

OE 3 JATC TOP HAND EQUIPMENT COMPETITION

Description of Events

Hydraulic and/or Lattice Crane

- Pick up a square tube and place it over a round tube.
- Remove square tube and slalom through pylons and then place square tube over a 2nd round tube.

Blade

- Navigate through a course of cones and stands, knocking balls off the stands and cones without hitting the stands or cones.

Excavator

- Using the teeth of the bucket, pick up a bar with a shape attached to it and place the shape inside a box of the same shape.

Dozer

- Navigate through 2 parallel rebar pathways, keeping a feather that is attached to the corner bit of the blade between the two pathways while knocking off balls that are attached to stands without knocking over the stands.

Loader

- Load a truck without knocking off a ball that is placed on a tee inside the cab within 2 minutes or less.

Backhoe

- Pick up four (4) golf balls with a spoon that is attached to the bucket and place the golf balls into a tube.

Eligibility Requirements

1. Must be an active member of IUOE 3.
2. Crane competitors must show proof of current NCCCO certification for applicable type of crane.

General Rules

1. Competitor will be automatically disqualified for any unsafe actions and/or abuse of equipment and will not be allowed to compete in other events.
2. The decisions of all judges are final.
3. Journeymen must compete against other journeymen and apprentices must compete against other apprentices.
4. Competitors will be assigned a competition start time for each event. Late comers will not be allowed to compete.
5. The Operator who completes the task with the fastest time wins.
6. Awards will be issued for each individual event in both Apprentice and Journeyman categories.
