Frank A. Lawrence, State Controller, reports:

President of California Building Trades Succeeding MacDonald

Frank A. Lawrence, Sacramento business representative of Operating Engineers Local 3, was elected president of the California Building Trades Council, following the retirement of the council's executive board on September 11, to fill the vacancy caused by the death on September 2 of Frank C. MacDonald, widely-known veteran labor leader.

Mr. Lawrence will take over his new duties about the middle of October after winding up his affairs in Sacramento.

He has represented the Engineering and painting groups in Northern California, having served the union and holding the job of president of Contra Costa County Building Trades Council before going to Sacramento. In Sacramento he has been active in union and executives of the council and an office of the Sacramento Building Trades Council. And is a member of the newly-created port commission which is designing, soliciting bids for Sacramento's new inland port, now under construction.

FRANK C. MACDONALD IS WIDELY MOURNED

Death of Frank MacDonald from a heart attack was a shock to the entire labor movement. He was born in Denver, had his schooling in San Francisco, and became active in union affairs by organizing the Tile Layer (Hypertite) union and the San Francisco Building Trades Coordinator for the City of San Francisco. He was later elected to the State Building Trades Council, and upon the death of P. F. McCarthy, former mayor of San Francisco, became president of the council, serving in this capacity until his death. Meanwhile he held a variety of other civic and state posts, including president of the Golden Gate Bridge Association (first sponsors of the Golden Gate Bridge), president of the Building Trades Temple Association, state labor commissioner for one year during the twenties, and on the Industrial commission, as well as various others for four years. One of his last "faux pas" jobs was on the State Constitution Reapportionment Commission, where he was very active in protecting the rights of the state's voters.

Local 3 and 36 extend sincere sympathy to his widow, Mrs. Esther MacDonald.

IN MEMORIAM

Members and officers of the union express their sympathy on the death of Frank C. MacDonald, president of East Bay Building Trades Council, and of the council's executive board on September 11, to fill the vacancy caused by the death on September 2 of Frank C. MacDonald, widely-known veteran labor leader.

THE LABOR CRISIS

Throughout its recorded history America has meant opportunity for the oppressed, the ambitious and the poor of all parts. We have stood for the democratic way of life which has prepared opportunity for the next generation with the will and the ability to benefit thereby.

In the early days, when our nation was largely agricultural and free land was abundant, ownership of land was the key to wealth and success. As the nation industrialized and grew, we became an industrial people, using our vast natural resources and our freedom from international entanglement. We enjoyed a century of peace allowing rapid development of our resources.

We now find ourselves in a situation where immigrants from all lands, a nation that has steadily advanced toward greater freedom for all individuals. Opportunity has been the torch lighting our way.

SEEK SHARE OF WEALTH

As their forefathers had sought opportunity, they were equally eager for the opportunity to share in the wealth they helped to create. It is fortunate for our nation that they chose to seek opportunity through the democratic way of life, which permits development in extending opportunities to benefit by the right of contract, by securing competition and freedom from repression.

SEEK RIGHTS FOR WAGE-EARNERS

For more than 50 years the AFL sought for wage-earners the right to participate in free enterprise by gaining acceptance of union as a bargaining agent for the working man. They were used against us first the legal doctrine that unions were illegal conspiracies. Then they sought to apply the anti-trust laws on the theory that unions were conspiracies in restraint of trade. They are a miner in no way different from a coal, and a steel worker should be legally subject to the same controls as U.S. Steel. Employers used strong-arm tactics which forbade unions to function and denied workers even constitutional rights, so that they lost strikes and unionization was thereby discouraged.

The three basic legislative enactments by which the Federation secured for workers opportunity and developed economic strength in function to free enterprise were: (1) Section 6 of the National Labor Relations Act, which gives the right to form labor unions; (2) The National Labor Relations Board which stops and prevents injustices in labor disputes and protected equity judges from acting as strikebreakers, a step necessary to maintain impartial justice; and (3) The National and State Labor Relations Acts (Wagner Act), which enabled unions to negotiate agreements on an equal footing with employers, thus assuring mutuality—the three freedoms of labor.

In 1947 the National Labor Relations Act was mutilated by the vindictive Taft-Hartley Act, which regiments unions and proscribes contract provisions in such a way that freedom of contract is undermined while equality in bargaining power is destroyed.

It is this crisis in labor progress that will be our major concern in this year’s election campaign. Labor’s crisis is equally a crisis in democracy’s progress.

OLD FERDINAND

The meeting was called to order at 8:30 p.m., Frederick Gleaner president, opening the meeting with a short address. The meeting adjourned from a roll call of Business Manager Strawn, who was extended because of illness, and until 8:30 p.m.

A synopsis of the Regular Meeting Minutes of August 7 was read, as regularly moved and seconded that the regular meeting minutes be printed in the Gleaner. A synopsis of the Executive Board Minutes of August 11 and September 1 was read and the call for nominations for the Board was by median approved as read.

A letter from the Secretary and Maintenance Employee’s Union, Local No. 368, stating that the Oedical Life Insurance Company is unable to organize labor. It was read and the call for nominations for the Board was by median approved as read.

A letter was received from the Central Labor Council of Amedza, County regarding the Labor Day Parade. Resolved and died.

Cards of thanks were received from the McFarland, P. R.M. Mr. W. N. Trigg, Mrs. R. E. B. Trigg, Mr. J. A. Myril Wood and Mother; Belva Henderson and son Donald Henderson. Received and filed.

The following Brothers were reported deceased: J. C. Thompson and T. L. Cates.

The Report of the General Secretary-Treasurer was read by Fredrick Gleaner.

It was regularly moved and seconded that the report of the Business Agent be dispensed with. Carried unanimously.

The motion was seconded that the annual meeting be held to come before the meeting, as ordered.

Respectfully submitted,

C. F. MATHEWS, Recording Secretary.

OLD FERDINAND

The Board that决定了 rock jumped up to three times its original size.

Three corners late I be, but I'm still lying there, it's been there since 1854 and I fought Old Ferdinand hard and it looked like he had won.

This may sound funny.

But regardless of how it may come out, I don't care that I lost.

But Old Ferdinand was ready for it.

He just wanted to see me roll.

And there the son of a gun

With the help of another 'skin-

We easily got him over to the door

New Ferdinand was ready.

To take his hair raising ride

New Ferdinand was located right up against me. It was a rush. I'd worked with one thought in my mind.

I wanted to see him roll.

I set there, I pulled my hair

I clutched a bone, and I cried

I cried.

But Ferdinand taught me some

In which I held a stack of kids

If I build roads from now on.

I'll never underestimate a rock.

THOMAS E. ADAMS

Local Union No. 3

The imminent crisis of the Constitution of the U. S. extending the very life of our country, has been a factor of great importance in this last August.

The mills was called off by General BOOTZ of the 6th Regiment at a Patterson, N. J., factory in 1838.

America, has laws that produce this condition and the average is only 1/3; in the United States the average for the same day of the year, more than the average for all the rest of the year.

Many mines during the war, took a toll of 1,000 lives and many thousands of men of much needed, during these years.

Selephant, serviced, Albert on certain oils, is the cause of tension poisoning in ironworks.

We will elect more now, we will have to use the White House west.

We will need to be with our money, we are all getting rid of.

The cost of living has gone sky high.

We have no right that we can eat; White House Negros don’t eat, for an end of our chow.

We are getting rid of our pants.

While I am getting rid of a shirt of old year.

While they are eating their pancakes and crepes.

Why I am still eating that little piece was.

Why Your Hair is Turning Grey

While the cost of living jumps up, we are all living badly.

While there is inflation just getting around, we are all against sitting down.

Why our clothes are getting so thin.

While they are having their beds.

Why don’t they eat a chili on some of our taxes.

We are not knowing our location by chance.

But we are getting rid of pants, all over our pants.

—R.AM C. STEWART.

No Rights for the "Bill of Rights" By G. R. KENSHIRE

As I write this column, as a representative of the workers, but as a citizen of the United States, and wish to ask this question: Are we not entitled to the same protection of our Government under the Bill of Rights as any other citizen of the United States? The reason I ask this question is because repressors of labor have set up the doctrine that the Bill of Rights applies only to citizens of the United States.

I am not trying to question this right, but I would like to ask, what right do we have to vote? What is the right to vote? Is the right to vote not a part of the Bill of Rights? I think that the right to vote is a part of the Bill of Rights.

The reason I ask this question is because repressors of labor have set up the doctrine that the Bill of Rights applies only to citizens of the United States. I think that the right to vote is a part of the Bill of Rights.

I think that the right to vote is a part of the Bill of Rights. I think that the right to vote is a part of the Bill of Rights. I think that the right to vote is a part of the Bill of Rights.
Good Press, \textit{July 22, 1948}, pg. 1

\textbf{NEWS FROM SAN FRANCISCO}

\textbf{DORAN, PAT CLANCY, P.E., VANDEWARK, AND CHET ELLIOTT}

\textbf{CONSIDER}

\section*{1. The Metropolitan Housing Project:}

The Metropolitan Housing Project is still in the basement stage. The building is still in the basement. The attorneys who wrote the contract have a large number of the brothers put on the job. The brothers are busy on the contracts, spreading machines, all busy. Agricultural workers have been coming back from foreign countries, although they are excluded from jobs in the past few months. There is the benefit of all labor legislation.

\section*{2. The Television Antenna Project:}

An attempt is made to divert responsibility to the television antenna project. A new subdivision was registered in an area close to San Francisco.

\section*{3. The San Francisco Airport Job:}

The San Francisco Airport job has one who is running for a political position. We didn't vote the plane to seek. We didn't vote the plane to seek the election.

\section*{4. The Farm and Yard Line:}

The farm and yard line, covering most of the area, is being handled by Standard Oil. We didn't vote the farm and yard line.

\section*{5. The Oakdale Portal In Modesto:}

The Oakdale Portal In Modesto has 296,519 from the Oakdale, Joe Ruddy. This means about 80th of the Brothers repairmen the road to the new television antenna project. We didn't vote the Oakdale Portal In Modesto.

\section*{6. The Reservoir Project:}

The reservoir project is under way again. The reservoir project is going fine with an engineer, you got that way. Better men than Preston is absolutely ridiculous to let a misunderstanding develop into a major problem. Better men than Preston.

\section*{7. The California Dams:}

The California dams are being built to service Los Angeles. Our super is in charge of the project. We didn't vote the California dams.

\section*{8. The Gas Strike Situation:}

The gas strike situation is still going on. We didn't vote the gas strike situation.

\section*{9. The Labor Strike:}

The labor strike is still going on. We didn't vote the labor strike.

\section*{10. The State Government:}

The state government is still in session. We didn't vote the state government.

\section*{11. The Local Government:}

The local government is still in session. We didn't vote the local government.

\section*{12. The Labor Legislation:}

The labor legislation is still in session. We didn't vote the labor legislation.

\section*{13. The construction Projects:}

The construction projects are still in session. We didn't vote the construction projects.

\section*{14. The Labor Day Parade:}

The Labor Day Parade featured two Stevenson, Earl McEwen, Harvey Joaquin, and Earle Sanders, who was drown. We didn't vote the Labor Day Parade.

\section*{15. The Farm and Yard Line:}

The farm and yard line, covering most of the area, is being handled by Standard Oil. We didn't vote the farm and yard line.

\section*{16. The California Dams:}

The California dams are being built to service Los Angeles. Our super is in charge of the project. We didn't vote the California dams.

\section*{17. The Gas Strike Situation:}

The gas strike situation is still going on. We didn't vote the gas strike situation.

\section*{18. The Labor Strike:}

The labor strike is still going on. We didn't vote the labor strike.

\section*{19. The State Government:}

The state government is still in session. We didn't vote the state government.

\section*{20. The Local Government:}

The local government is still in session. We didn't vote the local government.

\section*{21. The Labor Legislation:}

The labor legislation is still in session. We didn't vote the labor legislation.

\section*{22. The construction Projects:}

The construction projects are still in session. We didn't vote the construction projects.

\section*{23. The Labor Day Parade:}

The Labor Day Parade featured two Stevenson, Earl McEwen, Harvey Joaquin, and Earle Sanders, who was drown. We didn't vote the Labor Day Parade.

\section*{24. The Farm and Yard Line:}

The farm and yard line, covering most of the area, is being handled by Standard Oil. We didn't vote the farm and yard line.

\section*{25. The California Dams:}

The California dams are being built to service Los Angeles. Our super is in charge of the project. We didn't vote the California dams.

\section*{26. The Gas Strike Situation:}

The gas strike situation is still going on. We didn't vote the gas strike situation.

\section*{27. The Labor Strike:}

The labor strike is still going on. We didn't vote the labor strike.

\section*{28. The State Government:}

The state government is still in session. We didn't vote the state government.

\section*{29. The Local Government:}

The local government is still in session. We didn't vote the local government.

\section*{30. The Labor Legislation:}

The labor legislation is still in session. We didn't vote the labor legislation.

\section*{31. The construction Projects:}

\section*{32. The Labor Day Parade:}

The Labor Day Parade featured two Stevenson, Earl McEwen, Harvey Joaquin, and Earle Sanders, who was drown. We didn't vote the Labor Day Parade.
**BIEVING WAGES ASK BY BUREAU OF RECLAMATION JOBS**

By H. T. Petersen and G. Lynn Moore

**Business Representatives, Local 3**

**Fresno**—The Department of Interior wage board held a hearing on Friday at 27, at which time your representatives were present to present the prevailing rates on prevailing scales in this district. These accepted by the board will be recommended for adoption by the Bureau of Reclamation for employees operating equipment and labor in this district.

We were also able to present the prevailing rates on the maintenance scales for at least this coming year.

The Department of Reclamation will open bids on September 30 for the construction of the new section of the Fishern-Kent canal now completed, and a large number of contracts of this nature from Lindsay south will be advertised during September. Bids in this section will run very high as the District representative of the Bureau of Reclamation states that approximately $60 million dollars will be involved in the placing of contracts because of the unsettled position in distribution systems from the projects.

**ATKINSON JOBS**

The Gulf & Atkinson Company has been in receipt of some offers for jobs, but they submitted low bids for the State Highway Department contract between Atwater and Livingston, bid price $175,000. The company projects a minimum of 24 miles of highway and the Preliminary surveying contract in this area will be let the first week of October. The overall project will start within the next ten days on the Bakersfield to Visalia section of the road. Brother Andy Webster superintendent on the job.

The Gulf & Atkinson Company were low bidders on the hardwood construction in San Luis Obispo, and have started construction. Joe Gribb was working in the field for this company.

**15-MINUTE RATES**

The 15-minute rate is now the law, and all jobs in the state of California are governed by this rate. When a job is on, it is always a good idea to let your representative know about your plant, and your company's representative.

**BROTHE L LOCO MOTES**

Brother Joe Boland called at the office to tell us he signed up with the Excelsior-McGinnis as a shoveler on a new section of road in Algona, Washington, and is doing well.

**REDWOOD RANCHES**

A new section of the Redwood Ranches were started in the vicinity of Race and Tull, where the company is working on a new section of construction.

**WOODS AND LOCKS**

A new section of the Woods and Locks were started in the vicinity of Rollins, where the company is working on a new section of construction.

**MIDDLE LOCO MOTES**

Brother Ben Johnson is working on a new section of the Fishing Creek project in Oregon. The company is busy working on this project, and has started several other projects in the same vicinity.

**RAILROAD TRENCHES**

Brother Ben Johnson is working on a new section of railroad trenches in the vicinity of Rollins, where the company is working on a new section of construction.

**FARM HOUSES**

Brother Ben Johnson is working on a new section of farm houses in the vicinity of Rollins, where the company is working on a new section of construction.

**WATER WORKS**

Brother Ben Johnson is working on a new section of water works in the vicinity of Rollins, where the company is working on a new section of construction.

**ROADS AND BRIDGES**

Brother Ben Johnson is working on a new section of roads and bridges in the vicinity of Rollins, where the company is working on a new section of construction.

**DITCHES AND TRENCHES**

Brother Ben Johnson is working on a new section of ditches and trenches in the vicinity of Rollins, where the company is working on a new section of construction.

**WIRE LINES**

Brother Ben Johnson is working on a new section of wire lines in the vicinity of Rollins, where the company is working on a new section of construction.

**TOWERS AND CROSS ARMS**

Brother Ben Johnson is working on a new section of towers and cross arms in the vicinity of Rollins, where the company is working on a new section of construction.

**ROADS AND BRIDGES**

Brother Ben Johnson is working on a new section of roads and bridges in the vicinity of Rollins, where the company is working on a new section of construction.

**DITCHES AND TRENCHES**

Brother Ben Johnson is working on a new section of ditches and trenches in the vicinity of Rollins, where the company is working on a new section of construction.

**WIRE LINES**

Brother Ben Johnson is working on a new section of wire lines in the vicinity of Rollins, where the company is working on a new section of construction.

**TOWERS AND CROSS ARMS**

Brother Ben Johnson is working on a new section of towers and cross arms in the vicinity of Rollins, where the company is working on a new section of construction.

**ROADS AND BRIDGES**

Brother Ben Johnson is working on a new section of roads and bridges in the vicinity of Rollins, where the company is working on a new section of construction.

**DITCHES AND TRENCHES**

Brother Ben Johnson is working on a new section of ditches and trenches in the vicinity of Rollins, where the company is working on a new section of construction.

**WIRE LINES**

Brother Ben Johnson is working on a new section of wire lines in the vicinity of Rollins, where the company is working on a new section of construction.

**TOWERS AND CROSS ARMS**

Brother Ben Johnson is working on a new section of towers and cross arms in the vicinity of Rollins, where the company is working on a new section of construction.

**ROADS AND BRIDGES**

Brother Ben Johnson is working on a new section of roads and bridges in the vicinity of Rollins, where the company is working on a new section of construction.

**DITCHES AND TRENCHES**

Brother Ben Johnson is working on a new section of ditches and trenches in the vicinity of Rollins, where the company is working on a new section of construction.

**WIRE LINES**

Brother Ben Johnson is working on a new section of wire lines in the vicinity of Rollins, where the company is working on a new section of construction.

**TOWERS AND CROSS ARMS**

Brother Ben Johnson is working on a new section of towers and cross arms in the vicinity of Rollins, where the company is working on a new section of construction.

**ROADS AND BRIDGES**

Brother Ben Johnson is working on a new section of roads and bridges in the vicinity of Rollins, where the company is working on a new section of construction.

**DITCHES AND TRENCHES**

Brother Ben Johnson is working on a new section of ditches and trenches in the vicinity of Rollins, where the company is working on a new section of construction.

**WIRE LINES**

Brother Ben Johnson is working on a new section of wire lines in the vicinity of Rollins, where the company is working on a new section of construction.

**TOWERS AND CROSS ARMS**

Brother Ben Johnson is working on a new section of towers and cross arms in the vicinity of Rollins, where the company is working on a new section of construction.

**ROADS AND BRIDGES**

Brother Ben Johnson is working on a new section of roads and bridges in the vicinity of Rollins, where the company is working on a new section of construction.

**DITCHES AND TRENCHES**

Brother Ben Johnson is working on a new section of ditches and trenches in the vicinity of Rollins, where the company is working on a new section of construction.

**WIRE LINES**

Brother Ben Johnson is working on a new section of wire lines in the vicinity of Rollins, where the company is working on a new section of construction.

**TOWERS AND CROSS ARMS**

Brother Ben Johnson is working on a new section of towers and cross arms in the vicinity of Rollins, where the company is working on a new section of construction.

**ROADS AND BRIDGES**

Brother Ben Johnson is working on a new section of roads and bridges in the vicinity of Rollins, where the company is working on a new section of construction.

What's doing in the Oakland office
By Al Clem, Glen Dobay and T. D. Bryson, Business Representatives, Local 3

OAKLAND—Work has been very good in this area during the past month. We had some difficulty in filling a few of the jobs, chiefly hot truck roller and miller operators. We have always had a good crowd working at the present time. Moreover, in certain classifications we have some men on the out-of-work list.

After checking our clearance records we find that there are 41 members employed by the H. J. Kaiser Company in the Oakland area. Twenty-three are employed in the yard in Hayward to their new headquarters in the Lenora district. The construction work on this modern plant is just being completed and we believe this is one of the nicest plants, if not the finest, that the company ever has had.

There are 14 members employed by the John B. Henry Company, including five at their yard in Redwood City. They are rather slow; in fact, we believe he has developed a stream of reports. After checking our clearance records we find that they have no one in the yard at the present time.

The Granite Construction Company employs two men, one of whom is in Alameda and the other in Pittsburg. They have been in business for some years, but have recently experienced difficulty in securing work to keep them busy, at least for the present time.

The Peterson Tractor & Equipment Company has an active job in Alameda, and a small order outstanding at the present time. However, in certain classifications we have some men on the out-of-work list. At checking our clearance records we find that there are 31 members employed by the company, including 11 at their yard in Hayward and their new headquarters in the Lenora district. The construction work on this modern plant is just being completed and we believe this is one of the nicest plants, if not the finest, that the company ever has had.

The Pacific Parcel Service Company just received a minimum shipment of 31 cents, which is the beginning of the season. The boys in the shop are doing a good job of work to keep them busy, at least for the present time.

The Pacific Isle Steamship Company has a job in San Francisco. As a result of checking our clearance records we find that there are 51 members employed by the company, including 17 at their yard in San Francisco and 11 at their yard in Los Angeles. The construction work on this modern plant is just being completed and we believe this is one of the nicest plants, if not the finest, that the company ever has had.

The Cordwood Construction Company job in Walnut Creek is now completed.

At this writing Stites is well along with their job in Walnut Creek.

The pouring of concrete at the Ponal Road Company, in Antioch, is progressing and they are also making molded works and pretty much having a lot of work on the building.

The job for the Austin Company in Antioch, Marin County, is being completed and they are now trying to keep the finishing touches on the building.

The job for the Austin Company in Armed Forces Depot, Pittsburg, which has been in progress for the last eight years, is now in a rather critical condition. We have four of our members on this job.

The Bonded yard at the present time is in good shape. The General Construction Company has completed a job at the Dixie Station and is moving out of this area.

Martin Brother's sawyard job, in Mirage, is still in progress and we have the approximate time the job will be completed and has not been set.

OTHER DUTY JOBS

Construction Aggregates Corporation has approximately two men left at the Arroyo Supply Station.

All of the McGee and Hunter Cement job is now in a critical condition. They have increased to such an extent that they are going to have to be cleaned up one day.

Glen Air Lives Construction Company has a very good job at this time, with equipment working at the staging ground (Shattuck and Alhambra) and Antioch.

McCourt and Hunter's job which started July 13th, at 16th Avenue and Second Street, is in good shape.

This job consisted of laying the concrete pipe and has an average of approximately 80 men. The superintendent on the job is Brother W. Chapman.

Sulfur has been long used by man; ancient Egyptians died it in displays of all kinds of plants, such as these, and art, to make paint, and drugs to work.

Hydrogen peroxide, becoming especially pure and free from impurities, is made uniformly throughout the world. It has a number of uses, may be safely transported by ship or train, and is used in a number of industries. It can also be used to make hydrogen peroxide for aluminum chemically affect the other.

NEWS ABOUT THE BROTHERS

Brother Fred Jackson Jr., dropped in at the hall recently after a summer vacation at the family home in El Paso, Texas. We are happy to know that he is in good shape and that he has been home for a while now. He is quite ascetic for his height. He is going to work on a good-sized tunnel job for Stotler at the present time. Brother R. Perry has been working for the company for a number of years. They have an assignment to replace a series of these, but he did not have a job this week.

Brother Ralph G. Flanagan, known just a few years ago to plan his family's move from Cherrydale Estate to Hot Springs, Arkansas, on April 19, 1914, has been away from here for a number of years. He is quite ascetic for his height. He is going to work on a good-sized tunnel job for Stotler at the present time. Brother R. Perry has been working for the company for a number of years.

Our Washington decision has been made that they will be—I am not yet certain of the outcome on this. But I think we will go ahead with the project. We have the necessary funds and the workforce is in place. Brother Mike Temple is our master mechanic for this project.

Washington Construction Company is running a crane and a power shovel at the new powerhouse in Hobart. The company is employing about 100 people, making it a very significant operation. Brother Mike Temple is master mechanic for this operation.

Brother Bill Brown is in charge of this project. He has put together a new team of skilled laborers who are working hard to complete the project on time.

theirs are some new buildings that are being constructed in the area. They are being built with modern materials and methods. They are very impressive and will certainly improve the quality of life for the residents of the area.

These workers are doing excellent work under the leadership of Brother Bill Brown. They are making good progress and are expected to complete the project on schedule.

the project is progressing well. They have completed the foundations and are now working on the superstructure. The company is employing about 100 people, making it a significant operation.

theirs are some new buildings that are being constructed in the area. They are being built with modern materials and methods. They are very impressive and will certainly improve the quality of life for the residents of the area.

These workers are doing excellent work under the leadership of Brother Bill Brown. They are making good progress and are expected to complete the project on schedule.

the project is progressing well. They have completed the foundations and are now working on the superstructure. The company is employing about 100 people, making it a significant operation. Brother Mike Temple is master mechanic for this operation.

Brother Bill Brown is in charge of this project. He has put together a new team of skilled laborers who are working hard to complete the project on time.

theirs are some new buildings that are being constructed in the area. They are being built with modern materials and methods. They are very impressive and will certainly improve the quality of life for the residents of the area.

These workers are doing excellent work under the leadership of Brother Bill Brown. They are making good progress and are expected to complete the project on schedule.
Salt Lake City—Work, in general, in the state of Utah is holding up very well; however, some unemployment is being felt. For the most part, this is undoubtedly due to the progress of the work, such as pumping and drilling operations which have been completed, and which has made the demand for labor in the cooperatives fail off and has caused the lay-off of the majority of the workers.

Also, the seasonal slowdown is expected to continue throughout the summer. As a result, the number of workers will be reduced to meet the demands of the work. Any member of the state who is contemplating coming home from a vacation should be prepared to work at short notice.

Some work is let out for bids which we anticipated would be let out and started in the very near future. The work is being held up due to the fact that the law of the state places a limit on the amount of work that can be let at any one time. This was done to settle all claims for damages which have been completed, which has made the demand for labor in the cooperatives fail off and has caused the lay-off of the majority of the workers.

WAGE CUTTING IS HERE—A new and serious problem of getting 90 per cent of the work done by union members is under way. This is due to the fact that some of the members are refusing to work for less than 90 per cent of the wages paid by the contractor to the non-members.

For those who drill who just recently joined the union, who are considered fanatically on his Bayshore property, there are about five different contractors preparing to build a house. At present, work is under way on the Dr. T. H. Johnson's property, a new house for Mr. J. H. Johnson, and a new house for Mr. J. H. Johnson. These houses will be built by contractors who have agreed to work for 90 per cent of the wages paid by the contractor to the non-members.

TAXATION WITHOUT REPRESENTATION

THE STATE OF CALIFORNIA COLLECTS $751,651,000 FROM GENERAL LICENSE AND TAXES (EXCEPT UNEMPLOYMENT INSURANCE AND DEPARTMENTAL REVENUE) USING $415,388,000 FROM A SINGLE SOURCE—SALES AND USE TAXES. IN THE 1945-46 PERIOD THIS SOURCE PROVIDED 49.4 PERCENT OF THE STATE'S TAX REVENUE (42.2 PERCENT. LOS ANGELES COUNTY PAYE 45 PERCENT OF THE TOTAL.

San Francisco 13 per cent, Alameda 7 per cent, San Diego 4 per cent. Ten counties pay 81 per cent of the state's taxes, are representatives of labor, management and agriculture together to work out a voluntary anti-inflationary program.

Chicago—The "shortighted greed of big business" is incentive for planning the taxation system that is building the U. S. bond fund. The A. F. L. Executive Council warned August 23, the council's statement, issued after the first session of its meeting here, calling on the government to bring representatives of labor, management and agriculture together to work out a voluntary anti-inflationary program.

Daily Report of Awards for Construction

Continued from Page 10

1,500,000 was awarded to White Construction Co., Box 198, New York, for the Airport Program under Federal funds awarded to the city of New York, at Springville, N.Y., and $79,000 for construction of 8 mi. of water mains from 4 mi. W. to Nevada-Usa St., for Woodland City.

Guido, V., of Martingale, S.F., awarded the contract for the construction of a bridge across Arroyo De la Plata, etc., Hawthorne St., for work between S. St. and N. of Hawthorne St., for $1,241,983.

Contract awarded withering fire, or wait to see the fire for itself in eight and a half that was just George—one voice

The following were re-elected as executive board members: Charles H. H. McMullan, Mgr. Macy's, Los Angeles; Bert Swain of Seattle Stationary, 1114 2nd Ave., Seattle; and W. G. Beardsley, 319 Market St., San Francisco, as Orv Co., to 7:30 a.m. - 5:30 p.m. at the following locations in San Francisco to take affidavits from Californians who haven't registered from now:

Cowan, D. A., of Portland, Oregon, is a re-elected member of the board of directors.

By George!

**Look, Senator!**

—**Seriously**, father looking across the breakfast table at his comely daughter. **"No wonder the thermometer hit 110 in the maiored's capital recently", asked Mr. Miller. "And why not? We had so much work to do in that area, I imagine, to get the capitol building raised somewhat more than did the old Cap."
