STATIONARY ENGINEERS LOCAL

Vol. 16-No. 8

SAN FRANCISCO, CALIFORNIA

August, 1958

Last Day to Register Is Sept.

EMBARCADERO NEW LOOK-The 1.2 mile, \$91/2 million, double-deck freeway from the Bay Bridge to Broadway, along the waterfront, is moving fast these fine days. Southbound motorists, riding 70 feet above the street, will get a spectacular view. The job is to be completed late this year. Contractor is Chas. L. Harney.

Wkrs. Hit 150% Harder Than Rich by Sales Tax

(State Fed. of Labor Release)

California working people are now carrying a sales tax burden at least 150 per cent greater than those in the upper-income brackets, it is charged by C. J. Haggerty, secretary-treasurer of the California State Federation of Labora

Haggerty said the adoption of Proposition 17, the labor-backed state tax revision measure, will "relieve this injustice" by re- tax is a deterrent to economic cent.

Haggerty said that Proposition 17 provides a basic guarantee that the legislature will not aggravate the sales and use tax burden at the 1959 session.

Under Proposition 17, the measure gives the legislature the right to reduce the sales tax rate, but not to increase it above the 2 percent rate written into the initiative.

The power to establish higher rates would be reserved to the people by vote of the electors.

The state AFL head also wealthy. charged that the present-sales

ducing the present sales and expansion, since it seriously use tax from 3 percent to 2 per- weakens the buying power of

the working people.

Haggerty said the state faces the problem of maintaining consumer purchasing power during the present recession, if the consumer public is to "buy the ever-increasing products of American industry.

He also charged that ultraright forces in the California political world are "obviously planning" to impose new sales and consumer taxes in their efforts to offset the current fiscal crisis brought about by income tax privileges written to favor the

Make Sure that You, Others, Are Properly Registered to Vote!

By NEWELL J. CARMAN, Local Union Manager

One of the most crucial situations ever to face the organized labor movement in California lies directly ahead of us in the coming weeks-namely the battle to KILL THE OPEN SHOP MOVE now being tried, thru Proposition 18, which will return the working people to the dark ages in labor

And only three weeks from now we arrive at the first big skirmish in this battle . . . the last day on which you can register to vote. The second and final round, of course, comes on November 4, election day, when it will be decided whether or not the clock is to be turned back for the wage earners of Califor-

PLEASE MAKE EVERY EFFORT TO ATTEND YOUR DISTRICT AREA MEETING AND PARTICIPATE IN THE ELECTION AND FORMATION OF THE GRIEVANCE COMMITTEE.

San Mateo, Hub of the Peninsula

Work Booming in San Mateo County

By BILL RANEY and JERRY DOWD, Bus. Reps.

Work is really at a peak in San Mateo County, Good dirt men are at a premium, especially rubber tire and dozer men. Plant Mix, Rock Plants, etc., are not as good as last year, but the heavy dirt moving jobs are using more men. If the work load keeps increasing, we should have a bang-up year. One of the busiest

areas to be found in the County is in the vicinity of Junipera sub-grading the streets in the Serra in Daly City.

Colma, at the northern end of in the County. the County is progressing right along at this writing. We have eighty or ninety operators, melills Subdivision in San Mateo chanics, and supervision men on the payroll at present. Due to the fact that there is still a lot of dirt to be moved, together with shift basis hours, there is not so much turnover in personnel. There is no doubt that this is one of the better jobs in the area.

On the same project P. & E. Construction Company is going along with the underground work. In fact, they are right on the tail of Parker's spread. Really getting the job done in a hurry.

There are several other contractors on the job site. We have Jim Wilder cutting the lots with County also. his D-6, and Oliver Dozer, also his Fordson. Lyle McCann has his Case Backhoe digging the Redwood City is coming right home foundations. We are glad to see Lyle back in business once again. Lots of luck and good digging Lyle.

Over the hill on San Pedro Road, Piombo Construction Company has a Model 6 Northwest and two dozers working. Piombo is getting their fill here for the Hilton Hotel job at the Airport. This job is working two seven and one-half hour shifts. Quite a lot of yardage to be moved.

L. C. Smith still has his two ment for members of Local 3: shovels and blade working in the same location on Junipero are still working a few 20's and Serra Blvd. All this fill is going to the Airport area also.

Piombo's fill job at the airport is coming right along but know where we would get the they still have a lot of material operators though. Really scrapto haul. Their shovel and Euclid ing the bottom of the barrel Loader continue putting the muck out as fast as ever. Cer- healthy feeling. tainly keeps the dozer hands BRUNO SUBDIVISION busy on the fill. Bud Young was made fill foreman last month. Congratulations Bud.

At the United Airlines Maintenance Hanger and surrounding area we have quite a few jobs going on. L. C. Smith is in this area and as it is their doing the street work, Associ- old stamping grounds, they ated Engineers the underground. should know every bush and S. &. Q. Construction Company rock. Bro. Hammes will push has several of their rigs working in the area also. Besides as Master Mechanic. Bro. Frank these mentioned, there are quite | Coehlo is also on the project. a few smaller Sub-Contractors doing their part to make this one busy place. HOSPITAL JOB

Williams & Burrows are coming along with their Peninsula Hospital project. Bethlehem Steel Company are getting the steel up in a hurry. We don't have too many engineers on the job at present but hope to put a \$98,000 bid on a sanitary sewa few more on in the near fu-

Nick Ratkovich has started hauling from the Mills Estate. He's placing the fill between the Freeway and the old Bayshore, reclaiming this land for industrial sites. There's a 54-B in the pit with a dozer and blade. The dozerman on the fill has his hands full keeping up. No coffee time here.

Also in Millbrae we have the California Teacher's Association Building going up. Swinerton & Walberg are the prime contractors. This job has just started getting underway but will employ a few more Brothers in the future.

Mills Estate. This company has The H. Earl Parker Job at quite a lot of work going on

> Charles Berger still has a few Proper. This has been a nice job all summer for the Brothers. We hope another section of this job will be let. Charley also has his 80 Shovel working on Ralston Avenue in Belmont. The material going to the Parkside Subdivision, where they are reclaiming more land for home development. These are just a few of the jobs that Mr. Berger has going on in the County.

C. J. Woods has several rigs working on the Alameda De Las Pulgas in Belmont. Looks like its a little on the rocky side, Brothers. Woods, like Berger, has several jobs going on in the

Barrett Construction Company's Sequoia Hospital job in along at this writing. We have three engineers working there now and sometimes four. Would like to have a few more of these jobs in the area.

J. O. Archibald still have a few rigs at Farm Hills in Redwood City. Won't be long before Brother Bob Smith will have it all buttoned up.

In general, construction in the South San Francisco area is creating a great deal of employ-

Utah Construction Company two Cats on their job in South City. Would like to see them open up some more work. Don't now, but this makes for a very

McCammon & Wunderlich were awarded the contract for one-quarter of a million dollars Subdivision Improvement job in Crestmoor, in San Bruno, The company has had previous work the job with Red Fredrickson "Ham" expects to have about eighteen skinners at the peak. This one should last about four months.

New work just starting: Fill, construction, canal work, paving and pipeline work at the San Francisco Airport. Approximately one hundred thousand dollars. Krzick and Ramos were low with erline in Pacifica. Lowrie Paving Company was awarded a surfacing and pipeline job in Burlingame for \$41,000. South San Francisco has called for bids for two miles of storm sewers. Bayside Paving Company were low with a \$92,000 bid for storm drain improvements in Daly

Cotherman and Judd Incorporated were awarded the contract for surfacing and sidewalks on San Carlos Avenue, in San Carlos. Jefferson Union High School District is calling for bids for storm sewer, curbs, gutters and walks, as well as, street paving at Westmoor High School, in Daly City. We have

HARRY W. METZ

Passing of Bro. Harry W. Metz

Bro. Harry W. Metz, a business representative for Operating Engineers Local 3 for the past 20 years, succumbed on July 17 following an illness of three months.

Bro. Metz, who was 56, is survived by his wife, Violet, two married daughters and a grandchild. The family home is in San Mateo.

In addition to his duties with Local 3, Bro. Metz was also regional vice-president of the State Federation of Labor. Secy. C. J. Haggerty and Pres. Thomas L. Pitts of the Federation were among more than 300 trade unionists and friends who attended funeral services held under Masonic auspices.

Bro. Metz was active in the entire labor movement, taking leadership in many affairs that brought honor to labor in the community and state.

that the contract was awarded to Adam Arris for \$166,000. ENGINEER RALLY

Contracts with Bethlehem

Guire & Hester who are doing a cific Cost Ship Repair Comsmall amount of work on this panies have been completed and project for the City and County signed for a one year contract. The new contract includes an 11c per hour increase; two additional paid holidays per year, as well as increases in the Welfare Plan effective January 1st, 1959 with an additional 21/2 cent increase as of July 1st, 1959. The Key Terminal Job is pro-

pressing very well . . . Macco Company have now completed the rail removal in the terminal and on the approach ramps. Haas & Haynie were the successful bidders on the remaining portion of work on this job. This will include widening the ramps and paving the new roadway for bus service on the old train level, Pacific Paving Company is the sub-contractor on the paving work and Moore Drydock Company is doing the steel work. This job will be completed in about six months.

Charles Harney is very busy on the Portola Driv job. Some of the cement is already layed and the traffic will be eased shortly. Meanwhile Harney's Geary St. job is progressing very well but it will be some time before traffic gets back to normal. On the Ball Park most of Harney's equipment has been moved away . all that's left is the 120B, and a few cats and drill rigs which are still busy moving rock.

Williams & Burroughs have a cleaning and grading job on Clarendon Drive. They are claning out a lot of trees and bush on the West side of Twin Peaks making way for some more new homes to be built on a real "view" area.

Congratulations to Brothers George Freeland, Guy Slack and Jack Lloyd who were elected to the grievance committee at the last membership meeting an San Francisco. These Brothers are all full of vim and vigor and are doing a swell job!

In closing lets not forget A IMPORTANT VERY LEGE . . . THE PRIVILEGE OF VOTING!!! Remember that you must be registered to vote and if you, or any member of your family is not registered, the deadline to register is September 11th, 1958.

By H. T. PETERSEN, BILL BARR, TINY LAUX, DON KINCHLOE, WARREN LeMOINE and TOMMY THOMPSON, Business Representatives

Another section of the Eastshore Freeway will open early this month-another milestone in our Eastbay Freeway system.

Westbound traffic will be routed up on the elevated eight-lane section at Webster Street, through to the double deck freeway section at Market Street.

Eastbound traffic will continue to use Fifth Stret, while work on the \$6-\$7 million dollar structure is being completed. The 1.6 mile section is due for full use in December. The contractor, Johnson, Drake and Piper, are well ahead of scheduled.

The 10-mile stretch of Nimitz Freway in Southern Alameda County is runing ahead of schedule and will be opened in October. The completion of this section will link Berkeley and the Eastbay with the San Jose area by freeway.

The Summer Rush is on in San Jose District

By A. J. HOPE, T. J. STAPLETON and DANNY O. DEES, Business Representatives

We are happy to report at this time that our "Out-of-Work" list has been depleted. It has been a long time since we have been able to say that all of our men are working. There is no waiting for jobs at this time; as soon as a Brother finishes the job that he is on, there is another job waiting for him to go on. With new contracts being let every week, it looks like the Brothers will be busy until the rains shut

Ball and Simpson's work on the Freeway is shaping up nicely and have recently seen fit to put on the second shift. They expect to start paving in September. A. J. Raisch Company on this same project have completed most of the black-top on the overpasses and access roads. The bids for the extension of this highway will be let within a month.

J. C. Bateman Company have completed their job in the East Foothills and have started work on their subdivision off Saratoga

Piazza Paving Company have considerable work in this area. At the present time they are busy on their job of widening Curtner Ave., and have several paving jobs for the City of San Jose. They have all three of their Crusher Plants working at full capacity.

Brother Doc Reynolds is working in subdivisions in the East Foothills and also working on his job at the San Jose Brick Yard off Los Gatos Road.

P & E Construction Company are doing the underground work on the Tropicana Village subdivision. This 10,000 home subdivision will keep the Brothers busy for a long time. Pisano Brothers and Heple Utilities are also busy doing the sewer and underground work everywhere in this locality.

Ed Keeble was the low bidder on a \$65,430 contract for the improvement of Cottle Ave. in San Jose.

PALO ALTO, MT. VIEW

M.J.B. Construction Company and Dan Caputo have started their \$1,150,920 Freeway and Interchange job located at Mt. View - Alviso Road and the Bayshore Highway. They have 130,-000 cu. yds. of road excavation with 175,000 tons of imported borrow and sub-base material. the job.

P & E Construction Company is keeping 10 Engineers busy on their storm-drain job on Fremont Ave., in Sunnyale. They have 6000 feet of 36-inch and 52-inch pipe. This job went for 993 000

ous street jobs in Sunnyvale that in Livermore. went for \$412,828. It's the same old story, every place you go you see Sondgroth's equipment.

STOCKTON BUSY ON SMALL JOBS

By WALTER M, TALBOT, AL McNAMARA and C. L. CASEBOLT. **Business Representatives**

We are happy to report that the work here in the Stockton-Modesto district is improving to the point where we occasionally are unable to fill the calls for certain classifications of operators and apprentices without some delay. This of course varies from day to day as the supply and demand for engineers rarely is the

same. The jobs that have been let and those to be let are not of be finished with the dirt in any great size so consequently we are faced with the problem of reshuffling the brothers from job to job as one ends and the other commences.

Charles J. Dorfman of Los Angeles was the successful bidder on the southern industrial trunk sewer line job here in Stockton. This is the largest job let by the City of Stockton this year. The Dorfman company bid was \$934,336.

Duncan-Harrelson Company of Richmond secured another job in the Port area. Their new job is in the Naval Supply Depot on Rough and Ready Island, The job entails berthing facilities for Navy craft. The amount of the bid was \$135,738.

We have four bridges under construction at this writing, with another to be let August 27th, between Union Island and the Fabian Tract. However two of these are small structures, one across Mormon Channel on South San Joaquin Street and the other across the same channel at Diamond Street. which was just let to Thomas Construction Company of Fresno. Lord & Bishop should have their two bridges across the Calaveras River under way by the time this is printed, one on North El Dorado Street, the other on North Pershing Street.

Five road jobs in this district are now in the paving stages STOCKTON, Contract award- SACRAMENTO, Contract which has put a strain on this office to supply hot stuff paver and roller operators, asphalt plant crews and screedmen.

Rice Bros. is paving the road for Rockport Redwood Company at Yosemite Junction with M. Miles and Son on the cement SAN FRANCISCO, Contract treated base. Baldwin Contractawarded to Assoc. Pipeline Inc., ing Co. is paving for Transocean Engineering Corp. on their highway job near Jackson, M. J. Ruddy & Son and A. Teichert & Son are both paving on highway SAN FRANCISCO, Contract 50. Teichert at French Camp and

SAN FRANCISCO, Contract cats on the job by the time this

Macco Corporation have at this time one truck crane crew, three technical engineers and a monia Plant job near Lathrop. We expect that more engineers will be required before the end of the month.

H. Earl Parker is moving right along on his job at Peddler Hill on Highway 88. There is lots of rock on this job so they have the shovel working two shifts.

Joe Lema has started his five miles of road at Ham's Station Alto, \$44,146, for impyt. of San for the Forest Service. Joe has eight cats, three rubber tired rigs and a blade on the job.

Baldwin Construction Co. is laying the blacktop for Transocean Engineering on Highway 88 at Jackson. They have about three weeks of work left to complete the job.

Claude C. Wood Co. has finished moving the dirt on the Highway 4 job, above Murphy, SACRAMENTO, Contract and is getting ready to lay the

Claude C. Wood Co. also have the Pardee Dam job and should mento, SACTO COUNTY.

about two weeks. The lake will be open for fishing this fall and they must have the roads, docks and launching ramps finished. There will be no swimming or water skiing allowed so this should be good for the fishermen.

The bids on the Murphy grade job between Altaville and Murphy have been rejected by the Division of Highways. The bids were too high, more than the amount of money the state had set aside for the job.

NEWS ABOUT BROTHERS:

Brother Ray Smith has returned to his home after spending a couple of weeks in Dameron Hospital. Ray had what the medical people call Encephalitis, or inflammation of the brain. After doing a little research we find that this disease is carried from livestock to humans by mosquitos.

Received a letter from Troy H. Harwell who is employed by Guy F. Atkinson Company as an instructor in Japan. Brother Harwell's job is to teach the Japanese workers the use of modern machinery and how to operate

Another old timer who in past years has broken in more cableway operators than anyone we know is Brother Bill Bacon. Brother Bacon is now laid up with asthma,

In our past issues of the Engineers' News we have neglected to mention that Brother Vern Holmes was elected as the Stockton District rank and file executive board member, This district is composed of Alpine, Calaveras, San Joaquin, Stanislaus, Tuolumne and that portion of Amador County lying south and including Highway 88.

Brothers Sam Coburn, Harvey Edwards and Larry Chapman were elected to serve on the newly formed grievance committee at our last district meeting held in Stockton.

SACRAMENTO, Contract awarded to Edw. Keeble, Rt. 4, Box 64, San Jose, \$50,336, for Mossdale and should have ten widen rdwy., chnlz., const. traf. sig. sys. & hwy. lgtg. at Cottle Rd., San Jose, SANTA CLARA

SANTA ROSA UKIAH AREA JOB LOAD JUST FAIR

By R. F. SWANSON, Business Representative

I am very happy to report that most of the brothers in this area are working. That is the condition as of now but just what the future holds for all of the brothers is hard to say. I am sure that something will have to be done in the way of highway improvements for the roads in this area certainly are not adequate

to fulfill the needs of the ever increasing population and the the clearing. LeBoeuf & Doughincreasing number of tourists.

When the Coyote Dam is completed it will probably mean an ing. By the way this is disapincrease in the recreational facilities of the Ukiah area and this will mean a larger group trucks, so all of you rubber opof people who will continually erators please don't expect much be on the highways from the bay area. Now, in the peak of the tourist season it is impossible to make any time, even at homemade hopper contraption the legal speed limit. Once you which is kept loaded by cats. leave Santa Rosa going north, highway to slow the traffic to a snails pace. Improvements are there are no more major highcontinually being made but in way projects. As can be seen my opinion not fast enough for the need.

they feel just as I do. Some of the state legislators should take a trip all along the coast highway and see for themselves what a terrible condition this stretch of road presently is in. I guess because of the Winter Olympics due to be held in Squaw Valley in 1960, the roads to and from that area are on the high priority list but I do think that the Federal Government and the State should break loose with more highway work in this area. After all where else can you go and find all the advantages we have such as seashore, giant redwoods, lakes, and on about this area for I am impressed very much by it.

I would like to skip mentionwho are working for the various contractors in this issue. In the of the brothers working in this MISCELLANEOUS area and believe me I have had many comments both pro and ments which you brothers would care to make. I'll see you on the job so let know what you would prefer.

HIGHWAY WORK

cipated on the road between are scattered on various jobs Santa Rosa and Guerneville. close to Healdsburg. This would mean work for a few of the brothers. As we travel casional engineer but in the up the coast the first job of any most part try to keep their regsize is at Gualala. Here we find ulars busy. Tom Hanna in the windup stages and Peter Kiewit also on the home stretch of their road and division work in Santa Rosa. bridge job. Going north all the way to Rockport we find Tom Hull just finishing a small tions I have no news at present. stretch of highway. The next job | As soon as I hear anything from is at Cummings where Ball & the negotiating committee I Simpson are working on about a will have a meeting with those three-mile stretch. This is the of you employed under the biggest job presently in the area terms of the Rock, San and and they are working on a twoshift basis and will go on into next year. South of this job at Longvale is Mercer-Freser and Humboldt Constructors. Humboldt is about through with a five-mile stretch and Mercer- home in Ukiah after having suf-Freser is now doing the finish-

E. A. Forde doing a resurfacing job. This shouldn't be too Jong a job. Continuing south to Healdsburg we find Guy F. Atkinson working on the Healdsburg by-pass pob, Atkinson is

erty the pile driving. Phillip F. Rogers has the hauling and loadpointing because we had anticipated a lot of 20's and 21's on the job and now it will be all work out of this project.

The trucks will be loaded by a type of Euclid loader with a This means we have some equipt just takes one truck or one ment on the job but not near Sunday driver on the two-lane as much as we expected. Continuing south to Santa Rosa from this paragraph there is very little highway work for Maybe I'm just bitter, but I such a large area and this is don't think so, for I have talked the reason for my going on so to many of the brothers and much about the much needed highway improvements.

COYOTE DAM

Guy F. Atkinson has gone on a two-shift operation at the dam in the obtaining and placing of the rip-rap. A question came up as to who would be entitled to the shift premium. And after much discussion we came to an understanding that those brothers who were in any way connected with the two-shift operation would be entitled to the shift premium.

PIPELINES

E. T. Haas have finished in Ukiah but are still working in rivers, mountains. I could go on Fort Bragg on their pipeline job. Valley Trenching have started in Ukiah. Lentz Construction is ture. The Prime Dirt Mover of also going right along in Ukiah. ing the names of the brothers In Santa Rosa W&S still are employing a number of both Local 3 and 12 men. NEVADA ROUND-UP

By H. L. "CURLY" SPENCE and JOSEPH "JOE" MILLER, Business Representatives

Morrison-Knudsen has most of AIRBASE the muck moved on their job East of Sparks, Nevada, on Highway No. 40. The two shovels are digging on the last cuts with Brother Henry Tonn and his faithful Oiler, Brother Earl are pushing most of Miller's Olmstead, a real shovel crew, and Brother I. J. "Tobe" Tobler and Brother W. J. "Bruce" Broussard, the Oiler, holding their own on the other shift. Brother Leonard Miller, the Number One Blademan on the job, has lots of work and trouble keeping up with the blade work and other small duties he has to do in everyday of life. Brother Frank Gillespie has his Rock Crusher on the job crushing all the rock. Brother Don Jeakins is on the Crusher and he is quite the crusher man. Brother Chuck Walsh is the dozer hand on the job, and Brother Guy Tietjen is on the crushing crew but he doesn't do much work. Whiting Brothers has the sub-contract for the paving on the Morrison-Knudsen job. They have their Hot Plant smoking and going. Brother M. E. Butler is feeding the Hot Plant, and its a rough, dusty job, but that Butler's just the boy that can keep the Hot Plant going. Brother Larry Hudson is the Finish Roller man for Whitting Brothers, and that Larry can really roll it out smooth for he has had lots of

experience in the Hot Stuff

Game.

The Isbell Construction Co., Gordan Ball Co., and Granite Construction are well along with their joint venture on Highway No. 40 between Floriston, Calif. and Boca, Calif. The Bridge Structures and Railroad Overpasses are shaping up in good form. Granite Construction's Hot Plant is going good. They are mixing hot stuff for three other jobs other than the joint venthe three way joint venture, Isbell Construction is well along with the dirt. They have some Men on the job. Brother "Bud" Berg is the Finish Scraper Man and Brother Bill Ponton is the driver" on the job, and now Rapp Construction now - no Dear Brother Gray Azarren, "The Gambler", is the outstandpecially when he wins on Keno. And there is Brother W. R. Skinner doing his part on a cat. Bro. "Wild Bill" Whitworth has been promoted to a blademan, and believe me, that "Wild Bill" is going to make a real blademan one of these days. Brother Charles "Charley" J. Schafer is the grease monkey of all greasers and does a real job greasing the equipment for Isbell.

> Isbell Construction Co.'s Sun Valley job is going along in fine shape, and so is the "I" Street cut-off from Sparks to Reno.

> Isbell Construction Company expects to get started on their resurfacing and widening of the shoulders on Highway No. 40 between Reno and Verdi, Neveda, real soon. They are going to mix the Hot Stuff at the Second St. Pit and Plant.

Right-to-Work initiative. Vote NO on Proposition No. 18..

MEETING NOTICE

The next meeting for the area will be held September 4th at 8:00 p.m. in the Ukiah Labor Temple. Brothers this is a most important meeting for at this meeting you will elect from the rank and file a grievance com-

The George E. Miller Company has quite a bit of work around town and out at Stead Air Base. Brother Howard Johnston and Brother Don Bruner

Brother Cal Scolari is the Bossman now, for the George Grifall Company, and he really keeps that Brother Al Parlanti hopping now that he is the Boss. Brother Cal is even keeping George in line too.

busy putting gravel on their job at Starr Valley and Secret Pass in Elko County and will be paving these two jobs very soon. Brothers John Emmons and George "Whitey" Cate have subbed the paving on the Secret Pass job. We wish these Brothventure. Hoops is also getting the fellows to work. the job at Denio ready for gravel and oil. This Company was awarded two jobs in White Pine County at Ely, Nevada, and are hard at work on both jobs. They will be in full swing on the widening and paving East of Ely at press time.

South of Ely, Nevada, on JULY 3, 1958 Highway No. 6, Rice Brothers and Wells Cargo, Inc., are both in high gear on a stretch of road about 30 miles in length; Rice Brothers are paving their job at the present time and have about thirty operators working. Wells Cargo is in the dirt moving stage on their job and are moving along ahead of schedule at the present time. Brother Jack Chatelle is keeping the spread moving at a rapid pace.

Dodge Construction of Fallon, Nevada, has started to work again at the Iron Mines Southwest of Lovelock, Nevada. They have new ore contracts which is good news to the Brothers in the Lovelock area. These Brothers lost about a months work because of the mine shutdown.

Dodge Construction is also busy on their Highway work and will complete a couple of their jobs in the near future. The jobs at Austin, Nevada, and Mill City, Nevada, are near the final stages. Their job at Minden, Nevada, will be underway very soon.

FALLON

Carson City, and Hawthorne, Nevada. Work is progressing very well on each of these jobs. At this time, we are having some difficulty with Andy Drumm and are in a dispute with the Company over working schedules and overtime payments. It seems as though he has to attempt something new every now and again that doesn't conform with the Agreements in this area. By the time that this paper comes out, we will either have the issues settled or be in a fight with Drumm and tying up his jobs. We hope that this dispute can be settled.

Stewart and Wells were awarded the job from Yerington to Wabuska, Nevada, and will be moving on the job in a couple of weeks.

Morrison-Knudsen were low bidders and have been awarded the job on the Mt. Rose Road near Lake Tahoe. This should be a very good job as there is about 30 acres of clearing and around a half million yards of excava-

The Keystone job at Ely is advertised now and will be awarded at the middle of the month. This is another job that dollar mark. We hope that this sewer.

project will give the Brothers some winter work.

The Highway project East of Reno in the Canyon that is between Painted Rock and the Eagle Pitcher Plant should be advertised this month, WE HOPE. This is another four lane project and will keep many of the Brothers working when it gets under way.

There has been a considerable amount of work in this area this season, but there has also been a tremendous influx of men that Hoops Construction Co. is are out of work. There has been more men register on the "Out of Work" list in the Reno office this year than ever before in previous years, but we couldn't possible put all of the men that have registered to work. It has been a good season though and we hope it continues to grow ers a lot of good luck on this and that we can get more of

Construction Awards

SACRAMENTO, Contracts awarded as follows: (1) SUTTER & YUBA COUNTIES, to Lester L. Rice, 235 Summer St., Yuba City, \$188,888, for 10.9 mi. widen by grade, ptmx. surf. on untr. base & exist. surf., betw. 0.2 mi. south Bear River & Grand Ave. -(2) FRESNO COUNTY, to Estate of Stewart & Ness, P. HITTNG PEAK

SID McBROOME, **Business Representatives**

Work in the Redding District is in full swing. The work throughout Northern California reached its peak as of August 1. Although there has been several large contracts awarded, Mccannon & Wonderlik were low bidders on the Dunsmuir Freeway job. The bid was for 4 million dollars. There will be little time left, however, this year to accomplish much progress on this particular job due to the early winters in Northern California.

There were a number of other bids recently awarded in Trinity, Siskiyou and Shasta counties. S. E. Newman was the low bidder on a road job at Rush Creek. Ten firms submitted bids to Trinity County with Newman being the lowest.

We are happy to report work throughout the Northern part is holding up very well. The

Trinity Project does not warrant any additional help due to the trouble on the belt line. At the present we still have approximately 600 Engineers employed on the Trinity Dam Project. This includes the Shea, Kaiser, Morrison, Clear Creek Tunnel job and a number of access road jobs that are a part of the Trinity River Project.

We recently signed Construction Agreements with the following named contractors:

J. P. Estep & Sons on their job at Weaverville, Calif. Also, Joe Meyers Construction, who has 8 cats working-at Montgomery Creek. The United Equipment Company has their equipment rented to the Division of Highways and working cut on 299E out of Helena.

J. H. Trisdale, Redding contractor, is in full swing on his jobs at Old Station and at Oak Run

W. Brown started on his MS. new job at Hillcrest on Highway 299 out of Burney, Calif.

This office is happy to welcome the Peterson Tractor & Equipment Company of San Leandro. They will service the Northern District. We recently signed the employees who were employed by commenty Sierra Tractor & Equipment Co. This shop is 100 per cent union.

Sierra Construction Company were low bidders on a road job 6 miles south of Susanville, Calif. This job will go for approximately 3 months working 6 days at 10 hours. There are 10 brothers employed on this job.

Brother Allen Gray, who was injured while operating a cat on the Trinity Dam River Project, would like to show his gratitude and thank each of his fellow brothers on the Trinity Dam | quite a few of the jobs are of Project, for the collection that was recently taken up for him. Brother Gray is still confined to year. a wheel chair at Mercy Hospital and hopes to be released in September. He is looking forward to personally thanking each and every one of you for being so thoughtful of his obligations.

One of our Brother members, Claude M. McAlexander, is retiring this month. He has been a member of Local 3 since the early part of 1930. During those years he has worked on various jobs. He moved to Trinity county and then to Santa Barbara. In 1941 he went to Fresno and worked on the dam and joined on resurfacing work at Hill Air Local 3 with his son Claude Mc-

By MERLIN BOWMAN, GLEN FULLMER, GEORGE FARREL L, JAY NEELEY and JAMES HALL, Business Representatives

BEEN APPROVED TO THE TUNE OF A GIGANTIC \$31,000,000, Local 3 men busy, with Leo were off to a good start when and in the words of Road Commissioner Ellis Armstrong "This is Prisbey on the patrol, Verl San- their crusher broke down and almost everything we asked for or even hoped for" . . . with lower than estimated bids on the work already under contract, it has DW 15's, Brother Lewis Black made possible more funds for more roads—the amount of surplus on the Tamper Cat, Brothers on this job. being \$411,000. This work will start immediately, probably in the Fred Leigh and Grant Taylor dosoutheastern part of the state.

Actual starting date of the Force Base. Jacobsen Const. Co. Salt Lake City north-south-free- has additional Ram Jet Engine way is also getting closer. In fact it is so close now, the route has been definitely decided upon and plans for the first section on West 33rd Street. will be out next month. One section and possibly two will be under contract by January 1 1959; also, the second phase of the 7th East job will be let next month.

There is plenty of talk about the Garfield Dike work and the Bingham Stripping starting but as of this date the successful bidders are not known. In any event both jobs should be going this winter affording the much needed winter work that was so lacking last winter.

At the present time we are experiencing the greatest road building program in Utah's history with jobs going in all parts of the state. Most of them are working 48 hours per week and in some cases 60 hours. With the steady trend toward the use of rubber tired equipment we are experiencing some shortage of operators.

Gibbons and Reed Company has 5 pulls, 2 cats and 2 patrols working two shifts at the Salt Lake Airport, and expect two more pulls in a few days.

General Contracting Corporation, formerly a part of Young and Smith, has a job in Duchesne County consisting of a bridge over the Duchesne river and about 1 mile of new road alignment. They are using their D. W. 21's and several cats. We are very happy to see these people going again as our relationship in the past has veen very good.

We were all very sorry this month to hear of the passing of one of our good friends in the construction business. L. A. Young, "Lee" as we knew him, had certainly made his mark in the road building business in Utah. We extend our sympathy to the large family he

NORTHEN AREA

Going north, there have been several new jobs let in the northern area the past month which along with the work already underway should keep the majority of the men busy for some time. Although some of the new work is scheduled for completion this year the situation is considerably different on a number of jobs already mentioned in previous articles as several months duration and their spending for food only ards and shipyard committeewill carry over well into next

Included in the list of new work already bid and under contract are Wilkinson Brothers Construction Company of Morgan on State Route No. 65 from the Morgan-Summitt county line toward East, Canyon, General Contracting Corporation has SOUTHWEST AREA \$38,559 on the bridge in Box Elder County on Highway 191. Thorn Construction Company has \$152,000 on 5.8 miles of realining and resurfacing of U.S. No. 30 west of Snowville. Waterfall Const. Co. has \$123,000

Alexander Jr. Another son Bob Claude is retiring and going to is a Local 3 member also. Bro. live on a ranch at Buckeye.

Manufacturing facilities at the Marquardt Air Craft Co. Plant

The hot dry weather we have experienced the past month in the southern part of the state has been very good for the road builders. The weather is ideal for the oiling work that is so necessary to road construction. Many oiling jobs are in various stages of completion in this area. The J. M. Sumsion Company is putting the finishing touches on Field. This job is the first section of a 30 mile road into the Aneth Basin. Bethers Brothers Company from Heber City, Utah is busy on the grade of the second section.

The James Reed Co. has about one more week to complete the miles west of Blanding. Morrison Knudsen Company at about oil yet, as they are still hard at the grade.

W. W. Clyde Co. has released a few operators from their job in the cat stairs section on the Glen Canyon Road. The grade is finished on this job and they are up to the hubs in the oil, so to speak.

Brother Maurice Rasmussen has contracted the oil work on R. M. Jensen Company's job. His son, Brother Rodney Rasmussen and son-in-law Brother Gerald Shields are at work with him. Rumor has it that Brother Rasmussen has contracted the oil work on the D. A. Brimhall Co. job at Manti, Utah. We wish Brother Maurice and his newly formed company much success. This almost seems assured as we know the quality of the work he delivers in this line.

Orem, Utah has created some activity locally with \$165,000 improvement project programmed for the city. The work will consist of road improvements, curb and gutter and sidewalk.

interesting reading Some from the Political Memo from departments reported that 5,-437,000 people were unemployed in June this year, an increase of 533,000 over the number out of work in May. Marysville District Is Still Steaming Ahead

By C. R. VAN WINKLE, BILL WEEKS and C. E. COCKAYNE, Business Representatives

But we might add, sotto voce, at a slightly reduced speed, after a rather good month during July. During this month twice as many men were dispatched from the Marysville office than during any month this year, which fact apparently pleased everyone, especially the business representatives. July saw many calls taking as long as a week to fill, especially some of the more specialized ones

or the mountain jobs and it was necessary to go out of the dis- A BRIEF GLANCE AT THE trict a number of times to fill the jobs. For this reason the lights burned late more than at Butt Valley, Lake Almanor once during the month as we and Caribou have speeded up calls.

tempo slowing down to a stead- terway from Lake Almanor to ier rate and it also saw more the Butt Valley intake. men registering on the out-ofork list as some jobs began to Corporation are working two ten job around the Star Bend area pproach the finish stage. If the hour shifts on the Belden Dam present rate of calls continue, job and it looks like this will be however, it is our hope that the story until the rains slow these brothers will be back to work before this sees the light of day.

POSPECTS

The prospect for work during the balance of the season at the present writing looks very good and we expect that the brothers will be able to keep busy until the rains come, which we hope is very very late this year.

Many of the jobs that have been let recently are small, for instance Teichert and Son have been-successful bidders on a number of paving jobs running from \$20,000 to \$35,000 in several locations. None of these are arge or require too many of the brothers, but it keeps several of them busy.

Butte Creek Rock Company has picked up a similar number of small jobs of the same size, which is keeping the boys there usy. W. H. Lindeman was low pidder on a small bridge near Chico and Eagan Construction Company of Stockton was low bidder on a bridge in Chico, all of which means some work for some of the brothers.

Besides their work at Camp Beale, Baldwin Contracting Company, we note, has also been low bidder on several small jobs. Trinity Construction Company of Redding was low at a little Plumas County, all which goes to show that some of our troubles will be small ones, but it all means work.

there will be bid openings on a number of similar jobs in the ber of the brothers working. area, which will help keep the The crew has about stabilized empo up.

WORK

Walsh Construction Company ied to fill the more pressing their work by going on longer hours. They have Teicherts' five The first of August saw the yard Manitowac digging the wa-

> Darkenwald - Harmes - M. K. them up. This has proven to be a very good money job for a number of the brothers.

McCammon and Wunderlich have finished up parts of their Highway 40 Alternate job, both North and South of Oroville and are moving some of their equipment out. Some of the equipment and the operators will no doubt be moved to this Companys' better than four million dollar job near Dunsmuir.

O. K. Mittry at Spring Garden has about finished their part of the highway job there. M. J. Ruddy is laying the sub-base and doing the paving. Carl Woods is putting the finishing touches on his sub-contract with Lester L. Rice at Taylorsville and Rice is getting ready to lay the subbase and the plant mix.

Pomeroy on the power house at Butt Valley is making good progress with about sixty per cent of the pen stock completed. Wismer and Becker on the same project are making good progress. Morrison-Knudsen have finished the railroad job at Belden and are getting ready to ship out the equipment.

Pacific Bridge Company are moving right along on their Western Pacific Bridge job at Poe with a good sized crew working for a bridge job. They over \$40,000 on a paving job in have a batch plant, three cranes, a pile driver and a back-hoe working besides the maintenance crews.

Peter Kiewit & Sons on their During the month of August tunnel job are making good progress and have a goodly numand there is very little turnover. About the only complaint end of September or thereabouts.

Teichert & Son,

> jobs moving right along. H. the Sacramento River. All told about fifty of the brothers are

H. Earl Parker has started his Gilsizer Slough job and has J. H. Clack as a sub-contractor on the job as well as Osborne. As they are just starting to spread out we don't know, as yet, how many jobs there will be. There should be quite a few as the job is ten miles long.

Lester L. Rice has started his short route to Sacramento road and has several of the brothers working. Thomas Construction Company of Fresno is just getting a good start on their job at Browns Valley and from all appearances this will be a good

On top of the partial list outlined above we still have the Camp Beale job going strong with more contractors than you can count, all of whom, from appearances at least and from the way their equipment is running around are trying to run over everybody else.

This darn job is so scattered over such a large area that it isn't any wonder that we can't find anyone when we are looking for them, the wonder is that we don't get lost ourselves. To complicate things, some time this month they are going to start practice landings with the jets and things then will be more confused.

INDUSTRIAL REPORT:

Gladding, McBean and Company During the past month a new wage agreement effective June 30, 1958 to June 30, 1959 was ratified by the membership at a well attended meeting on July 23rd. The negotiated settlement was accepted by a four to one favorable vote.

We would like to say and we hope all members take this to heart that the Company showed a decided interest in the attendance at the meetings, pecially meetings where matters concerning the contract were discussed.

It appeared obvious that this and other companies geared their resistance to the Union's demands to the attendance and interest shown in the meetings. From this it should be obvious also to the membership as to how best they can help their the various companies.

While we weren't overwhelmed by the settlement, we honwas the best that could be obtained this year considering our hope for a better deal the

CONCRETE PIPE INDUSTRY

As anticipated the level of activity in this industry has not been too high this summer, however, normal crews have been used and there have been no some chance of being realized lay-offs or reduced hours of work. We have some hope that the fall activity will be better.

PERSONAL NOTES: Brothers Chillquist, Leonard and Larry The new agreements should Turner, Stockton and Pearow, of Tuttle Engineers, were injured tribution by the first of the in an automobile accident on the coming month. Work in the North Bay area is moving along in good shape with nearly all of the Engineers busy on local jobs. Several new contracts have been awarded in the past month, and a number of additional jobs are in the planning stage which should help keep the work picture favorable.

Alcan-Pacific Company of Sacramento has been awarded contract for 98 housing units at Fort Baker and Barry in Marin County, amounting to \$1,537,000. Also awarded to Alcan-Pacific is a \$346,602 contract for the Capehart Housing at Two Rock Ranch Station. John W. Hearn, superintendent of this project, will aron these two projects.

A pre-job conference was held with Jim Andrade representing Dan Caputo and Cambrian Gateway of San Jose on the Greenbrae overhead job. Cost of the contract award is \$1,792,059. and the job has already started, will approximately terminate Barry started August 4th. about September, 1959, estimated length of job is about 14 months. Brown-Ely is the subcontractor on dirt; Raymond Concrete Pile, Maggiora & Son, Anchor Fence, McGraff Steel and San Jose Steel are the other

Another pre-job conference recently held with the Engineers Ltd. Pipe Line of El Cerrito; LAKE COUNTY amount of this contract is \$240,-011, location of job is at Sleepy Hollow; continuation of Marin Municipal Water Department. Estimated length of this job is about two months, approximate date of completion, October 15. Bro. Chas. Larason is foreman; E. Denning, side-boom operator; R. Graham, backhoe operator; Barnet, oiler; Virgil Hysell, loader operator; Bro. Harper, chief of party.

C. Norman Peterson of Berkeley awarded a contract of \$1,-148,000 for construction of Bon Tempe Water Treatment Plant ruary 27, 1959. The main purand supply pipeline located at Bon Tempe and Phoenix Lakes in Marin County. A pre-job conference will be held shortly. This will be quite a big contract for water district filtration plant.

McCammon & Wonderlich has road job between Stinson Beach and Bolinas. Brothers are: M. G. Hamnes, foreman; Peter Foagrty, loader operator; Charles Butcher, dozer; Robert C. Rasmussen, dozer operator: James M. Craddock, loader operator.

BLACK POINT

Peter - Kiewit & Sons job at Black Point is progressing very nicely, according to report from Brad Lockwood, super. We find amongst their crew they have quite an artist by name of Bro. "Chuck" Kohler, grade setter. He is the party responsible for the very artistic work on the men's hard hats. One we find very amusing is the tin hat worn by Brother George, known as "Chewin-Tobacco" or "Beechnut" Freeland, shovel runner on the job. On the bill of "Beechmut's" hat reads "Caution-Constant Activity This Area." On both sides is "Beechnut," and on the back it reads, "Range—30 feet—360 degrees." (extent of tobacco juice!). (The above is all in RED LETTERS.)

Ghilotti Bros. going broke, so they sad. But what does he use for \$\$\$. Every time we pass by we see some new equipment and busy with a big crew of No. 3

At Basalt-McNear's Pt., we don't dare go in the place as we would get run over with some of their double shift equipment.

Carey Bros. at Reedlands have 120,000 yards with 2 weeks to move it-watch 'em go. They have three pieces of equipment from Burbank and two from Sacramento - in addition to their own crew.

Project hit a barnacle and sank.

REDWOOD EMPIRE LEVELS O

By K. A. "KEN" BROOKS and W. L. "BILL" TOMBERLIN. **Business Representatives**

Work in the Redwoods has reached the level off stage with very little turn over among the Brothers. The out of work list is the way we like to see it, real slim! There really isn't too much change in the area since last writing except that bids come out on the Dyerville to Myers Flat clearing job on Highway 101, on the

20th of this month. This is one we have been looking for for Wallace Bros. of Willow Creek, taking in 166 acres of rightaway. We like to see this clearing done this year and get it out of the way for a real good dirt job next year. If the whole 6.7 miles is let next year for grading it should be a dandy.

It has been rumored that the section from Little River to Trinidad on Hiway 101 will be let in the late fall, we sure hope so, it will certainly add to the program for 1959, there is a lot of dirt in this one. We will keep you informed on the latest dope.

Guy F. Atkinson Company have just about moved out on the Dyerville job. Mercer-Fraser Company has the paving on this job and are in full swing at this time.

Clack Const. Co. at Bluff Creek have 7 dozers; 1 H. D. Mech.; 1 oiler and 1 gradesetter on their Timber access road. It looks now as if Clack is calling for some help on this job and has sub-let a part of it to the

of a "Licensed Land Surveyor,' such employee shall be classified and paid the wage rate of "Senior Chief of Party."

APPRENTICE FIELD ASSISTANTS

The parties to this Agreement agree that an apprentice training period of six months duration will be in effect. During the apprentice training period the following rates shall be effective: Apprentice (first three months) \$2.16 per hour, Apprentice (second three months) \$2.41 per hour; Field Assistant rate Class 2 thereafter of \$2.76 per

Apprentice field assistants shall not replace any field assistant or cause any reduction in the size of the survey party by his employment, except, as follows: one apprentice shall be permitted to be used in lieu of a Field Assistant (Class 2) for each three survey parties engaged by the individual employ-

3. Pensions. The employer agrees to contribute five cents | fleet of cats and D W 21's. (5c) per hour, effective January 1, 1959 for each hour worked, including overtime hours and for the equivalent hours of paid vacation time and paid holidays, to a Pension Fund as may be created in the industry by Operating Engineers Local Union No. 3.

4. Section No. VIII. Travel Time. Revise by inserting "20 miles going and 20 miles returning."

5. Section XXII. Welfare. New 'Whenever an employee intime. Bros. R. Moorhead on one cluded in the bargaining unit job outside of the bargaining unit the employer agrees to 50% of such employee's total time.

> 6. Section No. IV. Revise section so that minimum pay for layoffs shall be 4-hours pay when working less than 4 hours hours but less than 8 hours.

some time. It is 6.7 miles long they are to move in right away with a few dozers.

Sacramento-James H. Quinn, Vice-Chairman of the State Board of Equalization, urged the defeat of Proposition 18, so-called rightto-work initiative on the November 4 ballot.

Quinn, a member of Steamfitters Union 342 of Oakland for the past 35 years and a past president of the Alameda County Building and Construction Trades Council, said:

"Proposition 18, the 'Right-towork' initiative, not only would disrupt the labor unions in California but, equally as important, bring on a condition of economic chaos in a State that, generally speaking, enjoys peace and harmony between employer and employee. Accordingly, emphasis must be placed on the contribution collective bargaining has made to the attainment of these desirable conditions. Any law that could conceivably injure the gains made between organized labor and business and industry would be detrimental to the economic life of our

Wkrs. Hit 150% Harder Than Rich by Sales Tax

(Continued from Page 1) come tax schedule to effect a modest redistribution of the burbasis of ability to pay.

The following changes are proposed:

1. The present sales and use tax rate of 3% would be reduced to 2%. The legislature would have the authority to reduce the rates further, but could not increase them above the 2% rates proposed by the initiative. The power to establish higher rates would be reserved to the people by vote of the electors.

2. The present state personal income tax schedule would be revised to provide rates ranging from 1/2 % on taxable incomes under \$5.000 to 46% on taxable. incomes over \$50,000, instead of the present range of 1% on taxable incomes under \$5,000 to 6% on taxable incomes over \$25,000. These ranges apply in the case of single returns. Where a husband and wife file a joint return the rates would range from 1/2 % on taxable incomes below \$10,-000 to 46% on taxable incomes over \$100,000, instead of present rates ranging from 1% on taxable incomes below \$10,000 to 6% on taxable incomes above

Newspapers up and down the state have been carrying the hysterical cries of the opponents of the initiative to the effect that, if passed by the voters, the measure would wreck the state financially. These cries in general have been largely unrelated to the facts.

The reduction in the sales tax from 3% to 2% would cut state revenues from this source by approximately \$200 million. This is easily calculated by dividing estimated revenues from the N. of Soledad & 1.0 mi. S. of present sales tax by three, inas-SACRAMENTO, Contract duced one-third. Most of the opall the \$200 million would be

On the contrary, the passage of this initiative measure would amount to a mandate from the public that the legislature shall meet the crisis in accordance with the principle of taxation based on the "ability to pay." Part of this mandate would be to prohibit the legislature from increasing the sales tax, and to assure the public that whatever the legislature does to meet the crisis, at least a partial revision of the state tax structure shall be accomplished to effectuate the principle of taxation on the basis of "ability to pay."

In essence, the tax revision initiative proposes a shift of about \$200 million, or approximately 11% of California's state tax taxpaying groups who compose TY. the vast majority of California taxpayers, to the upper income groups who are presently escaping their fair share of the state tax burden. The guiding principle is taxation based on "ability to pay", which, simply stated, is that persons with low incomes should pay a smaller percentage of their income in taxes than those in the higher income brackets and the rich.

State Eyes Safety Laws on Hauling Of Wkrs. in Trucks

In the light of the June 17th tragedy at Soledad, where 13 workers were burned to death and 18 others hospitalized by a flash fire on a truck carrying Mexican National workers, the in Stockton. Division of Industrial Safety is reviewing present safety regulaions dealing with the transportation of workers.

Edward P. Park, Director of California's Department of Industrial Relations, of which the Division of Industrial Safety is a part, says, "The apparent need for further regulations is made plain by the investigation conducted by the Division of Industrial Safety, which rushed representatives to the scene of the tragedy, and which received excellent cooperation not only from local authorities and the California Highway Patrol, but from Federal agencies interested because foreign workers wereaffected.

"At least three additional requirements are apparently necessary where truck transportation of workers is concerned-a ban on flammable materials where workers are riding; and means of communication between the driver and workers being transported; and a second or emergency exist from the truck bed."

On June 23rd the Division of Industrial Safety began another of its special one-week checks of trucks carrying workers, concentrating on the Salinas-Watsonville, Stockton, Fresno, Sacramento, Imperial Valley, and Rivverside-Orange County areas. | conditions.
