RESULTS OF BALLOTING BY MEMBERS OF LOCAL 3

Announcement to Re-Faire:
Shall the Executive Board of Local Union No. 3 be increased to 13 members?

Local Union Member: Victor S. Swanson, 4,022 votes
President: Par Cheney, 3,646 votes
Vice-President: H. D. Fowl, 3,324 votes
Recording- Corresponding Secy. D. D. Pellan, 3,384 votes
Financial Secretary: W. F. E. VanZande, 3,679 votes
Conductor: B. R. H. Broek, 3,508 votes
Guard: Paul Edgerly, 3,479 votes
Auditors
Arthur E. Whitney, 3,460 votes
J. A. Dankoff, 3,463 votes
N. H. Miller, 3,454 votes
Auditors: M. E. Morell, 3,378 votes
L. L. Martin, 3,363 votes
R. A. R. Miller, 3,321 votes
J. F. L. Chamber, 3,022 votes
Richard Shubkoff, 3,013 votes
Executive Board: 50 members
Total number of ballots mailed: 7,176
Total number of ballots received from Post Office: 5,237
Valid for election: 5,237
Total count: 5,237

Respectfully submitted,
S. E. R. RAFFERTY
C. R. DAVIS
R. F. SWANSON
A. G. ROHRBACH
J. D. MATTSON

SUMMARY

Election results for Local Union No. 3 shows a split vote in favor of increasing the number of board members from 10 to 13. The results are as follows:

- Yes: 3,646 votes
- No: 3,508 votes

Skimmers vs. Rattlers

Local 3 boys on the road at Joe's Cut off, running through the island, found a new herring-rattlesnake. At least 24 had been killed. The boys didn't get off their boats until well out of the rocks.

Strike Hunts Hawaii

Local 3 members in the islands report that the mouth-lan-quick strike has cut jobs down by half. The Department of Employment in Hawaii, with construction down 50 per cent.

- An angry issue is required for the taking of all species of fish, mollusks, and crustaceans, says the Divis of Fish and Game.

Power Lobby Out To Kill CVA

Dragline Prepares Way for Capital Annex

Vicious Fight Is Underway In Washington

An historic all-out battle is now underway in the backroom of the Senate capital to smash the administration's proposed Columbia Valley Administration bill, according to the Senate League for Political Education.

Unions, farmers, and businessmen of the Northwest are demanding CVA, and they are demanding it for working conditions, minimum wage, and other guarantees.

Bending the Job

Many Engineers and the Bureau of Reclamation are at present in charge of developing Columbia Valley waterways and are bringing the job, according to LLPE. There is a "comparative" offering of CVA and STAGE II for a job that is already being done.

Big contractors who have established themselves with working conditions and wage agreements oppose CVA, and "feel they make the jobs better." Both parties are in agreement on the legislation, and according to LLPE, "matters have died in this session, but it is possible that the issue will arise again."
Big Business' Advertisements

The reactionary management of the Standard Steel
Spring Company, in the 6th of a series of full-page
propaganda articles it has been running in the nation's press, comes
up with another sultry caption: "The Star Gazers and Social
Dreamers Won't Like This One.

It then explains: "You may think this crusade to regulate
and restrict business profits is no concern of yours; but you are not
a stockholder in business. Well, the critics and social dreamers won't
like this one—but, let's open it and take
a look.

Then it presents it's "startling" (Hot Hum! evidence to the
effect that American business is "owned" by 18 million
stockholders, and that altogether 78 million people actually
have some interest in the companies that they are insurance
policy holders or owns a savings account.

J. A. Livingston, a business analyst who runs a widely
published column, could scarcely agree with either these figures or the interpretation. Standard Steel
Springs, Livingston observed, committed a common error when
the newspapers have people quoted as if the figures are as
numerous, to the heads of their offices and the total of individuals
used by members.

To the best knowledge of Andrews
and Associates, the company's building committee, it will be
necessary for the stockholders to
contour an exhibition of machines and equipment
in use.

BOYS SCHOOL, SONOMA STATE HOME, BIG NORTH BAY JOBS

H. O. Foss, Business Representative, Local 5

The Archiabp Hanna School for Boys million and quarter project for which Williams and Barrows of Burlingame have the contract at Boys Spring is going along very well. The work is in progress and consists of furnishing the sand and gravel from a very efficient small nix plant which he built and installed at this project. Brother Frank Barrows is superintendent for this concern and is the Project Superintendent for Williams and Barrows.

On this project there are a couple of interesting incidents. The words and George Pay on the job called in the girls plumbers filling his ditch with dirt which had been used to fill the ditch with dirt which had been used by the contractor Frank Barrows came up and dug it out. Incidentally, the city of Sausalito have plans for the complete season where work is going on the project on Sausalito. Barrows, Bartlett, Andalo, and Cranbrooke are operating and Vic. and Sons are also operating.

Hawaii Hard Hit By Month-Old Waterfront Strike

by J. W. Wainwright

Honolulu—Waterfront Strike

At this writing, Hawaii is in the midst of a contemplated shutdown of all its ports for the next month by the I.W.W.-CIO.

This area is doon 99 per cent. It is estimated that the Byrds Oregon Construction Company’s Iron Mines of the San Francisco area will be the biggest in the country. Work on the project is being carried out under the most favorable conditions. The Fishermen’s Association with Bartlett and Sons is operating under the present conditions on the project. It is hoped that a settlement will be reached as soon as these men return because of the very uncertain conditions in shipping.

The only bright side, we have been assured that in the event that the Byrds Oregon Construction Company plans to use the Hamanako Coast Road in the Big Island, he would not touch the project, and members of this area have their sights set on some other projects.

The first plan was to have a waterfront strike for two months before returning for his second contract at the Byrds Oregon Construction Company International—San Francisco.

The weather has cleared somewhat in the Redwood Empire and the men are busy with the several small bridge jobs now on hand. In Humboldt County, there has been a good growth of the Redwood There have been several small bridge jobs to do for the county. Local promoters have not paid the bills at the time this article went to press. Mr. Roy C. Smalley, consulting engineer, says that the work will be done at Big Creek Park, trying to get it up before July 4th.

Shoreline Highway Job is Under Way in Humboldt

This is a highway job on Bonneville Road near the town of Prairie Home. Bonneville Road has been opened to traffic near the job on the Mountain Chain in this section of Humboldt County. This is a small bridge job, but it has been a long time coming. It is the first step in the construction of a new bridge for the town of Prairie Home.

A. Teichert & Sons job at Humboldt is coming along with the work set up and will be ready to start the grading. The road will be paved with Four Wheel Drive and the bridge will be ready for use by November 1st.

がある For the benefit of the County of Humboldt, the road will be paved with Four Wheel Drive and the bridge will be ready for use by November 1st.

Three bridges are now under construction in Humboldt County. The first is the Bridge at Humboldt, the second is the Bridge at Fortuna, and the third is the Bridge at Trinidad. These bridges will be ready for use by November 1st.

COOPER CREEK CAMP and Electric Company's Big River power development is proceeding exactly on record-setting construction schedule despite the size of the $62,000,000, 2½-year project employing 3,000 men.

First new power is expected to pour forth next November from the 10,000-horsepower generators of Cresta Powerhouse. Three months later, in February, 1950, the 18,000-horsepower Rock Creek Powerhouse will be in operation for the first time.

When the two plants are on stream the company will have added 28,000 horsepower to its generating capacity since V-J Day. Elsewhere on the system new plants continue under construction, which will add another million horsepower by the end of 1951. P. O. and R. is the nation in its third major power expansion program.

Involved in the double-barreled Feather River project are the construction of two dams, two tunnels and the two powerhouses as well as a major highway relocation, erection of towerless lines along majestic canyon walls, the transportation of heavy supplies, and the landfilling and construction of concrete.

For 16 miles through the narrow canyon of the Feather every shovelful of earth is of vital interest to everyone. Trails, tongs and trestle have been built through the canyon on both sides of the river for the 4,000 workers necessary for the job. Roads, tunnels and tunnels are under construction, which will add another million horsepower by the end of 1951. P. O. and R. is the nation in its third major power expansion program.

Aluminum Foil, a New Industry
For West, Opens in San Jose

By M. G. "MICKEY" MURPHY and JOE MILEY

Business Representatives, Local 3

Permanent aluminum foil will roll into a new field. Flatly speaking, the rolling of aluminum foil is an entirely new industry on the West Coast and as such, the construction industry for the processing of sheet aluminum to foil was imported from Germany and installed in the new plant.

Two workmen and a team of three engineers engaged in this venture have already made a great many workers in the construction field. An entire crew of new workers has had a great many new skills that are safe for the full and we are anticipating the market will grow.

SAN JOSE

There is quite a little work going on in this district and the employees in the pipeline and sewer gang are busy with many jobs. San Jose is the focal point for the construction of many of the new buildings and structures in the city. The work on these projects will keep the city's population busy for some time. We notice that Los was busy on the Spring and that their employees are working on some new buildings.

Bart will not be very busy this month, probably due to the fact that the local companies are not able to keep up with the demand. The work force is quite small and the job is not very large.

OSGOTH

Riden, Beeg, Benchi, Jelen, L. C. B. M. Miller, B. Baker, R. J. Goen, V. E., and Keesha, have completed many of the new structures and have a few more to do. In the next few months, we notice that the company is going to be very busy with the new buildings.

MINEROSA

There are a few men employed in the construction of the new structures. We notice that the city is going to be very busy with the new buildings.

SOUTHERN TERRITORY

Brother Alex Mercanti for McGlory Co., Inc., in Terreno, has completed his work and is moving on to Butler's territory within the next few days. We know that he is happy to have his work and we are happy to know that he is going to be busy.

Due to the price drop in crude oil, much of the activity in the area has been accelerated. Many of the employees are available for work and we are anticipating that the situation will improve.

Due to the oil situation all over the country, we notice that there are going to be many changes in the new buildings.

MENDOCINO HOSPITAL

The work on the hospital continues which was recently completed by our friend, Robert H. San Francisco for the Mendocino Hospital, at Ukiah, Calif., with a crew of 150 men.

The Nevada Construction Co. of Nevada, Nev., are well along with the work on the new hospital. The hospital will be ready for occupancy within a few months.

The work on the hospital was started by a large crew, but a large crew was needed to complete the work.

For West in San Jose, we are sorry to report the death of Sam McGlory, brother of the late brother Bob Steele, who was killed in an accident on the job.

The Van Valkenburgh Co., sturrn new hospital in Chico is doing nicely with a crew of 200 men. Brother Dave Wood is at the work and will be there until the job is completed.

We hope that everything will go well with the new hospital.

RECRUITER NEWS

Walter and Rocker are about to start work on a new building. They have their electrical work on the new building and have started work on one of the new buildings.

The work is going to be done by the same crew that worked on the new building.

Rocker has been working on the project and has done a good job.

The work is going to be done by the same crew that worked on the new building.

Rocker has been working on the project and has done a good job.

The work is going to be done by the same crew that worked on the new building.

For West in San Jose, we are sorry to report the death of Sam McGlory, brother of the late brother Bob Steele, who was killed in an accident on the job.

The Van Valkenburgh Co., sturrn new hospital in Chico is doing nicely with a crew of 200 men. Brother Dave Wood is at the work and will be there until the job is completed.

RECRUITER NEWS

Walter and Rocker are about to start work on a new building. They have their electrical work on the new building and have started work on one of the new buildings.

The work is going to be done by the same crew that worked on the new building.

Since the last issue of the paper, work has improved considerably, and the crew has cleared a good many jobs. A mid-month slump set our out-of-work list back somewhat, but things have picked up again in the last couple of weeks. However, we still have a plenty of takers for all of the jobs.

The J. R. Armstrong Company started work on the additional lane to the highway out past the Broadway turnpike. They have cleared the land for the residents of the Walnut Creek-Lafayette area, as it is expected to help considerably in overcoming peak traffic hour seas up and down the way.

Fredrickson & Watson are well started on the Freway in East Oakland and they seem to be in the swing of their jobs. In operation. This company has started work on the San Lorenzo Blvd. job and is now pouring concrete.

Macror Construction Co. have the subcontracts to drive the piling on this job. Brother Earl Weaver says that they have signed a contract with S. C. Smith handling the siding.

Roberts-United has the mucking machines double shifted on the cove job. A new job is now awarded to the contractor.

Out in Contra Costa County, Mauvay Improvement has a couple of good jobs. They are in their pool of Rosenthal job at the new Detore.

Ben Gervais has double-decked the drivers on the PG&E job. As you can imagine, his patience has worn thin and he is expecting the drivers to finally fall off considerably.

Brother Bob Vaughs, new steward of the 4-134 Mobile, reports that things are running well. Our local is in strong connection with the Mobile, W. Griffis and George Milford at the company on the Chicago Bridge and Girard.

Dropped by the Ben Gervais yard, and run into the two Broxton Bridge yard for the first time. Brother Joe Smith is a cracker of their own and he is busy running things up a pace. Joe has been members for a number of years and he knows many fellow members who have worked every success in Detroit and understanding.

Work on the Charles Swing Disposal Plant near Hayward is progressing rapidly. In addition, three Engineers on the same job are now volunteering their time who is contracting this work.

Lottery Paying has the chances for playing of unneeded cables for the Multiva. Their lot and to have to go to the Shaw & Swap Ave. This San Francisco.

NEWS ABOUT THE BROTHERS

Robbies, avocations, outside interests—call them what you want. Among the members we find they are varied, always interesting and many times unusual. Sometimes, a hobby is engaged in for artistry, for privacy, or for relaxation; and again, it is started with an eye toward profit. It's a hard fact to get your mind made up to the weekly pay check when you are running the same job over and over before the road can be opened for traffic. But there's no room on the job.

While the employment picture is good in the Bay and there's plenty of work coming along, there's a number of members who are doing a lot of things that are not being recognized by the paper. There are many members today who are doing things that are not being recognized by the paper. There are many members today who are doing things that are not being recognized by the paper. There are many members today who are doing things that are not being recognized by the paper.

One bright spot in the employment picture is the stock and sand business. There have been many new jobs opened up this year and it is expected that many more will follow. One thing that is interesting is that the stock and sand business is not only a good business for the members of the union but it is also a good business for members of the general public.

Brother Dick Christopherson was elected to the board of directors of the Pacific Bridge Co. This was a surprise to all members of the union.

NEWS ABOUT THE BROTHERS

As the season of the year is now approaching, the time to think about your hobbies and avocations is now. The time to think about your hobbies and avocations is now. The time to think about your hobbies and avocations is now.

SACRAMENTO—"Out of Work" List Melts as June Sunshine Brings Work to Valley

E. P. (ED) PARK, Business Representative, Local 3

The month of June brought not only hot weather but consistent lack of work throughout the Sacramento Valley area. For this year we are getting the best of our "Out of Work" list.

The first bids on the Deep Water Channel will be opened on June 27th. On the morning of the same day, a special train and channel leading and trains for and by roads, railroads and levee entrances and the Harbor area.

It will be remembered that the first job, after the bid opening before any notices of award were issued, was the Fillmore St. Bridge. The second contract awarded to Brother William Benning was on Charlie,.......

The month of June is expected to bring a return of some work to the various construction trades in the Sacramento area. The Washington School for $13,410.00, a contract for street improvements on 20th Street between T and U Streets B to 16th, has been awarded to the Bidwell Bros. It should really be going without saying that the high temperature, combined with the high humidity, will be the most important factor in the work season. However, those who have not been in the habit of working in the summer will find it advisable to start now.

The recent completion of the new St. Mary's hospital, at Anderson, and the addition of nine classrooms, a new contractor, Placer county.

Associated with the mechanical work, second Touches, reached 1949,.......

A companion to the above, the Los Angeles Cleaners, has been awarded the contract for dredging at Watsonville, $140,862 for canst. five re-

With most of the previous contracts awarded, the work on the Deep Water Channel will be opened.

The Southern Pacific at its right-of-way, with Brother "Smokey" Sullivan moving the earth. The Underground Construction Co. has been awarded the contract for laying the telephone line on the new right-of-way.

Roads and curbs at Uptown, $9,035 for repair line of pipes near River at E St. Yuba City, on D St., TUBA COUNTY.

The Continental Construction Co. was awarded the contract for the new Reno High School, on Scripps Avenue, $18,542 for con-

Several local companies have been awarded the contract for the new project. By Brother F. L. Lindstrom, at full pay. The Redwood News is a weekly publication and is interested in the work being done in the county.

June 14, 1949

RENO, NEVADA, was awarded the contract for the Davis campus, $35,867 and they lim in ary work on the Davis campus. -The Davis campus.

It will be approximately a

We are expecting to report that Brother Floyd Baldwin has been awarded the contract for the new project.

Brother Jim Cheadle is now in charge of the work. He is reported to have finished 6-20-49 and will do all the work on the Nevada project.

Brother John Harrison was a guest at the Mercy Hospital. He was subjected to operation. He is reported to have been doing well.

Brother Bob Stillman has been working for the Sacramento County School Board. He is reported to have done a good job and is now working on the same project.

The Sacramento Office will be open from 7 until 9 o'clock each week, beginning June 21, 1949, for the convenience of the members of the county.

DO NOT FAIL TO OBTAIN A CLEARANCE BEFORE GOING TO WORK ON ANY JOB.

WORK PACE SLACKS UP A BIT IN S.F., BUT BIG JOBS AHEAD

P. E. YANDEREW, PAT CLANCY and HARRY METZ
Business Representatives, Local 3

Working conditions have slowed somewhat from our previous report, due to the completion of some large jobs going on in the area, some new jobs of quite large proportions will be let next month, which should furnish additional employment for skilled tradesmen.

Dwight Seaborg, Const. on San Andreas was granted a (7) seven cent increase by the Committee of the Officers of the Operating Engineers Union working in the quarry and sand industry.

There has been reports of some construction work in San Jose and San Andreas locality, but you boys should be alert.

Mr. Blake and Mathes attended a meeting with P. W. Clemens of the Union, and was promised employees at the creek dredging project.

It is allowing the piers and docks to blood donations for our account and the Union, rather than the graveyard, no activity to speak of,

Merced apartment house project. Most of the towers for each of the 13 homes have been completed and the concrete is being poured on the roofs.

Eaton & Smith is still doing a considerable amount of excavation work to the 30th Ave. cutter. They are also back on the Younger Plants, but there are not many details.

It is hopeful that the citizens of the area will be interested in this project. It kept "Scecy" McConnell busy handling the concrete operations.

SEWER, LAKE JOBS

Remains a steady job, the piling job for the lake crossing is still making good progress. We carry the new entitle nine miles across the lake to the new sewer plant, which will be put into operation in the near future.

Local 3 pacified by agreement at the International Union meeting to extend the contract for five years as of the first of July and to have the local union take formal action by profession for labor lurk for the membership as a whole, are appreciative of our efforts in their behalf.

Wise men say that actions are going along very fast on the Stockton's Station road job. Although it is summer in the day time, it sure isn't at night.

The election in Local No. 3 is now past history and all who were elected are good friends as they always are.

It is an indication that the membership as a whole, are appreciative of our efforts in their behalf.

The members are going along very fast on the Stockton's Station road job.

Sixth District, CON. at San Andreas were granted a (7) seven cent increase by the Committee of the Officers of the Operating Engineers Union working in the quarry and sand industry.

There has been reports of some construction work in San Jose and San Andreas locality, but you boys should be alert.

It is allowing the piers and docks to blood donations for our account and the Union, rather than the graveyard, no activity to speak of.

The conference being held in Santa Barbara over the new shipbuilding program and the future of the yards is now in its third week and no satisfactory agreement has been reached up to this point. Although the union is still optimistic about the outcome, little progress is being made.

The waterfront still remains a battleground, but the strike is not as far advanced as it was at the beginning of the strike. The majority of the members have been laid off as of last week.

The waterfront still remains a battleground, but the strike is not as far advanced as it was at the beginning of the strike. The majority of the members have been laid off as of last week.
