Registration of All Unionists Said No. Task During Next Few Months

Laker Day speakers all over the United States were unanimous in emphasizing the main job of Organized Labor in the coming year — registration of every unionist in the United States and getting him to the polls in late November to vote non-recognition for the Ticket. The speakers upheld the Taft-Hartley Act as a great advancement of labor legislation under the Roosevelt administration.

A record-breaking crowd of 22,000 people overtook Soldiers Field in Chicago to hear AFL President William Green summon workers to the polls in 1946 to assure the rebirth of the United States of unions," Green said, and thousands of workers in celebration throughout the nation were registering "to assure a protest against this new attack on their legislative initiative." He singled out the Taft-Hartley Act as "the most offensive and most reprehensible law ever enacted against the worker's interests. Declared the AFL president.

Defeat Our Enemies

"We will call upon the membership of every union and of every trade unionist that he does not stand aloof from the Future," said John L. Lewis. "We challenge a showdown in Congress to save the country. ... We are determined that there shall be no task less than that of registering every unionist in the United States before the 1948 polls."

The rousing message was spread across the nation to local unions and national trade associations. The message was endorsed by the AFL-CIO, United Auto Workers, United Mine Workers, United Steelworkers, and several lesser organizations.

WHERE TO REGISTER IN S.F.

Deputy registrars will be located in local headquarters establishments from coast to coast to collect the votes for the November 6 election. Acting registration of many thousands of unionists is expected. Registration closes September 15.

JONES COUNTY DISTRICT, 208 S. Oak St., Eureka. Deputy registrations:
- R. W. Jones, Redwood City, 5-6 p.m.
- R. W. Jones, Redwood City, 5-6 p.m.

Pile Driver Picnic 28th

Members of AFL Pile Drivers and their families and friends are expected to have the time of their lives on September 28 when the union's annual picnic will be held at Linda Vista Park, Mission San Jose. The picnic will get under way at 10 o'clock in the morning. Admission is free. The dancing on the main stage will be one of the features. Ice cream, soda and rides on the ferris wheel will be free to the kids. Prizes will be offered in foot races for the young and "not so young." Hot dogs, coffee, and ice cream will be available. There will be a raffle of curtains, sheets, and tablecloths.

Valley Heart Beat

Men and machines have moved in for construction of Tracy Pumping Plant, second largest such plant in the United States, on the Tuolumne River. The project, a $9,886,455 job bid by Bechtel, Inc., United Concrete Pipe Co., Bingham Fabrications Co., and R. A. Bull, will be under way on October 1st in the morning. Admission is free.

Dining to the tune of John Brown will be one of many features. Ice cream, soda and rides on the ferris wheel will be free to the kids. Prizes will be offered in foot races for the young and "not so young." Hot dogs, coffee, and ice cream will be available. There will be a raffle of curtains, sheets, and tablecloths.

Malaria vs. Petersen

Bend, H. T. Petersen of London, Ill., is a brilliant and successful doctor who has been working in this country for many years. During his visit here he will be speaking at the annual meeting of the American Malaria Association, which is scheduled for October 1st in the morning.

Bureau to Hold Hearings on Big Dam at Folsom

SACRAMENTO—Following agreement between the State and Federal agencies to recommend a 1,100,000 acre-foot multiple purpose dam on the American River at Folsom, the Bureau of Reclamation has taken steps toward a specific determination of the immediate irrigation needs in the local service areas of the proposed development. Regional Director Richard L. Beale said the Bureau will hold a number of public hearings at Sacramento, San Joaquin and Placer Counties in the farming areas along the projected Folsom-Belden and Folsom-Roseville canals. Irrigation canals leading both north and south from Folsom are the three canals in the three counties that are proposed in the Bureau of Reclamation's Central Valley Project Report, and are recommended by the State in its latest American River project report. They are also included in legislation already introduced in Congress to authorize the construction of the American River development power, and flood control development as a part of the Central Valley Project.

"There is a great demand for the American River water which will be made available by the large storage development," Beale said, "especially from farming areas and communities on the west side of the San Joaquin Valley and in the Bay Region. We recognize, too, the increasing need for water for the local service areas of Sacramento, San Joaquin and Placer Counties. That is why we are calling the local hearings.

Pile Driver Picnic 28th

Members of AFL Pile Drivers and their families and friends are expected to have the time of their lives on Sunday, September 25 when the union's annual picnic will be held at Linda Vista Park, Mission San Jose. The picnic will get under way at 10 o'clock in the morning. Admission is free. The dancing on the main stage will be one of the features. Ice cream, soda and rides on the ferris wheel will be free to the kids. Prizes will be offered in foot races for the young and "not so young." Hot dogs, coffee, and ice cream will be available. Veterans' information

That Lucky Van

BY JOE BILEY

A for reaching measure was signed by President Truman clearing the way for completion of 100 low rent and sub-allow housing projects in 75 cities.

"The President's action puts an end to the gobierno's failure to fulfill its obligations," Chairman of the House Appropriations Committee said. It would cost more than $14,000 per family unit in small cities or more than $16,000 per family unit in large cities.

The administration would be divided into parts of Alaska by federal order, reported favorably to the Senate. The administration for the rate of one million veterans at $5,000,000 per year shall remain in full force until 1950,000. The Nennadive bountiful, his leg was shot, and he couldn't shoo. For a couple and a half years, he lay on a bed of leaves in peevish conditions of which he was already accustomed.

We are told by Veterans Administration, this service was established in the interest of the common weal, for the national welfare.

Don't fail to take advantage of the opportunity which demands immediate attention. Extent of Loans

The VA said that ex-servicemen and veterans who have borrowed under the GI Bill and have not paid off their obligations, may apply for a new loan under the GI Bill.

The Senate, which had passed the bill, which the House had passed, was voted to be adjourned until 9:30 a.m. on the 1st of March. The Senate was adjourned until 9:30 a.m. on the 1st of March. The Senate was adjourned until 9:30 a.m. on the 1st of March. The Senate was adjourned until 9:30 a.m. on the 1st of March. The Senate was adjourned until 9:30 a.m. on the 1st of March.

A statement calling attention to the effects of the war on the economy, the APL veteran representatives to the Senate, had called for action.

We do not measure by day traffic lights, or the diffuse dollar. Our time was measured by a different yardstick, existing rather than written.

The weather was fine, the people sure is swell. The big new Seahawks take advantage of their opportunity when your buddy for the first time.

For the first time in four years we have gained a victory, an open mind. We want nothing but to share others what we have learned. We have learned that war was useless. To do step people from being what we have learned, they have to learn. They don't have to learn. We have learned to live and let live. We have learned to be good neighbors.

We know that if there is no money behind the criminal science will be useless. No doctor can do a job of body politic. We have the times which we have learned.

We are the ones who have learned that better that anyone. We have learned that man in the word who is the "grocer," and not the public health dietitian.

We have learned to live and let live. We have learned to be good neighbors.

They said the Grass is Green:

(EDITOR'S NOTE: The following was submitted to Manager Simmons by Mr. Joe Riley, an employee of the City of San Francisco, California, who says that it was written by his wife. Incidentally, she signs her name as "forever with love.""

I've always had my doubts before. But now, no life is out for sure. The love I lose is a must. Perhaps you just know what I mean.

For the fellows call him Joe. And he runs a NORTHEAST shoveling like others use a hoe.

Joe left his home in Frisco. He's the country for me or bust. He didn't like the cold and fog. Summer sunshine was a must. He lost his love, is out for sure. He's a hard one to wade up here. And sometimes when you got the chance.

If you come up, DARE! The river runs right by the bay. Where one can fish or swim. So, NATURALLY, I thought it was a paradise for him.

Just a paradise for a sucker.

Soon I think that little trip is past. I'm sorry that I can't go with you. And sometimes when you got the chance.

If you come up, DARE! The river runs right by the bay. Where one can fish or swim. So, NATURALLY, I thought it was a paradise for him.

Just a paradise for a sucker.

For the fellows call him Joe. And he runs a NORTHEAST shoveling like others use a hoe.

Business Representatives, Local 3

Stockton—The Fall push is on in Stockton, with the Cameron in high gear, the diverting dams on the F.G. & E. lines under construction, and the many new workers in the winter period ends and the land.

Down on the canal job at Winkley, the entire dam is in back of the dam, and the lock is expected to be ready for use in about a month. A number of workers have been doing some interesting work on the river bank around the dam.

Brothers Vorn Holmes and Bud Parcell have taken a number of trips to Tracy for Teichert on an under-construction job, but they say it looks possible, but the two Engineers made them money, any way.

I just got word from Brother Rudy at the Stoker job that the Sutter Canal business is being run by Bob Stoel, who has been working for the union for some time now. The Sutter Canal business is very important, and the union has been working very hard to get it.

Aidata Track

In the field of manufacturing, the new agreements held by organized labor were announced. The agreement for stock car manufacturing, for example, covered approximately 4,000 workers.

The agreement provided for 36½ cents per hour, in addition to retroactive pay, and other benefits, including improved work conditions and better wages.

Choice Quotations

Said the late Wendell Willkie, "If your money isn't worth anything this year, then there is no intention of doing so."

Said Cyanus Edson, industrial mediator and bankr, in 1947: "It is our privilege to own, cultivate and sell capital."

The following brothers have signed up to work for the Cameron. They are:

Bob Holmes, George McLauchlin, and Bob Stoel.

High Voltage Accident

Bro. M. E. Tanner suffered bad from a high voltage accident last week while working on the power plant, necessitating amputation of the arm at the shoulder. We extend our sympathy to his family.

The Free of Local 6 was notified, but due to the distance, could not reach the scene of the accident. We extend our sympathy to the family of the injured worker.

The union will continue to press for improved working conditions and better wages for all workers in the industry.

AFL Leading CIO

By 17 Millions, Report Reveals

WASHINGTON—From a report of 3 million members in 1933, the American labor movement has wielded its membership fivefold, reaching nearly 17 million in 1938, according to a survey. The present membership is said to number approximately 15 million, with 20 per cent of them affiliated with the AFL.

For capital tax payments to the AFL are in excess of 2½ billion dollars, and total membership is up to 20 million, with 35 per cent of them affiliated with the AFL.

Despite the heavy growth in membership, the AFL represents only slightly more than half of all non-agricultural workers excluding the self-employed farm workers and small farmers.

In the field of manufacturing, the new agreements held by organized labor were announced. The agreement for stock car manufacturing, for example, covered approximately 4,000 workers.

The agreement provided for 36½ cents per hour, in addition to retroactive pay, and other benefits, including improved work conditions and better wages.

SACRAMENTO OFFICE REPORTS

SACRAMENTO, Calif.—This month will mark the completion of several large highway jobs in this area. E. W. Elliott finally finished the road from Stockton to San Benito. From the South Tahoe district have planned for a celebration for the event. This job was started as far back as 1941. Due to hard rock, hard luck and the war it had been dragged along until Elliott finished it in just about the time of the outlast fall and the job bung fire for another year. However, it is now completed, eliminating a high grade route from Meyers to Echo Summit.

Oakland—Now that Labor Day has come and gone, most of the Labor Day news is behind us, and we can look back at the past six days of fairly good pickin’s in this area. The only casualty reported as a result of the big three day holiday of the season was a few choice headaches—with the majority of the workers expected to enjoy their vacation and many more to work to earn their wages.

While Labor Day is primarily an American celebration, many of the European countries have similar observances that focus on recreation and community. In France, for example, the equivalent of Labor Day is called May Day or Workers' Day. In Germany, it is known as International Workers' Day. In Italy, it is called Labor Day. The observances typically involve parades, political speeches, and demonstrations to promote workers' rights and social justice.

The 2023 observation of Labor Day in the United States is marked by a mix of traditional commemorations and contemporary discussions. Many labor organizations, unions, and community groups hold events to honor the contributions of workers to society and to pressure for fair wages, safe working conditions, and collective bargaining rights. The 2023 celebration also comes amid ongoing discussions about the future of work, automation, and the broader implications of the labor market on the economy and society at large.
Round-up of the news from Utah
By C. L. Caseboll, T. L. Clark, C. R. Van Winkle and L. G. Ostler, Business Representatives, Local 3

Salt Lake City—Some concern has been expressed by some of our membership at different times over the newspaper reports regarding the Salt Lake City AFL Board of Trustees coming before the Utah State Industrial Commission. For the information of our membership and for the purpose of correcting any erroneous impressions given us by the newspapers, we have, therefore, asked a few questions of the Salt Lake Industrial Commission, which was armed as the Salt Lake Labor Relations Act, an amendment which was passed by the legislature this year, without the Governor's signature, which was called the "Chase Bill." This bill became effective March 21, 1947, and provided, among other things, six unfair labor prac-

ices in the case of our members. One of these unfair labor practices was striking and picking under majority in the bargaining unit.

Business representatives can be pressed, avel in the Salt Lake Construction, a well-known contractor, but increases the

Unfair Labor Practices

In the matter of the Salt Lake and Wheelwright cases, it is worth noting that these cases have been appealed to the Federal Court of Appeals, which will hear the case and will have the final word on the outcome.

The union representatives of Associated General Contractors, Interim Branch, with the understanding that the membership of that association would vote against the contract, has been asked to join the union and to participate in the membership, and a majority, among the contractors, have agreed to join the union. These moves have been taken by the contractors because of their desire to improve the working conditions of the employees.

The Salt Lake Board, on the other hand, has been asked to join the union and to participate in the membership. The union representatives of Associated General Contractors, Interim Branch, have agreed to join the union, and a majority, among the contractors, have agreed to join the union. These moves have been taken by the contractors because of their desire to improve the working conditions of the employees.

The Salt Lake Board, on the other hand, has been asked to join the union and to participate in the membership. The union representatives of Associated General Contractors, Interim Branch, have agreed to join the union, and a majority, among the contractors, have agreed to join the union. These moves have been taken by the contractors because of their desire to improve the working conditions of the employees.

Cement Plants in the world has dinner gives engineers safety awards

By M. G. Murphy

Representative, Local 3

San Jose—Pacific Portland Cement Company, near Los Gatos (the largest cement plant in the world with an annual capacity of 5,000,000 barrels) honored the members of Operating Engineers at a dinner Sept. 12, 1947, to celebrate their achievements. The dinner was held during the visit to the world's largest cement plant of one of the nation's most coveted and important safety awards.

The trophy was presented to

Rufus W. Davis, operating engineer, who in turn presented it to President Kenny Ryder, who accepted it in behalf of the company. The cement plant was operated without a fatality the entire year 1939. This also takes into account freedom from fatalities and saving no heating disasters since Aug.

This record was compiled by an average force of 27 employees handling 4,000,000 tons of material while working 38,000 man-hours. The names of members of Local 3 and others who contributed to the notable achievement are:

Grady Coburn, foreman; operators, W. Jones, Jr., Michael E. Flicker, W. F. Naucu, R. Martin, Jr., and H. C. Sample, cement plant superintendent; Fred L. Dillard, and a cement mason, representing Local 2.

Joe Lawless, a jack of many trades, just recently decided to do a little contracting and is now competing with the big boys.

Northern Part of District

In regard to the northern part of this district, Granite Construction has won two envelopes for work in the town of Salinas, Monterey, and Santa Cruz. The Foreman of the Santa Cruz branch took this job, while the Foreman of the Salinas outfit is still trying to get his hands on a cement plant. The cement plant, which consists of divisions and irrigation work, is in the hands of the contractor.

Bob Ray Jackson

Bob Ray Jackson has been quite busy recently, brothers. He has received orders for work on the Santa Cruz highway job. According to a recent conversation with him, this job will be let on October 3rd. The new job information is correct that they are willing to let this job before too long.

Many of the brothers have started the fall elections. An election will be held on October 7th, which will clear up the situation for the next two terms. The next election will be held on October 21st. The next election will clear up the situation for the next two terms.

Stockton, Cal.
San Francisco—Construction work is in full swing along a number of fronts in the area due to the increase in new development. The northern part of the city has become a focal point for many new projects, with construction companies busily working on a wide range of projects. Many of the jobs are large-scale developments, including new office buildings and residential complexes, which are creating a surge in employment opportunities for skilled tradesmen.

Among the projects currently underway, a notable one is the construction of a new office building near the financial district. The building is expected to be completed within the next few months, providing much-needed space for the growing number of businesses in the area. Additionally, there is a significant amount of work being done on the waterfront, with plans for a new park and public space.

The increase in construction activity is not limited to the city center, as suburban areas are also seeing a boost in development. Many new neighborhoods are being created, with a focus on sustainability and green spaces. This has led to a rise in demand for skilled tradesmen, particularly in the areas of carpentry and plumbing.

The local construction unions are working hard to ensure that all members are adequately trained and equipped to handle the growing workload. They are also pushing for better working conditions and improved safety measures on the job sites.

Despite the challenges posed by the current economic climate, the construction industry in San Francisco remains strong, with a bright future ahead as new developments continue to take shape throughout the city.
WAGE-EARNER GETS LICKING AS CONSUMER, SAYS REPORT OF FEDERAL RESERVE BOARD

SAN FRANCISCO—In a recent issue of the News Letter, a summary was made of the first part of the "Survey of Consumer Finances," issued by the Federal Reserve Board, in which appeared the following statement: "It is a solidly united labor vote in the election of 1936, the apex of the intensification of the struggle for the abolition of the wage earners in this country. The Federal Reserve Board has just issued the second part of this study, in which it discusses the characteristics of the holders of liquid assets."

Income levels were particularly related to the income levels of the non-wage earners, as professional persons, managers, and skilled men, and sales personnel and farm operators.

The latter finding made it clear that there was no significant income difference between the non-wage earners and the wage earners at all.

The latter conclusion is of special interest, as it shows that the income levels are not significantly different between the non-wage earners and the wage earners at all.

The report draws a common place conclusion in interpreting the results of the study, that "Most professional people and self-employed persons, and also some business groups, have higher incomes than those of the wage earners, and therefore may well be expected to be more affected by a reduction in wealth in liquid form." 

Another part of this study is devoted to changes in income during the last 10 years, and it is found that there was an overall increase in income from 1929 to 1936, so that 60 percent of all consumers had incomes of $1,500 or more in 1936, as compared with 36 percent in 1929. The last third of the consumer toward highest income levels was particularly a "wage-earner" group, as professional persons, managers, and skilled men, and farm operators.

"Why are we in debt to our country?" Asked the labor daily, labor-supported Congressman Frank C. Haremore, who made a speech to unions to convince them that only through "the will of the people" could they achieve success in the fight for the "New Deal".

"The Taft-Hartley law has made it illegal," said Mr. Haremore, "for a union to go through the husband's pocket to make its demands."
