chapter of the A. G. C. in Nevada, from the President, Andy Drumm, and the Nevada Chapter of the Construction Industries, Local No. 3 and Local No. 2.

**AGC Members of the Operating Engineers Local No. 3 are eligible to sign up for the Nevada Chapter of the Construction Industries Local No. 3 and Local No. 2.**

**Brotherhood**

Brotherhood is a strong one in this job. The job is expected to start soon.

The Bay Area Land Surveyors voted down the negotiated in the classifications meant, little tenure. I think sufficient labor and sufficient work to make America's housing materials are now available for us is an adequate number of skilled That conclusion was reached past. ship councils throughout the coun-

The Association is no longer recognized by the union of a bargaining agent. Strike reservation has been re-

The increasing use of household garbage grinders is creating new severe problems; some 200,000 printers have been installed.

How Low Can Hartley Go Now

The Bay Area Land Surveyors voted down the negotiated contract that their committee had agreed to. It is apparent by the SS to 11 negative votes that at no time did they intend to bargain in good faith. Recognizing this fact, the Union must take the position that the Bay Area Land Surveyors and other-shop stewards should take no further action until, at the insistence of the Union, the contract is re-
